**CESTNI BLAGOVNI PREVOZ, SLOVENIJA, 1. – 2. ČETRTLETJE 2003**  
 TRANSPORT OF GOODS BY ROAD, SLOVENIA, 1<sup>ST</sup> – 2<sup>ND</sup> QUARTER 2003

- Podatke o cestnem blagovnem prevozu zbiramo z anketo, ki temelji na slučajnem vzorcu. Objavljene ocene pa so preračunane na celotno populacijo registriranih tovornih vozil v Republiki Sloveniji.
- V 2. četrtletju 2003 je bilo prepeljanih 11 432 tisoč ton blaga in opravljenih 1 018,4 milijona tonskih kilometrov.
- Obseg prevoza, izražen v tonskih kilometrih, se je zmanjšal za 7 % v primerjavi z 2. četrtletjem 2002, od začetka leta pa je bilo opravljenih kar za 22 % manj tonskih kilometrov kot v enakem obdobju lani, zlasti zaradi prvega četrtletja.
- V 2. četrtletju 2003 so pravne in fizične osebe opravile približno enak delež prevoza blaga. 23 % vsega prepeljanega blaga so prepeljale pravne osebe v javnem prevozu in 28 % v prevozu za lastne potrebe. Fizične osebe so v javnem prevozu prepeljale 47 % blaga, za lastne potrebe pa le 2 %.
- Glede na vrsto blaga po klasifikaciji NST/R je bilo največ prepeljanega blaga iz poglavja 6 - Surovi in predelani minerali ter gradbeni materiali. 4 % blaga, prepeljanega v 2. četrtletju 2003, se po evropski pogodbi ADR klasificira kot nevarno blago.
- Data on road goods transport are obtained with a survey based on a random sample. Estimates published in this report are calculated for the whole population of goods vehicles registered in the Republic of Slovenia.
- In the 2<sup>nd</sup> quarter of 2003, 11,432,000 tons were carried and 1,018.4 million ton-kilometres were made.
- The amount of ton-kilometres made decreased by 7% in comparison with the 2<sup>nd</sup> quarter of 2003. From the beginning of the year 22% less ton-kilometres were made in comparison with the same period last year, because of the large reduction in the 1<sup>st</sup> quarter of 2003.
- In the 2<sup>nd</sup> quarter of 2003 legal and natural persons carried approximately the same share of goods. Legal persons carried 23% of all goods in transport for hire or reward and 28% in transport on own account. Natural persons carried 47% of goods in transport for hire or reward and only 2% in transport on own account.
- Regarding the type of goods according to the NST/R classification, most goods carried belong to Chapter 6 - Crude and manufactured minerals, building materials. The share of dangerous goods (classified in ADR) carried in the 2<sup>nd</sup> quarter of 2003 was 4%.

**OPOMBE**

Zaradi zaokroževanja se seštevki vedno ne ujemajo.  
Ostali podatki, pridobljeni z raziskavo o cestnem prevozu blaga so dostopni na Statističnem uradu Republike Slovenije.

**REMARKS**

The figures are rounded, so the sums might not be totally correct.  
Additional data from the survey on road transport of goods are available at the Statistical Office of the Republic of Slovenia.

**METODOLOŠKA POJASNILA****Namen statističnega raziskovanja**

je četrtno zbrati osnovne podatke o prepeljanem blagu (teža, vrsta, oblika tovora / pakiranja in ali spada med nevarne snovi), podatke o prevoženih kilometrih (polnih in praznih), podatke o stopnji naloženosti na poti in podatke o vrsti prevoza.

**Enote opazovanja**

so registrirana tovorna motorna vozila z vsaj eno tono nosilnosti v opazovanem tednu. Poročevalske enote pa so poslovni subjekti (*pravne in fizične osebe*), ki imajo v lasti, najemu ali upravljanju registrirana tovorna motorna vozila z vsaj eno tono nosilnosti, in sicer v **javnem prevozu in prevozu za lastne potrebe**.

