

# NEW ERA SUPPLEMENT

Edited by Louis M. Kolar.

## Current Thought.

### GESTURES ARE NOT ACHIEVEMENTS

It isn't what you mean to do for your lodge, but what you actually accomplish that decides the degree of success that your lodge attains. Many members have ideas in mind which, put into practical use, would work wonders in achieving popularity. For example, John Jones has an idea that a basketball team would be beneficial to rousing interest among members of his lodge. He probably talks it over half-heartedly with some members, receiving only fair response. They also have the same feeling as John Jones has concerning a basketball team. In their minds they are wishing for some unseen power to handle the situation for them, instead of depending on their own initiative to accomplish the desired end. What is the natural result? In due time the idea of having a basketball team is entirely forgotten and nothing comes out of it.

### ACTION IS NECESSARY

Before a plan to stir some interest in the organization can be successful the members must first have a desire for the particular plan—in this instance it is a basketball team. Like any other desire, there must be ACTION plus a systematic program. The players on the team must be selected with the most scrupulous and a tentative schedule must be mapped out for the forthcoming season. However, a number of members must be willing to sacrifice a little of their time in order to make their lodge of being represented by willing and hard workers. The work is then systematized so that all the burden does not fall upon the shoulders of one, but rather it is distributed evenly. Before long the success of the basketball team as planned beforehand is assured. Even the organizers themselves are surprised at the outcome.

The basketball team may not win every game of the season. However, the winning factor is of no consequence. A good team in the eyes of the public is to be admired as much as the winning team. The idea to keep in mind is that an attempt was made to win. We must try and put our best foot forward at all times and our latent convictions. We must keep in mind that in order to have a lodge that we can be proud of we must make progress. And progress is contingent upon ACTION. We can't stand in the quiet of backwaters—we can't make headway until we start producing—no plan is worth a fraction until it is working. Desires and good intentions are worthless until they are crystallized into ACTION. Progress cannot be made without good intentions.

## EDUCATION

Education is a necessity today to those who look forward to a successful abundant life. Statistics have shown that men who have only a grade school preparation the average salary is \$1,500 a year. They earn their highest wages at the age of 43. Men with a high school education average approximately \$2,500 as a peak salary. They reach their highest earning power at the age of 44. College-trained men receive their highest salaries at the age of 49, and their incomes average \$5,000 a year.

A study of "Who's Who in America" proves that the man who has had a college education has one chance in 150,000 of attaining real wealth; with a grammar school education, he has four chances; with a high school education, 87 times the chance; with a college education, 800 times the chance.

Education brings not only more money; it brings greater achievement, increased enjoyment of life, and a higher standard of living. Many people are deprived of the opportunity of even attending high school upon the completion of the grade school. This fact should not thwart their ambition in attaining their goal, as there are numerous schools to be attended in the evening.

### Why Go to School at Night

The question is often asked, "How far should one go in education?" The answer, of course, depends on a great number of factors, including the circumstances of the individual in question and his ambitions and ideals for a useful life. The education that one is acquiring may not be of immediate benefit as the financial question is concerned. But it may prove of inestimable value in later years when one is about to reach the pinnacle of his career. One fact must always be kept in mind: An education is of the greatest benefit to one who trains himself in such a way as to be able to analyze complexities and solve them.

### Coca Cola

A government analysis of Coca Cola made a few years ago showed that this drink is composed of from 34 to 41 per cent water, 50 or more per cent sugar, some caffeine, alcohol, phosphoric acid and a little lime juice, and other seasonings.

### Many Different Parts Are There in a Watch?

An average watch contains 150 separate parts. The number varies somewhat, but the number of extra parts in a watch is not so great as the number of parts in a watch as one might think.

