POSLOVNE TENDENCE V GRADBENIŠTVU, SLOVENIJA, FEBRUAR 2006
BUSINESS TENDENCY IN CONSTRUCTION, SLOVENIA, FEBRUARY 2006

- Desezonirana vrednost kazalnika zaupanja je bila za 3 odstotne točke višja kot pretekli mesec. V primerjavi z istim mesecem lani je bila nižja za 14 odstotnih točk ter za 7 odstotnih točk nižja od lanskega povprečja.
- Na rast kazalnika zaupanja je v februarju 2006 vplivalo zvišanje pričakovanega zaposlovanja.
- Kazalniki stanj so se v primerjavi s preteklim mesecem večinoma izboljšali. Pričakovanja za naslednje tri mesece niso ugodna, z izjemo pričakovanega zaposlovanja.
- The seasonally adjusted value of the confidence indicator rose by 3 percentage points compared to the previous month. Compared to February 2005 it was down by 14 percentage points and compared to last year's average by 7 percentage points.
- The rise of the confidence indicator in February 2006 was influenced by the improvement of expected employment.
- Compared to the previous month, the observed indicators for appreciation of the situation mostly deteriorated. The expectations for the next three months are favourable, except for expected employment.

1. KAZALNIK ZAUPANJA V GRADBENIŠTVU¹⁾ V SLOVENIJI IN EU²⁾, MAREC 2002–FEBRUAR 2006
CONSTRUCTION CONFIDENCE INDICATOR¹⁾ IN SLOVENIA AND EU²⁾, MARCH 2002–FEBRUARY 2006