**Viri in načini zbiranja podatkov**

Poslovne subjekte, izbrane v vzorec za statistično opazovanje v določenem četrletju, predhodno obvestimo z obvestilnim pismom. To vsebuje seznam registrskih številk tovornih motornih vozil s pripadajočimi tedni opazovanja. Potem jim približno 10 dni pred določenim tednom opazovanja pošljemo vprašalnik (TR-CES-B/T: Tedensko poročilo o cestnem blagovnem prevozu), navodila, priloga (Nekateri primeri izpolnjenih vprašalnikov) in okrožnico ter kuverto s plačano poštnino (za vračilo). Vprašalnik mora biti vrnjen v 8 dneh po koncu določenega tedna opazovanja. Tistim, ki tega roka ne upoštevajo, pošljemo I. opomin približno 10. dan, II. opomin pa 23. dan po koncu določenega tedna opazovanja, 30. dne pa sledi še telefonski opomin.

**Zajetje**

Osnova za izdelavo četrletnega vzorca je Register motornih vozil, ki ga vodi Ministrstvo za notranje zadeve. Za vsako četrletje se pridobi trenuten okvir, ki predstavlja celotno populacijo registriranih tovornih motornih vozil na področju Slovenije. Dobljene podatke primerjamo in uskladimo s Poslovnim registrom Slovenije in jim dodelimo šifro dejavnosti (SKD).

**Vzorec**

Vzorčimo glede na tip lastnine (pravne in fizične osebe) in glede na nosilnost (4 razredi za tovorne automobile in specialna tovorna vozila ter ločeno vlačilci - skupaj 5 razredov). Alokacija glede na tip lastnine je proporcionalna številu vozil v stratumih s popravkom za različno stopnjo neodgovora pri fizičnih in pravnih osebah. Alokacija glede na nosilnost je enaka (v vsaki skupini izberemo enako število vozil v vzorcu). Izbranih je 190 vozil na teden, torej 2 470 vozil na četrletje, od tega v lasti pravnih oseb 1 090 (44 %) in v lasti fizičnih oseb 1 380 (56 %).

**METHODOLOGICAL EXPLANATIONS****The purpose of the statistical survey**

Is to obtain every quarter basic data on goods carried (weight, type, type of cargo / packing and whether goods are dangerous), kilometres travelled (loaded and empty), degree of loading and type of transport.

**Observation units**

are registered goods motor vehicles with at least one tonne of load capacity in the reference week. Reporting units are business subjects (*legal and natural persons*) owning, leasing or managing registered goods motor vehicles with at least one tonne of load capacity **both in transport for hire or reward and in transport on own account**.

**Sources and method of data collection**

Business subjects selected in a certain quarter are sent an invitation letter in which a list of licence plate numbers of goods motor vehicles with reference weeks are stated. Ten days before the reference week business subjects are sent a questionnaire (TR-CES-B/T: Weekly report on road goods transport) together with guidelines, annex (examples of answered questionnaires), the circular letter and the pre-paid envelope in which they have to return the questionnaire. The questionnaire has to be returned within 8 days after the end of the reference week. If they are not returned, we send the first reminder on the 10<sup>th</sup> day and the second reminder on the 23<sup>rd</sup> day after the reference week. On the 30<sup>th</sup> day we remind the reporting units by phone.

**Coverage**

The basis for preparing the quarterly sample is the Register of Motor Vehicles, kept by the Ministry of the Interior. For every quarter current coverage, which represent the whole population of registered goods motor vehicles in Slovenia, is used. The collected data are linked to Business Register of Slovenia data and assigned a code of activity (according to the national Standard Classification of Activities).

**Sample**

Sampling is performed regarding the type of ownership (legal or natural persons) and load capacity (four classes for goods vehicles and specialised goods vehicles, and separately for road tractors – i.e. 5 classes in total). The allocation regarding the type of ownership is proportional to the number of vehicles in strata with corrections for different levels of non-response between legal and natural persons. The allocation regarding the load capacity of vehicles is equal (in each group we select the same number of vehicles). 190 vehicles are chosen per week, that is 2,470 per quarter, thereof 1,090 owned by legal entities (44%) and 1,380 owned by natural persons (56%).

