## METODOLOŠKA POJASNILA

### Namen statističnega raziskovanja

je četrtletno pridobivanje osnovnih podatkov o trgovinski mreži, zaposlenih osebah, gibanju prihodka od prodaje blaga in materiala, o strukturi prihodka ter o gibanju zaloga blaga v trgovini na drobno in debelo.

### Statistična enota opazovanja

je vsak poslovni objekt ali le del (podjetje, družba, podjetnik posameznik, poslovna enota), ki se ukvarja s trgovinsko dejavnostjo. Poročajo podjetja, katerih glavna dejavnost je trgovina, in podjetja z drugimi dejavnostmi, vendar se podatki vedno nanašajo le na tisti del njihove dejavnosti, ki se lahko uvršča v trgovino (nakup blaga za nadaljnjo prodajo in dejanska prodaja tega blaga). Notranjih prodajnih tokov med trgovino na debelo in trgovino na drobno v sestavljenem podjetju ne zajemamo; kot prihodek se šteje le vrednost prodaje zunanjim kupcem.

### Statistično zajetje

Trgovinska dejavnost v tej publikaciji obsega področje G iz Standardne klasifikacije dejavnosti, razen naslednjih skupin: Popravila izdelkov široke porabe, Vzdrževanje in popravila motornih vozil, ter razreda Trgovina na drobno na tržnicah in stojnicah. Tudi storitve, opravljene v prometu blaga, ki jih je mogoče posebej prikazati, niso zajete.

Ker je opazovana dejavnost t. i. čista trgovinska dejavnost (ne glede na to, ali jo podjetje opravlja kot svojo glavno ali stransko dejavnost), je oddelek SKD 50 (prodaja motornih vozil in prodaja motornih goriv na drobno) smiselno razdeljen na tri opazovane sklope dejavnosti: prodaja na drobno, prodaja na debelo in posredništvo pri prodaji. Zato je taka razdelitev različna od razdelitve, objavljene v mesečnih Statističnih informacijah.

Ker v praksi ni mogoče zbrati podatkov od vseh poslovnih subjektov omenjenih dejavnosti, so podatki četrtletnega raziskovanja od leta 2004 dalje pridobljeni na podlagi zajetja s pragom. V raziskovanje vključimo vsa podjetja, ki po statističnih merilih spadajo med velika in srednja podjetja. V primeru nekaterih manj številčnih skupin dejavnosti pa vključimo še del malih podjetij. S tem zagotovimo zadostno zastopanost v vseh skupinah dejavnosti, za katere objavljamo rezultate.

Pri določitvi podjetij, vključenih v raziskovanje, smo uporabili podatke Poslovnega registra Slovenije, zaključnih računov za leto 2002, Statističnega registra delovno aktivnega prebivalstva, ter podatke, ki so nam jih podjetja v raziskovanju poročala v preteklem letu. Iz celotne populacije 11731 podjetij smo tako v raziskovanje vključili 1642 podjetij.

Med njimi se je za 52 podjetij izkazalo, da so neustrezna oz. neaktivna, 69 podjetij pa na anketo ni odgovorilo. Stopnja ustreznosti je torej 95,6 odstotna, stopnja odgovorjenosti pa 93,3 odstotna.

Rezultati, objavljeni v tej številki Statističnih informacij, niso niti desezonirani niti prilagojeni številu delovnih dni.

### Način zbiranja podatkov

Podatke zbiramo z vprašalnikom TRG/ČL (četrtletno poročilo trgovine). Vsaka poročevalska enota upošteva pri izpolnjevanju vprašalnika tudi vse svoje morebitne poslovne enote. Uradu ga posreduje po pošti. Vir podatkov je računovodska in kadrovska evidenca podjetij, izjemoma tudi njihova ocena.

## METHODOLOGICAL EXPLANATIONS

### The purpose of the survey

is quarterly collection of basic data on distributive trade network, employed persons, changes of turnover from sale of goods and material, structure of income and changes of stocks of goods in wholesale and retail trade and collection of turnover in commission trade.

### Observation unit

is every business subject or its part (enterprise, company, business unit, entrepreneur) performing trade activity. Reporting units are thus enterprises whose main activity is trade and enterprises with other main activities. However, in both cases only data concerning trade (purchase of goods for further sale and actual sale of goods) are taken into consideration. Internal sale between wholesale and retail trade in a composite enterprise is not taken into consideration; income is only the value of sale to external buyers.

### Coverage

Trade in this survey is section G of the Standard Classification of Activities, except groups Repair of personal and household goods, Maintenance and repair of motor vehicles and deductible, the class Retail sale via stalls and markets, and services performed in transport of goods.

