Povprečna poraba na turista na dan na poslovnih potovanjih v Sloveniji se je v primerjavi z istim četrtletjem leta 2005 povečala, na poslovnih potovanjih v tujini pa zmanjšala.

Business trips cost on average about SIT 90 thousand: in Slovenia about SIT 40 thousand and abroad about SIT 105 thousand. Business tourists spent on average about SIT 35 thousand per day: in Slovenia about SIT 24 thousand and abroad about SIT 37 thousand. Expenditures covered by the employer as well as those covered by the business tourists themselves are included. In comparison with the same quarter of 2005, average expenditure per tourist per day on business trips in Slovenia increased and on those abroad decreased.

Neudeležba na zasebnih potovanjih

74,2 % prebivalcev Slovenije, starih 15 let ali več, v 1. četrtletju 2006 ni odšlo na zasebno potovanje. Od teh je 38,9 % oseb odgovorilo, da zaradi pomanjkanja prostega časa, 26,6 % pa zaradi finančnih razlogov. Pomanjkanje prostega časa je bilo glavni razlog v starostnih skupinah 15-24 in 25-44 let. Po 10,9 % oseb ni odpotovalo zaradi neprimerne letnega časa oz. ker ni čutilo potrebe. V primerjavi s 4. četrtletjem 2005 se je delež tistih, za katere je bil letni čas neprimeren, povečal za 3 odstotne točke. Za 10,6 % oseb so bili glavna ovira zdravstveni razlogi, posebej v starostni skupini 65 let in več in med upokojeanci.

Not going on private trips

74.2% of Slovenian population did not go on private trips in the 1st quarter of 2006; 38.9% of them stated lack of time as the main reason and 26.6% mentioned financial reasons. Lack of time was the most important in the age groups 15-24 and 25-44. By 10.9% of the population didn't go on private trip because of the inappropriate season or did not feel the need to go. Compared to the 4th quarter of 2005 the share of those, for whom the season was inappropriate, increased by 3 percentage points. For 10.6% of the population the main obstacle were health reasons, especially for persons aged 65 years and more and among retired ones.

METODOLOŠKA POJASNILA**Namen statističnega raziskovanja**

S četrtletno Anketo o turističnih potovanjih domačega prebivalstva – TU-ČAP, ki smo jo uvedli z letom 2000, zbiramo podatke o potovanjih slovenskega prebivalstva: zakaj, kdaj, kam, za koliko časa, kako ljudje odhajajo zdoma in koliko denarja za to porabijo. Namen raziskovanja pa je tudi spoznati, zakaj nekateri prebivalci nikoli ne zapuščajo svojega doma zaradi turističnih potovanj.

Leta 1995 je Svet Evropske unije sprejel Direktivo 95/57/ES za področje statistike turizma; ta določa tudi obseg in natančnost podatkov o potovanjih domačega prebivalstva. Določila te Direktive so v anketi v celoti upoštevana.

Enota opazovanja

Ciljna populacija so prebivalci Slovenije, stari 15 let ali več. Enota opazovanja pa je član izbranega gospodinjstva, star 15 let ali več, ki bo prvi od anketarjevega klica dalje, imel rojstni dan.

Viri in način zbiranja podatkov

Podatke o turističnih potovanjih domačega prebivalstva zbiramo s telefonsko, računalniško podprto anketo (CATI). Izvajamo jo četrtletno, torej vsake tri mesece: januarja, aprila, julija in oktobra. Referenčno obdobje je četrtletje pred mesecem anketiranja, to pomeni, da se je potovanje moralo končati v tem obdobju, začelo pa se je lahko največ eno leto pred tem.

Vsako četrtletje izberemo v vzorec telefonske številke oz. gospodinjstva iz telefonskega imenika naročnikov. Na naslov imetnika telefonskega priključka pošljemo obvestilno pismo in zgibanko, s katerima gospodinjstvo obvestimo, da jih bo poklical anketar statističnega urada, in jih seznanimo z vsebino ankete.

Izmed članov gospodinjstva izberemo anketiranca po metodi "prvega rojstnega dne". Anketar torej želi govoriti s članom gospodinjstva, starih 15 let ali več, ki bo (od datuma anketarjevega klica) prvi imel (praznoval) rojstni dan. Vsa vprašanja, razen vprašanja o porabi sredstev za potovanje, se nanašajo samo na izbranega člana. Vprašanje o porabi sredstev za zasebno potovanje se lahko nanaša na vse udeležence potovanja.