## YOUR PAPER

"Contributions"—the word as it stands covers a multitude of sins. Contributions, journalistically speaking, mean letters to the editor, news hints, criticisms about news, "feature" hints, poems, editorials—in short, the whole gamut of what's in a newspaper. No experience, or previous experience does not bar one from trying out for the NEW ERA SUPPLEMENT. Communication with the editor, depending on one's interest, is welcomed and is encouraged.

This is your paper. Express your views on matters of interest to the S. S. C. U. lodges. Write your comments on the newspaper as it is published. NEW ERA SUPPLEMENT page is one of the best means of advertising the activities of your lodge. By all means use it.

## INDUSTRIALEXHIBIT AT CLEVELAND, O. Radiovision and Other Attractions

Wednesday, Sept. 25, will open the first industrial exhibit among the American Slovenes in the United States. It is sponsored by the St. Clair Merchants' Association, and will take place in the auditorium of the Slovenian National Home. All phases of industries will be shown, chief among which will be the modern radiovision exhibited by the youngest exhibitor, A. Truger.

The show will be entertaining as well as instructive, for the committee has secured the services of local artists. Piano, violin and xylophone solos will comprise some of the entertaining features. A style show will also be part of the gala affair. A popularity contest already in force at the present time will terminate at the closing of the exhibition, Oct. 1.

Many prizes will be offered. A Chevrolet sedan, a Slovenian accordion and a Winchester constitute some of the prizes to be given away. The exhibition will be held from Sept. 25 to Oct. 1. The doors will be open every night at 7 p. m.

## BANOVEC - ROPASOVA IN WAUKEGAN

The two Slovenian opera singers, Ropasova and Banovec, were well received in Waukegan, Ill. Their singing thrilled the audience that gathered to hear them.

Most of their offerings were selections from operas. Although the audience duly appreciated such music, they did not fully comprehend the significance of the songs. The encores were received with great enthusiasm as the principal songs. As the encores consisted chiefly of popular Slovenian airs, it showed that the majority of the people present at the concert favored the lighter melodies.

Nevertheless, Miss Ropasova and Mr. Banovec should be complimented on their achievements as opera singers. They possess the finish and touch of artists. They will sing in the Slovenian Workingman's Home, Detroit, Mich., on October 13.

### Difference Between Dromedary and Camel

The dromedary is merely a large one-humped camel, noted for its speed. It is the species known as the Arabian camel. The two-humped animals are known as Bactrian camels.

## BRIEFS

Miljus, pitcher for the Cleveland Indians, will be guest of honor at a banquet given by the Jugoslavs of Cleveland. The banquet will take place at the Croatian National Home on Sunday, Sept. 29.

At Catholic university, Washington, D. C., the school's backfield aces are Jack Malevich, captain and fullback, and Joe Champa, quarterback. Frank Miroslavich, who hails from Eveleth, Minn., also plays on the team.

Frank Simms (Simoncic) of Cleveland put up a masterful exhibition in the art of boxing at Windsor, Canada, last Tuesday. Frank has a number of knockouts to his credit.

Louis Kochevar, age 45, of Aurora, Minn., died late Friday night in Eveleth, following a brief illness.

John L. Mihelich, Slovenian councilman of Cleveland, O., is being sued for \$50,000 damages by Walter L. Oehme, former city detective, who was crippled in line of duty seven years ago. Mr. Mihelich was chairman of the committee that investigated Oehme's physical condition to determine whether he had actually been injured while on duty, and whether he was entitled to reimbursements for medical expenses.

## BOY, 13, ENTERS COLLEGE

Knew Alphabet in Infancy

Northwestern University has enrolled as a freshman one of the youngest college students in the country. He is Harold M. Finley of McConnellsville, O., who was only 13 years of age last February.

At the age when many boys have not yet entered high school, Master Finley is entering a university. During his four years in high school his grades in all subjects never fell below E, and were the highest given by the school.

When he was 18 months old, Harold had learned the alphabet from alphabet blocks. He could tell time when he was 2, and taught himself to read. When he first entered school, at the age of 6, he was placed in fourth grade. At the end of the first month, however, he was promoted to the fifth grade.

