POSLOVNE TENDENCE V GRADBENIŠTVU, SLOVENIJA, NOVEMBER 2006

BUSINESS TENDENCY IN CONSTRUCTION, SLOVENIA, NOVEMBER 2006

- Direktorji so poslovne tendence v gradbeništvu ocenili novembra 2006 ponovno boljše kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila za 1 odstotno točko višja kot pretekli mesec. V primerjavi z lanskim novembrom je bila višja za 27 odstotnih točk in za 22 odstotnih točk je bila višja od povprečja lanskega leta.
- In November 2006, managers again estimated business tendencies in construction as being better than in the previous month. The seasonally adjusted value of the confidence indicator rose by 1 percentage point compared to the previous month. Compared to November 2005 it was up by 27 percentage points and it was 22 percentage points above last year's average.
- V tem mesecu posebej izstopata še kazalnik obseg gradbenih del, ki je dosegel najvišjo vrednost po aprilu 2002, in kazalnik tehnične zmogljivosti, ki je prvič v opazovanem obdobju negativen.
- In November the assessment of building activity indicator reached the highest value since April 2002. The technical capacity indicator reached a negative value for the first time in the whole observed period.
- Kazalniki stanj so se v primerjavi s preteklim mesecem izboljšali; izjema je le kazalnik zaposlovanje. Pričakovanja za naslednje tri mesece so ugodna, izjema je le kazalnik pričakovane cene.
- Compared to the previous month, the observed indicators for the appreciation of the situation improved, except for employment. The expectations for the next three months are favourable, except the price expectations indicator.

6. OMEJITVENI DEJAVNIKI V GRADBENIŠTVU V SLOVENIJI, MAREC 2002–NOVEMBER 2006

FACTORS LIMITING BUILDING ACTIVITY IN SLOVENIA, MARCH 2002–NOVEMBER 2006

Graf ponazarja delež zaposlenih v gradbeništvu, ki imajo naslednje skupine težav:

- Skupina "ni omejitev" zajema zaposlene, ki se ne soočajo z omejitvami.
- Skupina "težave s povpraševanjem" zajema zaposlene, ki imajo težave z nezadostnim povpraševanjem in konkurenco v dejavnosti.
- Skupina "težave s ponudbo" zajema zaposlene, ki imajo težave s slabimi vremenskimi pogoji, visokimi finančnimi stroški, visokimi stroški materiala in dela, težave pri pridobivanju kreditov. V to skupino sodijo tudi podjetja, ki imajo težave s pomanjkanjem usposobljenih delavcev, opreme in materialov.
- Skupina "hude omejitve" zajema zaposlene, ki imajo hkrati težave z dejavniki iz skupine "šibko povpraševanje" in z dejavniki iz skupine "težave s preskrbo".

The chart on production obstacles shows the share of employees who are facing the following groups of problems:

- Group "no limits" includes employees with no limits in building activity.
- Group "weakness in demand" includes employees who are facing insufficient demand and competition in own sector.
- Group "supply difficulties" includes employees who are facing bad weather conditions, high cost of finance, materials and/or labour; difficulties with access to bank credits, lack of equipment, and shortage of skilled labour and shortage of materials.
- Group "severe obstacles" includes employees who are facing at the same time problems from the group "weakness in demand" and those from the group "supply difficulties".

METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah v gradbeništvu (PA-GRAD/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalnika zaupanja v gradbeništvu.

Anketo o poslovnih tendencah v gradbeništvu izvajamo v Sloveniji od marca 2002 s poenot enim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

ENOTE OPAZOVANJA

Opazujemo podjetja, ki so razvrščena v gradbeništvo, to je v oddelku 45 Standardne klasifikacije dejavnosti (SKD), in imajo 11 zaposlenih ali več ter so bila izbrana na podlagi dveh meril, in sicer:

- velikosti (število zaposlenih, skladno z zakonom o gospodarskih družbah) in
- razvrstitev podjetja po SKD.

VIRI

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu za tekoči mesec.

