

## A LITTLE FLYING BOAT

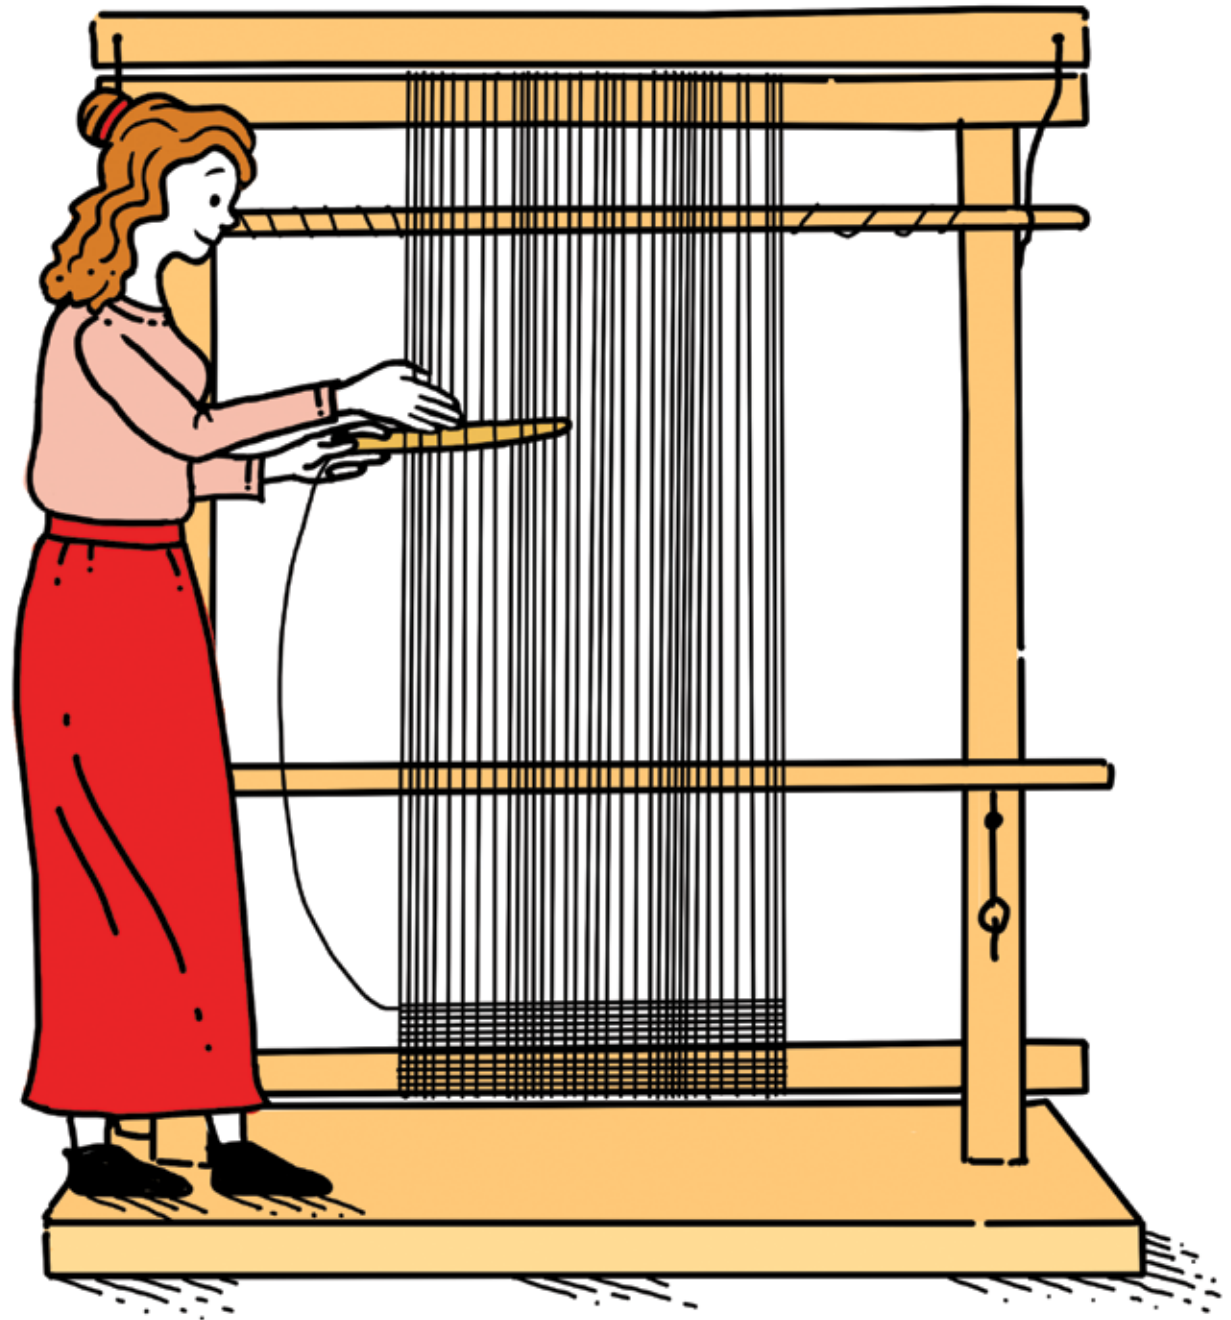

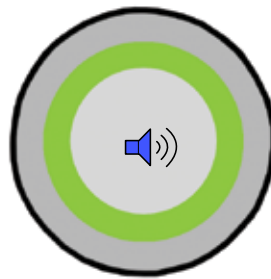