Because the observed activity is the so-called 'pure activity' (it is irrelevant whether the enterprise performs it as its main or supplementary activity) the NACE 50 section (the sale of motor vehicles and retail sale of fuels) is divided between three sets of observed activities: retail trade, wholesale and commission trade. Thus the breakdown in this publication is different from that in the monthly Rapid Reports.

Because in practice it is impossible to collect data from all business subjects in the mentioned activity, since 2004 we collect data on the basis of threshold coverage. The survey thus covers all enterprises classified as large and medium-sized according to statistical criteria. In some less numerous groups of activities a part of small enterprises is included as well. In this way we provide sufficient representation in all groups of activities for which results are published.

Enterprises which are included in the survey were defined on the basis of data from the Business Register of Slovenia, final accounts for 2001 and the Statistical Register of Employment. From the entire population of 11731 enterprises, 1642 enterprises were included in the survey.

It turned out that 52 enterprises were either ineligible or inactive and 69 enterprises did not respond. The eligibility rate was thus 95.6% and the response rate was 93.3%.

The results published in this issue of Rapid Reports are not seasonally adjusted nor working-day adjusted.

### Method of data collection

We collect data with the TRG/ČL questionnaire (quarterly report on distributive trade). In answering the questionnaire every reporting unit takes into consideration all its business units. Questionnaires are returned to the Statistical Office by mail. The source of data is accounting and personnel records of enterprises, and only exceptionally estimates.

### Statistične definicije

**Trgovina na debelo** je nakupovanje blaga za nadaljnjo prodajo in nadaljnja prodaja tega blaga trgovcem, predelovalcem ali velikim porabnikom doma ali v tujini. Blago se lahko prodaja nespremenjeno ali po obdelavi, pakiranju, prepakiranju, ki je značilno za trgovino na debelo.

**Trgovina na drobno** je nakupovanje blaga ter nadaljnja prodaja tega blaga končnim porabnikom (za osebno porabo in potrebe gospodinjstev) ali drugim, ki nabavljeno blago uporabljajo za opravljanje dejavnosti pod določenimi pogoji.

**Posredništvo** (SKD 51.1) je:

- dejavnost trgovskih posrednikov in trgovcev na debelo, ki trgujejo v svojem imenu in za račun drugih,
- dejavnost tistih, ki posredujejo med prodajalci in kupci in prevzemajo trgovske posle v imenu lastnika blaga, tudi preko interneta,
- dejavnost dražbenih hiš pri prodaji na debelo.

Med dejavnost posredništva pri prodaji blaga vključujemo tudi posredništvo pri trgovini z motornimi vozili, z rezervnimi deli za motorna vozila, z motornimi kolesi in rezervnimi deli ter posredništvo pri prodaji na drobno z motornimi gorivi (prodaja na bencinskih servisih preko franšize).

Posrednik trži tuje blago za tuj račun, npr. komisionarji, agenti, posredniki, zadruga, ki se ukvarjajo s trženjem kmetijskih izdelkov ipd. Prihodek posrednika od prodaje je provizija.

**Vrednost prodaje (prodaja)** je prihodek in davek na dodano vrednost. Indeksi se računajo iz vrednosti po tekočih cenah.

**Prihodek** od prodaje blaga in materiala - kupcem zaračunana prodaja - je skupni znesek, ki ga podjetje obračuna za prodajo blaga in materiala, ki sta bila v opazovanem obdobju prodana kupcem in za katera je bila izdana faktura. Vsebuje vse stroške in obremenitve, vezane na kupca, ne zajema pa davka na dodano vrednost, morebitne prodaje osnovnih sredstev in drugih izrednih prihodkov. Prodaja na posojilo se šteje v mesec fakturiranja.

**Davek na dodano vrednost** je znesek dajatev, ki jih ob prodaji plača kupec (izstopni davek).

**Pri neposrednem izvozu** so prikazani indeksi prihodka od prodaje blaga in materiala, ki ju je podjetje v svojem imenu in za svoj račun (brez posredovanja drugih) prodalo v tujino.

**Vrednost zalog** ob koncu četrtega je vrednost blaga, ki je ob koncu četrtega bilo v zalogah. Zaloge trgovine na debelo vrednotimo po nabavnih cenah, zaloge v trgovini na drobno pa po prodajnih cenah.

**V številu oseb**, ki so bile ob koncu četrtega zaposlene v trgovini na drobno in v trgovini na debelo, so upoštevane osebe, ki so izključno ali pretežno opravljale trgovinsko dejavnost, tudi upravni in administrativni delavci, sezonski delavci, vajenci.