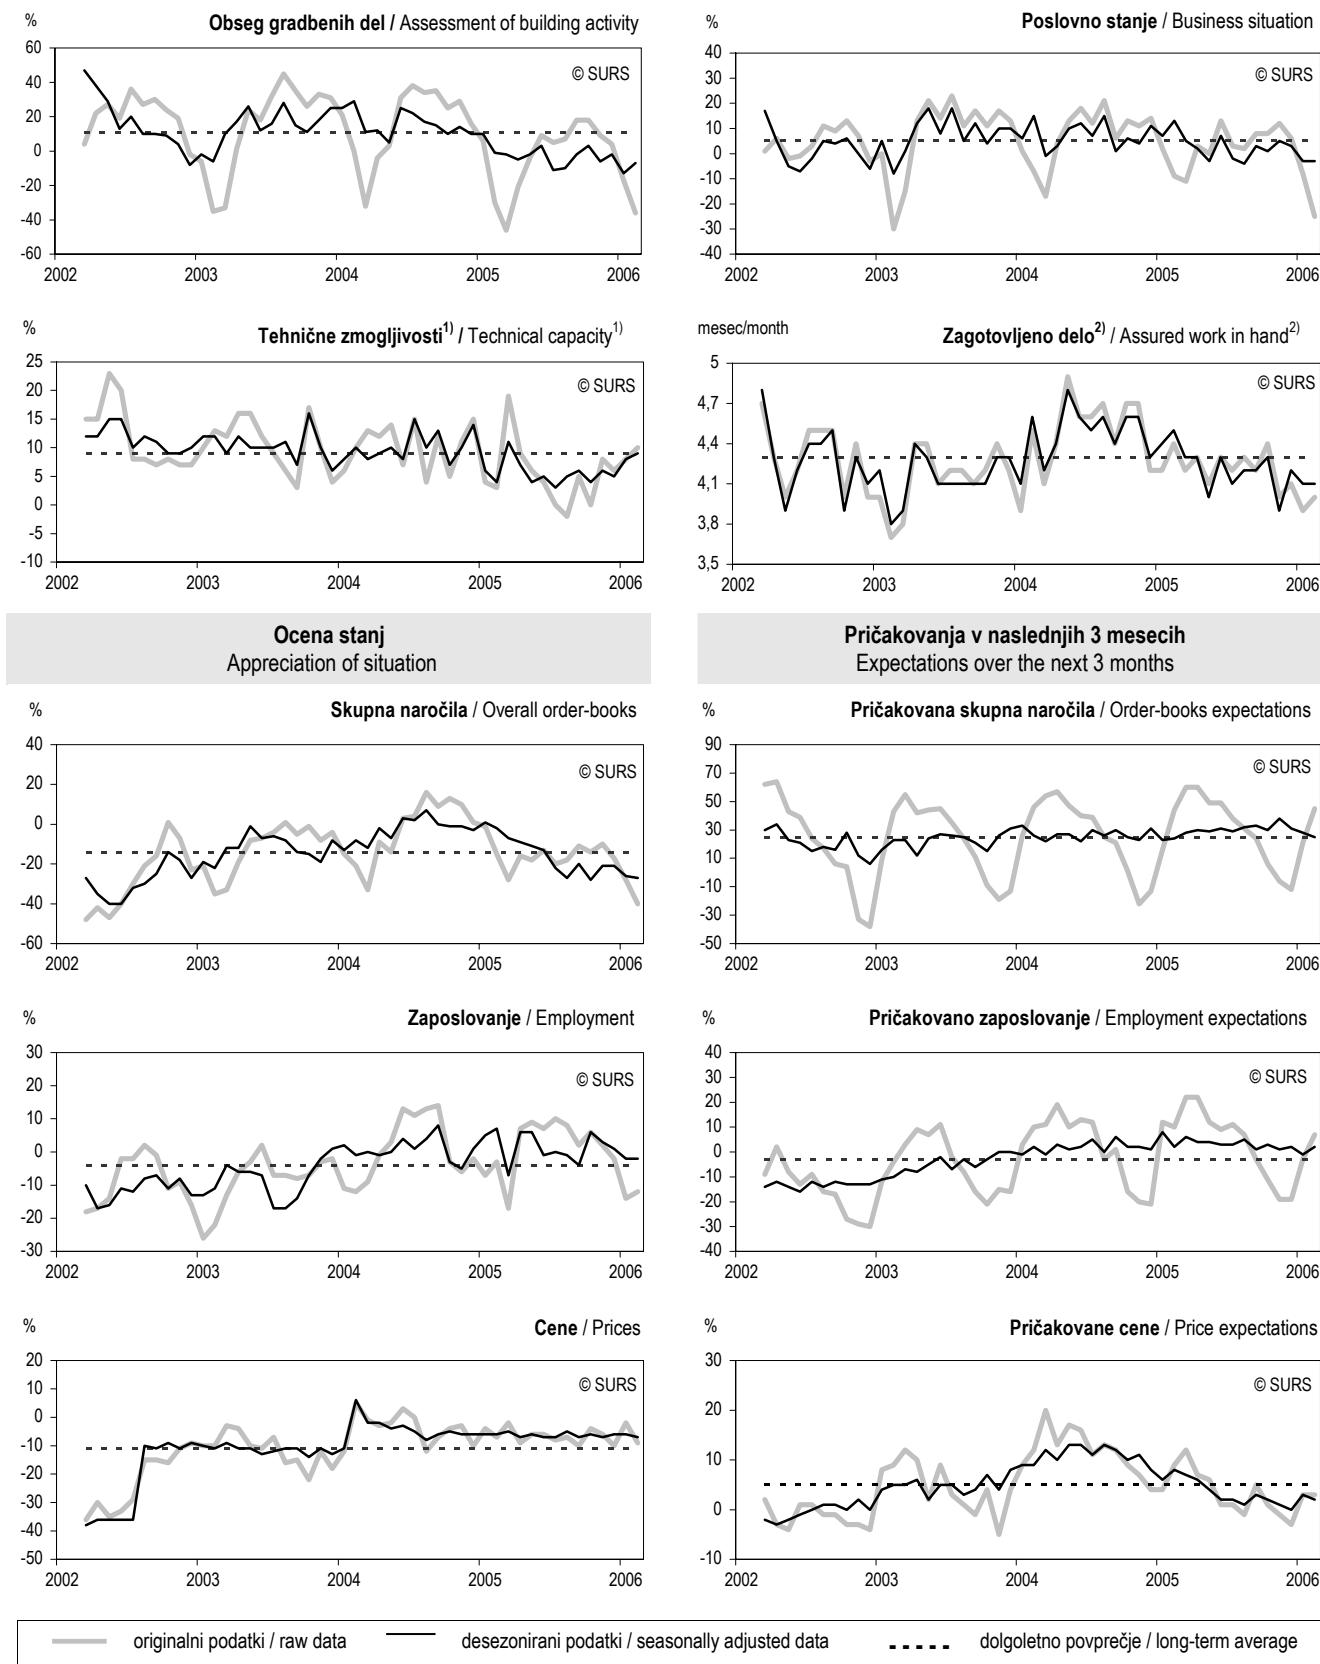

1) Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanim zaposlovanju.

The confidence indicator is an average of responses (balances) to questions on overall order-books assessments and employment expectations.

6. OMEJITVENI DEJAVNIKI V GRADBENIŠTVU V SLOVENIJI, MAREC 2002 - FEBRUAR 2006

FACTORS LIMITING BUILDING ACTIVITY IN SLOVENIA, MARCH 2002 - FEBRUARY 2006

Graf ponazarja delež zaposlenih v gradbeništvu, ki se soočajo z naslednjimi skupinami težav:

- Skupina "ni omejitev" zajema zaposlene, ki se ne soočajo z omejitvami.
- Skupina "težave s povpraševanjem" zajema zaposlene, ki imajo težave z nezadostnim povpraševanjem in konkurenco v dejavnosti.
- Skupina "težave s ponudbo" zajema zaposlene, ki imajo težave s slabimi vremenskimi pogoji, visokimi finančnimi stroški, visokimi stroški materiala in dela, težave pri pridobivanju kreditov. V to skupino sodijo tudi podjetja, ki imajo težave s pomanjkanjem usposobljenih delavcev, opreme in materialov.
- Skupina "hude omejitve" zajema zaposlene, ki imajo hkrati težave z dejavniki iz skupine "šibko povpraševanje" in z dejavniki iz skupine "težave s preskrbo".

The chart on production obstacles shows the share of employees who are facing the following groups of problems:

- Group "no limits" includes employees with no limits in building activity.
- Group "weakness in demand" includes employees who are facing insufficient demand and competition in own sector.
