

Zakaj je važno, da je Burke ponovno izvoljen

Nadaljevanje s prve strani

ka iz svojega političnega žaklja in povedali, zakaj da bi bil moral biti Burke v tork razporežen: namreč zato, da se ugleda pot republikanski stranki—očividno Taftu—in da pridejo na krmilo zvezne vlade v Washingtonu ljudje, ki menijo, da je delovno ljudstvo v Ameriki pod demokrati postalo "presito," da vlada delavskim unijam daje "preveč potuho," in je že skrajni čas, da se delovnim množicam in "navadnemu" ljudstvu v občje pokaže, kdo je pravzaprav gospodar v tej deželi.

To je tisto, za kar bo šlo v tork pri volitvah v Clevelandu. Ali je treba se posebej poudarjati, da je dolžnost vsakega pametnega delovnega človeka očitna? Zmaga republikancev bi bila predujem ali "ara" za republikansko zmago prihodnje leto. Zato je potrebno, da je župan Thomas A. Burke ponovno izvoljen.

KOVAČIČ, FAKULT IN KOVACH ZA ČLANE MESTNEGA SVETA

Poleg župana bodo v tork voljeni tudi člani mestnega sveta ali zbornice, katerim pravimo v Clevelandu "councilmani." Mestna zbornica šteje 33 članov, ki so enako kakor župan voljeni za dobo dveh let. Državljeni slovenskega porekla so danes raztreseni malone po vsem Clevelandu, vendar množično bivajo še vedno v treh okrožjih, kjer so nastale originalne slovenske "kolonije" v Clevelandu—v "stari naselbini" na St. Clairju, v Collinwoodu, in v Newburghu. Razumljivo je torej, da kandidirajo za councilmanske urade v teh okrožjih kandidati slovenskega porekla.

Ze deset let zastopa v mestni zakonodaji prebivalec 23. varde Edward J. Kovačič. Omenjamo ga zgolj radi tega, da poudarimo itak znano dejstvo, da se je v omenjeni dobil razvil v enega najbolj vestnih in sposobnih članov mestnega sveta. Councilman Kovačič nima protikandidata, toda radi tega, da se zadosti formalnosti, bo njegovo ime na glasovnici. Glasovi, oddani zanj, bodo torej v polnem pomenu besede le izraz moralne zaupnice.

Protikandidate imata ostala dva slovenska kandidata, ki sta, kakor Kovačič, tudi demokrata. V Collinwoodu, ali 32. vardi, je to John A. Fakult, o katerem smo na kratko spregovorili že ob priliki primarnih volitev. Fakult, po poklicu odvetnik, stopa po Kovačičevih stopinjah, in si je v dobri dveh let, odkar je nastopil urad councilmana, pridobil zaupanje in spoštovanje ljudi njegovega volilnega okrožja in občje javnosti.

JOHN A. FAKULT

V 28. vardi, ali Newburghu, stoji pri teh volitvah prvič na "svojih nogah" councilman Joseph W. Kovach, ki je bil kmalu po zadnjih mestnih volitvah imenovan za člana mestne zbornice na mesto, ki se je izpraznilo z odstopom councilmana Michaela Lúca. Kovach je v Minnesoti rojen Slovenec, ki se je pred leti preselil v Cleveland, se začel tukaj takoj javno udejstvovati ter bil eno službeno dobo član državne zakonodaje v Columbusu. Oba, Fakult in Kovach, sta nam osebno poznana, oba sta značajna in poštena javna uradnika, zato ju brez vsakega pridržka priporočamo našim ljudem, da jima dajo svoje glasove.

JOSEPH STEARNS ZA SODNIKA

Ko smo pri kandidatih, ne smemo pozabiti na glasovnico za mestne sodnike.

Večina sedanjih sodnikov je brez opozicije in torej ni važno, koliko glasov bo za prizadete odanih. Želimo pa opozoriti na enega izmed kandidatov za mestnega sodnika, ki ga priporočamo v izvolitev—to je sedanji šef urada policijskih prosekutorjev Joseph Stearns. O njem smo ob par prilikah spregovorili. Torej ne pozabite naraviti križ pred imenom: Joseph Stearns.

