15 KMETIJSTVO IN RIBIŠTVO AGRICULTURE AND FISHING

19. JANUAR 2005
19 JANUARY 2005

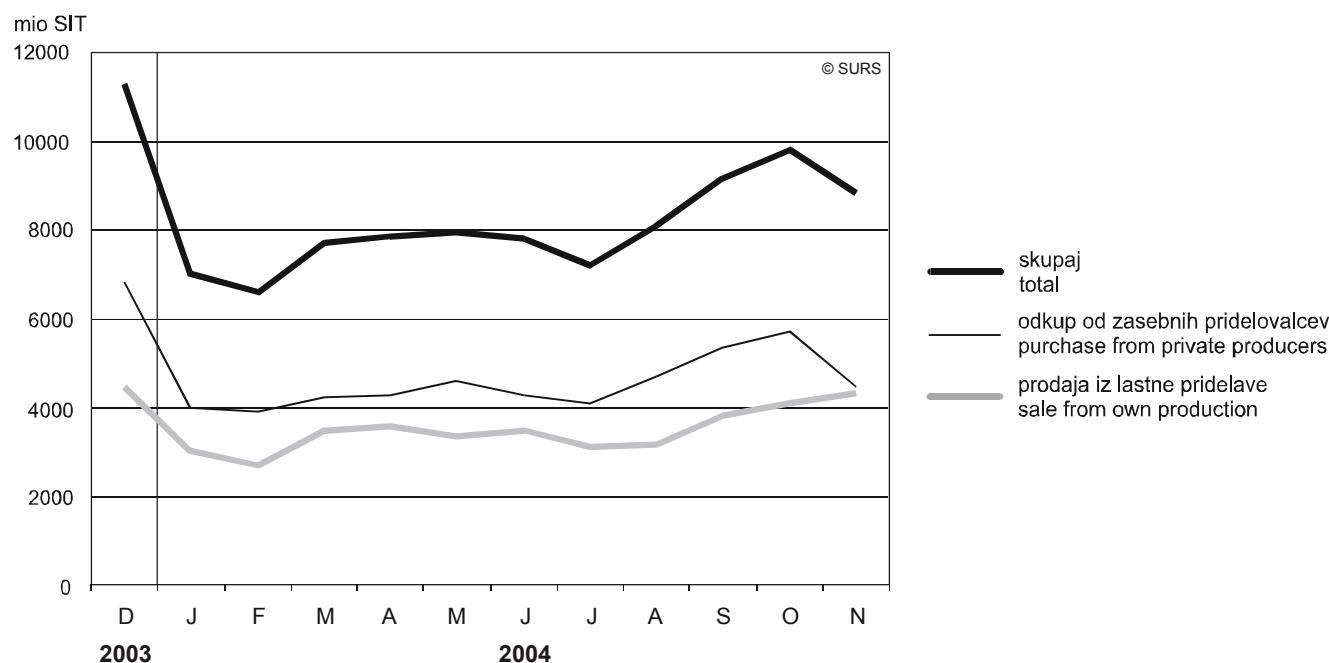

št./No 17

št./No 4

ODKUP KMETIJSKIH PRIDELKOV, SLOVENIJA, NOVEMBER 2004 PURCHASE OF AGRICULTURAL PRODUCTS, SLOVENIA, NOVEMBER 2004

- ▶ Celoten odkup kmetijskih pridelkov je bil novembra 2004 v primerjavi z oktobrom 2004 vrednostno nižji povprečno za 9,9 % (vrednost odkupa od zasebnih pridelovalcev je bila nižja za 21,6 %, vrednost prodaje iz lastne pridelave organizacij pa za 6,3 % višja).
- ▶ Vrednost odkupa je bila novembra večja v naslednjih skupinah: sadike sadnega drevja, alkoholne pijače, živina, kože in volna, ribe in les; manjša pa v skupinah žita, industrijske rastline, vrtnine, krmne rastline, sadje, grozdje, perutnina in jajca, mleko in mlečni izdelki, med in vosek ter drugi pridelki.
- ▶ Med pomembnejšimi kmetijskimi pridelki je bil količinsko večji odkup težkih prašičev, pitanih prašičev in prašičkov ter goveda in telet za zakol, jajc, vina in tehničnega lesa; količinsko manjši pa odkup perutnine za zakol, mleka, krompirja, jabolk in drv.
- ▶ In comparison with October 2004, in November 2004 the value of purchase decreased on average by 9.9% (the value of purchase of agricultural products from private producers decreased by 21.6% and the value of sold agricultural products from own production increased by 6.3%).
- ▶ In November the value of purchase increased in the following groups: fruit plants, alcoholic drinks, livestock, hides and wool, fishes and wood. The value of purchase decreased in these groups: cereals, industrial plants, vegetables, fodder plants, fruits, grapes, poultry and eggs, milk and milk products, honey and wax and other products.
- ▶ Of main agricultural products, the quantities of purchased fat pigs, porkers and sucking pigs, cattle and calves for slaughter, eggs, wine and pitprops and logs increased, while the quantities of purchased poultry for slaughter, milk, potato, apples and fuelwood decreased.