**V številu prodajal na koncu četrtega** upoštevamo klasično prodajalno, samopostrežno prodajalno, blagovno hišo, diskontno trgovino, bencinsko črpalko, kiosk in lekarno. Odprtih stojnic na živilskih trgih ali ulicah, raznih skladiščnih prostorov za razkladanje ipd. ter prodajal v tujini ne upoštevamo.

**Površina prodajnega prostora** je površina, na kateri se prodaja blago, skupaj s površino izložb.

### Definitions

**Wholesale** is purchase of goods for further sale to merchants, processors or big customers at home or abroad. Goods can be sold unchanged or after processing, packing or re-packing characteristic for wholesale.

**Retail trade** is purchase of goods for further sale to final users (for personal and household use) or to others who use purchased goods for performing activity under certain conditions.

**Commission trade** (NACE Rev. 1.1 51.1) is:

- activity of commercial agents and wholesale traders trading on their own behalf and on third party account,
- activity of those who act as agents between sellers and buyers and take over trade business on behalf of the owner of goods, even via the Internet,
- activity of auction houses in wholesale.

Commission trade activities in sale of goods include also commission trade in sale of motor vehicles and spare parts for motor vehicles, sale of motorcycles and spare parts for motorcycles, and commission trade in sale of motor fuels (franchise sale at petrol stations).

The agent trades foreign goods on third party account, e.g. commission agents, agents, brokers, cooperatives trading agricultural products, etc. The agents' sales income is the commission.

**Turnover including value added tax** is in our case the whole value of sale including value added tax. Indices are calculated of values at current prices.

**Turnover without value added tax** - from sale of goods and material - sale charged to buyers - is the value of goods and materials which were in the observed period sold to buyers and for which invoices (or some other accounting documents) were issued. It includes all costs and charges linked to the buyer and excludes the value added tax, eventual sale of fixed assets and other extra income. The sale of loan is registered in the month of invoicing.

**Value added tax** is a tax buyers pay at sale (output value added tax).

**Direct export** is income from goods and material which an enterprise sold abroad on its own behalf and account (without external intervention).

**Value of stocks** at the end of the quarter is value of goods which trade enterprises had in stock at the end of the quarter. We value stocks of wholesale at purchase prices and stocks of retail trade at selling prices.

**Number of persons** employed at the end of the quarter in wholesale and retail trade includes persons exclusively or predominantly performing trade activity, including administrative service, seasonal workers, apprentices.

**Number of stores** at the end of the quarter includes classical stores, self-service stores, department stores, discount stores, petrol stations, kiosks and pharmacies. Open stalls on market places or streets, various warehouses for unloading etc. and stores abroad are not taken into consideration.

**Sales area** is area on which goods are sold, including area of shop-windows.

### Obdelava podatkov

Za tista podjetja, ki niso odgovorila, imamo pa njihov podatek iz prejšnjega četrtertletja ali izpred enega leta, smo podatek ocenili. Za ostala podjetja, ki niso odgovorila, smo izračunali utež neodgovora.

Oceno poslovanja cele populacije opazovane dejavnosti, povezujemo po razredih dejavnosti, ki jo opazovana enota opravlja. Dejavnost je definirana glede na skupino blaga, s katerim podjetje pretežno posluje (ta opredelitev torej ne pomeni dejansko prodanega blaga).

Posamezni razredi dejavnosti podjetij so v tej publikaciji smiselno združeni v skupine, ki jih agregiramo še na raven trgovine z živili, neživili in trgovine z motornimi vozili in gorivi.

Rezultati so prikazani po tekočih cenah; sprememba cen ni izločena.

### Data processing

For enterprises which did not respond and we have their data from the previous quarter, we estimated the data. For other enterprises which did not respond, we calculated the non-response weight.

We combine results which present the whole population of the observed activity into groups by classes of activity which the observed unit performs. Activity is defined with regard to the group of goods with which an enterprise predominantly does business and not with regard to actually sold goods.

Individual classes of activity are in our case logically combined into groups which we aggregate also to the level of trade with food, trade with non-food and trade with motor vehicles and fuels.

Results are shown at current prices; change of prices is not eliminated.

Standard Classification of Activities' groups and codes:

Poročevalske enote od leta 2000 dalje vsako četrletje določajo svojo dejavnost po skupini blaga, ki je v prihodku opazovanega obdobja najpomembnejša. To pri analizi podatkov po dejavnostih lahko povzroči nihanja indeksov. Statistika praviloma vsako četrletje preverja vse spremembe dejavnosti.

Reporting units since 2000 define every quarter their activity according to the commodity group which has the greatest influence on the turnover of the observed quarter. This may cause fluctuations of indices in data analysis by activity. Statistics controls all changed activities every quarter.