JOSEPH STEARNS

O OBVEZNICAH IN DRUGIH JAVNIH VPRAŠANJH

V odločitev volilcem bodo dana med ostalimi tri okrajna vprašanja in tri vprašanja mesta Clevelanda. Gre za poverilo, da se izdajo obveznice za nekatere nujne javne izboljšave in vzdrževanje dobrotelčnosti, kar pa ne pomeni povišanje davčne mere. Dalje, da župan Clevelanda

istotako točni. S serviranjem bomo pričeli točno ob 6. uri in gledje, da ste pri obmizju preje, ker morebiti s vašo zakasnelostjo zadržujete ostale. S programom bomo pričeli tudi točno, kot tudi s zvočnim filmiranjem v barvah, katero je zvezano s vso poslavo, in bi bilo zelo neprijetno, da kadar se slike posnemajo, da bi bil povzročen prevelik nered in govorjenje. Prosim vas, vpoštevaite in sodelujte z odborom v hvaležnost nam in samim sebi.

Članstvo društva V boj, št. 53 SNPJ opozarjam, da se tudi ta dan vrši naša redna mesečna seja. Pričela se bo točno ob 9. uri zjutraj. Tako, kateri mislite priti na sejo, bodite točni, ker bomo poskušali sejo hitro skončati, kajti smo vsi zaposleni s delom za našo priredbo zvečer.

Prosil bi tudi vse pevce in pevke, kateri nastopite pri večernem programu, da ste na mestu ob času. Rečem naj še to, glede sedežev: kdor prej pride, boljši sedež bo dobil. Pomnite to, da je prostora v spodnji dvorani Slovenskega delavskega doma le za gotovo število, zato je priporočljivo, da si vstopnice prekrbite ob času.

Končno še kličem vsem, kateri ste se odločili, da pridete na to proslavo, dobrodošli in pozdravljeni ob 45-letnici društva V boj, št. 53 SNPJ, dne 11. novembra v Slovenskem delavskem domu na Waterloo Rd., kjer bo praznik našega dela na fraternalističnem polju!

dobi oblast imenovati načelnika policijske sile, ki mu bo odgovoren za njeno poslovanje, in pa za izboljšanje pravilnika za mestne civilne nameščence.

Vsi ti predlogi, okrajni in mestni, so koristni, in zaželjivo je torej, da jih volilci odobrijo.

V.J.G.

Naj še to pripomnim, da bo brat Cam. Zarnik, član glavnega porotnega odbora, zabaval navzoče z lepimi slovenskimi pesmimi, katere proizvajajo "Fantje na vasi," katere plošče je prinesel s seboj iz stare domovine zadnje poletje, ko se je tam nahajal. To petje je nekaj krasnega in vam ne bo žal jih slišati.

Nekaj z Jutrovega

CLEVELAND, Ohio—Iz naše naselbine je res malo dopisov. No, ker smo sedaj v sezoni volitev, bom pa jaz nekaj napisal.

Čenjeni rojaki in volilci v 28. vardi: Znano vam je, da je naš councilman Joe Kovač, ki kandidira za ponovno izvolitev. Naša dolžnost je, da zanj glasujemo. Naj prvo povem, da je on mož, na katerega se lahko zanesete v slučaju, da bi rabili kakšno pomoč. Osetno jaz to prav dobro vem, ker sem imel izkušnje že parkrat in je bil v veliko pomoč, še posebno pa je vredno, ker se lahko pogovorite z njim v slovenskem jeziku. Že veliko se je izboljšalo v naši naselbini, odkar je on naš councilman, še več bi se doseglo ali so razmere drugačne, ker danes se nahajamo v vojnem ozračju in ni vsega na razpolago. To je krivda, da ni vse izvršeno. V kratkem bodo začeli pa z delom, da pomnožijo število cestnih luči na Elizabeth, Prince in Reno Ave. Pa tudi z drugimi izboljšavami se bo pričelo v naselbini, ker je že bilo odobreno, in sicer se bo napravilo novo cesto od E. 100 St. in Reno Ave. čez do Nelson Ave., kjer bodo zgradili otroško igrišče.

Torej, zakaj ne bi ponovno volili za Joe Kovač v mestno zbornico! Tisti, ki ste morda zamudili primarne volitve 2. septembra, gledjte, da ne boste zamudili tudi rednih volitev v tork, 6. novembra. Ako ste registrirani, lahko volite. Te redne volitve so še bolj važne, ker bodo odločujoče.

