

POSLOVNE TENDENCE V TRGOVINI NA DROBNO, SLOVENIJA, APRIL 2006

BUSINESS TENDENCY IN RETAIL TRADE, SLOVENIA, APRIL 2006

- ▶ Desezonirana vrednost kazalnika zaupanja v trgovini na drobno je bila za 1 odstotno točko višja od vrednosti v preteklem mesecu. V primerjavi z lanskim aprilom je bila višja za 4 odstotne točke in za 3 odstotne točke je bila višja od lanskega povprečja.
- ▶ Na rast vrednosti kazalnika zaupanja so vplivale vse tri komponente kazalnika: poslovni položaj, obseg zalog in pričakovani poslovni položaj.
- ▶ Kazalniki stanj in pričakovanj so se v primerjavi s preteklim mesecem večinoma izboljšali (razen naslednjih kazalnikov: obseg zalog, prodajne cene, raven prodaje in pričakovane prodajne cene).
- ▶ The seasonally adjusted retail trade confidence indicator increased by 1 percentage point in comparison with the previous month. Compared to April 2005 and last year's average it was up by 4 and 3 percentage points, respectively.
- ▶ This increase of the indicator was influenced by all three components: business situation, volume of stocks and expected business situation.
- ▶ The observed indicators for appreciation of the situation and expectations mainly increased compared to the previous month (except the following indicators: volume of stocks, selling prices, level of sales and selling prices expectations).

1. KAZALNIK ZAUPANJA¹⁾ V SLOVENIJI IN EU²⁾ JANUAR 1999 – APRIL 2006
CONFIDENCE INDICATOR¹⁾ IN SLOVENIA AND EU²⁾ JANUARY 1999 – APRIL 2006

1) Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanja o sedanjem in pričakovanem poslovnem položaju ter sedanjem obsegu zalog (obrnjen predznak). The confidence indicator is an average of responses (balances) to questions on present and expected business situation and present volume of stocks (the latter with inverted sign).

2) Vir podatkov je Evropska komisija (http://europa.eu.int/comm/economy_finance/indicators/businessandconsumersurveys_en.htm). Podatki o EU za zadnji mesec niso na voljo. The source for EU data is the European Commission (http://europa.eu.int/comm/economy_finance/indicators/businessandconsumersurveys_en.htm). Data for the EU for the last month are not available.

2. GIBANJE EKONOMSKIH KAZALNIKOV V TRGOVINI NA DROBNO V SLOVENIJI, JANUAR 1999 - APRIL 2006

Omejitveni dejavniki v trgovini na drobno / Obstacles in retail trade

■ ni omejitev / no limits ■ težave s povpraševanjem / demand difficulties ■ težave s ponudbo / supply difficulties □ hude omejitve / severe obstacles

Grafikon o omejitvah v trgovini na drobno prikazuje deleže podjetij, ki se soočajo z naslednjimi skupinami omejitev:

- Skupina "ni omejitev" zajema podjetja, ki nimajo težav pri prodaji.
- Skupina "težave s povpraševanjem" zajema podjetja, ki imajo težave z nizkim povpraševanjem in konkurenco v sektorju.
- Skupina "težave s ponudbo" zajema podjetja, ki imajo težave s slabo ponudbo, visokimi stroški dela, visoko ceno denarja, težavami z dostopnostjo do bančnih posojil, premajhno prodajno površino in premajhnimi skladiščnimi prostori.
- Skupina "hude omejitve" zajema podjetja, ki imajo hkrati težave z dejavniki iz skupine "težave s povpraševanjem" kot tudi z dejavniki iz skupine "težave s ponudbo".

The chart on retail trade obstacles shows the share of enterprises faced with the following groups of problems:

- Group "no limits" includes enterprises with no limits to retail.
- Group "demand difficulties" includes enterprises faced with low demand and competition in own sector.
- Group "supply difficulties" includes enterprises faced with bad supply, high cost of labour, high cost of finance, problems with access to bank credits, small sales surface and small storage capacity.
- Group "severe obstacles" includes enterprises faced with problems from the group "demand difficulties" and those from the group "supply difficulties" at the same time.