ZAJETJE

V anketo smo zajeli vsa velika in srednje velika podjetja in 75 % malih podjetij (ali 74 % zaposlenih). Panelni vzorec pokriva 82 % podjetij vzorčnega okvira ali 93 % zaposlenih v gradbeništvu.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj oddelkov SKD so odgovori uteženi s številom zaposlenih.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo; delež neodgovorov se giblje med 5 in 10 % (povprečno 8 %).

DEFINICIJE

Grafikoni prikazujejo ravnotežja po posameznih vprašanjih. **Ravnotežje** je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalnikov.

Ko so prikazane daljše časovne vrste podatkov ali primerjave kazalnikov s kazalniki EU, so vrednosti **desezonirane**. To so

METHODOLOGICAL EXPLANATIONS

PURPOSE OF STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency in Construction (hereinafter: PA-GRAD/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the construction confidence indicator.

We have been carrying out the Survey on Business Tendency in Construction in Slovenia since March 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in construction – division 45 of the Standard Classification of Activities (SKD) and have 11 or more employees. They were selected by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act),
- classification of the enterprise according to the SKD.

SOURCES

Respondents to the monthly questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th in the month for the current month.

COVERAGE

The panel includes all large and medium-sized enterprises and 75% of small enterprises (or 74% of employees). The panel covers 82% of the enterprises of the studied population or 93% of employees in construction.

METHOD OF DATA COLLECTING

The survey is carried out monthly by mail.

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect relative importance of an individual enterprise in the panel. Inside divisions of Standard Classification of Activities (SKD) responses are weighted with the number of employees.

NON-RESPONSES

Non-responses are processed every month in accordance with the harmonised methodology and vary between 5 and 10% (8% on average).

DEFINITIONS

The charts show the balance by individual questions. The **balance** is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

In the charts with longer time series or by comparisons with EU indicators, data are **seasonally adjusted**. Values are adjusted for

vrednosti, pri katerih je izključen vpliv sezone, vsebujejo pa trend-cikel in naključno komponento. Podatki za EU so desezonirani z metodo DAIINTIES, za Slovenijo pa z metodo TRAMO/SEATS, ki temelji na modelih ARIMA. Pri oblikovanju modelov je upoštevano časovno obdobje od marca 2002 do januarja 2006.

Kazalnik zaupanja v gradbeništvu je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanim zaposlovanju.

OBJAVLJANJE PODATKOV

Sodelujoči v anketi prejmejo informacijo o gradbeništvu kot celoti, o oddelku SKD, v katerega se po dejavnosti razvrščajo in glede na vrsto gradnje, vendar le, če so izpolnili vprašalnik za tekoči mesec.

Ostalim uporabnikom so dostopni podatki na ravni gradbeništva in njegovih skupin ter podatki glede na vrsto gradnje. Slednji so mesečno objavljeni v Statističnih informacijah – Poslovne tendence v gradbeništvu in v podatkovni bazi SI-STAT na naslovu <http://www.stat.si>.

VPRAŠANJA:

- Obseg gradbenih del v zadnjih 3 mesecih: večji, enak, manjši?
- Dejavniki, ki omejujejo gradbeno dejavnost: ni omejitve, nezadostno povpraševanje, slabi vremenski pogoji, visoki stroški materiala, visoki stroški dela, visoki finančni stroški, težave pri pridobivanju kreditov, pomanjkanje usposobljenih delavcev, pomanjkanje opreme, pomanjkanje materialov, velika konkurenca v dejavnosti, ostalo?
- Sedanja naročila v tujini: višja kot normalna, normalna, nižja kot normalna?
- Sedanja domača naročila: višja kot normalna, normalna, nižja kot normalna?
- Sedanja skupna naročila: višja kot normalna, normalna, nižja kot normalna?
- Pričakovana naročila v naslednjih 3 mesecih: zrasla, ostala nespremenjena, padla?
- Zaposlovanje v zadnjem mesecu: povečalo, ostalo enako, zmanjšalo?
- Pričakovano zaposlovanje v naslednjih 3 mesecih: povečalo, ostalo enako, zmanjšalo?
- Cene so se: zvišale, ostale enake, znižale?
- Pričakovane cene v naslednjih 3 mesecih: naraščale, ostale enake, padale?
- Tehnične zmogljivosti glede na povpraševanje v naslednjih 12 mesecih: več kot zadostne, zadostne, nezadostne?
- Pri običajnih delovnih urah že začeto ali s pogodbami zagotovljeno dela za: ... mesecev?
- Poslovno stanje v primerjavi s preteklim mesecem: boljše, enako, slabše?

the seasonal component, but include the trend-cycle component and the irregular component. Data for EU are seasonally adjusted by the DAIINTIES method and for Slovenia by the TRAMO/SEATS method, which is based on ARIMA models. The designing of the models is based on the time period from March 2002 to January 2006.