Apeliram na vse Slovence v 28. vardi, da greste vsi na volišče v tork, 6. novembra in tako bomo gotovo izvolili Joe W. Kovač za prihodnji dve leti v mestno zbornico, saj je nas Slovencev tu dovolj, da ga lahko izvolimo, če se zavzamemo za to. S tem mu bomo dali priznanje in gotov sem, da bo tudi on to upošteval ter še bolj delal za napredek naše naselbine. Izvolimo svojega moža na mesto, kjer bo nas Slovence najbolj zastopal.

Era vsi na volišče v 28. vardi in volite za JOSEPH W. KOVACH za councilmana!

Pozdravljam vse čitatele Enakopravnosti!

Anton Vatovec.

Mestni pravdnik kandidira za sodnika mestnega sodišča

CLEVELAND, Ohio—Mestni pravdnik Robert Selzer, kateri je bil prvotno imenovan na to mesto za časa, ko je bil sedanji governor Frank J. Lausche župan mesta Clevelanda, kandidira pri torkovih volitvah za sodnika mestnega sodišča.

Kot veže in izkušeni odvetnik, ki je imel opravka z mestnimi zadevami v zvezi z pravdništvom, razume težnje in zapreke, ki dovedejo ljudi pred mestno sodišča. Radi tega bo vsikdar v stanu pravično razsoditi, na kateri strani je pravica in tako delal čast mestnemu sodišču s pravičnim postopanjem. Njegov rekord kot pravdni direktor je izvrsten in ne boste napravili napake, če boste v tork volili zanj.

Poiščite si glasovnico za volitev sodnikov, ko boste v tork šli v volilno kočjo, in napravite X pred imenom Robert Selzer.

CAN DO

At Fort Belvoir, Va., a few miles from historic Mount Vernon, the Army trains men to be soldier-engineers. They don't start out surveying or building pontoon bridges right away. First of all, the new recruit goes through basic training like his friends in the Infantry, Artillery, and other branches of the Service.

During basic, he learns how to be a soldier, and is thoroughly versed in military tradition and custom. He learns close-order drill and the use of small weapons. He is instructed in the care and use of the M-1 rifle, light machine gun, hand and rifle grenades, and bivouac and night operations. Then he goes on to specialized training where he learns the skills required of iron workers, riggers, shovel operators, power and hand tool specialists, lathe operators, machinists, and utility repairmen.

When the 16 weeks are over, and the soldier is a qualified member of the Corps of Engineers, he then has the opportunity to apply for advanced training at The Engineer School. The School is modern in every respect. Its students learn through the usual classroom and field techniques, with the addition of visual aids, breakdown models, and films. Instructors are expert in every phase of engineering, and are well qualified to teach the novice engineer. Reference libraries are well stocked with technical literature, and there are facilities for off-duty recreation as well.

Courses are varied and interesting to the young soldier who wants to further his Army career in the engineering branch. Here's a brief description of some of the most important courses given at the School, and the subjects studied in each course:

Map Compiling: (10 weeks) Map and aerial reading; sketching; photomapping; mosaics; mapping problems; multiplex area projector.

Engineer Drafting: (12 weeks) Map and aerial photograph reading; topographic drawing; mechanical drawing; machine drafting; general construction drafting.

Topographic Drafting: (12 weeks) Basic drafting; map and aerial photograph reading; basic topographic drafting; map compilation; map revision; color separation drawings.

Electricity: (8 weeks) Basic electricity; motors and generators; preliminary line construction practices; pole line construction; preliminary interior wiring practices; ground signal equipment; distribution transformers.

General Surveying: (12 weeks) Basic drafting; map and aerial photograph reading; mathematics; leveling; transit traverse; planetable; construction layout; earthwork plotting and computing; construction survey; triangulation.

Topographic Surveying: (12 weeks) Drafting and notekeeping; map and aerial photograph reading; mathematics; planetable; traverse procedure; triangulation; azimuth determination; astronomy; field problems.

Topographic Computing: (20 weeks) Map and aerial photograph reading; basic mathematics; field notes; projections and grid computations; field astronomy; geodetic computations; comprehensive problems.

Dozer Operation: (8 weeks) Nomenclature and functioning of tractors, dozers, and tractor-drawn equipment; internal combustion engines; practical operation of carry-all scrapers; loading and unloading of tractors and tractor-drawn equipment.