## HAPPY-GO-LUCKYS HOLD DANCE

Barberton, O. — The Happy-Go-Lucky Lodge No. 195 will hold its first anniversary dance on Saturday, Sept. 28, 1929, in the Domovina Hall on 14th St. It was approved at the meeting that all members not attending this dance will pay a fine of \$1, that is to go into the lodge treasury.

The music will be furnished by the well-known "Nightingales," who are masters in the art of playing dance music. We take this opportunity to invite all the neighboring lodges as well as other people from Barberton and vicinity to attend this dance. Here's hoping to see you all at the dance.

Mrs. J. Hiti.

### Does a Mole Have Eyes?

The common mole has eyes, but they are very small and buried beneath the fur and skin, apparently serving no practical purpose as organs of sight.

## HEADS UP

We want to remind the members again of the prize money offered to those securing new members. This should prove an incentive to all and stir our ambitions. All one has to do is impress his or her friends with the advantages derived by joining one of the lodges of the S. S. C. U. Then invite your friends to the next regular monthly meeting. In that way outsiders get acquainted with the members of the lodge and their activities.

The natural tendency will then gradually bring out the desire of non-members to become one of the group. To share in the work of the members and actually become one of them will be unavoidable. Also remember that in addition to the regular prizes offered a commission of \$1 is given for each new member.

With such inducements confronting you members the acquiring of candidates for membership to your lodges should prove an easy task. Just go out and do a little sales talk to your friends. You will be surprised at yourself on your accomplishments. Below is a list of the regular prizes:

For 10 members.....	\$15.00
For 15 members.....	20.00
For 20 members.....	25.00
For 25 members.....	30.00
For 30 members.....	35.00
For 35 members.....	40.00
For 40 members.....	45.00
For 45 members.....	50.00
For 50 members.....	60.00
For 60 members.....	75.00
For 75 members.....	90.00
For 76 or more.....	100.00

## NEW LODGE IN CANADA

A new lodge, St. Rocus No. 205, was formed in East Windsor, Canada. This comprises the first lodge founded in Canada by the S. S. C. U., adding a new chapter to the activities of our organization. A number of members were present from the lodge Triglav No. 144 of Detroit, Mich., at the opening. An entertainment was given on Saturday, Sept. 21, in honor of the gala occasion. Mr. Terbovec, our editor, was present at the invitation of the committee.

A picnic was held by the Triglavs the following day, Sunday, Sept. 22, at Travnikar's farm in Detroit. A large crowd was present, including the ones present at the opening of St. Rocus' Lodge.

## FATHER SHOTS SON

Sixteen-year-old George Vanko of Lorain, O., is recovering from wounds sustained when his father, George Sr., mistook him for a thief and shot him. Physicians say he has little chance to recover, as the youth has a bullet wound in his forehead. Thieves had been entering the Vanko chicken coop lately and the elder Vanko thought it was one of the marauders when he fired at his son.

## Origin of "Handkerchief"

The original word was "kerchief," from "cur," to cover, and "chief," head. A kerchief was a covering for the head. "Cur" has the same meaning in "curtain" and "curfew." The words "handkerchief" and "pocket handkerchief" are verbal monstrosities from the standpoint of origin. The one means a hand covering for the head, and the other a pocket hand covering for the head.

## SPORT SENSE

### CROAT STAR WRESTLER

Earns Reputation as Leg Crusher

Jack Sherry, known as the "Oklahoma Cyclone," will attempt to annex his tenth consecutive victory in Cleveland, O., where he will meet Joe Rogaski, new Polish mat star from New York. Mr. Sherry is a Croat. His bonecrushing leg-hold has made him quite famous.

