POSLOVNE TENDENCE V GRADBENIŠTVU, SLOVENIJA, MAJ 2006

BUSINESS TENDENCY IN CONSTRUCTION, SLOVENIA, MAY 2006

- Direktorji so poslovne tendence v gradbeništvu ocenili maja 2006 boljše kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila za 4 odstotne točke višja kot pretekli mesec. V primerjavi z istim mesecem lani je bila višja za 5 odstotnih točk in za 5 odstotnih točk je bila višja od povprečja lanskega leta.
- Na rast kazalnika zaupanja je vplivalo zvišanje skupnih naročil.
- Kazalniki stanj so se v primerjavi s preteklim mesecem večinoma izboljšali. Pričakovanja za naslednje tri mesece so ugodna.
- In May 2006, managers estimated business tendencies in construction as being better than in the previous month. The seasonally adjusted value of the confidence indicator rose by 4 percentage points compared to the previous month. Compared to May 2005 it was up by 5 percentage points and 5 percentage points above last year's average.
- The rise of the confidence indicator was influenced by the rise of overall order-books.
- Compared to the previous month, the observed indicators for the appreciation of the situation mostly improved. The expectations for the next three months are favourable.

1. KAZALNIK ZAUPANJA V GRADBENIŠTVU¹⁾ V SLOVENIJI IN EU²⁾, MAREC 2002–MAJ 2006

CONSTRUCTION CONFIDENCE INDICATOR¹⁾ IN SLOVENIA AND EU²⁾, MARCH 2002–MAY 2006

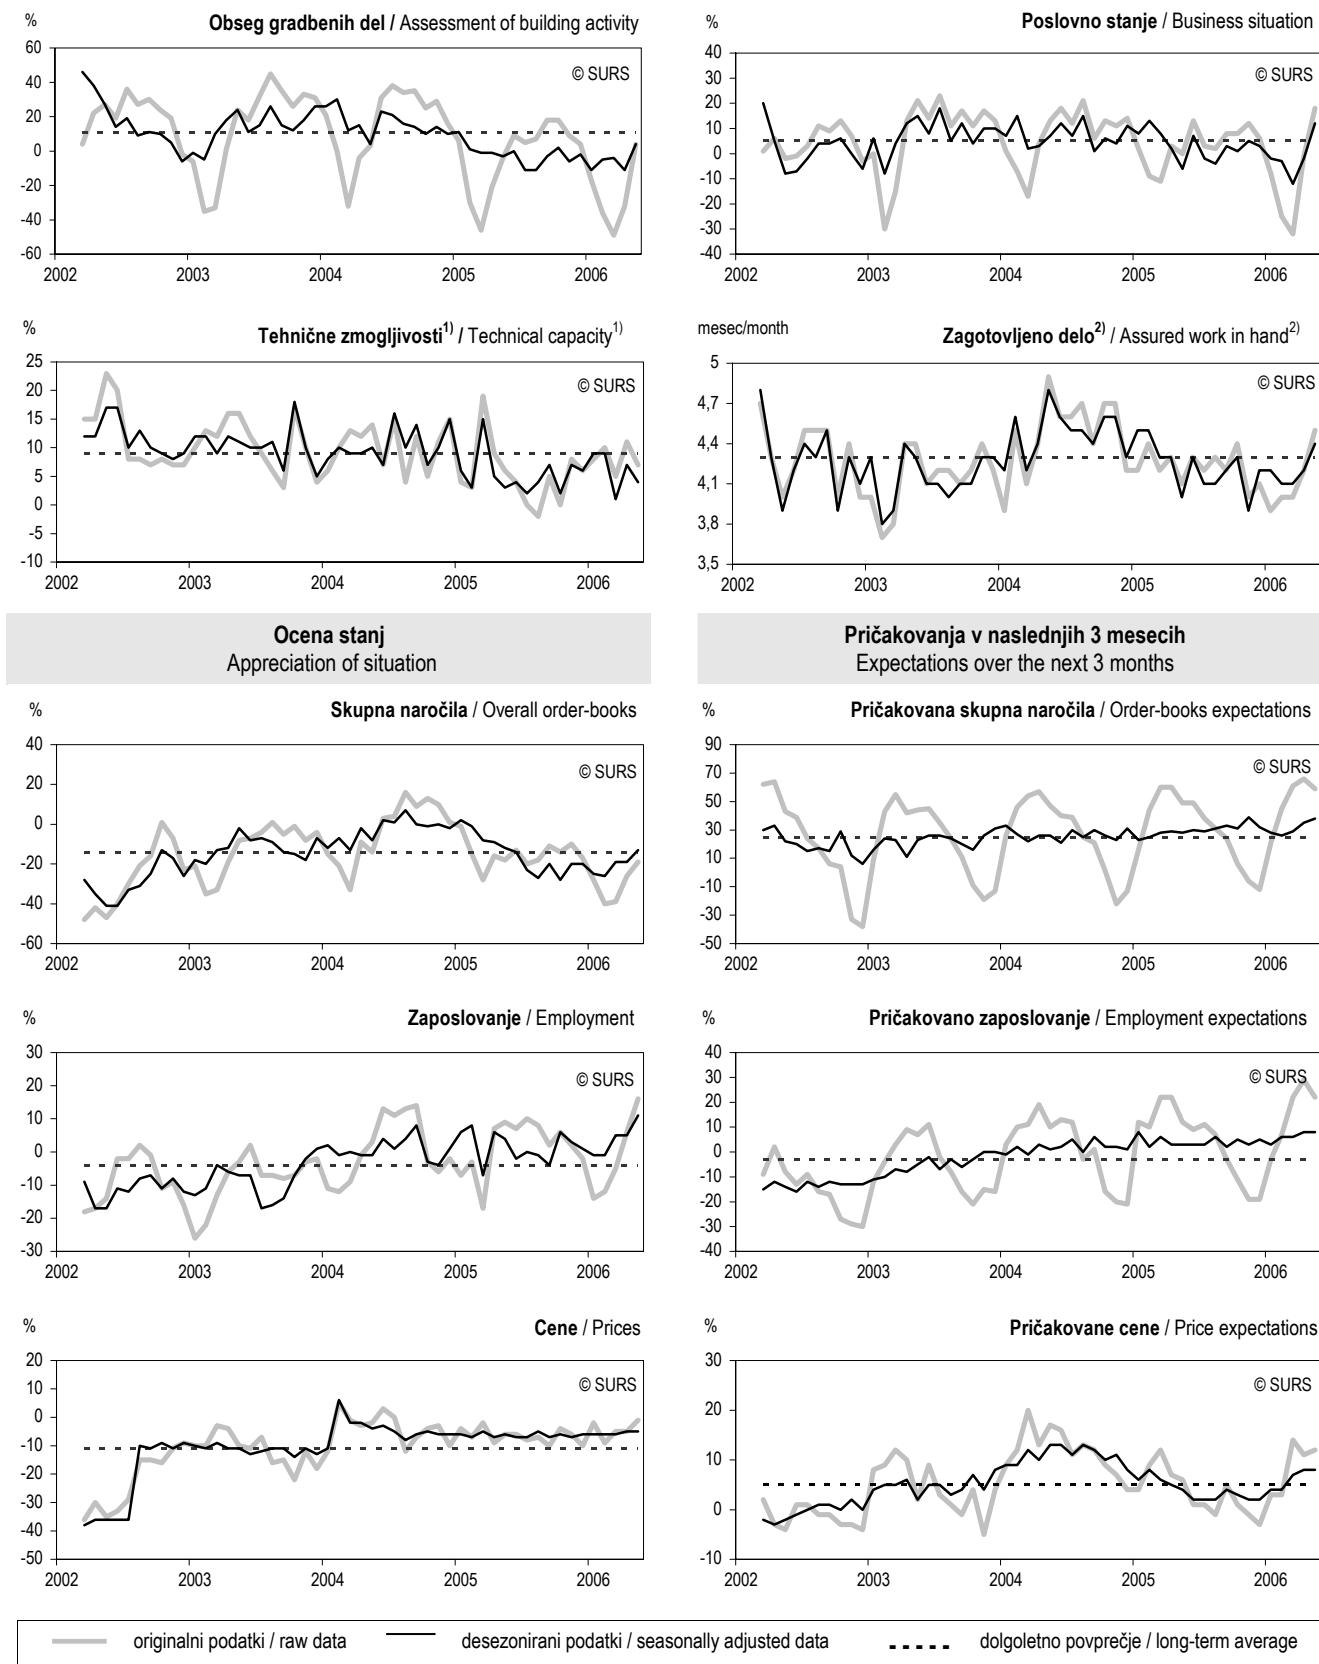

1) Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanem zaposlovanju. Podatki so desezonirani.

The confidence indicator is an average of responses (balances) to questions on overall order-books assessments and employment expectations. Data are seasonally adjusted.

4.1 Gibanje ekonomskega kazalnikov v podjetjih z dejavnostjo gradnja objektov in delov objektov, Slovenija, maj 2005–maj 2006

Evolution of economic indicators in enterprises engaged in construction works, Slovenia, May 2005–May 2006