3. GIBANJE EKONOMSKIH KAZALNIKOV V TRGOVINI NA DROBNO V SLOVENIJI IN EU¹⁾, JANUAR 1999–APRIL 2006 EVOLUTION OF ECONOMIC INDICATORS IN RETAIL TRADE IN SLOVENIA AND EU¹⁾, JANUARY 1999 – APRIL 2006

METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah v trgovini na drobno (vprašalnik PA-TRG) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalnika zaupanja v trgovini na drobno in kazalnika gospodarske klime, ki vključuje poleg kazalnika zaupanja v trgovini na drobno tudi kazalnik zaupanja pri potrošnikih in kazalnik zaupanja v predelovalnih dejavnostih.

Panelno anketo o poslovnih tendencah v trgovini na drobno izvajamo v Sloveniji od januarja 1999 s poenotenim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kakor jo izvajajo v državah članicah Evropske unije že več desetletij, kar omogoča neposredno primerljivost podatkov.

ENOTA OPAZOVANJA

Opazujemo podjetja, ki so po Standardni klasifikaciji dejavnosti (2002) razvrščena v trgovino na drobno, in sicer v naslednja oddelka:

- 50 - Prodaja, vzdrževanje in popravila motornih vozil, trgovina na drobno z motornimi gorivi,
- 52 - Trgovina na drobno, razen z motornimi vozili, popravila izdelkov široke porabe.

Vzorec podjetij je oblikovan na podlagi dveh meril:

- razvrstitve trgovskega podjetja po SKD-ju in
- velikosti trgovskega podjetja (prihodek, skladno z zakonom o gospodarskih družbah).

VIRI

Na vprašalnik PA - TRG odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu.

ZAJETJE

V panelni vzorec smo zajeli vsa velika in srednje velika podjetja ter 36 % malih podjetij (ali 42 % prihodka malih podjetij), ki so razvrščena v dejavnost trgovine na drobno ali trgovine z motornimi vozili. Opisani panelni vzorec pokriva 48 % podjetij vzorčnega okvira ali 95 % prihodka v trgovini na drobno in trgovine z motornimi vozili.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj razredov SKD so odgovori uteženi s prihodkom.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo.

DEFINICIJE IN POJASNILA

Ravnotežje je razlika med pozitivnimi in negativnimi odgovori, izraženimi v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih kazalnikov (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalnikov. Grafikoni prikazujejo ravnotežja po posameznih vprašanjih.

METHODOLOGICAL EXPLANATIONS

PURPOSE OF THE STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency (questionnaire PA-TRG) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the confidence indicator in retail trade and latter on also for the sentiment indicator, which also includes the consumer confidence indicator and the confidence indicator in manufacturing.

The Panel Survey on Business Tendency in Retail Trade is being carried out in Slovenia since January 1999 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in the Standard Classification of Activities (SKD, 2002) in retail trade or sale of motor vehicles in the following divisions:

- 50 - Sale, maintenance and repair of motor vehicles, retail sale of motor fuel
- 52 - Retail trade, except of motor vehicles, repair of personal and household goods

They were selected into the panel by two criteria:

- the classification of the enterprise according to the Standard Classification of Activities (SKD) and
- the size of the enterprises (turnover in accordance with the Companies Act).

SOURCES

Respondents answering to the monthly PA-TRG questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th of the month.

COVERAGE

The panel includes all large and medium-sized enterprises and 36% of small enterprises (or 42% of their turnover), the principal activity of which is classified into retail trade and sale of motor vehicles. The panel covers 48% of enterprises of the studied population or 95% of turnover in retail trade and sale of motor vehicles.

METHOD OF DATA COLLECTION

The survey is carried out monthly by mail.

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect relative importance of an individual enterprise in the panel. Inside the SKD classes responses are weighted with the turnover.

NON-RESPONSES

Non-responses are processed every month in accordance with the harmonized methodology.

DEFINITIONS AND EXPLANATIONS

The **balance** is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic indicators (present situation and future expectations), and not the real size of economic indicators. The charts show the balance by individual questions.

Grafi prikazujejo **desezonirane vrednosti**. To so vrednosti, pri katerih je izločen vpliv sezonskih dejavnikov, vsebujejo pa trend - cikel in naključno komponento. Podatki za EU so desezonirani z metodo DAINTIES, za Slovenijo pa z metodo TRAMO/SEATS, ki temelji na ARIMA modelih.