Last week when the Oklahoma husky wrestled with James Istock, policeman from Alquippa, Pa., he copped the first fall with a reverse wrist lock, but brought his leg crusher into use for the second fall and won that tumble within three minutes. Not a single opponent has been able to escape from Sherry's leg-hold once he applied it properly. He has registered all nine of his wins with the use of that grip.

Rogaski is rated one of the best of the newer Polish behemoths, and is in line for a bout in the East with Stanley Stasiak, the Polish champion, in which Stasiak's title will be at stake.

### WORLD SERIES DOPE COMRADES LOSE TO LAKE ZURICH

Only Four Pitchers Have Won Three Games And Lost None In Penant Series

It is nine years ago since a world's series pitcher has been able to win three games and lose none. Will the forthcoming blue ribbon event between the Philadelphia Athletics and Chicago Cubs bring out another name inscribed in the hall of fame?

Never in a considerable period of time has a pitcher been afforded a better opportunity to turn the trick, as there will be an off day for traveling eastward from Chicago to Philadelphia, a day of rest in Philadelphia as Sunday baseball is prohibited; and an additional off day for the journey back to Chicago, in the event the series goes more than five games. This is very likely as the teams appear very evenly matched.

Grove or Earnshaw for Philadelphia has a good chance to win three games in the series. As for the Chicago Cubs, Charley Root may inscribe his name in the hall of fame, while Fred Blake may be the big surprise.

### The "Big Four" Pitchers

Christy Mathewson shut out the Athletics three times in succession in 1905; Charley Adams downed the Tigers of Detroit in 1909; John Coombs of Athletics won three games against the Chicago Cubs in 1910 and Stanley Coveleskie of Cleveland Indians who rose to glory against Brooklyn in 1920. These comprise the only four pitchers who won three games in a world series without losing one.

Mathewson prevented the Athletics from scoring a single run, allowing them but four hits in the first game that he pitched, four hits in the second game, and six hits in the third game. Coveleskie is the only other pitcher who approaches Mathewson's record. He allowed Brooklyn but 15 hits in 27 innings. This sure was a marvelous exhibit of pitching as the ball was much more livelier in 1920 than in 1905. The "Big Four" pitchers were all right-handed.

### SLOVENIAN PROFESSOR IN CHESS MATCH

Dr. Milan Vidmar, rector of the University of Ljubljana, almost won the crown of international chess champion held at Carlsbad Czecho-Slovakia. Elimination matches were held for four weeks. A. Nimzovitch of Denmark and Dr. Vidmar swept all opposition, including all masters of chess; namely, the famous Rudolf Spielman, Capablanca, Alexander Alkekin and Emanuel Lasker. The two then played for the international title, which A. Nimzovitch won.

Strategy and logical aggression marked the interesting features of the decisive match. The title was won through sheer strategy, with no blunders to mar the game. Dr. Vidmar is an eminent professor of electro-dynamics.

### \$6,000 FOR 800 1-CENT STAMPS

Nassau Stamp Co. of New York paid \$6,000 for 800 1-cent stamps, face value \$8. These valuable little bits of blue paper were the first 1-cent stamps printed by the U. S. government, in 1851. To the casual observer, each stamp would be simply a picture of the head of Benjamin Franklin, but the stamp enthusiast's magnifying glass could detect countless little differences in the lines, some so rare that they made a single stamp worth hundreds of dollars.

IZ URADA GL. TAJNIKA

RACUN MED DRUSTVI IN JEDNOTO ZA MESEC AVGUST 1929

Table with columns: St. dr. Lodge No., Dohodki Income, Izdatki Disbursements. Lists financial data for various lodges from 1 to 188.

Table with columns: No., Amount. Lists names and amounts for individuals, including a summary for 'Za julij' and 'Za avgust'.

Table with columns: No., Name, Amount. Lists names and amounts for individuals, including a summary for 'Skupaj' and 'BOLNIŠKA PODPORA IZ-PLAČANA MESECA AVGUSTA 1929'.