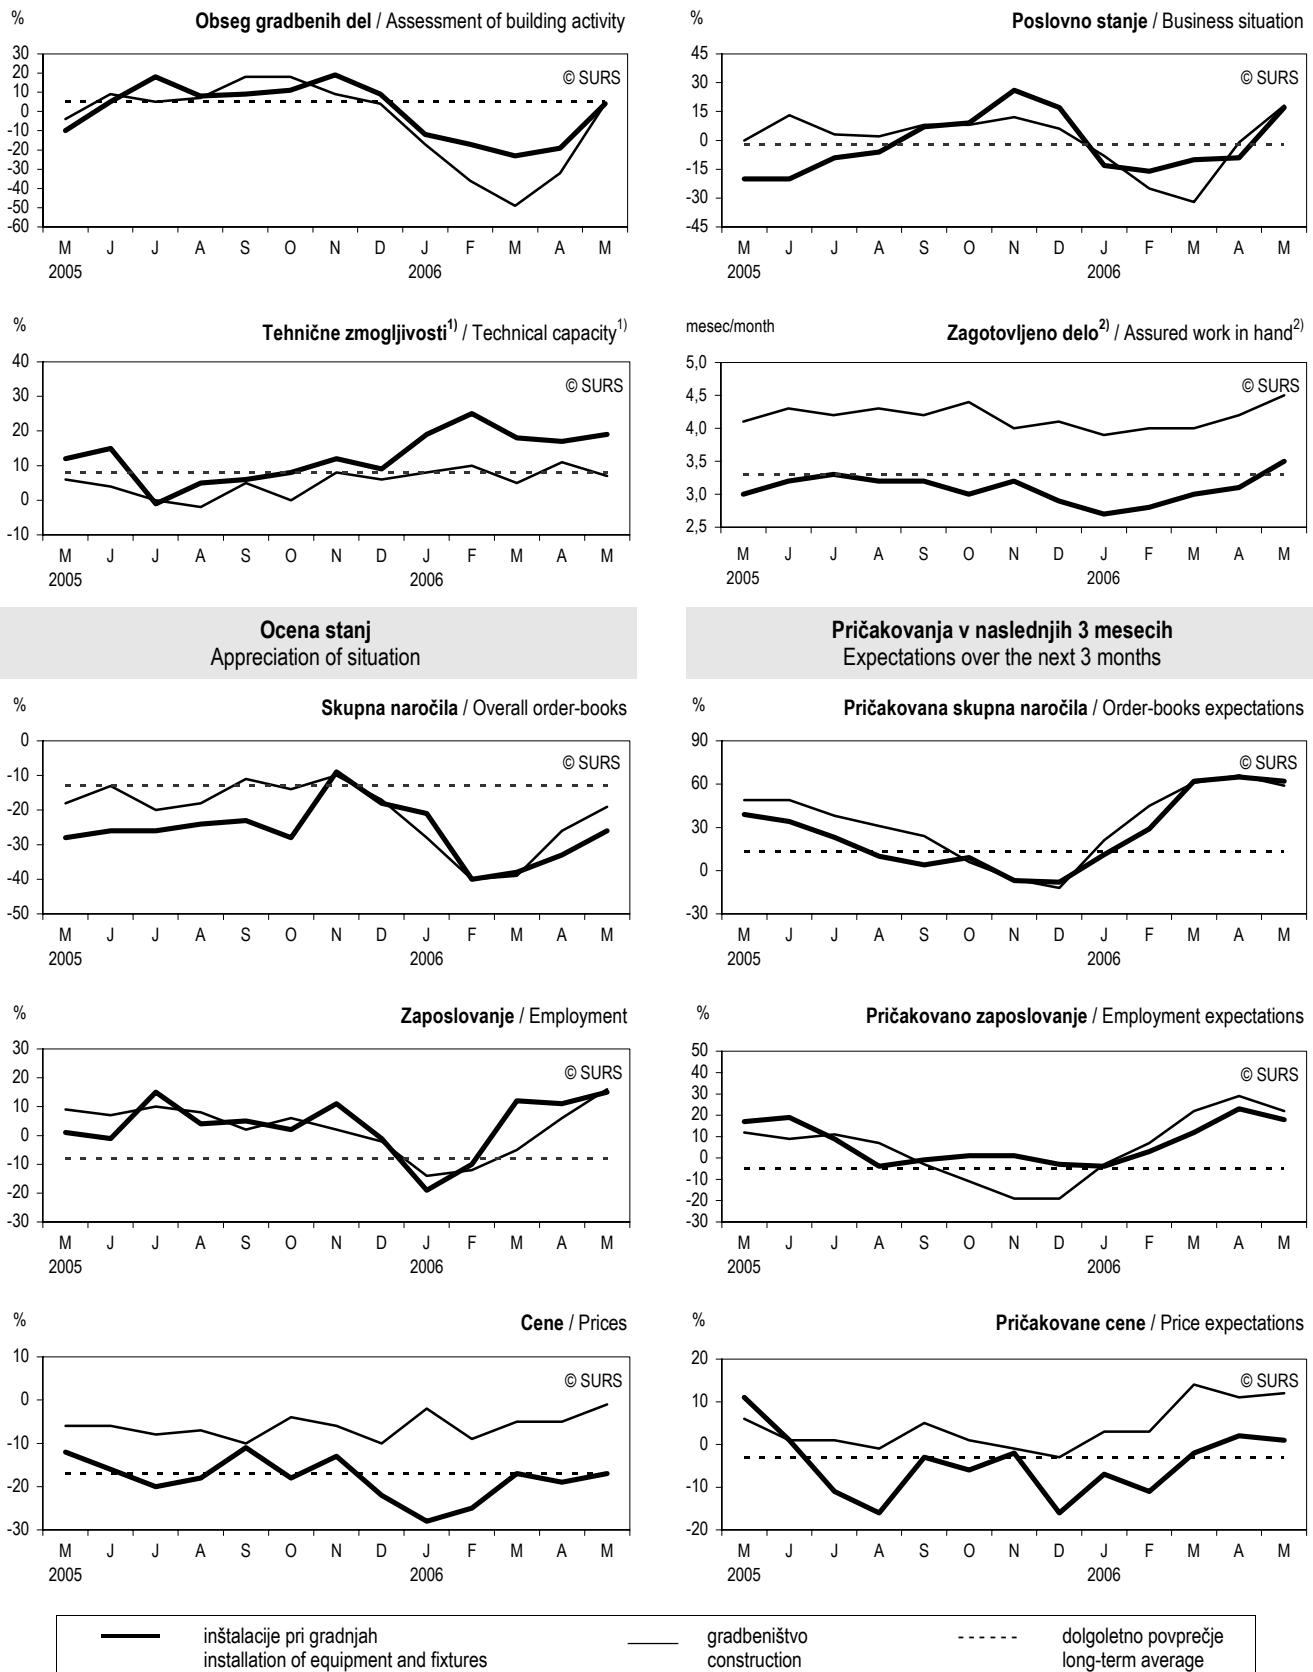

1) Količina in kakovost opreme glede na povpraševanje v naslednjih 12 mesecih. / Amount and quality of equipment regarding expected demand in the next 12 months.

2) Že začeto ali s pogodbami dogovorjeno delo pri običajnih delovnih urah. / With normal working hours, works in progress and contracts in hand.

4.2 Gibanje ekonomskih kazalnikov v podjetjih z dejavnostjo inštalacije pri gradnjah, Slovenija, maj 2005–maj 2006

Evolution of economic indicators in enterprises engaged in installing equipment and fixtures, Slovenia, May 2005–May 2006

