KRATKA DNEVNA ZGODBA

HERVE DE PESLOUAN:

RAZSTANEK

Henry Wegmann je stopil v obednico. Njegova žena je sedela za mizo in štela kapljice ter jih zlivala v čašo vode.

vedovati, kakšne načrte ima za drugo polovico dne. Nameravala je posetiti neke trgovine in vrniti en obisk.

lovati... Ona je obžalovanja vredna, ne jaz... Prosim vas, bodite tako ljubeznivi in izvolite cigarete!

"Bila... Preiskal me je in mi zanimalo tle zdravilo. Dejal je, da mi pesa sree. Popoln mir mi je priporočil."

Henry je skomignil z rameni in se nasmešnil. Z veliko zgovornostjo je dokazoval, da ima prav.

Najstarejši izmed trojice se je približal Henryjevi ženi, da bi ji poljubil roko, toda ona se je odtegnila.

"Kaj bova kosila?" "Teletino z zeljem. In sadje."

Tudi so utrnili in odložili cigarete. Eden izmed njih je potegnil iz žepa svetel, kovinast predmet.

"Kakor zločinca..." je zašepetal in te besede so se mu zdele grozne.

"Kaj Tukaj so že? Dobro, povejte jim, da sem doma in da jih počakam v stanovanju..."

Henry je prijel za alabastrno ročico in poljubil blazinice njenih prstičev.

Detektivi so ga uklenili in ga odvedli v avtomobil.

"Nu, nu, saj ni tako hudo... Ti tega ne razumeš. Poslovne tajne... Otrasi se takih misli in mi rajša povej, kam si namenjena popoldne."

Električni zvonec je pozvonil. V sobo je prišla sobarica: "Gospod, zunaj so trije gospodje, ki pravijo, da imajo nalogo govoriti z vami."

"Zelo vas obžalujem, gospod..." "Ne, prosim, mene ni treba obžalovati..."

RAZMAK BAKRA.

Ko je pred par meseci neka železniška družba naznanila, da namerava uvesti električni pogon na svoji progi iz New Yorka do Wilmingtona, zaviadalo je veselje med proizvedci bakra.

zemeljsko kroglo ob ekvatorju 2000 krat. Ena izmed ameriških brzojavnih družb rabi več milijonov milij bakrene žice in lastuje 18 bakrenih kablov ki spajajo Evropo z Ameriko.

Radi te obširne rabe bakra nekateri nazivajo baker ručno električarjev. Kjerkoli vidiš električno svetlo in rabo električne sile, tam je baker.

Čisti baker je premahak za razne vrste. Ali daje se rabiti mešan z drugimi kovinami. Zmes bakra in kositra je bron. Baker in cink tvorita med. Vsaka izmed teh zmesi vsebuje več kot polovico bakra.

Celo drobiž je iz bakra in, kamorkoli naj se peljemo na delo, baker nas spremlja.

Dandanes 16 uniljskih držav in Alaska proizvajajo vsaka po več kot 100,000 funtov bakra na leto.

STROŠEK ZA ŠOLSTVO V AMERIKI.

Po podatkih odbora National Bureau-a of Economic Research, ki je proučevala spremembe v standardu življenja ameriškega ljudstva, je razvidno, da Združene države trošijo za šolstvo ogromno svoto na leto.

polovica tega večjega stroška gre na račun ljudskih šol. Istocasno se je število učencev ljudskih šol povečalo od 18 na 21 milijonov otrok, torej za 17 odst.

Povprečni strošek za učenca ljudskih šol je leta 1926 znašal \$63,31 za vsakega. V srednjih šolah (high school) je ta povprečni strošek znašal \$195,74 in na vseučiliščih \$423,00.

Tudi število poslušalcev visokih šol se je v tem razdobju silno povečalo: od 326,000 na 823,000 dijakov. Troškovnih brezplačnih visokih šol se je med tem povečalo za 350 odst.