Pri oblikovanju modelov smo upoštevali obdobje od januarja 1999 do januarja 2006. Zaradi narave podatkov se modeli za leto 2006 razlikujejo od modelov za leto 2005. Pri sedanjem obsegu zalog, pričakovanem zaposlovanju, prodajnih cenah, pričakovanih prodajnih cenah, ravni prodaje in kazalniku prodaje sezonska komponenta ni prisotna.

Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanja o sedanjem in pričakovanem poslovnem položaju ter sedanjem obsegu zalog (obrnjen predznak).

OBJAVLJANJE REZULTATOV

Sodelujoči v anketi prejmejo informacijo o dejavnosti, v katero so uvrščeni.

Drugim uporabnikom so ti podatki dostopni na ravni trgovine na drobno in po velikostnih razredih podjetij. Objavljamo jih mesečno v Statističnih informacijah in podatkovni bazi SI-STAT (<http://www.stat.si>).

VPRASHANJA:

- Ocene stanj:
 - Ocena poslovnega položaja v zadnjih 3 mesecih: dober, zadovoljiv - normalen glede na sezono, slab?
 - Prodajne cene so v primerjavi s preteklim mesecem: višje, enake, nižje?
 - Ocena finančnega položaja v primerjavi s preteklim mesecem: boljši, enak, slabši?
 - Ocena obsega zalog: premajhne, ustrezne - normalne glede na sezono, prevelike?
 - Ocena prodaje glede na isti mesec lanskega leta: na višji ravni, na isti ravni, na nižji ravni?
 - Ocena konkurence na vašem področju glede na pretekli mesec: večja, enaka, manjša?
 - Prodaja¹⁾ v zadnjih treh mesecih: povečala, ostala enaka, zmanjšala?
- Pričakovanja v naslednjih mesecih:
 - Pričakovani poslovni položaj čez 6 mesecev: boljši, enak, slabši?
 - Pričakovane prodajne cene v naslednjih 3 mesecih: višje, enake, nižje?
 - Pričakovano zaposlovanje v naslednjih 3 mesecih: povečalo, ostalo enako, zmanjšalo?
 - Pričakovani obseg skupne nabave (tuji in domači dobavitelji) v naslednjih 3 mesecih: večji, enak, manjši?
 - Pričakovana prodaja¹⁾ v naslednjih 3 mesecih: povečala, ostala enaka, zmanjšala?
 - Dejavniki, ki ovirajo izboljšanje sedanjega položaja: ni omejitev, nizko povpraševanje, slaba ponudba, visoki stroški dela, visoka cena denarja, težka dostopnost do bančnih posojil, premajhna prodajna površina, premajhni skladiščni prostori, konkurenca v sektorju, ostalo?
 - Pričakovani obseg nabave pri domačih dobaviteljih v naslednjih 3 mesecih: večji, enak, manjši, nimamo domačih dobaviteljev?
 - Pričakovani obseg nabave pri tujih dobaviteljih v naslednjih 3 mesecih: večji, enak, manjši, nimamo tujih dobaviteljev?

¹⁾ Januarja 2006 smo spremenili vprašanje 'gibanje prodaje za to obdobje leta' v 'prodaja v zadnjih 3 mesecih', 'pričakovano povpraševanje' pa v 'prodaja v naslednjih 3 mesecih'.

Data in the charts are **seasonally adjusted**. Values are adjusted for the seasonal component and include the trend-cycle component and the irregular component. Data for the EU are seasonally adjusted by the DAINTIES method and for Slovenia by the TRAMO/SEATS method, which is based on ARIMA models.

The designing of the models is based on the time period from January 1999 to January 2006. Due to the nature of the data, the models for year 2006 differ from the models for year 2005. Present volume of stocks, expected employment, selling prices, selling prices expectations, level of sales and indicator of sales have no seasonal component.

The **confidence indicator** shows an average of responses (balances) to questions on present and expected business situation and present volume of stocks (the latter with inverted sign).

PUBLISHING

Participants in the survey get the information on the activity of their enterprises.

Other users can get data for retail trade and data for large, medium-sized and small enterprises published monthly in Rapid Reports and in the SI-STAT database (<http://www.stat.si/eng>).