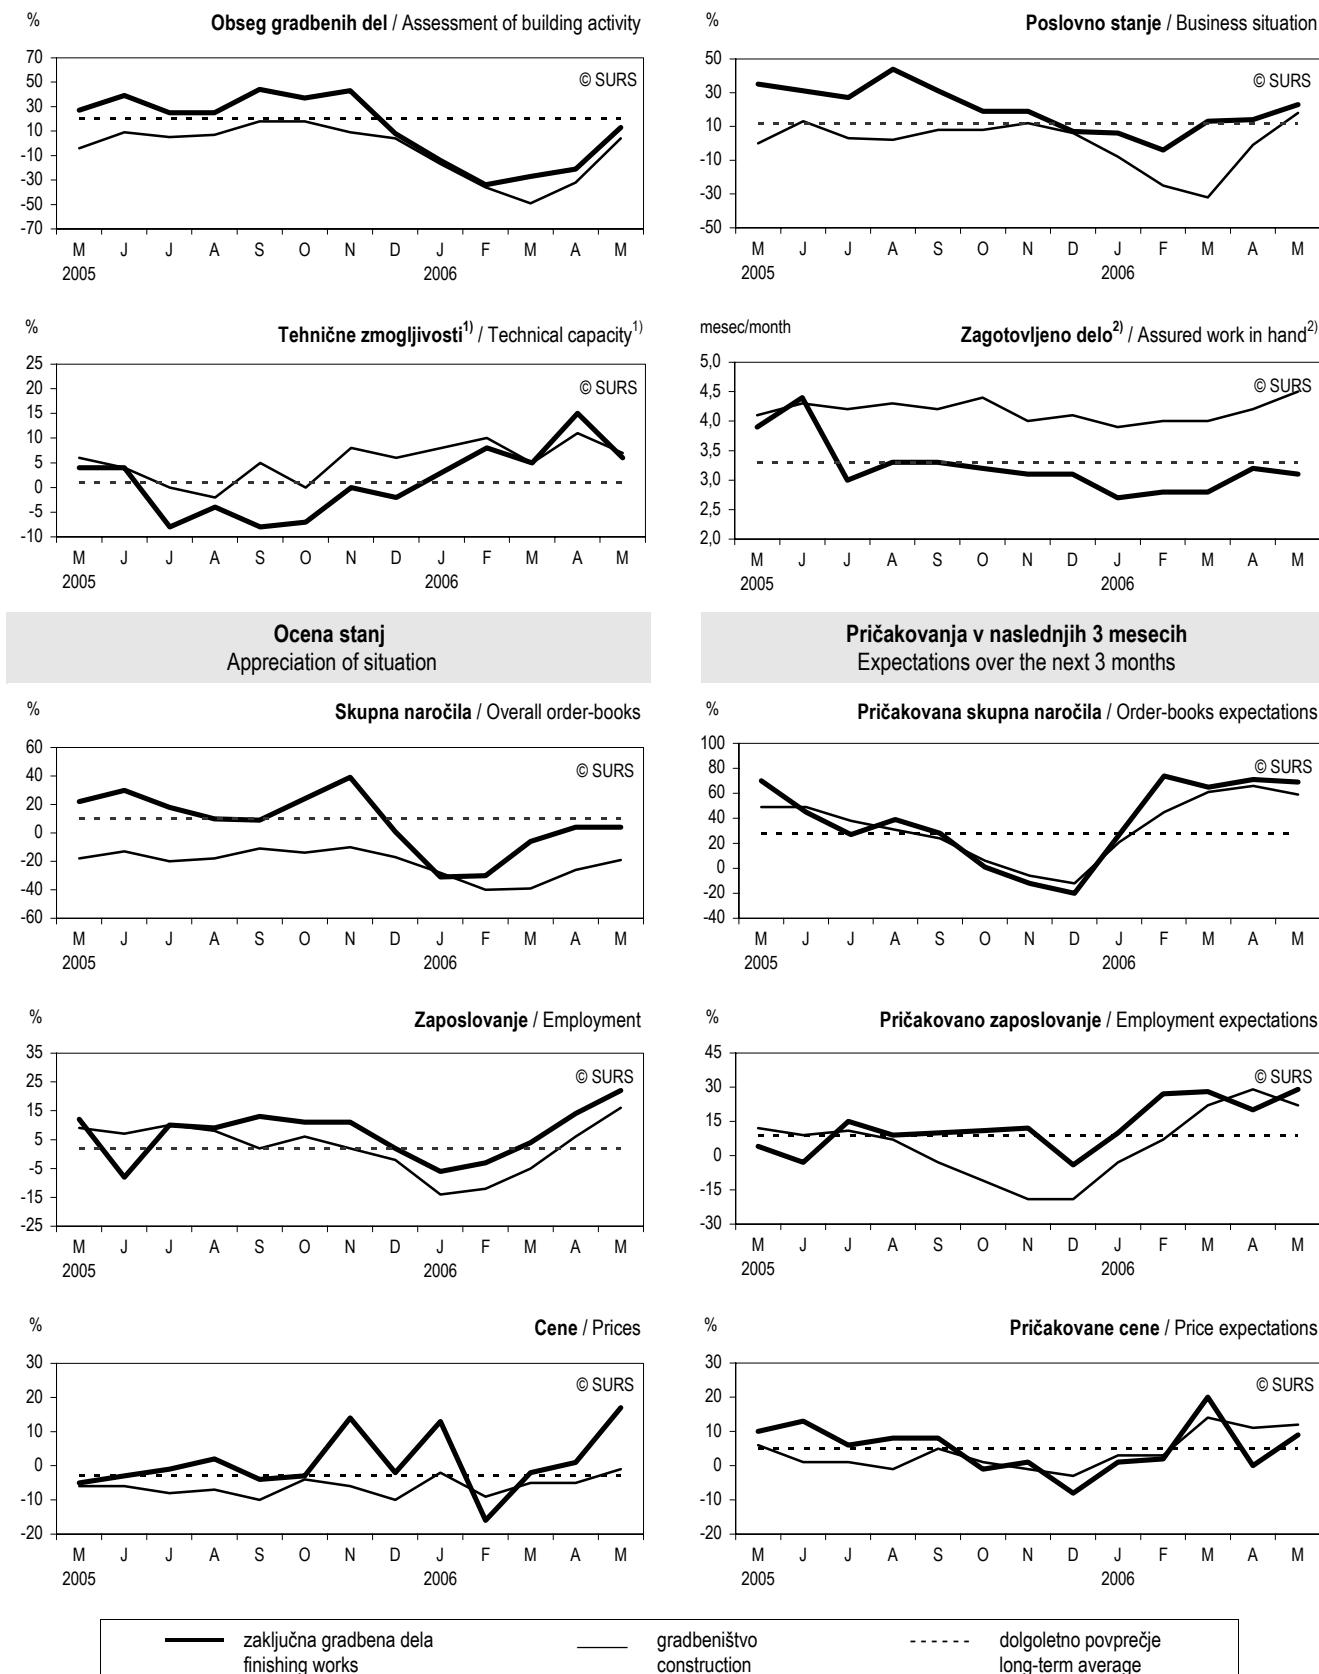

1) Količina in kakovost opreme glede na povpraševanje v naslednjih 12 mesecih. / Amount and quality of equipment regarding expected demand in the next 12 months.

2) Že začeto ali s pogodbami dogovorjeno delo pri običajnih delovnih urah. / With normal working hours, works in progress and contracts in hand.

4.3 Gibanje ekonomskih kazalnikov v podjetjih z dejavnostjo zaključna gradbena dela, Slovenija, maj 2005–maj 2006

Evolution of economic indicators in enterprises engaged in finishing works, Slovenia, May 2005–May 2006