Confidence indicator in construction is defined as the arithmetic mean of the answers (balances) to the questions on order-books assessments and employment expectations.

PUBLISHING

Persons participating in the survey get information for construction, division in which they are classified and for the type of construction. They get it only if they responded in the current month.

Other users can get data for construction and its groups, size of enterprises and type of construction. Data are published in the Rapid Reports – Business Tendency in Construction and in the SI-STAT database which is available at <http://www.stat.si/eng>.

QUESTIONS:

- Building activity over the past 3 months: increased, remained unchanged, decreased?
- Factors limiting building activity: none, insufficient demand, bad weather conditions, high cost of material, high cost of labour, high cost of capital, access to bank credit, shortage of skilled labour, shortage of equipment, shortage of material, competition in own sector, other?
- Assessment of foreign order books: above normal, normal, below normal?
- Assessment of domestic order books: above normal, normal, below normal?
- Assessment of overall order books: above normal, normal, below normal?
- Expected order books over the next 3 months: increase, remain unchanged, decrease?
- Assessment of employment: increased, remained unchanged, decreased?
- Employment expectations over the next 3 months: increase, remain unchanged, decrease?
- Assessment of prices: increased, remained unchanged, decreased?
- Expected prices over the next 3 months: increase, remain unchanged, decrease?
- Technical capacity regarding expected demand in the next 12 months: more than sufficient, sufficient, not sufficient?
- With normal working hours, the work in hand and work already contracted for ... months?
- Business situation compared to the previous month: better, the same, worse?

KOMENTAR

Novembra 2006 so direktorji ocenili poslovne tendence v gradbeništvu ponovno boljše kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila za 1 odstotno točko višja kot pretekli mesec in je s tem ponovno dosegla najvišjo vrednost v celotnem opazovanem obdobju. V primerjavi z novembrom 2005 je bila višja za 27 odstotnih točk in za 22 odstotnih točk je bila višja od povprečja lanskega leta.

POSLOVNO STANJE

Desezonirana vrednost kazalnika poslovno stanje je bila v primerjavi s preteklim mesecem višja za 1 odstotno točko. V primerjavi z istim mesecem lani je bila višja za 15 odstotnih točk in za 16 odstotnih točk je bila višja od lanskega povprečja.

OBSEG GRADBENIH DEL

Desezonirana vrednost kazalnika obseg gradbenih del je bila v primerjavi s preteklim mesecem višja za 1 odstotno točko. Glede na isti mesec lani je bila višja za 39 odstotnih točk in za 33 odstotnih točk je bila višja od povprečja lanskega leta.

SKUPNA NAROČILA IN PRIČAKOVANA SKUPNA NAROČILA

Desezonirana vrednost kazalnika skupna naročila se je v primerjavi s preteklim mesecem zvišala za 3 odstotne točke. Glede na isti mesec lani je bila višja za 28 odstotnih točk in za 22 odstotnih točk je bila višja tudi od lanskega povprečja.

Desezonirana vrednost kazalnika pričakovana skupna naročila za naslednje tri mesece se je v primerjavi s preteklim mesecem zvišala za 9 odstotnih točk. Glede na isti mesec lani je bila nižja za 3 odstotne točke in za 5 odstotnih točk je bila višja od povprečja lanskega leta.

ZAPOSLOVANJE IN PRIČAKOVANO ZAPOSLOVANJE

Desezonirana vrednost kazalnika zaposlovanje se je v primerjavi s preteklim mesecem znižala za 9 odstotnih točk. V primerjavi z istim mesecem lani je bila višja za 14 odstotnih točk in za 16 odstotnih točk je bila višja od povprečja lanskega leta.