METODOLOŠKA POJASNILA

Namen statističnega raziskovanja

Na podlagi podatkov, ki jih zberemo s poročili (obrazca KME-ODK/M in KME-PRO/M), želimo prikazati mesečno gibanje odkupa in prodaje kmetijskih pridelkov. V poročilih je zajetih okoli sto pomembnejših pridelkov, ki so jih pridelovalci prodali; prikazane so količine prodanega blaga in zneski, ki so jih dobili za oddano (odkupljeno oz. prodano) blago, ter povprečne odkupne oz. prodajne cene; te so osnova za izračunavanje indeksov cen za kmetijske pridelke.

Enote statističnega opazovanja

so podjetja, zadruge in druge organizacije, ki prodajajo pridelke iz lastne pridelave ali kmetijske pridelke odkupujejo neposredno od zasebnih pridelovalcev.

Zajetje

O odkupu kmetijskih pridelkov od zasebnih pridelovalcev poročajo podjetja, zadruge, gozdna gospodarstva in organizacije, ki te pridelke odkupujejo za nadaljnjo prodajo.

O prodaji kmetijskih pridelkov iz lastne pridelave poročajo kmetijska podjetja, šole, zavodi in druge organizacije (nezasebni pridelovalci).

Količine kmetijskih pridelkov, ki jih zasebni pridelovalci sami prodajo neposredno večjim potrošnikom ali na prostem trgu (prodaja na domu, sejmih ali na živilskih trgih), tu niso upoštevane.

Definicije

Skupni odkup kmetijskih pridelkov in proizvodov zajema podatke o odkupu od zasebnih pridelovalcev ter o prodaji kmetijskih pridelkov iz lastne pridelave podjetij, zadrug in drugih organizacij.

Odkup od kmetov je odkup kmetijskih pridelkov neposredno od zasebnih pridelovalcev prek pooblaščenih organizacij, ki odkupljene pridelke prodajo naprej, lahko jih prej tudi predelajo.

Prodaja zajema prodajo kmetijskih pridelkov iz lastne pridelave zadrug, kmetijskih podjetij in drugih organizacij. K prodaji pa ne štejemo pridelkov, ki so bili kot surovine dani za predelavo lastnim enotam. V tem primeru štejemo kot prodajo izdelke teh enot (mlečne izdelke, alkoholne pijače, suho sadje itd.), ki so bili prodani.

Vrednost odkupa je znesek, ki ga zasebni pridelovalec prejme za oddane pridelke. Stroški organizacije v zvezi s prevzemom kmetijskih pridelkov od zasebnih pridelovalcev, s prevozom do skladišč, hrambo ali z uskladiščenjem se ne štejejo v vrednost odkupa.

METHODOLOGICAL EXPLANATIONS

Purpose of the survey

Data on the purchase and sale are taken from monthly reports (KME-ODK/M and KME-PRO/M). The purpose of the survey is to show monthly changes of purchase of agricultural products. Data on volume, value and average purchase prices for about one hundred main agricultural products are collected. Data are used to observe the volume and value of purchase as well as for calculating the price indices of agricultural products.

Observation units

are companies, co-operatives and other organisations selling products from their own production or purchase agricultural products directly from the farmers.

Coverage

Reports on the purchase of agricultural products from private producers are submitted by companies, co-operatives, forestry and other organisations that purchase agricultural products directly from private producers.

Reports on the sale of agricultural products are submitted by agricultural companies, schools, institutions and other organisations (not private producers).

These reports do not contain the quantities of agricultural products sold directly to larger consumers and also not the quantities sold on the free market (on the farm, on stock fairs or markets).

Definitions

Total purchase of agricultural products contains data on purchase from private producers and data on sale from own production of companies, co-operatives and other organisations.

Purchase from private producers is the purchase of agricultural products from farmers through authorised organisations for processing or further direct sale of purchased products.

Sale covers data on the sale of agricultural products from ones own production (agricultural companies, schools, institutions and other organisations). Not considered as sale is the giving of raw materials to own units for processing. In this case only the products of these units are considered as sale (dairy products, alcoholic drinks, dried fruit, etc.).

Value of purchase is the value that private producers get for sold agricultural products. Manipulation costs related to the delivery of agricultural products from farmers, with transport to the storage are not included in the value of purchased products.

Vrednost prodaje je znesek, ki ga nezasebni pridelovalci dobijo od prodaje kmetijskih pridelkov iz lastne pridelave; ta zajema tudi stroške, ki nastanejo v zvezi s pripravo pridelkov za dobavo do nakladalnega kraja (sortiranje, pakiranje ipd.). V vrednosti prodaje niso zajeti vratljiva embalaža, transportni stroški od nakladalne do razkladalne postaje in olajšave, ki jih organizacije odobrijo kupcem.