QUESTIONS:

- Appreciation of situation:
 - Assessment of the present business situation over the past 3 months: good, satisfactory (normal for the season), bad?
 - Selling prices compared to the last month: up, unchanged, down?
 - Assessment of financial situation compared to the last month: better, same, worse?
 - Assessment of volume of stocks: too small, adequate (normal for the season), too large?
 - Assessment of sales compared to the same month of the previous year: at a higher level, unchanged, at a lower level?
 - Assessment of competition in own sector compared to the last month: up, unchanged, down?
 - Sales¹⁾ over the past 3 months: increased, remained unchanged, decreased?
- Expectations in the next months:
 - Expected business situation 6 months ahead: better, same, worse?
 - Selling price expectations for the next 3 months: up, unchanged, down?
 - Employment expectations for the next 3 months: up, unchanged, down?
 - Expectations on orders to place with total suppliers (domestic and foreign) in the next 3 months: up, unchanged, down?
 - Expected sales¹⁾ for the next 3 months: increased, remained unchanged, decreased?
 - Factors limiting the improvement of the present business situation: none, low demand, bad supply, high labour costs, high costs of finance, problems with access to bank credits, small sales surface, small storage capacity, competition in own sector, other?
 - Expectations on orders to place with domestic suppliers in the next 3 months: up, unchanged, down, no domestic suppliers?
 - Expectations on orders to place with foreign suppliers in the next 3 months: up, unchanged, down, no foreign suppliers?

¹⁾ In January 2006 we changed the wording 'evolution of sales for this period of year' to 'sales over the past 3 months' and 'expected demand' to 'sales for the next 3 months'.

KOMENTAR

Desezonirana vrednost kazalnika zaupanja v trgovini na drobno je bila za 1 odstotno točko višja od vrednosti v preteklem mesecu. V primerjavi z lanskim aprilom je bila višja za 4 odstotne točke in za 3 odstotne točke je bila višja od lanskega povprečja.

OCENA STANJ

POSLOVNI POLOŽAJ

Desezonirana vrednost kazalnika poslovni položaj je bila v primerjavi s preteklim mesecem višja za 2 odstotni točki. Glede na isti mesec lani je bila višja za 6 odstotnih točk in za 7 odstotnih točk je preseгла lansko povprečje.

PRODAJNE CENE

Vrednost kazalnika prodajne cene je bila v primerjavi s preteklim mesecem nižja za 7 odstotnih točk. V primerjavi z istim mesecem lani je bila vrednost kazalnika višja za 2 odstotni točki in 4 odstotne točke nad povprečjem lanskega leta.

FINANČNI POLOŽAJ

Desezonirana vrednost kazalnika finančni položaj je bila enaka kot pretekli mesec in hkrati enaka lanskemu povprečju, v primerjavi z istim mesecem lani pa je bila 4 odstotne točke nižja.

OBSEG ZALOG

Kazalnik obsega zalog je bil v primerjavi s preteklim mesecem nižji za 3 odstotne točke, v primerjavi z istim mesecem lani za 6 odstotnih točk in 4 odstotne točke pod povprečjem lanskega leta.

RAVEN PRODAJE

Vrednost kazalnika raven prodaje se je v primerjavi s preteklim mesecem zmanjšala za 24 odstotnih točk. V primerjavi z istim mesecem lani je bila nižja za 8 odstotnih točk in za 3 odstotne točke je preseгла lansko povprečje.

PRIČAKOVANJA

PRIČAKOVANI POSLOVNI POLOŽAJ

Desezonirana vrednost kazalnika pričakovani poslovni položaj je bila v primerjavi s preteklim mesecem višja za 1 odstotno točko. V primerjavi z istim mesecem lani pa je bila nižja za 1 odstotno točko in enaka lanskemu povprečju.

PRIČAKOVANE PRODAJNE CENE

Vrednost kazalnika pričakovane prodajne cene je bila v primerjavi s preteklim mesecem za 2 odstotni točki nižja, v primerjavi z istim mesecem lani za 2 odstotni točki višja in 3 odstotne točke nad lanskim povprečjem.