Grader Operation: (8 weeks) Nomenclature, function, and operation of motorized graders; operator engine maintenance; operation of the towed grader and crawler tractor; camouflage of engineer equipment; decontamination of engineer equipment.

Refrigeration Equipment Repair: (12 weeks) Safety precautions; theory and fundamentals of refrigeration; ice making equipment; air conditioning equipment; cold storage warehouses; mobile refrigeration equipment; and absorption refrigeration equipment.

Electric Motor Repair and Winding: (8 weeks) Basic electricity; basic shop techniques; direct current machines; rewinding three phase motors; portable generators; trouble shooting and maintenance; alternating current machines.

Water Supply and Purification: (8 weeks) Gasoline engines and pumps; storage of equipment, pipe fittings, well pumps, jetting and hydraulics; water and water analysis; water point development and water reconnaissance; servicing, operation, and maintenance of distillation equipment.

Air Compressor Operation: (8 weeks) Motor vehicle operation; LeRoi 105 cfm air compressor and Ingersoll Rand 315 cfm air compressor; standard pneumatic tools; special subjects.

Secretary of the Army Frank Pace, Jr., recently said that "in the Army's technical services the practical value of military service is readily apparent. While in Korea I saw our Engineer and Transportation Corps soldiers working together to repair and rebuild damaged railroad lines, roads, and bridges. The reconstruction was going on day and night, under great pressure, despite handicaps of material shortages and inexperienced Korean labor." He continued with a salute to the American soldier for "his fine technical training, his flair for improvisation, his capacity for hard work, and his ability to organize and direct the work of hastily recruited, unskilled local laborers."

After graduation from The Engineer School, the soldier is ready for any one of hundreds of interesting assignments. The history of the Corps of Engineers has been a proud and glorious one, and the turreted castle is one of the oldest and most well-known of all Army insignia. The 1951 engineer-soldier wears that symbol proudly. He is trained to move mountains, divert rivers, build dams, and help keep the Army moving, in war and in peace. He's a soldier, technician, specialist, and engineer—all in one.

An ingenious new technique for utilizing the microscopic power of X-rays has been developed recently at Massachusetts Institute of Technology. An atomic microscope can form images of the atoms in certain crystals that are as much as 300,000 times larger than the atoms themselves. This is sufficiently large to be photographed through an ordinary microscope.

Automobile grease in the future may contain tiny particles of sand. These smooth, minute particles will serve as microscopic ball bearings.

Throckmorton: "Do you think someone can really tell the future by looking at cards?" Bill: "My mom can. She took one look at my report card and told me just what would happen when Pop got home."

BLOOD TO SAVE PRECIOUS LIVES

When you donate a pint of the precious blood in your veins... you are helping to save a life. You are standing at the surgeon's side when he infuses your "Gift of Life" into the blood stream of a wounded soldier, the sick infant, the injured father or a mother giving birth to a child.

There is no substitute for your blood. It cannot be turned out on a production line or concocted from some secret formula. When you give your blood you are as near to the medical fighting front in your own community hospital or battle lines, as any wonder drug. Blood is a medicine. It is needed now.

Doctors and surgeons use blood to save lives. Scientists and chemists work tirelessly, seeking still further uses of blood. There are the sick, the

injured, the wounded. And there is YOU... THE DONOR... only source of this life-giving fluid.

More pints of blood are now available to you, your family, to the people of our community and to the serviceman who lies wounded in some veteran's hospital. The Cleveland Red Cross Regional Blood Center makes this possible.

Your Red Cross Blood Donor Card represents the pint of blood you gave... the card that is good immediately in any participating hospital for a pint of blood... the card that can be used by you, a member of your family, a fellow worker or friend—not only in our own community but in any of the 45 Red Cross Regional Blood Centers across the nation.

GOOD EATING—GOOD HEALTH

Teachers are becoming increasingly aware of the importance of teaching nutrition in the elementary schools. Recent surveys show that many children come to school in the morning with little or no breakfast, others are skipping lunch or buying only soft drinks and potato chips for their noon meal. Poorly nourished children are unable to do their best work in school. They are listless, inattentive and tire easily. The healthy, alert boys and girls are the well fed!