### Uteževanje

Dobljeni podatki so s pomočjo uteži razširjeni na celotno populacijo tovornih motornih vozil v Sloveniji. Uteževanje poteka po stratumih: tip lastnine oziroma vrsta poslovnega subjekta (pravna, fizična oseba) in nosilnost tovornih motornih vozil (4 razredi glede na nosilnost in vlačilci – skupaj 5 razredov).

### Kriteriji natančnosti

- ocene s koeficientom variacije, manjšim od 0,10 ( $CV \leq 0,10$ ), so objavljene brez omejitve;
- ocene s koeficientom variacije od 0,10 do 0,20 ( $0,10 < CV \leq 0,20$ ), so objavljene v enojnih oklepajih;
- ocene s koeficientom variacije od 0,20 do 0,30 ( $0,20 < CV \leq 0,30$ ), so objavljene v dvojnih oklepajih;
- ocene s koeficientom variacije, večjim od 0,30 ( $CV > 0,30$ ), niso objavljene, nadomeščene so s piko.

Uporabnik ocen (podatkov) iz ankete naj bi pri uporabi podatkov

### Weighting

With the help of weights, the collected data were grossed up to the total population of goods motor vehicles in Slovenia. Weighting is done by strata: type of ownership or type of business subject (legal or natural person) and load capacity or motor vehicles (four classes as regards load capacity and separately for road tractors – i.e. five classes in total).

### Definitions and other explanations

- estimates with the coefficient of variation under 0.10 ( $CV \leq 0.10$ ) are published without limitations;
- estimates with the coefficient of variation between 0.10 and 0.20 ( $0.10 < CV \leq 0.20$ ) are published in single parentheses;
- estimates with the coefficient of variation between 0.20 and 0.30 ( $0.20 < CV \leq 0.30$ ) are published in double parentheses;
- estimates with the coefficient of variation over 0.30 ( $CV > 0.30$ ) are not published, but each one is substituted by a dot.

The user of survey estimates (data) should take into account that

upošteval, da so ocene, objavljene brez omejitev, dovolj zanesljive, tiste v oklepajih pa manj.

estimates published without limitations are sufficiently reliable, while those in parentheses are less reliable.

## Definicije in druga pojasnila

### Tovorno cestno motorno vozilo

je vsako posamezno cestno motorno vozilo, ki je namenjeno za prevoz blaga (tovornjak), ali kombinacije cestnih vozil, oblikovanih za prevoz blaga (npr. tovornjak s priklopnikom oz. priklopnički ali cestni vlačilec s pol priklopnikom in s priklopnikom ali brez njiju).

### Cestno vlečno vozilo (vlačilec)

je cestno motorno vozilo, ki je namenjeno izključno ali pretežno za vleko drugih cestnih vozil, ki nimajo svoje lastne pogonske sile (večinoma pol priklopnikov).

### Nosilnost

je največja dovoljena teža blaga, ki jo določi pristojni organ države pri registraciji vozila.

### Starost cestnega vozila

je časovno obdobje od prve registracije cestnega vozila ne glede na državo, v kateri je bilo vozilo registrirano.

### Javni prevoz

je prevoz blaga v komercialne namene, za katerega se relacija, cena prevoza in drugi prevozni pogoji določijo s pogodbo med prevoznikom in naročnikom prevoza.

### Prevoz za lastne potrebe

je prevoz, ki ga fizična ali pravna oseba opravlja za zadovoljevanje potreb pri izvajanju svoje dejavnosti oziroma nalog s svojega delovnega področja.

Glede na usmeritev blaga delimo prevoz blaga na: notranji promet, izvoz, uvoz in prevoz v tujini.

### Notranji promet

je prevoz blaga med dvema krajema (krajem nalaganja in krajem razlaganja), ki se nahajata v isti državi (Sloveniji). Lahko vključuje tudi tranzit skozi drugo državo.

### Izvoz

je prevoz blaga med dvema krajema, pri katerem je kraj nalaganja v državi, ki poroča (Slovenija), kraj razlaganja pa v drugi državi.