Desezonirana vrednost kazalnika pričakovano zaposlovanje se je v primerjavi s preteklim mesecem zvišala za 1 odstotno točko. Glede na isti mesec lani je bila višja za 24 odstotnih točk in za 11 odstotnih točk je bila višja od lanskega povprečja.

CENE IN CENOVNA PRIČAKOVANJA

Desezonirana vrednost kazalnika cene se je v primerjavi s preteklim mesecem zvišala za 2 odstotni točki. Glede na isti mesec lani je bila višja za 17 odstotnih točk in za 11 odstotnih točk je bila višja od povprečja lanskega leta.

Desezonirana vrednost kazalnika cenovna pričakovanja za naslednje tri mesece se je v primerjavi s preteklim mesecem znižala za 1 odstotno točko. Glede na isti mesec lani je bila višja za 5 odstotnih točk in za 4 odstotne točke je bila višja od povprečja lanskega leta.

COMMENT

In November 2006, managers again estimated business tendencies in construction as being better than in the previous month. The seasonally adjusted value of the confidence indicator rose by 1 percentage point compared to the previous month and thus reached the highest value in the observed period. Compared to November 2005 it was up by 27 percentage points and it was 22 percentage points above last year's average.

BUSINESS SITUATION

Compared to the previous month the seasonally adjusted value of the business situation indicator rose by 1 percentage point. Compared to November 2005 it was up by 15 percentage points and compared to last year's average by 16 percentage points.

BUILDING ACTIVITY

The seasonally adjusted value of the building activity indicator rose by 1 percentage point compared to the previous month. Compared to November 2005 and last year's average it was up by 39 and 33 percentage points, respectively.

OVERALL ORDER-BOOKS AND EXPECTED ORDER-BOOKS

The seasonally adjusted value of the overall order-books indicator rose by 3 percentage points compared to the previous month. Compared to November 2005 and last year's average it was up by 28 and 22 percentage points, respectively.

The seasonally adjusted value of the expected order-books for the next three months rose by 9 percentage points compared to the previous month. Compared to November 2005 it was down by 3 percentage points and 5 percentage points above last year's average.

EMPLOYMENT AND EMPLOYMENT EXPECTATIONS

The seasonally adjusted value of the employment indicator fell by 9 percentage points compared to the previous month. Compared to November 2005 it was up by 14 percentage points and compared to last year's average by 16 percentage points.

The seasonally adjusted value of the expected employment indicator rose by 1 percentage point compared to the previous month. Compared to November 2005 it was up by 24 percentage points and compared to last year's average by 11 percentage points.

PRICES AND PRICE EXPECTATIONS

The seasonally adjusted value of the prices indicator rose by 2 percentage points compared to the previous month. Compared to November 2005 it was up by 17 percentage points and was 11 percentage points above last year's average.

The seasonally adjusted value of the price expectations indicator for the next three months fell by 1 percentage point compared to the previous month. Compared to November 2005 it was up by 5 percentage points and 4 percentage points above last year's average.

TEHNIČNE ZMOGLJIVOSTI

Desezonirana vrednost kazalnika tehnične zmogljivosti zajema oceno količine in kakovosti opreme glede na povpraševanje v naslednjih 12 mesecih.

Desezonirana vrednost tega kazalnika se je primerjavi s preteklim mesecem znižala za 3 odstotne točke. Glede na isti mesec lani je bila nižja za 10 odstotnih točk in za 6 odstotnih točk je bila nižja od lanskega povprečja.

ZAGOTOVLJENO DELO

Desezonirana vrednost kazalnika zagotovljeno delo temelji na oceni števila mesecev, za katere je delo zagotovljeno s pogodbami.

V novembru 2006 so imela podjetja s pogodbami zagotovljeno delo v povprečju za 4,5 meseca. To je za 0,6 meseca več kot v istem mesecu lani in za 0,3 meseca več od povprečja lanskega leta.

OMEJITVENI DEJAVNIKI

Med omejitvenimi dejavniki v gradbeništvu so prevladovali dejavniki iz skupine hude omejitve. V tem mesecu se je z njimi spopadalo 41 % zaposlenih (oziroma 32 % podjetij).