Good eating habits should be established in early childhood. The elementary grades are an ideal place to teach good nutrition. Boys and girls are very receptive at this age to suggestions and there are many activities that help to develop good habits that appeal to them. Parents of young children are also more apt to try to follow through at home any suggestions made to the children in school. Good food habits established early usually last through the individual's lifetime. It is much more difficult to correct poor habits in older children than to establish good ones in the younger.

Nutrition cannot be taught in one or two lessons, but should become an integral part of the total school program. Nutrition can be incorporated in all the usual subjects—art, arithmetic, and English, for example. In younger children the objective of nutrition education should be to develop an interest in and a liking for many different foods. Specific nutrition knowledge, as vitamin content of foods, is much better taught in science or home economic classes at the high school level.

Fred Bozik

"Gentleman" Fred Bozik, Cleveland's gift to the mat world, gets his big chance to avenge last Tuesday's beating he took from Buddy Rogers next Tuesday night at the Arena, where he faces the Nature Boy in the feature event. Promoter Jack Ganson has been ignoring Bozik for the past few weeks and Freddy took it upon himself to demand a match this week. In so doing he entered the ring last Tuesday before the start of the main event and openly challenged all heavyweights, especially Rogers. On leaving the ring Rogers grabbed him and slammed his head against the ring post inflicting a three inch gash in Freddy's forehead. It took all the police had to stop an open riot at the Arena, but Jack Ganson saved the night when he announced that Bozik would meet Rogers in the Arena, next Tuesday night, November 6th.

Yukon Eric Holmback faces Lou Sgoberg in the semi-final with the big Alaskan still main-

taining he can pin any heavy-weight twice within a half hour, Luther Lindsey tackles Wild Man Zimm, Johnny Valentine squares away with Tommy O'Toole and Joe Scarpello takes on Pierre La Salle in the opener starting at 8:30. Next Tuesday will be ladies nite at the Arena. Any lady accompanied by a purchaser of a reserved seat will be admitted for payment of tax only.

Couldn't leave the color red till we suggested a saucy starched red petticoat to wear under a dark suit or dress. And if you are penny-wise you'll make it yourself—a half-slip of muslin, the bottom flounce of eyelet embroidery. Dye a bright red with all-purpose dye, starch and you are walking in high fashion.

"I hear your son is to be a dentist," remarked Jones. "I always thought he wanted to be an ear specialist."

"Yes, I know he did," replied his father, "but I reminded him that a man has 32 teeth and only two ears."

Cold-Weather Battery

It was sunbathing weather but engineers were thinking ahead of the cold of winter when they froze this new Willard Heavy Duty De-Luxe Battery in a cake of ice to demonstrate its increased cold-weather cranking power. The iced battery cranked the car continuously for more than 12 minutes without faltering! Research on military batteries for Arctic use led to the development of this automotive battery with more cranking power. Other features include more resistance to under-hood heat and a new, stronger container that resists road shocks. The new battery is available in sizes to fit 99 per cent of the cars on the road today.

In a Detroit factory there was a character named Jud, who made a regular career out of being lazy. Anything resembling hard work would set him to puzzling for hours how to get out of it. One day an important tool belonging to Jud disappeared, and all the men helped him look for it, but to no avail. Finally one of them said: "Well, Jud, guess it's been stolen."

Jud sat down, wrinkled his forehead in thought for a moment, then muttered: "People stealin' somethin' they need I can understand. But stealin' somethin' to work with?"

Puccini's opera Tosca displays its dramatic expression with: Josephine Petrovic as Tosca; Edward Kenik as Cavaradossi; Frank Brandach as Scarpia; Joseph Mersol as Spoletta.

After a brief intermission, the performance continues with Georges Bizet's fiery Carmen.

Four scenes from this popular opera will be presented with

four different voices singing the "Carmen" role.

Scenes from the first act will be sung by: June Price as Carmen; Anthony Mramor as Don Jose; Wencel Frank as Zuniga; and the Glasbena Matica chorus.

The "Cigarette Chorus," "Habenera" and "Seguidilla" will be heard in this scene.

The second scene presents Anne Safred as Carmen; Felix Turel as Don Jose; Charles Yanchar as Escamillo; Mary Jo Zorman as Frasquita; Alice Somrak as Mercedes; Joseph Mersol as El Dancario; and the Glasbena Matica chorus; Judy Pretnar, ballet dance.

The famed "Toreador Song" is heard in this scene.