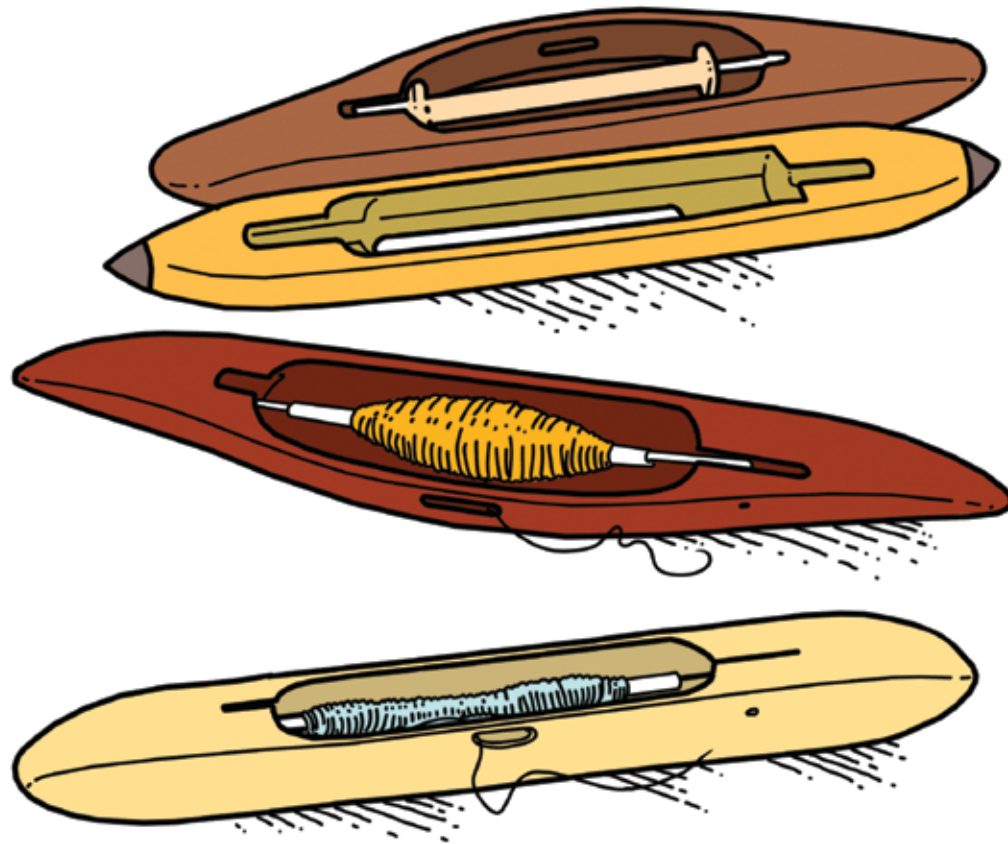

WHERE IS THIS LITTLE FLYING BOAT  
GOING? PRESS THE BUTTON  
AND LISTEN CAREFULLY.