Vzorec

Vzorčni okvir je telefonski imenik zasebnih telefonskih naročnikov v Republiki Sloveniji. Vzorec je stratificiran sistematični. Stratumi so definirani s statistično regijo (12 regij) in tipom naselja znotraj statističnih regij (6 tipov). V vsakem stratumu smo vzorčili neodvisno. Število enot oziroma telefonskih števil v posameznem stratumu je sorazmerno glede na delež oseb, starih 15 let ali več, ki živijo v območju posamezne statistične regije, in glede na velikost naselja. V prvem, drugem in tretjem četrtletju je v vzorec izbranih 3 000 telefonskih števil, v četrtletju pa 6 000.

Stopnje (ne)odgovorov

V 1. četrtletju 2006 je bilo za anketiranje ustreznih 2 948 števil, v anketi

METHODOLOGICAL EXPLANATIONS**Purpose of the statistical survey**

With the quarterly Survey on Tourism Travels of Domestic Population, which we introduced in 2000, we collect data on travels of Slovenian population: why, when, where, for how long and with what vehicle people travel and how much money they spend. The purpose of this survey is also to find out why some people do not leave their homes for the purpose of tourism travels.

In 1995 the Council Directive 95/57/EC for the field of tourism statistics was adopted, which also defines the extent and accuracy of data on tourism travels of resident population. This survey follows the definitions and principles of the Directive.

Observation unit

The target population is resident population of Slovenia aged 15 years or over. Observation unit is a member of a selected household aged 15 years or more who is the first in the household to have his/her birthday after the date of the interviewer's call.

Sources and methods of data collection

Data on tourism travels of domestic population are collected by a computer assisted telephone survey (CATI). The survey is carried out quarterly, i.e. every three months: in January, April, July and October. The reference period is the quarter before the month in which the survey is implemented. This means that the trip should have been finished in this period, while it can start one year before at the most.

Every quarter a sample of telephone numbers (households) is selected from the list of telephone subscribers. We send a letter and a brochure to the address of the owner of the telephone to inform the household that an interviewer from the Statistical Office would call. We also inform the household about the content of the survey.

Of all household members we select the respondent according to the "first birthday" method. The interviewer thus talks to the household member aged 15 or more who is the first in the household to have (celebrate) his/her birthday after the date of the interviewer's call. All questions, except the question on expenditure for travelling, can refer only to the selected member of the household. The question on expenditure for private travelling refers to all participants who went on the trip.

Sample

The sampling frame is the directory of private telephone subscribers in the Republic of Slovenia. The sample is stratified systematic. Strata are defined with statistical region (12 regions) and type of settlement within the region (6 types). Each stratum was sampled independently. The number of units (telephone numbers) in each stratum is proportional to the share of persons aged 15 or more living in the area of statistical region and the size of settlement. In the first, second and third quarter 3,000 telephone numbers are selected in the sample and in the fourth 6,000.

(Non)response rates

In the 1st quarter of 2005, 2,948 numbers were eligible and 1,786 persons

pa je sodelovalo 1 786 oseb. To pomeni, da je stopnja ustreznosti dosegla 98,3 %, stopnja odgovora pa 60,6 %. Stopnja neodgovora je znašala 39,4 %, od tega stopnja zavračanja 22,8 %.

Uteževanje

Podatki so uteženi glede na velikost gospodinjstva, ker imajo osebe, ki živijo v gospodinjstvih z več člani, manjšo verjetnost izbora. Poleg osnovnega uteževanja uporabimo dodatno uteževanje (kalibracijo), ki prilagodi porazdelitev kontrolnih spremenljivk znani populacijski sestavi. Za prilagoditev smo uporabili naslednje spremenljivke: spol, starost, izobrazbo, velikost gospodinjstva, statistično regijo in tip naselja.

Natančnost ocen

Natančnost ocen za nekatere ciljne spremenljivke je bila ocenjena s pomočjo programskega paketa Sudaan 9.0. Natančnost preostalih objavljenih podatkov je bila ocenjena s pomočjo modela.