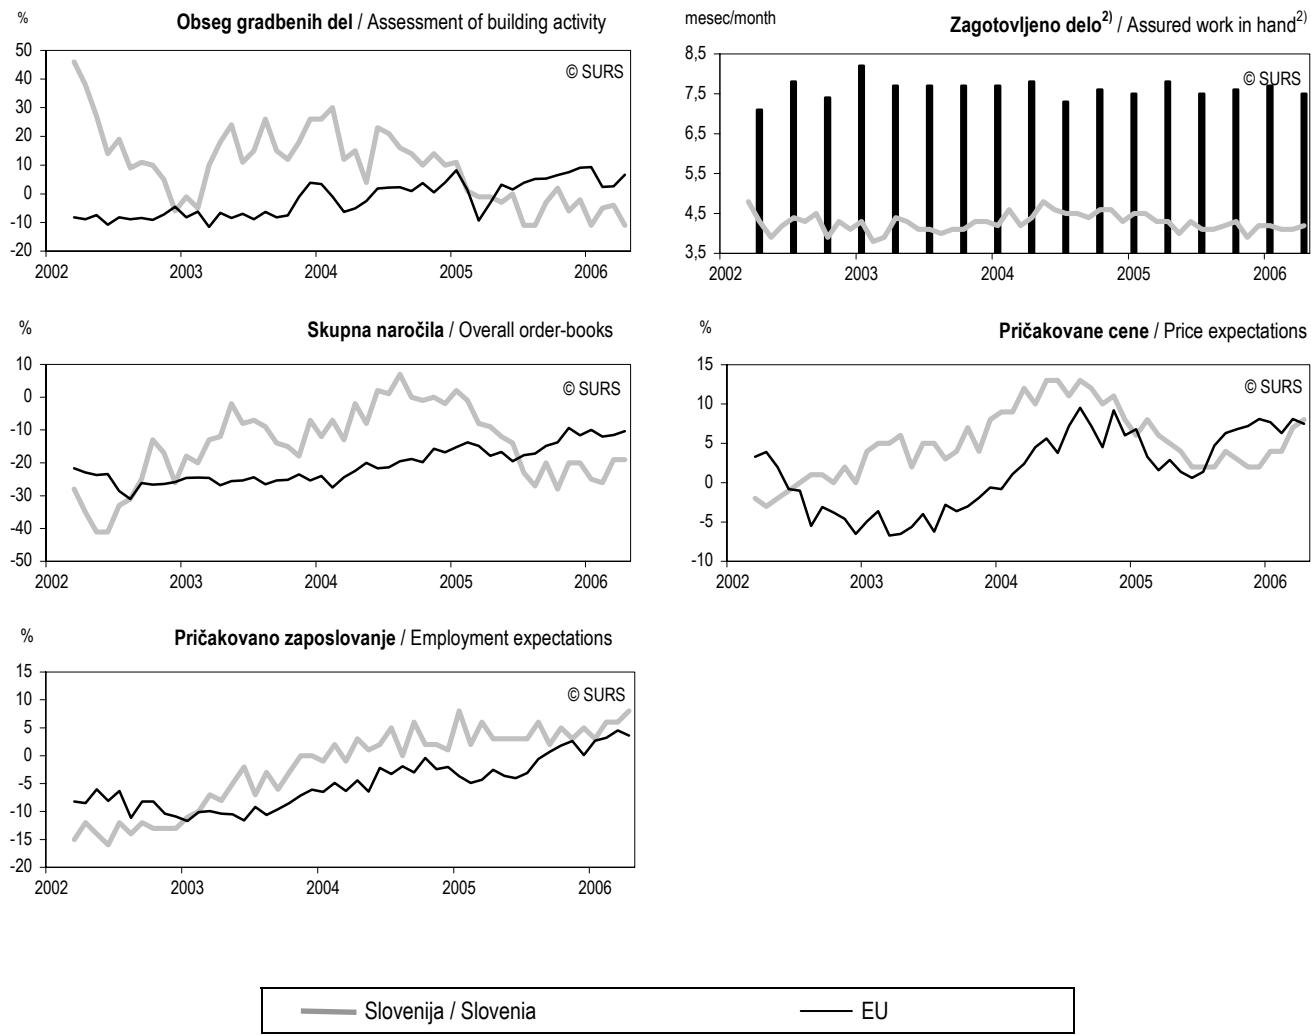

1) Količina in kakovost opreme glede na povpraševanje v naslednjih 12 mesecih. / Amount and quality of equipment regarding expected demand in the next 12 months.

2) Že začeto ali s pogodbami dogovorjeno delo pri običajnih delovnih urah. / With normal working hours, works in progress and contracts in hand.

5. GIBANJE EKONOMSKIH KAZALNIKOV V GRADBENIŠTVU V SLOVENIJI IN EU, MAREC 2002–MAJ 2006¹⁾

EVOLUTION OF ECONOMIC INDICATORS IN CONSTRUCTION IN SLOVENIA AND THE EU, MARCH 2002–MAY 2006¹⁾

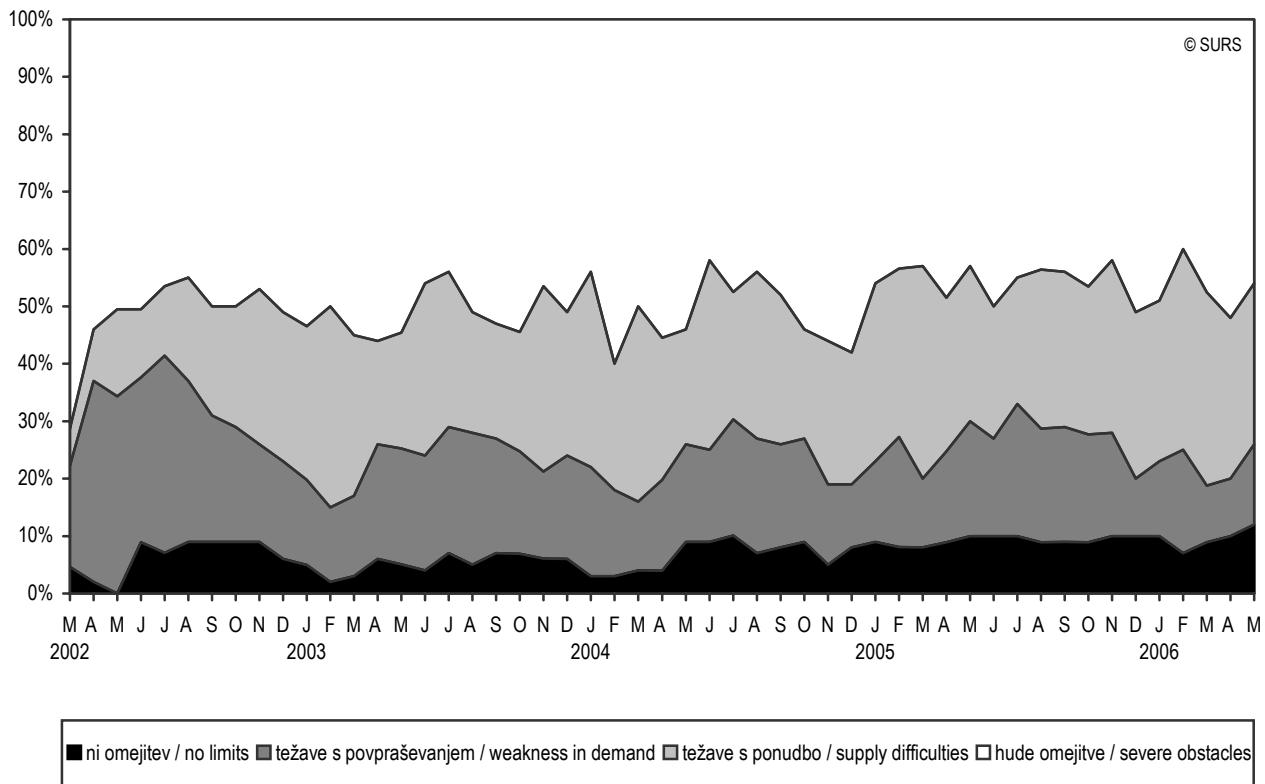

1) Vir / Source: http://europa.eu.int/comm/economy_finance/indicators/businessandconsumersurveys_en.htm. Podatki o EU za zadnji mesec niso na voljo. Podatki so desezonirani. / Data for the EU for the last month are not available. Data are seasonally adjusted.