PRIČAKOVANO ZAPOSLOVANJE

Vrednost kazalnika pričakovano zaposlovanje je bila višja v vseh treh primerjavah: za 7 odstotnih točk je bila višja od vrednosti v prejšnjem mesecu, za 5 odstotnih točk od vrednosti v lanskem aprilu in za 11 odstotnih točk od lanske povprečne vrednosti.

PRIČAKOVANA SKUPNA NABAVA

Desezonirana vrednost kazalnika pričakovana skupna nabava je bila glede na pretekli mesec višja za 1 odstotno točko. V primerjavi z vrednostjo v istem mesecu lani je bila nižja za 1 odstotno točko in za 2 odstotni točki pa je bila nižja od povprečja lanskega leta.

PRIČAKOVANA PRODAJA

V primerjavi s preteklim mesecem je bila desezonirana vrednost glede na pretekli mesec enaka. V primerjavi z istim mesecem lani je bila višja za 10 odstotnih točk in za 3 odstotne točke je bila višja od lanskega povprečja.

COMMENT

The seasonally adjusted retail trade confidence indicator increased by 1 percentage point in comparison with the previous month. Compared to April 2005 and last year's average it was up by 4 and 3 percentage points, respectively.

APPRECIATION OF SITUATION

BUSINESS SITUATION

The seasonally adjusted indicator of the business situation was up by 2 percentage points compared to March 2006. Compared to April 2005 it was up by 6 percentage points and compared to last year's average by 7 percentage points.

SELLING PRICES

The indicator of the selling prices went down by 7 percentage points compared to March 2006. In comparison with April 2005 the value of the indicator went up by 2 percentage points and was 4 percentage points above last year's average.

FINANCIAL SITUATION

The seasonally adjusted indicator of the financial situation was the same as in March 2006. Compared to April 2005 it was down by 4 percentage points and equal to last year's average.

VOLUME OF STOCKS

Compared to March 2006 the volume of stocks indicator went down by 3 percentage points. Compared to April 2005 it was 6 percentage points lower and 4 percentage points below last year's average.

LEVEL OF SALES

In comparison with March 2006 the indicator of the level of sales went down by 24 percentage points. Compared to April 2005 it was down by 8 percentage points and 3 percentage points above last year's average.

EXPECTATIONS

EXPECTED BUSINESS SITUATION

The seasonally adjusted indicator of the expected business situation increased by 1 percentage point compared to March 2006. In comparison with April 2005 it was down by 1 percentage point and equal to last year's average.

SELLING PRICES EXPECTATIONS

Selling prices expectations indicator was down by 2 percentage points compared to the previous month. Compared to April 2005 it went up by 2 percentage points and was 3 percentage points above last year's average.

EXPECTED EMPLOYMENT

The indicator of the expected employment was up by 7 percentage points compared to the previous month. Compared to April 2005 it increased by 5 percentage points and was 11 percentage points above last year's average.

EXPECTED ORDERS

The seasonally adjusted indicator of the expected orders was up by 1 percentage point. The indicator went down by 1 percentage point when compared to April 2005 and was down 2 percentage points below last year's average.

EXPECTED SALES

The seasonally adjusted indicator of the expected sales was the same as in March 2006. It was up by 10 percentage points compared to April 2005 and by 3 percentage points compared to above last year's average.

KONKURENČNOST

Desezonirana vrednost kazalnika konkurenčnost je bila za 1 odstotno točko višja od vrednosti v preteklem mesecu. V primerjavi z istim mesecem lani in lanskim povprečjem pa je bila nižja za 5 odstotnih točk oz. 4 odstotne točke.

PRODAJA

Vrednost prodaje je bila v vseh treh primerjavah višja: glede na vrednost v preteklem mesecu za 8, glede na vrednost v lanskem aprilu za 17, glede na lansko povprečje pa za 16 odstotnih točk.

OMEJITVENI DEJAVNIKI V TRGOVINI NA DROBNO

V trgovini na drobno se je 32 % podjetij (oz. 24 % prihodka) srečevalo z dejavniki iz skupine *hude omejitve*. Delež teh podjetij je bil v primerjavi s preteklim mesecem za 1 odstotno točko nižji in za 4 odstotne točke nižji kot v aprilu 2005.