Kriteriji natančnosti:

- ocene s koeficientom variacije, manjšim od 0,10 ($CV \leq 0,10$), so objavljene brez omejitve;
- ocene s koeficientom variacije od 0,10 do 0,15 ($0,10 < CV \leq 0,15$) so objavljene v enojnih oklepajih;
- ocene s koeficientom variacije od 0,15 do 0,30 ($0,15 < CV \leq 0,30$) so objavljene v dvojnih oklepajih;
- ocene s koeficientom variacije, večjim od 0,30 ($CV > 0,30$), niso objavljene, nadomeščene so s piko.

Uporabnik ocen (podatkov) iz ankete naj bi pri uporabi rezultatov upošteval, da so ocene, objavljene brez omejitev, dovolj zanesljive, tiste v oklepajih pa manj.

Seštevkki se zaradi zaokroževanja včasih ne ujemajo.

V letu 2006 smo zaradi povpraševanja uporabnikov po absolutnih številkah prešli na objavo absolutnih ocen. Iz tega razloga (večje širine stolpcev) so se spremenile tudi nekatere publikacijske tabele.

Definicije in druga pojasnila

Turizem je splet dejavnosti oseb, ki potujejo in bivajo najmanj en dan v kraju zunaj njihovega običajnega okolja (z najmanj 1 prenočitvijo), vendar ne več kot eno leto (365 dni) brez presledka, in sicer zaradi preživljanja prostega časa, poslovnih ali drugih razlogov. Po dogovoru so izločeni določeni neprostovoljni nameni potovanj, npr. bivanje v bolnišnici ali podobni medicinski ustanovi, ki zagotavlja klinično/medicinsko zdravljenje, kot ga je določil zdravnik, bivanje v zaporih ipd.

To je osnovna definicija, ki jo je sprejela Svetovna turistična organizacija (WTO) in s tem tudi naša država, ki je članica te organizacije. Definicijo so prevzele tudi članice Evropske unije in je navedena v zakonskih aktih, ki zadevajo statistiko turizma.

Turist je oseba, ki potuje v kraj, ki ni del njenega običajnega okolja, in tam vsaj enkrat prenoči, vendar zaporedno ne več kot 365-krat, in sicer zaradi preživljanja prostega časa, poslovnih ali drugih razlogov, vendar ti v kraju potovanja niso pridobitnega značaja (turist ne prejme plačila, nagrade).

took part in the survey. This means that the eligibility rate was 98.3% and the response rate was 60.6%. The non-response rate was 39.4%, of that the refusal rate was 22.8%.

Weighting

Data are weighted regarding the household size because persons living in households with more members are less likely to be selected. Besides the basic weighting additional weighting is used (calibration), which adjusts the distribution of control variables to the known population structure. For adjustment we used the following variables: sex, age, level of education, household size, statistical region and size of settlement.

Precision of estimates

Precision of estimates for some target variables was estimated with the help of Sudaan 9.0 software. For other published data the precision is estimated with the help of a model.

Error criteria:

- estimates with the coefficient of variation under 0.10 ($CV \leq 0.10$) are published without limitations;
- estimates with the coefficient of variation between 0.10 and 0.15 ($0.10 < CV \leq 0.15$) are published in single parentheses;
- estimates with the coefficient of variation between 0.15 and 0.30 ($0.15 < CV \leq 0.30$) are published in double parentheses;
- estimates with the coefficient of variation over 0.30 ($CV > 0.30$) are not published, but each one is substituted by a dot.

The user of survey estimates (data) should take into account that estimates published without limitations are sufficiently reliable, while those in parentheses are less reliable.

Totals are not always accurate due to rounding.

In the year 2006 due to the request of our users for absolute data we passed over to publishing absolute estimates. For this reason (wider columns) some of the published labels have been changed.

Definitions and other explanations

Tourism includes the activities of people travelling and staying away from their place of usual environment for at least one day (spending at least one night), but not more than a year (365 days) continuously, for leisure, business or other reasons. Some non-voluntary purposes of trips are excluded by convention: non-voluntary stays in hospital or other medical institutions providing clinical/medical treatment, which is prescribed by doctor, stays in prison, etc.