Sledili so omejitveni dejavniki iz skupine težave s ponudbo. V tem mesecu se je z njimi srečevalo 39 % zaposlenih (oziroma 43 % podjetij).

Z dejavniki iz skupine šibko povpraševanje se je v tem mesecu srečalo 11 % zaposlenih (oziroma 11 % podjetij).

9 % zaposlenih (oziroma 14 % podjetij) v tem mesecu ni imelo omejitev.

Podrobnejši pregled omejitvenih dejavnikov v gradbeništvu v tem mesecu pokaže naslednje¹⁾:

- 42 % podjetij (ali 46 % zaposlenih) je omejevalo pomanjkanje usposobljenih delavcev;
- 40 % podjetij (ali 50 % zaposlenih) je omejevala velika konkurenca v dejavnosti;
- 33 % podjetij (ali 39 % zaposlenih) so omejevali visoki stroški dela;
- 23 % podjetij (ali 23 % zaposlenih) so omejevali visoki stroški materiala;
- 13 % podjetij (ali 14 % zaposlenih) so omejevali visoki finančni stroški;
- 12 % podjetij (ali 9 % zaposlenih) so omejevale slabe vremenske razmere;
- 9 % podjetij (ali 6 % zaposlenih) so omejevali drugi dejavniki;
- 7 % podjetij (ali 9 % zaposlenih) je omejevalo nezadostno povpraševanje;
- 6 % podjetij (ali 5 % zaposlenih) so omejevale težave pri pridobivanju kreditov;

TECHNICAL CAPACITY

The seasonally adjusted value of the technical capacity indicator includes the evaluation of the quantity and quality of equipment regarding expected demand in the next 12 months.

The seasonally adjusted value of this indicator fell by 3 percentage points compared to the previous month. Compared to November 2005 it fell by 10 percentage points and was 6 percentage points below last year's average.

ASSURED WORK IN HAND

The value of the assured work indicator includes the evaluation of the number of months for which work is assured by contracts.

In November 2006, enterprises had work assured for 4.5 months on average, which is 0.6 month more than in November 2005 and 0.3 month more than last year's average.

LIMITING FACTORS

Among factors limiting building activity, severe obstacles prevailed. In November 2006, 41% of employees (32% of enterprises) were faced with them.

The second most important obstacles were supply difficulties. In November 2006, 39% of employees (43% of enterprises) faced them.

The third most important obstacles were demand difficulties. In November 2006, 11% of employees (11% of enterprises) faced them.

Only 9% of employees (14% of enterprises) experienced no obstacles in November 2006.

A more detailed overview of factors limiting building activity shows that in this month¹⁾:

- 42% of enterprises (or 46% of employees) were limited by shortage of skilled labour;
- 40% of enterprises (or 50% of employees) were limited by competition in own sector;
- 33% of enterprises (or 39% of employees) were limited by high costs of labour;
- 23% of enterprises (or 23% of employees) were limited by high costs of material;
- 13% of enterprises (or 14% of employees) were limited by high costs of capital;
- 12% of enterprises (or 9% of employees) were limited by bad weather conditions;
- 9% of enterprises (or 6% of employees) were limited by other factors;
- 7% of enterprises (or 9% of employees) were limited by insufficient demand;
- 6% of enterprises (or 5% of employees) were limited by access to bank credits;

¹⁾ Podjetja lahko označijo več dejavnikov, ki omejujejo njihovo dejavnost, zato vsota odstotkov ni 100%. Enterprises can select several factors limiting their business, so the total is not 100%.

- 2 % podjetij (ali 3 % zaposlenih) je omejevalo pomanjkanje opreme;
- 1 % podjetij (ali 3 % zaposlenih) je omejevalo pomanjkanje materialov.

Najobsežnejša omejitve v gradbeništvu je bilo pomanjkanje usposobljenih delavcev, sledile so ji velika konkurenca v dejavnosti, visoki stroški dela in visoki stroški materiala.

- 2% of enterprises (or 3% of employees) were limited by lack of equipment;
- 1% of enterprises (or 3% of employees) enterprises were limited by shortage of material.

The most important factor limiting building activity was shortage of skilled labour, followed by competition in own sector, high costs of labour and material.
