Chart 2: Resident population on tourism trips by activity status, 4th quarter 2006

Od turistov, ki so odšli na zasebno potovanje v 4. četrtletju 2006, jih je 42,0 % odšlo na vsaj eno daljše zasebno potovanje; to pomeni, da je zunaj svojega običajnega okolja prenočilo najmanj 4-krat zaporedoma 9,3 % prebivalcev. V primerjavi s 4. četrtletjem 2005 se je število prebivalcev, ki so odšli na vsaj eno daljše zasebno potovanje, zmanjšalo za 1,0 %.

64,6 % turistov je odšlo na eno zasebno potovanje, 17,0 % na dve, 6,7 % na tri, 11,7 % pa jih je odšlo na štiri ali več zasebnih potovanj. Izmed turistov, ki so bili na daljših zasebnih potovanjih, je bilo 89,3 % takih, ki so odšli le na eno daljše zasebno potovanje, 9,0 % turistov je odšlo na dve, 1,7 % pa na tri ali več daljših zasebnih potovanj.

Delež turistov je med moškimi znašal 28,4 %, med ženskami pa 23,8 %. Na zasebno potovanje je odšlo 23,1 % moških in 21,2 % žensk. Zanimiva je tudi primerjava deležev oseb, ki so odšle na zasebno potovanje, po starostnih razredih. Največ oseb, ki se je udeležilo zasebnih potovanj, je bilo iz starostne skupine 15 do 24 let (34,5 %). Z vidika stopnje izobrazbe je bilo med udeleženci zasebnih potovanj največ oseb z visoko izobrazbo ali višjo od te, in sicer 40,6 %, najmanj, le 15,4 %, pa oseb z osnovno izobrazbo ali nižjo od te. Z vidika statusa aktivnosti se je zasebnih potovanj udeleževalo največ dijakov in študentov (36,0 %). Glede na število članov gospodinjstva je bil med osebami, ki so v tem četrtletju odšle na zasebno potovanje, največji delež tistih, ki so člani tri- ali štiričlanskega gospodinjstva (24,4 %), najmanjši pa tistih, ki živijo sami – v enočlanskem gospodinjstvu (13,5 %). Primerjava turistov po tipu naselij, od koder le-ti prihajajo, kaže, da je odšlo na zasebno potovanje največ primestnega in mestnega prebivalstva (28,7 % in 28,6 %).

Of the tourists who went on private trips in the 4th quarter of 2006, 42.0% went on at least one longer private trip, which means that 9.3% of the population spent at least once four consecutive nights outside the place of their usual environment. In comparison with the 4th quarter of 2005 the number of population who went on at least one longer private trip decreased by 1.0%.

64.6% of tourists went on one private trip, 17.0% went on two, 6.7% went on three and 11.7% went on four or more private trips. Of the tourists who went on longer private trips, 89.3% went on one longer private trip, 9.0% on two and 1.7% on three or more longer private trips.