2) Že začeto ali s pogodbami dogovorjeno delo pri običajnih delovnih urah. Kazalnik opazujejo v EU vsake 3 mesece. / With normal working hours, works in progress and contracts in hand. In the EU the indicator is observed every three months.

6. OMEJITVENI DEJAVNIKI V GRADBENIŠTVU V SLOVENIJI, MAREC 2002–MAJ 2006

FACTORS LIMITING BUILDING ACTIVITY IN SLOVENIA, MARCH 2002–MAY 2006

Graf ponazarja delež zaposlenih v gradbeništvu, ki imajo naslednje skupine težav:

- Skupina "ni omejitev" zajema zaposlene, ki se ne soočajo z omejitvami.
- Skupina "težave s povpraševanjem" zajema zaposlene, ki imajo težave z nezadostnim povpraševanjem in konkurenco v dejavnosti.
- Skupina "težave s ponudbo" zajema zaposlene, ki imajo težave s slabimi vremenskimi pogoji, visokimi finančnimi stroški, visokimi stroški materiala in dela, težave pri pridobivanju kreditov. V to skupino sodijo tudi podjetja, ki imajo težave s pomanjkanjem usposobljenih delavcev, opreme in materialov.
- Skupina "hude omejitve" zajema zaposlene, ki imajo hkrati težave z dejavniki iz skupine "šibko povpraševanje" in z dejavniki iz skupine "težave s preskrbo".

The chart on production obstacles shows the share of employees who are facing the following groups of problems:

- Group "no limits" includes employees with no limits in building activity.
- Group "weakness in demand" includes employees who are facing insufficient demand and competition in own sector.
- Group "supply difficulties" includes employees who are facing bad weather conditions, high cost of finance, materials and/or labour; difficulties with access to bank credits, lack of equipment, and shortage of skilled labour and shortage of materials.
- Group "severe obstacles" includes employees who are facing at the same time problems from the group "weakness in demand" and those from the group "supply difficulties".

METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah v gradbeništvu (PA-GRAD/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalnika zaupanja v gradbeništvu.

Anketo o poslovnih tendencah v gradbeništvu izvajamo v Sloveniji od marca 2002 s poenot enim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

ENOTE OPAZOVANJA

Opazujemo podjetja, ki so razvrščena v gradbeništvo, to je v oddelku 45 Standardne klasifikacije dejavnosti (SKD), in imajo 11 zaposlenih ali več ter so bila izbrana na podlagi dveh meril, in sicer:

- velikosti (število zaposlenih, skladno z zakonom o gospodarskih družbah) in
- razvrstitev podjetja po SKD.

VIRI

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu.

ZAJETJE

V anketo smo zajeli vsa velika in srednje velika podjetja in 75 % malih podjetij (ali 74 % zaposlenih). Panelni vzorec pokriva 82 % podjetij vzorčnega okvira ali 93 % zaposlenih v gradbeništvu.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj oddelkov SKD so odgovori uteženi s številom zaposlenih.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo; delež neodgovorov se giblje med 5 in 10 % (povprečno 8 %).

DEFINICIJE

Grafikoni prikazujejo ravnotežja po posameznih vprašanjih. **Ravnotežje** je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalnikov.

Ko so prikazane daljše časovne vrste podatkov ali primerjave kazalnikov z EU-jem, so vrednosti **desezonirane**. To so

METHODOLOGICAL EXPLANATIONS

PURPOSE OF STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency in Construction (hereinafter: PA-GRAD/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the construction confidence indicator.

We have been carrying out the Survey on Business Tendency in Construction in Slovenia since March 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in construction – division 45 of the Standard Classification of Activities (SKD) and have 11 or more employees. They were selected by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act),
- classification of the enterprise according to the SKD.

SOURCES

Respondents to the monthly questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th in the month.

COVERAGE

The panel includes all large and medium-sized enterprises and 75% of small enterprises (or 74% of employees). The panel covers 82% of the enterprises of the studied population or 93% of employees in construction.

METHOD OF DATA COLLECTING

The survey is carried out monthly by mail.

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect relative importance of individual enterprise in the panel. Inside divisions of Standard Classification of Activities (SKD) responses are weighted with the number of employees.

NON-RESPONSES

Non-responses are processed every month in accordance with the harmonised methodology and vary between 5 and 10% (8% on average).

DEFINITIONS

The charts show the balance by individual questions. The **balance** is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

In the charts with longer time series or by comparisons with EU indicators, data are **seasonally adjusted**. Values are adjusted for

vrednosti, pri katerih je izključen vpliv sezone, vsebujejo pa trend-cikel in naključno komponento. Podatki za EU so desezonirani z metodo DAIINTIES, za Slovenijo pa z metodo TRAMO/SEATS, ki temelji na modelih ARIMA. Pri oblikovanju modelov je upoštevano časovno obdobje od marca 2002 do januarja 2006.

Kazalnik zaupanja v gradbeništvu je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanim zaposlovanju.

OBJAVLJANJE PODATKOV

Sodelujoči v anketi prejmejo informacijo o gradbeništvu kot celoti, o oddelku SKD, v katerega se po dejavnosti razvrščajo in glede na vrsto gradnje, vendar le, če so izpolnili vprašalnik za tekoči mesec.

Ostalim uporabnikom so dostopni podatki na ravni gradbeništva in njegovih skupin ter podatki glede na vrsto gradnje. Slednji so mesečno objavljeni v Statističnih informacijah – Poslovne tendence v gradbeništvu in v podatkovni bazi SI-STAT na naslovu <http://www.stat.si>.