Podjetij, ki so se srečevala z dejavniki iz skupine *težave s ponudbo*, je bilo 30 % (oz. 25 % prihodka), to je za 1 odstotno točko več kot v preteklem mesecu in za 2 odstotni točki več kot aprila lani.

Podjetij, ki so se srečevala s skupino dejavnikov *težave s povpraševanjem*, je bilo 28 % (oz. 30 % prihodka), to je enako kot v preteklem mesecu in za 2 odstotni točki več kot v aprilu 2005.

Podjetij, ki v aprilu 2006 pri svojem poslovanju *niso imela omejitev*, je bilo 10 % (oz. 21 % prihodka) oziroma prav toliko kot v preteklem mesecu in v lanskem aprilu.

Podrobnejši pregled omejitvenih dejavnikov v trgovini na drobno¹⁾:

- 46 % podjetij (ali 48 % prihodka) je omejevala konkurenca v sektorju,
- 36 % podjetij (ali 38 % prihodka) so omejevali visoki stroški dela,
- 26 % podjetij (ali 20 % prihodka) je omejevalo nezadostno povpraševanje,
- 17 % podjetij (ali 21 % prihodka) je omejevala visoka cena denarja,
- 14 % podjetij (ali 6 % prihodka) je omejevala premajhna prodajna površina,
- 12 % podjetij (ali 4 % prihodka) so omejevali drugi dejavniki, kot so finančna nedisciplinarnost, visoke najemnine, slaba lokacija itd.,
- 11 % podjetij (ali 21 % prihodka) ni imelo omejitev v poslovanju,
- 9 % podjetij (ali 4 % prihodka) je omejevala dostopnost do bančnih posojil,
- 9 % podjetij (ali 5 % prihodka) so omejevali premajhni skladiščni prostori,
- 1 % podjetij (ali 0 % prihodka) je omejevala slaba ponudba.

1) Podjetja so lahko označila več dejavnikov, ki so omejevala njihovo poslovanje, zato vsota odstotkov ni 100%.
Enterprises can select several obstacles to their business, so the total is not 100%.

Statistično raziskovanje je sofinancirala Evropska komisija. Za objavljene podatke in besedila je odgovoren izključno Statistični urad Republike Slovenije in ne Evropska komisija.

COMPETITION

In comparison with the previous month, the seasonally adjusted indicator of the competition increased by 1 percentage point. Compared to April 2005 and last year's average it went down by 5 and 4 percentage points, respectively.

SALES

The value of sales indicator was up by 8 percentage points compared to the previous month. Compared to April 2005 and last year's average it was up by 17 and 16 percentage points respectively.

OBSTACLES IN RETAIL TRADE

32% of enterprises in retail trade (24% of turnover) were faced with "severe obstacles" in trading. Compared to the previous month the share was 1 percentage point lower and 4 percentage points lower than in April 2005.

The share of enterprises faced with "supply difficulties" was 30% (25% of turnover). This share was 1 percentage point higher than in March 2006 and 2 percentage points higher than in April 2005.

The share of enterprises faced with "demand difficulties" was 28% (30% of turnover), which was the same as in March 2006 and 2 percentage point higher than in April 2005.

Only 10% of enterprises (21% of turnover) experienced *no obstacles*. The share of these enterprises was the same as in March 2006 and in April 2005.

A more detailed overview of obstacles in retail trade¹⁾ shows that:

- 46% of enterprises (or 48% of turnover) were limited by competition in their own sector,
- 36% of enterprises (or 38% of turnover) were limited by high cost of labour,
- 26% of enterprises (or 20% of turnover) were limited by insufficient demand,
- 17% of enterprises (or 21% of turnover) were limited by the high cost of money,
- 14% of enterprises (or 6% of turnover) were limited by shortage of sales surface,
- 12% of enterprises (or 4% of turnover) were limited by other factors such as lack of financial discipline, high rents, bad location, etc.,
- 11% of enterprises (or 21% of turnover) experienced no obstacles,
- 9% of enterprises (or 4% of turnover) were limited in their access to bank credits,
- 9% of enterprises (or 5% of turnover) were limited by small storage capacity,
- 1% of enterprises (or 0% of turnover) were limited by supply shortage.

The business survey is co-financed by the European Commission. However, the European Commission accepts no responsibility or liability whatsoever with regard to the material published in this publication.