Premije, regresi, kompenzacije ipd., ki jih pridelovalci dobijo za določene pridelke, v vrednosti odkupa in prodaje niso zajeti.

Odkupne oziroma prodajne cene izračunamo tako, da vrednost posameznega pridelka delimo z njegovo količino. To so pravzaprav povprečne vrednosti na mersko enoto. Poročevalske enote nam sporočijo celotno količino in vrednost za posamezne odkupljene in prodane pridelke, ne glede na kakovost, sорт ali tip pridelkov. Cene ne vključujejo DDV.

Objavljanje rezultatov

KOMENTAR

Novembra 2004 je vrednost odkupa kmetijskih pridelkov znašala 8 milijard 828 milijonov tolarjev in je bila v primerjavi z vrednostjo odkupa v oktobru 2004 za 9,9 % nižja, glede na november 2003 pa za 8,2 % nižja.

Vrednost odkupa v živinoreji kot najpomembnejši skupini je bila novembra 2004 skoraj enaka kot oktobra 2004; od pomembnejših skupin v skupini živinoreja je bila manjša vrednost odkupljene perutnine in jajc (za 6,4 %) ter mleka (za 2,8 %), več pa je bilo po vrednosti odkupljene živine (za 11,3 %). Na spremembe v vrednosti odkupa v skupini živinoreja so vplivale večje oz. manjše odkupljene količine. Tako je bilo težkih prašičev, pitanih prašičev in prašičkov, goveda in telet za telet za zakol ter jajc odkupljenih več, manjši pa je bil količinski odkup perutnine za zakol in mleka. Cene živali in živalskih proizvodov pa so se novembra glede na oktober v povprečju znižale za 0,5 %.

V drugih skupinah se je vrednost povečala v skupinah: sadike sadnega drevja (večji odkup vseh vrst sadik), alkoholne pižače (večji odkup vseh vrst vina), kože in volna (večji odkup govejih in telečjih kož), ribe (večji odkup školjk, postrvi, krapov) ter v skupini les (večji odkup celuloznega in tehničnega lesa); manjši pa je bil po vrednosti odkup v skupinah: žita (precej manjši odkup pšenice, porasel pa je odkup koruze v zrnju), industrijske rastline (manjši odkup sladkorne pese in buč za olje, odkup hmelja pa je bil malo višji); sadjarstvo in vinogradništvo (manjši odkup jabolk, hrušk, grozdja za predelavo, višji pa je bil odkup vina); cene sadja so porasle za 9,0 %, cene kakovostnega vina pa v povprečju za 21,9 %.

Value of sold agricultural products is the value that nonprivate producers get for sold agricultural products from own production; it includes costs of preparation of products for delivery and transport to the loading place (sorting, packing, etc.). The price of packaging, which is returned, and the costs of transport to the loading and unloading station and other facilities of payment granted to the buyer are also not included.

Bonuses, reimbursements, compensations, etc., which producers obtain for certain products, are not included in the value of purchase or sale.

The prices of purchase and sale are calculated by dividing the value of the agricultural product by its quantity. The prices are in fact average values per unit of measure. Enterprises report all quantities and volume of purchased and sold agricultural products irrespective of the quality or type. Prices do not include VAT.

COMMENT

In November 2004 the value of purchase of agricultural products was SIT 8.828 billion. In comparison with October 2004 it decreased by 9.9% and in comparison with November 2003 by 8.2%.

In comparison with October 2004, in November 2004 the value of purchase in the most important group – livestock breeding – was nearly the same; of the most important subgroups in the group livestock breeding the value of purchased poultry and eggs decreased by 6.4% and milk by 2.8%, while the value of purchased livestock increased by 11.3%. In fact, the value increased or decreased in line with purchased quantities; the purchase of fat pigs, porkers and sucking pigs, cattle and calves for slaughter and eggs increased, while the quantities of purchased poultry for slaughter and milk decreased. On average, the prices of animals and animal products in November in comparison with October decreased by 0.5%.

As regards other groups, the value of purchase increased in fruit plants (higher purchase of all fruit trees), alcoholic drinks (higher purchase of all kinds of wine), hides and wool (higher purchase of cattle and calves raw hides), fishes (higher purchase of shells, trout, carps) and in the group wood (higher purchase of pulpwood and pitprops and logs). On the other hand, the value of purchase decreased in the groups cereals (lower purchase of wheat but higher purchase of corn), industrial plants (lower purchase of sugar beet, and pumpkins for oil, while the purchase of hops was a little higher), fruit and wine growing (lower purchase of apples, pears and wine grapes, but higher purchase of wine). The prices of fruits increased by 9.0% and the prices of quality wine by 21.9%.