### Uvoz

je prevoz blaga med dvema krajema, pri katerem je kraj nalaganja v drugi državi, kraj razlaganja pa v državi, ki poroča (Slovenija).

### Prevoz v tujini (cross – trade)

je prevoz blaga med dvema krajema, pri katerem sta tako kraj nalaganja, kot kraj razlaganja v drugi državi oziroma državah.

### Vrste blaga,

ki se prevaža po cesti, določa nomenklatura NST/R.

### NST/R (Standardna nomenklatura blaga za statistiko transporta / prenovljena – EUROSTAT)

NST/R ima obliko seznama s 176 nazivi za blago, združenimi v 52 skupin in v 10 poglavij; blago je razvrščeno, kolikor je mogoče, na podlagi njegove narave, stopnje obdelave, metod prevoza in skupne prevožene teže. Z direktivo EU za cestni promet (Council Directive 78/546) pa je bila predstavljena NST/R - 24 (24 skupin), ki jo uporabljamo tudi pri nas.

## Definitions and other explanations

### Goods road motor vehicle

Any single road motor vehicle designed to carry goods (lorry), or any coupled combination of road vehicles designed to carry goods, (i.e. lorry with trailer(s), or road tractor with semi-trailer and with or without trailer).

### Road tractor

Road motor vehicle designed, exclusively or primarily, to haul other road vehicles which are not power-driven (mainly semi-trailers).

### Load capacity

Maximum weight of goods declared permissible by the competent authority of the country of registration of the vehicle.

### Age of road vehicle

Length of time after the first registration of the road vehicle, irrespective of the registering country.

### Transport for hire or reward

Transport of goods for commercial purpose, where the distance, the price and the other terms of transport are defined by contract between haulier and consumer of transport services.

### Transport on own account

Transport that a natural or legal person performs for its needs in carrying out its activity or tasks from its field of work.

**Transport of goods by road** is divided in respect of direction goods on national transport, export, import and cross–trade.

### National transport

Road transport of goods between two places (a place of loading and a place of unloading) located in the same country (Slovenia). It may involve transit through a second country.

### Export

Transport of goods between two places, where the place of loading is in Slovenia and the place of unloading is in a foreign country.

### Import

Transport of goods between two places, where the place of loading is in a foreign country and the place of unloading is in Slovenia.

### Cross-trade road transport

Transport of goods between two places, where the place of loading and unloading are in the foreign country(s).

### Types of goods carried by road

Are defined by the NST/R nomenclature.

### NST/R nomenclature (Standard Goods Nomenclature for Transport Statistics / revised – EUROSTAT)

The NST/R nomenclature is a list with 176 types of goods, combined into 52 groups and 10 chapters; goods are classified, as far as possible, on the basis of their nature, level of processing, transport mode and total weight carried. The EU directive on road transport (Council Directive 78/546) introduced the NST/R – 24 nomenclature (24 groups), which is being used in Slovenia.

## Nevarno blago

Vrste nevarnega blaga, ki se prevaža po cesti, so določene z Evropskim sporazumom o mednarodnih prevozih nevarnega blaga po cesti (ADR).

## ADR (Evropska pogodba o mednarodnem prevozu nevarnih snovi)

Med nevarne snovi spadajo: eksplozivne snovi in eksplozivni predmeti, plini, vnetljive tekočine, vnetljive trdne snovi, samovnetljive snovi, snovi, ki pri stiku z vodo tvorijo vnetljive pline, oksidirajoče snovi, organski peroksiidi, strupi, kužne snovi, radioaktivne snovi in jedke snovi.