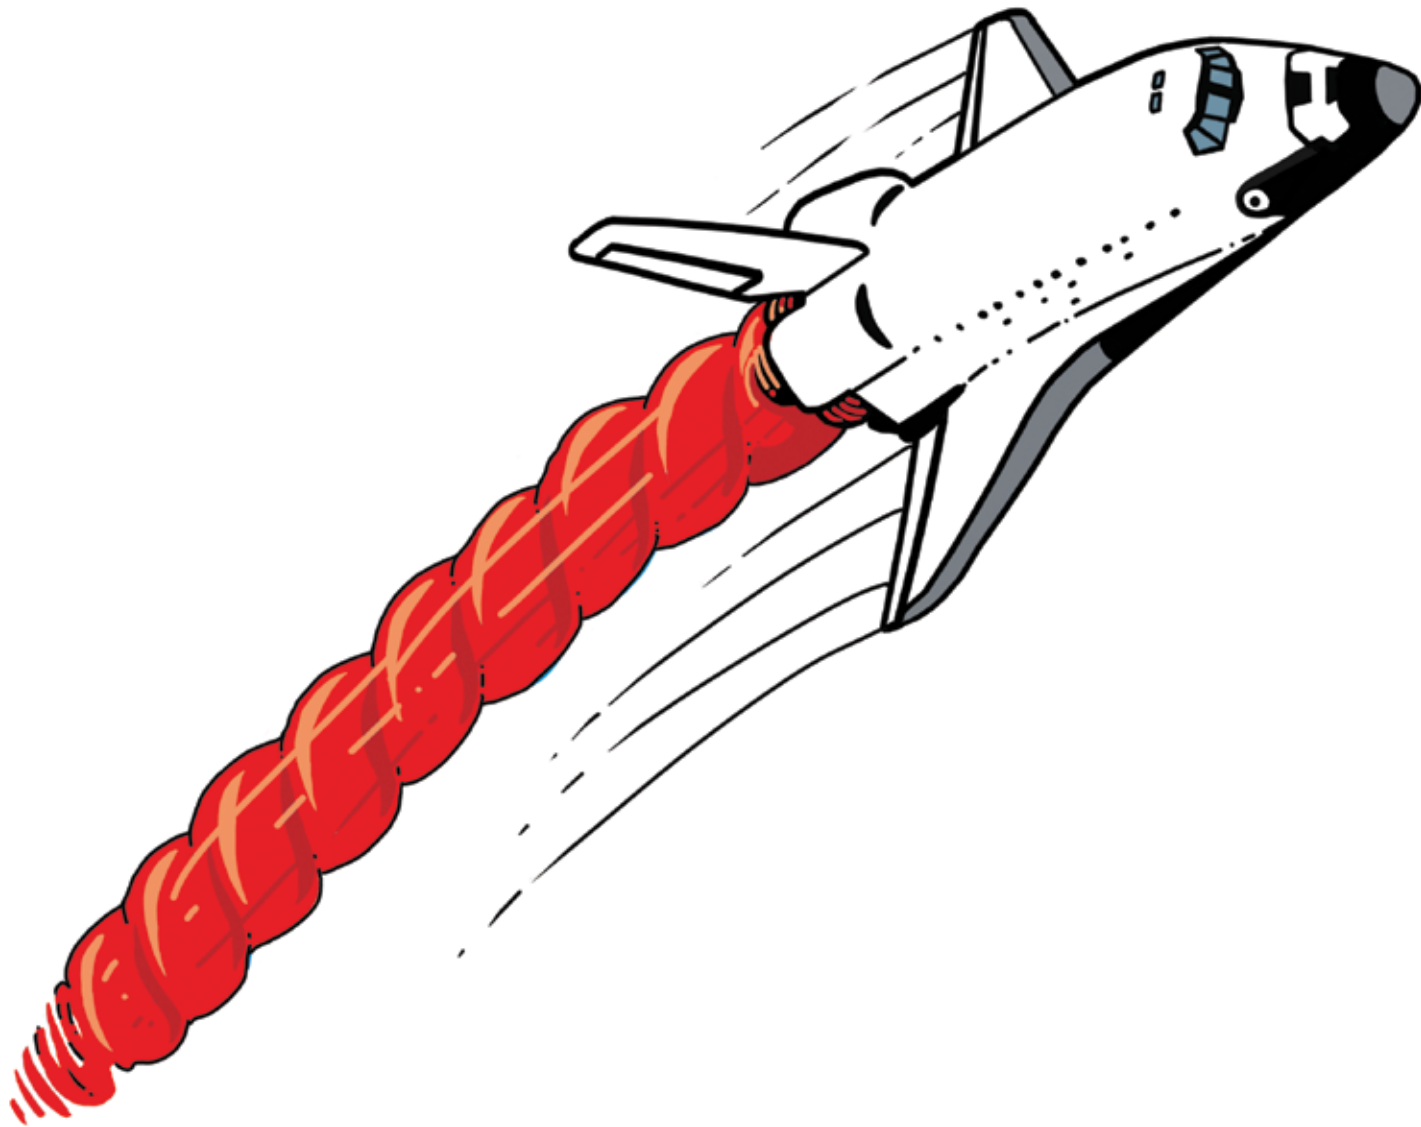

ACTUALLY, THIS ISN'T A FLYING BOAT,  
BUT A 'SHUTTLE' RUNNING BACK  
AND FORTH ON A LOOM. IT CARRIES  
A THREAD CALLED THE WEFT  
AND ITS FINAL GOAL IS WOVEN FABRIC.