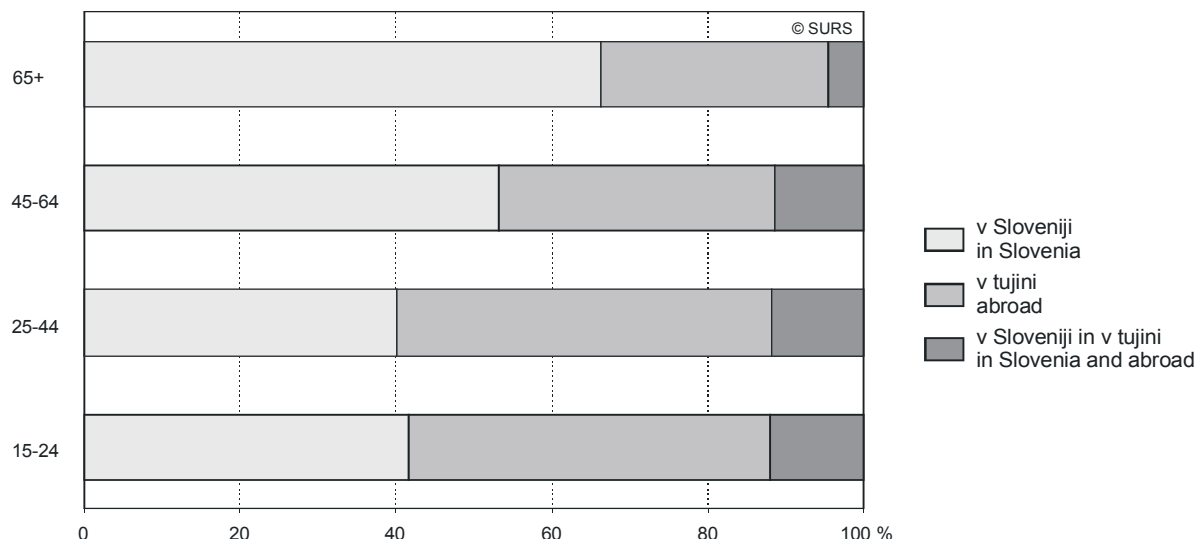

As regards sex, 28.4% of the male population and 23.8% of the female population went on at least one private or business trip. 23.1% of men and 21.2% of women went on private trips. An interesting comparison is the one by age classes: the greatest percent of people who went on private trips was recorded in the age group 15–24 (34.5%). As regards the level of school education, 40.6% of persons with university education or more and only 15.4% of persons with elementary education or less went on private trips. According to the activity status, the most students or persons in education (36.0%) went on private trip. As far as the number of household members is concerned, the share of people living in 3- or 4-member households is the highest (24.4%) and the share of people living alone in single households is the lowest (13.5%). Comparison by type of settlements where the respondents are coming from shows that most of the suburban and urban population went on private trips (28.7% and 28.6%).

47,6 % turistov je bilo na zasebnih potovanjih le v Sloveniji, 41,4 % le v tujini in 10,9 % v Sloveniji in v tujini.

47.6% of private tourists were only travelling in Slovenia, 41.4% only abroad and 10.9% both in Slovenia and abroad.

Neudeležba na zasebnih potovanjih

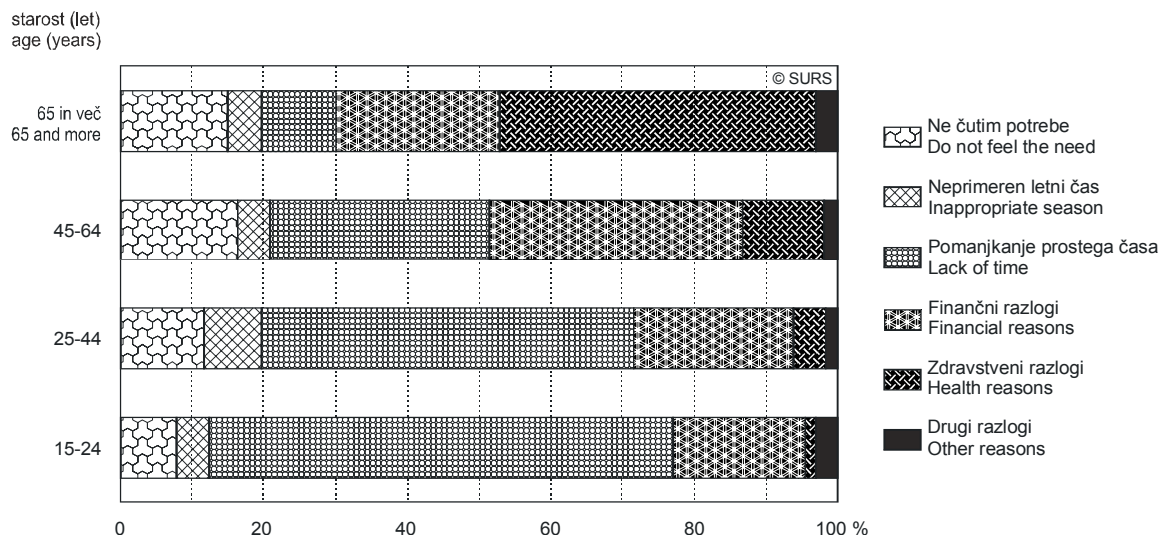

77,9 % prebivalcev Slovenije, starih 15 let ali več, v 4. četrtnetu 2006 ni odšlo na zasebno potovanje. Od teh je 38,3 % oseb odgovorilo, da zaradi pomanjkanja prostega časa, 26,4 % pa zaradi finančnih razlogov. Pomanjkanje prostega časa je bilo v največji meri prisotno v starostnih skupinah 15-24 let in 25-44 let ter med (samo)zaposlenimi in dijaki ali študenti. 14,1 % prebivalcev ni odpotovalo zaradi zdravstvenih razlogov; to je bil tudi glavni razlog v starostni skupini 65 let in več ter med upokojevci. 13,4 % prebivalcev ni čutilo potrebe po potovanju; število teh se je v primerjavi s 4. četrtnetjem 2005 povečalo za tretjino.