- Group "supply difficulties" includes employees who are facing bad weather conditions, high cost of finance, materials and/or labour; difficulties with access to bank credits, lack of equipment, and shortage of skilled labour and shortage of materials.
- Group "severe obstacles" includes employees who are facing at the same time problems from the group "weakness in demand" and those from the group "supply difficulties".

METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah v gradbeništvu (PA-GRAD/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskega kazalnikov ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalnika zaupanja v gradbeništvu.

Anketo o poslovnih tendencah v gradbeništvu izvajamo v Sloveniji od marca 2002 s poenot enim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

ENOTE OPAZOVANJA

Opazujemo podjetja, ki so razvrščena v gradbeništvo, to je v oddelek Standardne klasifikacije dejavnosti (SKD) 45, in imajo 11 zaposlenih ali več ter so bila izbrana na podlagi dveh merit, in sicer:

- velikosti (število zaposlenih, skladno z zakonom o gospodarskih družbah) in
- razvrstitev podjetja po SKD-ju.

VIRI

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu.

ZAJETJE

V anketi sodeluje 433 izbranih gradbenih podjetij. V anketu smo zajeli vsa velika in srednjevelika podjetja in vsa mala podjetja z 11 zaposlenimi in več.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj oddelkov SKD so odgovori uteženi s številom zaposlenih.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo; delež neodgovorov se giblje med 5 in 10 % (povprečno 8 %).