WHEN WEAVING ON HANDLOOMS  
THE WEAVERS USED LARGE STICK  
SHUTTLES MADE OF A FLAT,  
NARROW PIECE OF WOOD.

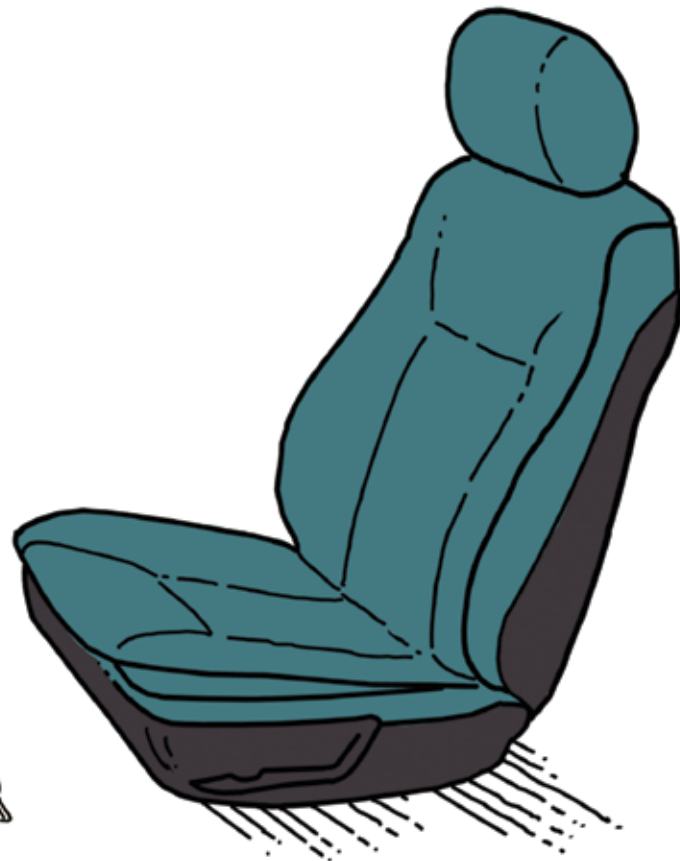

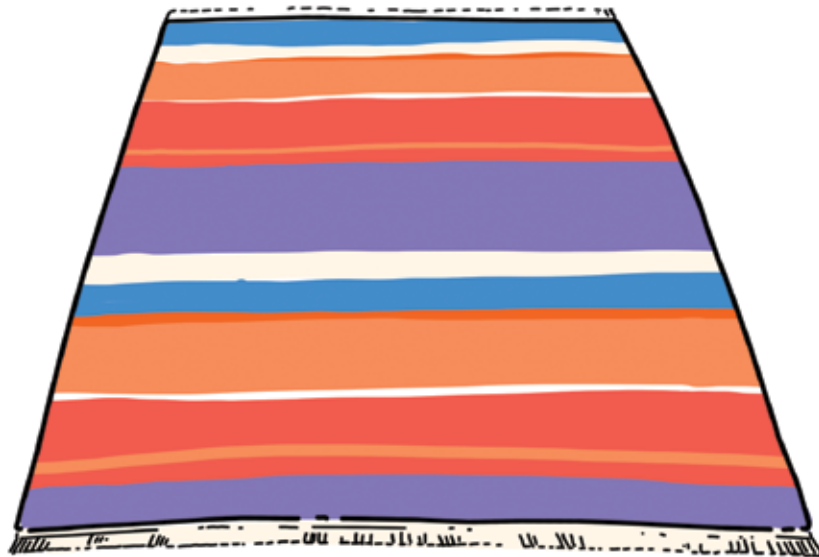

JUST LIKE THE LOOMS, THE SHUTTLE CHANGED  
ITS LOOK AND "VOICE" SEVERAL TIMES.  
PRESS THE BUTTON AND YOU WILL HEAR  
THE VERY LOUD SOUND OF SHUTTLE LOOMS  
IN A TEXTILE FACTORY.

MODERN TEXTILE INDUSTRY MAINLY  
USES LOOMS WITHOUT SHUTTLES.  
INSTEAD THEY SOMETIMES USE  
A JET OF WATER OR AIR THAT  
CARRIES A THREAD AS FAST  
AS A SPACE SHUTTLE!

THE PRODUCTS MADE FROM  
WEAVING ARE CALLED FABRICS.  
DO YOU RECOGNISE ANY OF THEM?

LET THE WORK BE HEARD

## A LITTLE FLYING BOAT