## KOMENTAR :

Obseg prevoza, izražen v tonskih kilometrih, se je v 1. četrletju 2003 zmanjšal kar za 34 % v primerjavi s 1. četrletjem 2002, medtem ko se je količina prepeljanega blaga v tonah zmanjšala za 11 %. Razlog za tak padec je skoraj prepolovitev mednarodnega prevoza glede na enako obdobje lani, zaradi česar je padec tonskih kilometrov izrazitejši, saj se prevozi v mednarodnem transportu opravlja na daljših razdaljah. V notranjem prevozu je bil zaznan 6-odstotni padec v količini prepeljanega blaga in 22-odstotni padec v številu opravljenih tonskih kilometrov. Skupna količina prepeljanega blaga v 2. četrletju 2003 se v primerjavi z enakim obdobjem lani ni bistveno razlikovala, število opravljenih tonskih kilometrov pa se je zmanjšalo za 7 %. V obeh primerih se je močno zmanjšal prevoz po tujini (blago za tretjino, tonski kilometri za polovico).

V opazovanem obdobju so največji delež prevoženih ton prepeljala vozila, registrirana v Sloveniji, v notranjem prevozu, in sicer v 1. četrletju 2003 91 % in v 2. četrletju 2003 92 %. V izvozu so prepeljala 5 % (1. čl.) oziroma 4 % (2. čl.) celotne količine prepeljanega blaga, v uvozu pa 4 % v obeh obdobjih. Količina prevoženega blaga v tujini je predstavljala manj kot odstotek celotnega prevoza.

V 1. četrletju 2003 je znašal delež blaga, prepeljanega v mednarodnem prevozu, 9 %. V javnem prevozu je bil ta delež 14 %, v prevozu za lastne potrebe pa 2 %. Delež mednarodnega prevoza pri pravnih osebah je znašal 6 %, pri fizičnih osebah pa 13 %. V 2. četrletju 2003 so znašali ti deleži 8 % pri skupnem prevozu, 16 % pri javnem prevozu, 2 % pri prevozu za lastne potrebe, 8 % pri prevozu, ki so ga opravile pravne osebe, in 9 % pri prevozu, ki so ga opravile fizične osebe.

Delež tonskih kilometrov v notranjem prevozu je znašal 34 % v 1. četrletju in 36 % v 2. četrletju. Izvoz in uvoz sta predstavljala 33 in 28 % v 1. četrletju ter 31 in 28 % v 2. četrletju. Delež tonskih kilometrov, opravljenih v prevozu po tujini, je znašal 5 % tako v 1. kot v 2. četrletju 2003.

V 1. četrletju 2003 je bilo v notranjem prevozu 80 % blaga prepeljanega na razdaljah od 0 do 49 km, 13 % na razdaljah od 50 do 149 km in 7 % na razdaljah, daljših od 150 km. V 2. četrletju 2003 je bilo v notranjem prevozu 79 % blaga prepeljanega na razdaljah od 0 do 49 km, 16 % na razdaljah od 50 do 149 km in 6 % na razdaljah, daljših od 150 km.

## Hazardous goods

The categories of hazardous goods carried by road are those defined by the European Agreement Concerning the International Carriage of Dangerous Goods by Road (ADR).

## ADR (the European Agreement Concerning the International Carriage of Dangerous Goods by Road)

Hazardous goods are: explosives, gases, flammable liquids, flammable solids, substances liable to spontaneous combustion, substances which, in contact with water, emit flammable gases, oxidising substances, organic peroxides, toxic substances, substances liable to cause infections, radioactive material and corrosives.

## COMMENT:

The extent of transport expressed in ton-kilometres decreased in the 1<sup>st</sup> quarter of 2003 in comparison with the 1<sup>st</sup> quarter of 2002 by 34%, while quantity of tones carried decreased by 11%. The reason for such a large fall in the total figure is in international transport, which in the 1<sup>st</sup> quarter of 2003 amounted only to a half of transport performed in the 1<sup>st</sup> quarter of 2002. The decline of the ton-kilometres was bigger because of the large distances in international transport. In national transport the amount of tons carried decreased by 6% and the number of ton-kilometres made by 22%. The total quantity of goods carried in the 2<sup>nd</sup> quarter of 2003 did not change considerably compared with the same period last year, while the number of ton-kilometres decreased by 7%. In both cases the cross-trade decreased largely (tons by one third and ton-kilometres by a half).