VPRAŠANJA:

- Obseg gradbenih del v zadnjih 3 mesecih: večji, enak, manjši?
- Dejavniki, ki omejujejo gradbeno dejavnost: ni omejitve, nezadostno povpraševanje, slabi vremenski pogoji, visoki stroški materiala, visoki stroški dela, visoki finančni stroški, težave pri pridobivanju kreditov, pomanjkanje usposobljenih delavcev, pomanjkanje opreme, pomanjkanje materialov, velika konkurenca v dejavnosti, ostalo?
- Sedanja naročila v tujini: višja kot normalna, normalna, nižja kot normalna?
- Sedanja domača naročila: višja kot normalna, normalna, nižja kot normalna?
- Sedanja skupna naročila: višja kot normalna, normalna, nižja kot normalna?
- Pričakovana naročila v naslednjih 3 mesecih: zrasla, ostala nespremenjena, padla?
- Zaposlovanje v zadnjem mesecu: povečalo, ostalo enako, zmanjšalo?
- Pričakovano zaposlovanje v naslednjih 3 mesecih: povečalo, ostalo enako, zmanjšalo?
- Cene so se: zvišale, ostale enake, znižale?
- Pričakovane cene v naslednjih 3 mesecih: naraščale, ostale enake, padale?
- Tehnične zmogljivosti glede na povpraševanje v naslednjih 12 mesecih: več kot zadostne, zadostne, nezadostne?
- Pri običajnih delovnih urah že začeto ali s pogodbami zagotovljeno dela za: ... mesecev?
- Poslovno stanje v primerjavi s preteklim mesecem: boljše, enako, slabše?

the seasonal component, but include the trend-cycle component and the irregular component. Data for EU are seasonally adjusted by the DAIINTIES method and for Slovenia by the TRAMO/SEATS method, which is based on ARIMA models. The designing of the models is based on the time period from March 2002 to January 2006.

Confidence indicator in construction is defined as the arithmetic mean of the answers (balances) to the questions on order-books assessments and employment expectations.

PUBLISHING

Persons participating in the survey get information for construction, division in which they are classified and for the type of construction. They get it only if they responded in the current month.

Other users can get data for construction and its groups, size of enterprises and type of construction. Data are published in the Rapid Reports – Business Tendency in Construction and in the SI-STAT database which is available at <http://www.stat.si/eng>.

QUESTIONS:

- Building activity over the past 3 months: increased, remained unchanged, decreased?
- Factors limiting building activity: none, insufficient demand, bad weather conditions, high cost of material, high cost of labour, high cost of capital, access to bank credit, shortage of skilled labour, shortage of equipment, shortage of material, competition in own sector, other?
- Assessment of foreign order books: above normal, normal, below normal?
- Assessment of domestic order books: above normal, normal, below normal?
- Assessment of overall order books: above normal, normal, below normal?
- Expected order books over the next 3 months: increase, remain unchanged, decrease?
- Assessment of employment: increased, remained unchanged, decreased?
- Employment expectations over the next 3 months: increase, remain unchanged, decrease?
- Assessment of prices: increased, remained unchanged, decreased?
- Expected prices over the next 3 months: increase, remain unchanged, decrease?
- Technical capacity regarding expected demand in the next 12 months: more than sufficient, sufficient, not sufficient?
- With normal working hours, the work in hand and work already contracted for ... months?
- Business situation compared to the previous month: better, the same, worse?

KOMENTAR

Maja 2006 so direktorji poslovne tendence v gradbeništvu ponovno ocenili boljše kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila za 4 odstotne točke višja kot pretekli mesec. V primerjavi z istim mesecem lani je bila višja za 5 odstotnih točk in je bila 5 odstotnih točk nad povprečjem lanskega leta.

POSLOVNO STANJE

Desezonirana vrednost kazalnika poslovno stanje je bila v primerjavi s preteklim mesecem višja za 14 odstotnih točk. V primerjavi z istim mesecem lani je bila višja za 18 odstotnih točk in za 9 odstotnih točk je bila višja od lanskega povprečja.

OBSEG GRADBENIH DEL

Desezonirana vrednost kazalnika obseg gradbenih del je bila v primerjavi s preteklim mesecem višja za 15 odstotnih točk. Glede na isti mesec lani je bila višja za 8 odstotnih točk in za 6 odstotnih točk je bila višja od povprečja lanskega leta.

SKUPNA NAROČILA IN PRIČAKOVANA SKUPNA NAROČILA

Desezonirana vrednost kazalnika skupna naročila se je v primerjavi s preteklim mesecem zvišala za 6 odstotnih točk. Glede na isti mesec lani je bila nižja za 1 odstotno točko in za 2 odstotni točki je bila višja od lanskega povprečja.

Desezonirana vrednost kazalnika pričakovana skupna naročila za naslednje tri mesece se je v primerjavi s preteklim mesecem zvišala za 3 odstotne točke. Glede na isti mesec lani je bila višja za 10 odstotnih točk in za 8 odstotnih točk je bila višja od povprečja lanskega leta.

ZAPOSLOVANJE IN PRIČAKOVANO ZAPOSLOVANJE

Desezonirana vrednost kazalnika zaposlovanje se je v primerjavi s preteklim mesecem zvišala za 6 odstotnih točk. V primerjavi z istim mesecem lani je bila višja za 7 odstotnih točk in za 9 odstotnih točk je bila višja od povprečja lanskega leta.

Desezonirana vrednost kazalnika pričakovano zaposlovanje je ostala enaka kot pretekli mesec. Glede na isti mesec lani je bila višja za 10 odstotnih točk in za 4 odstotne točke je bila višja od lanskega povprečja.

CENE IN CENOVNA PRIČAKOVANJA

Desezonirana vrednost kazalnika cene je ostala enaka v primerjavi s preteklim mesecem. Glede na isti mesec lani je bila višja za 5 odstotnih točk in za 1 odstotno točko višja od povprečja lanskega leta.

Desezonirana vrednost kazalnika cenovna pričakovanja za naslednje tri mesece je ostala v primerjavi s preteklim mesecem enaka. Glede na isti mesec lani je bila višja za 6 odstotnih točk in za 4 odstotne točke je bila višja od povprečja lanskega leta.

TEHNIČNE ZMOGLJIVOSTI

Desezonirana vrednost kazalnika tehnične zmogljivosti vključuje oceno količine in kakovosti opreme glede na povpraševanje v naslednjih 12 mesecih.

Desezonirana vrednost kazalnika se je v primerjavi s preteklim mesecem znižala za 3 odstotne točke. Glede na isti mesec lani je bila višja za 1 odstotno točko in 1 odstotno točko je bila nižja od lanskega povprečja.

ZAGOTOVLJENO DELO

Desezonirana vrednost kazalnika zagotovljeno delo temelji na oceni števila mesecev, za katere je delo zagotovljeno s pogodbami.

COMMENT

In May 2006, managers estimated business tendencies in construction as being better than in the previous month. The seasonally adjusted value of the confidence indicator rose by 4 percentage points compared to the previous month. Compared to May 2005 it was up by 5 percentage points and was 5 percentage points above last year's average.