DEFINICIJE

Grafiki prikazujejo ravnotežja po posameznih vprašanjih. **Ravnotežje** je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskega spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskega kazalnikov.

Kazalnik zaupanja je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanemu zaposlovanju.

OBJAVLJANJE PODATKOV

Sodelujoči v anketi prejmejo informacijo o gradbeništvu kot celoti, o

METHODOLOGICAL EXPLANATIONS

PURPOSE OF STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency in Construction (hereinafter: PA-GRAD/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the construction confidence indicator.

We have been carrying out the Survey on Business Tendency in Construction in Slovenia since March 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in construction – division 45 of the Standard Classification of Activities (SKD) and have 11 or more employees. They were selected by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act),
- classification of the enterprise according to the SKD.

SOURCES

Respondents to the monthly questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th in the month.

COVERAGE

433 enterprises participate in the survey. We included all large and medium-sized enterprises and all small enterprises with 11 employees and more.

METHOD OF DATA COLLECTING

The survey is carried out monthly by mail.

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect relative importance of individual enterprise in the panel. Inside divisions of Standard Classification of Activities (SKD) responses are weighted with the number of employees.

NON-RESPONSES

Non-responses are processed every month in accordance with the harmonised methodology and vary between 5 and 10% (8% on average).

DEFINITIONS

The charts show the balance by individual questions. The **balance** is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

Confidence indicator is defined as the arithmetic mean of the answers (balances) to the questions on order book assessments and employment expectations.

PUBLISHING

Persons participating in the survey get information for construction, division in

oddelku SKD, v katerega se po dejavnosti razvrščajo in glede na vrsto gradnje, vendar le, če so izpolnili vprašalnik za tekoči mesec.

Ostalim uporabnikom so dostopni podatki na ravni gradbeništva in njegovih skupin ter podatki glede na vrsto gradnje. Slednji so mesečno objavljeni v Statističnih informacijah – Poslovne tendence v gradbeništvu in v podatkovni bazi SI-STAT na naslovu <http://www.stat.si>.

VPRAŠANJA:

- Obseg gradbenih del v zadnjih 3 mesecih: večji, enak, manjši?
- Dejavniki, ki omejujejo gradbeno dejavnost: ni omejitev, nezadostno povpraševanje, slabi vremenski pogoji, visoki stroški materiala, visoki stroški dela, visoki finančni stroški, težave pri pridobivanju kreditov, pomanjkanje usposobljenih delavcev, pomanjkanje opreme, pomanjkanje materialov, velika konkurenca v dejavnosti, ostalo?
- Sedanja naročila v tujini: višja kot normalna, normalna, nižja kot normalna?
- Sedanja domača naročila: višja kot normalna, normalna, nižja kot normalna?
- Sedanja skupna naročila: višja kot normalna, normalna, nižja kot normalna?
- Pričakovana naročila v naslednjih 3 mesecih: zrasla, ostala nespremenjena, padla?
- Zaposlovanje v zadnjem mesecu: povečalo, ostalo enako, zmanjšalo?
- Pričakovano zaposlovanje v naslednjih 3 mesecih: povečalo, ostalo enako, zmanjšalo?
- Cene so se: zvišale, ostale enake, znižale?
- Pričakovane cene v naslednjih 3 mesecih: naraščale, ostale enake, padale?
- Tehnične zmogljivosti glede na povpraševanje v naslednjih 12 mesecih: več kot zadostne, zadostne, nezadostne?
- Pri običajnih delovnih urah že začeto ali s pogodbami zagotovljeno dela za: ... mesecev?
- Poslovno stanje v primerjavi s preteklim mesecem: boljše, enako, slabše?

KOMENTAR

Februarja 2006 so direktorji tendence v gradbeništvu ocenili boljše kot pretekli mesec. Desezonirana vrednost kazalnika zaupanja je bila za 3 odstotne točke višja kot pretekli mesec. V primerjavi z istim mesecem lani je bila nižja za 14 odstotnih točk ter za 7 odstotnih točk nižja od lanskega povprečja.