This is the basic definition adopted by the World Tourism Organisation (WTO) and thus also by our country since Slovenia is a member of this organisation. Definition was also adopted by members of the European Union and it is quoted in regulations concerning tourism statistics.

Tourists are persons who travel to and stay in a place that is not part of their usual environment and who spend at least one night there (but not more than 365 nights consecutively) for leisure, business or other reasons, but not to make profit in the place visited (they are not remunerated).

Običajno okolje osebe sestavljajo neposredna okolica njenega doma in kraja dela ali študija ali drugih krajev, ki jih oseba stalno obiskuje. Oseba ima samo eno "običajno" okolje, zato razna počitniška in podobna bivališča niso del običajnega okolja in se tudi večdnevni odhodi tja, zlasti ob koncu tedna, obravnavajo kot turistična potovanja. Le izjemoma, če so ti odhodi redni (vsak konec tedna v opazovanem obdobju), se običajno okolje lahko razširi tudi na počitniško bivališče in se zato ti odhodi ne uvrščajo med turistična potovanja.

V Anketi o turističnih potovanjih domačega prebivalstva smo spraševali tudi o rednih, vsakotredenskih odhodih vedno v isti kraj. Ta potovanja smo upoštevali v prikazu skupnega števila potovanj, vendar s pogojem, da v referenčnem obdobju anketiranec ni odšel v ta kraj več kot 10-krat, torej ne vsak konec tedna.

Turistična potovanja so vsi odhodi od doma z najmanj 1 prenočitvijo, vendar ne z več kot 365 zaporednimi prenočitvami, in to iz prej navedenih razlogov. Vsako potovanje zajema pot in bivanje. Lahko ima več vmesnih točk postanka, a glavni cilj je le eden. Prav tako je možen le en glavni razlog, in to je tisti, brez katerega tega potovanja ne bi bilo.

Turistična potovanja delimo glede na glavni razlog na:

- poslovna potovanja in
- zasebna potovanja.

Poslovna potovanja so tista, katerih glavni razlog za odhod je poklicne ali študijske narave, npr. kongresi, seminarji, poslovna srečanja, poklicna športna udeležba, zaposlenost v prevoznih dejavnosti, npr. vozniki tovornjakov ipd.

Zasebna potovanja so tista, katerih glavni razlog za odhod na potovanje je:

- preživljanje prostega časa (počitnice, dopust, potovanje),
- obisk sorodnikov in prijateljev (pogrebi, poroke in drugi podobni razlogi) in
- drugi razlogi (neznani).

Pri zasebnih potovanjih zaradi preživljanja prostega časa so se udeleženci lahko odločali za naslednje možne aktivnosti med potovanjem:

- sprostitve, počitek, zabava,
- rekreativne dejavnosti,
- ogled naravnih in kulturnih znamenitosti,
- ogled kulturnih, zabavnih, športnih prirediteljev,
- sodelovanje na kulturnih, zabavnih in športnih prireditvah (neprofesionalno),
- nakupovanje,
- izobraževanje,
- skrb za zdravje, bivanje v zdravilišču,
- romanje in religiozne dejavnosti,
- drugo.

Potovanja, ki **niso uvrščena** med turistična potovanja:

- tedenske migracije ali odhodi na delo ali šolanje,
- sezonsko delo,
- bivanja v bolnišnicah ali zdraviliščih kot podaljšano bolnišnično zdravljenje,
- odhodi v zapor,
- begunstvo in iskanje azila,
- enodnevni izleti brez prenočitve.

Trajanje potovanja se meri v številu prenočitev. Po številu prenočitev delimo potovanja na *krajša* in *daljša*. Na krajših potovanjih je turist prenočil od enkrat do trikrat, na daljših pa najmanj štirikrat.

Usual environment of a person is immediate surroundings of the person's home and place of work or study, or other places that the person regularly visits. Each person has only one "usual" environment, therefore various holiday homes and similar dwellings are not part of the usual environment; even spending several days there, especially during the weekends, is treated as tourism trip. Only exceptionally, if departures are regular - i.e. every weekend in the observed period - the usual environment can be expanded to the holiday home and therefore these departures are not counted as tourism trips.

In the Survey on Tourism Travels of Domestic Population we asked also about regular, weekly departures to the same place. These trips were taken into account in the total number of trips only if the respondent did not go there more than 10 times in the reference period, i.e. not every weekend.