In the reporting periods the highest share of tons carried by vehicles registered in Slovenia was performed in national transport, namely 91% in the 1<sup>st</sup> quarter of 2003 and 92% in the 2<sup>nd</sup> quarter of 2003. In export, 5% was carried in the 1<sup>st</sup> quarter and 4% in the 2<sup>nd</sup> quarter, while in import 4% was carried in both periods. The quantity of goods carried in cross-trade was less than 1% in both periods.

In the 1<sup>st</sup> quarter of 2003 international transport represented 9% of total transport. In transport for hire or reward 14% of goods was carried in international transport and in transport for own account only 2%. Legal persons carried 6% of all goods in international transport, while natural persons carried 13%. In the 2<sup>nd</sup> quarter of 2003 international transport represented 8% of total transport, 16% of transport for hire or reward, 2% of transport for own account, 8% of transport by legal persons and 9% of transport by natural persons.

The share of ton-kilometres in national transport in the 1<sup>st</sup> quarter of 2003 was 34% and in the 2<sup>nd</sup> quarter of 2003 36%. In the 1<sup>st</sup> quarter 33% of all ton-kilometres were made in export and 28% in import, in the 2<sup>nd</sup> quarter 31% was made in export and 28% in import. 5% of ton-kilometres were made in cross-trade in both quarters.

In the 1<sup>st</sup> quarter of 2003 in national transport 80% of goods was carried at distances between 0 and 49 km, 13% at distances between 50 and 149 km and 7% at distances longer than 150 km. In the 2<sup>nd</sup> quarter of 2003 in national transport 79% of goods was carried at distances between 0 and 49 km, 16% at distances between 50 and 149 km and 6% at distances longer than 150 km.

57 % blaga, ki so ga prepeljala cestna motorna tovorna vozila, registrirana v Sloveniji v 2. četrtletju 2003, se po klasifikaciji NST/R razvrščajo v poglavje 6 – *Surovi in predelani minerali, gradbeni materiali*, kamor spadajo pesek, gramoz, glina, žlindra, sol, železovi piriti, žveplo, druge kamnine in rudnike, mavec, cement, apno in drugi industrijski gradbeni materiali. V poglavje 9 – *Stroji, transportna oprema, industrijski izdelki in mešani izdelki* spada 22 % blaga, prepeljanega v istem obdobju. Delež nevarnega blaga, ki so ga prepeljala vozila, registrirana v Sloveniji, znaša 4 % v 1. četrtletju in 5 % v 2. četrtletju 2003. Glede na klasifikacijo ADR je izmed nevarnih snovi največji delež vnetljivih tekočin.

Glede na obliko tovora je bil največji delež prepeljanega blaga v 2. četrtletju 2003 v oblikah trdnega razsutega tovora (70 %), sledilo mu je blago v oblikah tovora na paletah (10 %), tekoči razsuti tovor (9 %) in ostale oblike.

#### Objavljanje podatkov

Mesečno:

Statistične informacije, Transport in komunikacije

Nekateri pomembnejši podatki Republike Slovenije

Mesečni statistični pregled

Letno:

Statistični letopis

Rezultati raziskovanj. Letni pregled transporta in komunikacij

57% of goods, carried by road motor goods vehicles, registered in Slovenia in the 2<sup>nd</sup> quarter of 2003 are classified according the NST/R in Chapter 6 - *Crude and manufactured minerals, building materials*. Here are listed sand, gravel, clay, scoria, salt, iron pyrites, sulphur, other stoneware and ore, plaster, cement, lime and other industrial construction materials. 22% of goods carried are classified in Chapter 9 - *Machinery, transport equipment, manufactured articles and miscellaneous articles*. The share of dangerous goods, carried by motor goods vehicles, registered in Slovenia is 4% in the 1<sup>st</sup> quarter of 2003 and 5% in the 2<sup>nd</sup> quarter of 2003. Among the dangerous goods, most goods carried belong to ADR code Flammable liquids.

Regarding the type of cargo, the highest share of tones carried in the 2<sup>nd</sup> quarter of 2003 was in the form of Solid bulk cargo (70%), followed by Palletised goods (10%), Liquid bulk cargo (9%) and others.