POSLOVNO STANJE

Desezonirana vrednost kazalnika poslovnega stanja je bila v primerjavi s preteklim mesecem enaka. V primerjavi z istim mesecem lani je bila nižja za 16 odstotnih točk in za 6 odstotnih točk pod lanskim povprečjem.

which they are classified and for the type of construction. They get it only if they responded in the current month.

Other users can get data for construction and its groups, size of enterprises and type of construction. Data are published in the Rapid Reports – Business Tendency in Construction and in the database SI-STAT which is available on <http://www.stat.si/eng>.

QUESTIONS:

- Building activity over the past 3 months: increased, remained unchanged, decreased?
- Factors limiting building activity: none, insufficient demand, bad weather conditions, high cost of material, high cost of labour, high cost of capital, access to bank credit, shortage of skilled labour, shortage of equipment, shortage of material, competition in own sector, other?
- Assessment of foreign order books: above normal, normal, below normal?
- Assessment of domestic order books: above normal, normal, below normal?
- Assessment of overall order books: above normal, normal, below normal?
- Expected order books over the next 3 months: increase, remain unchanged, decrease?
- Assessment of employment: increased, remained unchanged, decreased?
- Employment expectations over the next 3 months: increase, remain unchanged, decrease?
- Assessment of prices: increased, remained unchanged, decreased?
- Expected prices over the next 3 months: increase, remain unchanged, decrease?
- Technical capacity regarding expected demand in the next 12 months: more than sufficient, sufficient, not sufficient?
- With normal working hours, the work in hand and work already contracted for ... months?
- Business situation compared to the previous month: better, the same, worse?

COMMENT

In February 2006, managers estimated business tendencies in construction better than in the previous month. The seasonally adjusted value of the confidence indicator rose by 3 percentage points compared to the previous month. Compared to February 2005 it was down by 14 percentage points and compared to last year's average by 7 percentage points.

BUSINESS SITUATION

The seasonally adjusted value of the business situation indicator remained the same compared to the previous month. Compared to February 2005 it was down by 16 percentage points and compared to last year's average by 6 percentage points.

OBSEG GRADBENIH DEL

Desezonirana vrednost kazalnika obsega gradbenih del je bila v primerjavi s preteklim mesecem višja za 6 odstotnih točk. Glede na isti mesec lani je bila nižja za 6 odstotnih točk in 5 odstotnih točk pod povprečjem lanskoga leta.

SKUPNA NAROČILA IN PRIČAKOVANA SKUPNA NAROČILA

Desezonirana vrednost kazalnika skupnih naročil se je v primerjavi s preteklim mesecem znižala za 1 odstotno točko. Glede na isti mesec lani je bila nižja za 25 odstotnih točk in za 12 odstotnih točk pod lanskim povprečjem.

Desezonirana vrednost kazalnika pričakovanih skupnih naročil za naslednje tri mesece se je v primerjavi s preteklim mesecem znižala za 3 odstotne točke. Glede na isti mesec lani je bila višja za 1 odstotno točko in 5 odstotnih točk pod povprečjem lanskoga leta.

ZAPOSLOVANJE IN PRIČAKOVANO ZAPOSLOVANJE

Desezonirana vrednost kazalnika zaposlovanja je v primerjavi s preteklim mesecem ostala enaka. V primerjavi z istim mesecem lani je bila nižja za 9 odstotnih točk in 4 odstotne točke pod povprečjem lanskoga leta.

Desezonirana vrednost kazalnika pričakovanega zaposlovanja se je v primerjavi s preteklim mesecem zvišala za 3 odstotne točke. Glede na isti mesec lani je bila nižja za 3 odstotne točke in 2 odstotni točki pod povprečjem lanskoga leta.