Tourism trip is every departure from home for the above reasons when at least one night is spent but not more than 365 nights consecutively. Every trip covers journey and staying. It can have several stops on the way but there is only one final destination. There is also only one main reason, i.e. the one without which the trip would not take place.

Tourism trips are divided by the main reason into:

- business trips and
- private trips.

Business trips are those the main reason of which is of professional or study nature, e.g. congresses, seminars, business meetings, professional sport participation, employment in transport activity (e.g. lorry drivers), etc.

Private trips are those the main reason of which is:

- leisure time (holidays, travels),
- visiting relatives and friends (funerals, marriages and similar reasons),
- other reasons (unknown).

In private trips for which the reason was leisure the participants could decide among the following activities during the trip:

- relaxation, resting,
- recreation,
- sight-seeing,
- culture, entertainment, sports as spectator,
- culture, entertainment, sports as participant (unprofessional),
- shopping,
- education,
- health reasons,
- pilgrimages, religious events,
- other.

These trips are **not considered** to be tourism trips:

- weekly migration or departure for work or schooling,
- seasonal work,
- staying in hospitals or health resorts as extended hospital treatment,
- departure to prison,
- refugees and asylum seekers,
- one-day trips without spending the night.

Duration of trip is measured with nights spent. With regard to the number of nights spent, we distinguish between *shorter* and *longer* trips. On shorter trips tourists spend 1-3 nights and on longer ones 4 or more nights.

Povprečni izdatki oz. povprečna poraba na turističnih potovanjih zajema potne stroške, nastanitvene stroške, stroške za hrano, pijačo, vstopnine ipd.

V anketi smo spraševali tudi po vrsti glavnega prevoznega sredstva, vrsti prenočitvenih zmogljivosti, datumu odhoda in ali so bila potovanja kakor koli organizirana s pomočjo potovalnih agencij. Pri domačih zasebnih potovanjih smo spraševali, v katerem kraju je anketiranec prenočeval, pri potovanjih v tujino pa po državi, kjer je preživel večino časa. Tako pri poslovnih kot zasebnih potovanjih smo spraševali, koliko denarja so porabili za potovanje.

Anketa o turističnih potovanjih domačega prebivalstva ni namenjena le zbiranju podatkov o potovanjih, temveč odgovarja tudi na vprašanje, zakaj nekateri prebivalci Slovenije ne odhajajo na turistična potovanja. Ti podatki prispevajo k natančnejši socialni sliki prebivalstva.

Bistveni podatki v statistiki turizma so tudi podatki o značilnostih oseb, ki se udeležujejo turističnih potovanj, in o njihovem gospodinjstvu: o stopnji izobrazbe, statusu aktivnosti (med samozaposlene so uvrščeni tudi kmetje), letu rojstva in spolu anketiranca ter številu članov v gospodinjstvu in mesečnem neto dohodku gospodinjstva. Tudi te podatke smo pridobili s to anketo.

Mesečni neto dohodek na člana gospodinjstva je izračunan iz skupnega mesečnega neto dohodka gospodinjstva: plač, pokojnin, dohodkov iz dejavnosti, lastnine, kmetijstva, nadomestil za brezposelnost, štipendij, otroških dodatkov ipd.

Average expenditure on tourism trips comprises travelling expenses, expenses for accommodation, food and beverage, shopping, entrance fees, etc.

In the survey we asked about the main means of transport, type of accommodation, departure date and whether trip was in any way organised with the assistance of travel agencies. In private trips in Slovenia we asked about the locality where the respondents spent the night, while in trips abroad we asked about the country where they spent most of the time. Both for business and private trips we asked about the amount of money spent for the trip.

The aim of the Survey on Tourism Travels of Domestic Population is not only to collect data on travels, but also to answer the question why the people of Slovenia do not go on tourism trips. These data contribute to more accurate social portrait of the population.

The essential data in tourism statistics are also the data on the profile of a tourist. We collected the data on the respondents and their households: level of education, activity status (farmers are counted as self-employed), year of birth and sex of the respondent, the number of household members and monthly net income of the household.

Monthly net income per household member is calculated from the total monthly net income of the household: wages/salaries, pensions, income from activity, property, farming, unemployment benefits, scholarships, child benefit.