BUSINESS SITUATION

The seasonally adjusted value of the business situation indicator rose by 14 percentage points compared to the previous month. Compared to May 2005 it was up by 18 percentage points and compared to last year's average by 9 percentage points.

BUILDING ACTIVITY

The seasonally adjusted value of the building activity indicator rose by 15 percentage points compared to the previous month. Compared to May 2005 and last year's average it was up by 8 and 6 percentage points respectively.

OVERALL ORDER-BOOKS AND EXPECTED ORDER-BOOKS

The seasonally adjusted value of the overall order-books indicator rose by 6 percentage points compared to the previous month. Compared to May 2005 it was down by 1 percentage point and compared to last year's average it was up by 2 percentage points.

The seasonally adjusted value of the expected order-books for the next three months rose by 3 percentage points compared to the previous month. Compared to May 2005 it was up by 10 percentage points and compared to last year's average it was up by 8 percentage points.

EMPLOYMENT AND EMPLOYMENT EXPECTATIONS

The seasonally adjusted value of the employment indicator rose by 6 percentage points compared to the previous month. Compared to May 2005 it was up by 7 percentage points and compared to last year's average it was up by 9 percentage points.

The seasonally adjusted value of the expected employment indicator remained the same as in the previous month. Compared to May 2005 it was up by 10 percentage points and compared to last year's average by 4 percentage points.

PRICES AND PRICE EXPECTATIONS

The seasonally adjusted value of the prices indicator remained the same as in the previous month. Compared to May 2005 it was up by 5 percentage points and was 1 percentage point above last year's average.

The seasonally adjusted value of the price expectations indicator for the next three months remained the same as in the previous month. Compared to May 2005 it was up by 6 percentage points and 4 percentage points above last year's average.

TECHNICAL CAPACITY

The seasonally adjusted value of the technical capacity indicator includes the evaluation of the quantity and quality of equipment regarding expected demand in the next 12 months.

The seasonally adjusted value of this indicator was down by 3 percentage points compared to the previous month. Compared to May 2005 it was up by 1 percentage point and 1 percentage point below last year's average.

ASSURED WORK IN HAND

The value of the assured work indicator includes the evaluation of the number of months for which work is assured by contracts.

V maju so imela podjetja s pogodbami zagotovljeno delo v povprečju za 4,4 meseca. To je za 0,4 meseca več kot v istem mesecu lani in za 0,2 meseca več od povprečja lanskega leta.

OMEJITVENI DEJAVNIKI

Med omejitvenimi dejavniki v gradbeništvu so prevladovali dejavniki iz skupine hude omejitve. V tem mesecu se je z njimi spopadalo 46 % zaposlenih (oziroma 36 % podjetij).

Sledili so omejitveni dejavniki iz skupine težave s ponudbo. V tem mesecu se je z njimi srečevalo 28 % zaposlenih (oziroma 38 % podjetij).

Z dejavniki iz skupine šibko povpraševanje se je v tem mesecu srečalo 14 % zaposlenih (oziroma 14 % podjetij).

Kar 12 % zaposlenih (oziroma 12 % podjetij) v tem mesecu ni imelo omejitev, kar je najvišja vrednost v celotnem opazovanem obdobju.

Podrobnejši pregled omejitvenih dejavnikov v gradbeništvu v tem mesecu pokaže naslednje¹⁾:

- 43 % podjetij (ali 56 % zaposlenih) je omejevala velika konkurenca v dejavnosti;
- 34 % podjetij (ali 29 % zaposlenih) je omejevalo pomanjkanje usposobljenih delavcev;
- 29 % podjetij (ali 28 % zaposlenih) so omejevale slabe vremenske razmere;
- 29 % podjetij (ali 37 % zaposlenih) so omejevali visoki stroški dela;
- 23 % podjetij (ali 28 % zaposlenih) so omejevali visoki stroški materiala;
- 15 % podjetij (ali 21 % zaposlenih) je omejevalo nezadostno povpraševanje;
- 14 % podjetij (ali 11 % zaposlenih) so omejevali visoki finančni stroški;
- 10 % podjetij (ali 7 % zaposlenih) so omejevali drugi dejavniki;
- 6 % podjetij (ali 4 % zaposlenih) so omejevale težave pri pridobivanju kreditov;
- 3 % podjetij (ali 2 % zaposlenih) je omejevalo pomanjkanje opreme;
- 1 % podjetij (ali 0 % zaposlenih) je omejevalo pomanjkanje materialov.

Največja omejitev v gradbeništvu so velika konkurenca v dejavnosti, sledijo pomanjkanje usposobljenih delavcev, slabe vremenske razmere in visoki stroški dela.

Statistično raziskovanje je sofinancirala Evropska komisija. Za objavljene podatke in besedila je odgovoren izključno Statistični urad Republike Slovenije, in ne Evropska komisija.

1) Podjetja lahko označijo več dejavnikov, ki omejujejo njihovo dejavnost, zato vsota odstotkov ni 100.
Enterprises can select several factors limiting their business, so the total is not 100%.

In May 2006, enterprises had work assured for 4.4 months on average, which is 0.4 month more than in May 2005 and 0.2 month more than last year's average.

LIMITING FACTORS

Among factors limiting building activity, severe obstacles prevailed. In May 2006, 46% of employees (36% of enterprises) were faced with them.

The second most important obstacles were supply difficulties. In May 2006, 28% of employees (38% of enterprises) faced them.

The third most important obstacles were demand difficulties. In May 2006, 14% of employees (14% of enterprises) faced them.

As many as 12% of employees (12% of enterprises) experienced no obstacles in May 2006, which is the highest percentage ever.

A more detailed overview of factors limiting building activity shows that in this month¹⁾:

- 43% of enterprises (or 56% of employees) were limited by competition in own sector;
- 34% of enterprises (or 29% of employees) were limited by shortage of skilled labour;
- 29% of enterprises (or 28% of employees) were limited by bad weather conditions;
- 29% of enterprises (or 37% of employees) were limited by high costs of labour;
- 23% of enterprises (or 28% of employees) were limited by high costs of material;
- 15% of enterprises (or 21% of employees) were limited by insufficient demand;
- 14% of enterprises (or 11% of employees) were limited by high costs of capital;
- 10% of enterprises (or 7% of employees) were limited by other factors;
- 6% of enterprises (or 4% of employees) were limited by access to bank credits;
- 3% of enterprises (or 2% of employees) were limited by lack of equipment;
- 1% of enterprises (or 0% of employees) were limited by shortage of material.

The most important factor limiting building activity is competition in own sector, followed by shortage of skilled labour, bad weather conditions and high costs of labour.