CENE IN CENOVNA PRIČAKOVANJA

Desezonirana vrednost kazalnika cen se je v primerjavi s preteklim mesecem znižala za 1 odstotno točko. Glede na isti mesec lani je bila nižja za 2 odstotni točki in 1 odstotno točko pod povprečjem lanskoga leta.

Desezonirana vrednost kazalnika cenovnih pričakovanj za naslednje tri mesece je bila v primerjavi s preteklim mesecem nižja za 1 odstotno točko. Glede na isti mesec lani je bila nižja za 6 odstotnih točk in 2 odstotni točki pod povprečjem lanskoga leta.

TEHNIČNE ZMOGLJIVOSTI

Desezonirana vrednost kazalnika tehnične zmogljivosti vključuje oceno količine in kakovosti opreme glede na povpraševanje v naslednjih 12 mesecih.

Desezonirana vrednost kazalnika se je v primerjavi s preteklim mesecem zvišala za 1 odstotno točko. Glede na isti mesec lani je bila višja za 7 odstotnih točk in 3 odstotne točke nad lanskim povprečjem.

ZAGOTOVLJENO DELO

Desezonirana vrednost kazalnika zagotovljeno delo temelji na oceni števila mesecev, za katere je delo zagotovljeno s pogodbami.

V februarju so imela podjetja s pogodbami zagotovljeno delo v povprečju za 4,1 meseca. To je za 0,4 meseca manj kot v lanskem februarju in za 0,1 meseca manj od povprečja lanskoga leta.

OMEJITVENI DEJAVNIKI

Med omejitvenimi dejavniki v gradbeništvu so prevladovali dejavniki iz skupine hude omejitve. V tem mesecu se je z njimi spopadalo le 40 % zaposlenih (oziroma 37 % podjetij), kar je najmanj v celotnem opazovanem obdobju.

Sledili so omejitveni dejavniki iz skupine težave s ponudbo. V tem

BUILDING ACTIVITY

The seasonally adjusted value of the building activity indicator rose by 6 percentage points compared to the previous month. Compared to February 2005 and last year's average it was down by 6 and 5 percentage points respectively.

OVERALL ORDER-BOOKS AND EXPECTED ORDER-BOOKS

The seasonally adjusted value of the overall order-books indicator fell by 1 percentage point compared to the previous month. Compared to February 2005 it was down by 25 percentage points and compared to last year's average by 12 percentage points.

The seasonally adjusted value of the expected order-books for the next three months fell by 3 percentage points compared to the previous month. Compared to February 2005 it was up by 1 percentage point and compared to last year's average it was down by 5 percentage points.

EMPLOYMENT AND EMPLOYMENT EXPECTATIONS

The seasonally adjusted value of the employment indicator remained the same compared to the previous month. Compared to February 2005 it was down by 9 percentage points and compared to last year's average by 4 percentage points.

The seasonally adjusted value of the expected employment indicator rose by 3 percentage points when compared to the previous month. Compared to February 2005 it was down by 3 percentage points and compared to last year's average by 2 percentage points.

PRICES AND PRICE EXPECTATIONS

The seasonally adjusted value of the prices indicator fell by 1 percentage point compared to the previous month. Compared to February 2005 it was down by 2 percentage points and compared to last year's average by 1 percentage point.

The seasonally adjusted value of the price expectations indicator for the next three months fell by 1 percentage point compared to the previous month. Compared to February 2005 it was down by 6 percentage points and 2 percentage points below last year's average.

TECHNICAL CAPACITY

The seasonally adjusted value of the technical capacity indicator includes the evaluation of the quantity and quality of equipment regarding expected demand in the next 12 months.

Compared to the previous month the seasonally adjusted value indicator rose by 1 percentage point. Compared to February 2005 it was up by 7 percentage points and compared to last year's average by 3 percentage points.

ASSURED WORK IN HAND

The value of the assured work indicator includes the evaluation of the number of months for which work is assured by contracts.

In January 2006, enterprises had work assured for 4.1 months on average. Compared to February 2005 it was down by 0.4 month and compared to last year's average by 0.1 month.

LIMITING FACTORS

Among factors limiting building activity, severe obstacles prevailed. In February 2006, 40% of employees (37% of enterprises) were faced with them.

The second most important obstacles were supply difficulties. In February

mesecu se je z njimi srečevalo 35 % zaposlenih (oziora 44 % podjetij).

Z dejavniki iz skupine šibko povpraševanje se je v tem mesecu srečalo 18 % zaposlenih (oziora 13 % podjetij).

7 % zaposlenih (oziora 6 % podjetij) v tem mesecu ni imelo omejitev.

Podrobnejši pregled omejitvenih dejavnikov v gradbeništvu v tem mesecu pokaže naslednje¹⁾:

- 44 % podjetij (ali 45 % zaposlenih) so omejevale slabe vremenske razmere;
- 40 % podjetij (ali 46 % zaposlenih) je omejevala velika konkurenca v dejavnosti;
- 33 % podjetij (ali 34 % zaposlenih) so omejevali visoki stroški dela;
- 31 % podjetij (ali 25 % zaposlenih) je omejevalo pomanjkanje usposobljenih delavcev;
- 21 % podjetij (ali 24 % zaposlenih) so omejevali visoki stroški materiala;
- 16 % podjetij (ali 14 % zaposlenih) so omejevali visoki finančni stroški;
- 16 % podjetij (ali 20 % zaposlenih) je omejevalo nezadostno povpraševanje;
- 11 % podjetij (ali 8 % zaposlenih) so omejevali drugi dejavniki;
- 5 % podjetij (ali 4 % zaposlenih) so omejevali težave pri pridobivanju kreditov;
- 2 % podjetij (ali 1 % zaposlenih) je omejevalo pomanjkanje opreme;
- 1 % podjetij (ali 1 % zaposlenih) je omejevalo pomanjkanje materialov.

Največja omejitev v gradbeništvu so slabe vremenske razmere, sledijo velika konkurenca v dejavnosti, visoki stroški dela in pomanjkanje usposobljenih delavcev.

Statistično raziskovanje je sofinancirala Evropska komisija. Za objavljene podatke in besedila je odgovoren izključno Statistični urad Republike Slovenije in ne Evropska komisija.

2006, 35% of employees (44% of enterprises) faced them.

The third most important obstacles were demand difficulties. In February 2006, 18% of employees (13% of enterprises) faced them.

7% of employees (6% of enterprises) experienced no obstacles in February 2006.

A more detailed overview of factors limiting building activity shows that in this month¹⁾:

- 44% of enterprises (or 45% of employees) were limited by bad weather conditions;
- 40% of enterprises (or 46% of employees) were limited by competition in own sector;
- 33% of enterprises (or 34% of employees) were limited by high costs of labour;
- 31% of enterprises (or 25% of employees) were limited by shortage of skilled labour;
- 21% of enterprises (or 24% of employees) were limited by high costs of material;
- 16% of enterprises (or 14% of employees) were limited by high costs of capital;
- 16% of enterprises (or 20% of employees) were limited by insufficient demand;
- 11% of enterprises (or 8% of employees) were limited by other factors;
- 5% of enterprises (or 4% of employees) were limited by access to bank credits;
- 2% of enterprises (or 1% of employees) were limited by lack of equipment;
- 1% of enterprises (or 1% of employees) were limited by shortage of material.

The most important factor limiting building activity is bad weather conditions, followed by competition in own sector, high costs of labour and shortage of skilled labour.

The business survey is co-financed by the European Commission. However, the European Commission accepts no responsibility or liability whatsoever with regard to the material published in this publication.

1) Podjetja lahko označijo več dejavnikov, ki omejujejo njihovo dejavnost, zato vsota odstotkov ni 100.
Enterprises can select several factors limiting their business, so the total is not 100%.