Not going on private trips

77.9% of Slovenian population did not go on private trips in the 4th quarter of 2006; 38.3% of them stated lack of time as the main reason and 26.4% mentioned financial reasons. Lack of time was the most important in the age groups 15-24 and 25-44 and among (self-)employed and students and persons in education. 14.1% of the population didn't go on any private trip because of health reasons – this was the main reason in the age group 65 and over and among retired persons. 13.4% of the population did not feel the need to go. The number of those increased by a third in comparison to the 4th quarter of 2005.

STATISTIČNA ZNAMENJA

- ni pojava

METODOLOŠKA POJASNILA**Namen statističnega raziskovanja**

S četrtletno Anketo o turističnih potovanjih domačega prebivalstva – TU-ČAP, ki smo jo uvedli z letom 2000, zbiramo podatke o potovanjih slovenskega prebivalstva: zakaj, kdaj, kam, za koliko časa, kako ljudje odhajajo zdoma in koliko denarja za to porabijo. Namen raziskovanja pa je tudi spoznati, zakaj nekateri prebivalci nikoli ne zapuščajo svojega doma zaradi turističnih potovanj.

Leta 1995 je Svet Evropske unije sprejel Direktivo 95/57/ES za področje statistike turizma; ta določa tudi obseg in natančnost podatkov o potovanjih domačega prebivalstva. Določila te Direktive so v anketi v celoti upoštevana.

Enota opazovanja

Ciljna populacija so prebivalci Slovenije, stari 15 let ali več. Enota opazovanja pa je član izbranega gospodinjstva, star 15 let ali več, ki bo prvi od anketarjevega klica dalje, imel rojstni dan.

Viri in način zbiranja podatkov

Podatke o turističnih potovanjih domačega prebivalstva zbiramo s telefonsko, računalniško podprto anketo (CATI). Izvajamo jo četrtletno, torej vsake tri mesece: januarja, aprila, julija in oktobra. Referenčno obdobje je četrtletje pred mesecem anketiranja, to pomeni, da se je potovanje moralo končati v tem obdobju, začelo pa se je lahko največ eno leto pred tem.

Vsako četrtletje izberemo v vzorec telefonske številke oz. gospodinjstva iz telefonskega imenika naročnikov. Na naslov imetnika telefonskega priključka pošljemo obvestilno pismo in zgibanko, s katerima gospodinjstvo obvestimo, da jih bo poklical anketar statističnega urada, in jih seznanimo z vsebino ankete.

Izmed članov gospodinjstva izberemo anketiranca po metodi "prvega rojstnega dne". Anketar torej želi govoriti s članom gospodinjstva, stari 15 let ali več, ki bo (od datuma anketarjevega klica) prvi imel (praznoval) rojstni dan. Vsa vprašanja, razen vprašanja o porabi sredstev za potovanje, se nanašajo samo na izbranega člana. Vprašanje o porabi sredstev za zasebno potovanje se lahko nanaša na vse udeležence potovanja.

Vzorec

Vzorčni okvir je telefonski imenik zasebnih telefonskih naročnikov v Republiki Sloveniji. Vzorec je stratificiran sistematični. Stratumi so definirani s statistično regijo (12 regij) in tipom naselja znotraj statističnih regij (6 tipov). V vsakem stratumu smo vzorčili neodvisno. Število enot oziroma telefonskih števil v posameznem stratumu je sorazmerno glede na delež oseb, starih 15 let ali več, ki živijo v območju posamezne statistične regije, in glede na velikost naselja. V prvem, drugem in tretjem četrtletju je v vzorec izbranih 3 000 telefonskih števil, v četrtem pa 6 000.

Stopnje (ne)odgovorov

V 4. četrtletju 2006 je bilo za anketiranje ustreznih 5 945 števil, v anketi pa je sodelovalo 3 849 oseb. To pomeni, da je stopnja ustreznosti

METHODOLOGICAL EXPLANATIONS**Purpose of the statistical survey**

With the quarterly Survey on Tourism Travels of Domestic Population, which we introduced in 2000, we collect data on travels of Slovenian population: why, when, where, for how long and with what vehicle people travel and how much money they spend. The purpose of this survey is also to find out why some people do not leave their homes for the purpose of tourism travels.

In 1995 the Council Directive 95/57/EC for the field of tourism statistics was adopted, which also defines the extent and accuracy of data on tourism travels of the resident population. This survey follows the definitions and principles of the Directive.

Observation unit

The target population is the resident population of Slovenia aged 15 years or more. Observation unit is a member of a selected household aged 15 years or more who is the first in the household to have his/her birthday after the date of the interviewer's call.

Sources and methods of data collection

Data on tourism travels of domestic population are collected by a computer assisted telephone survey (CATI). The survey is carried out quarterly, i.e. every three months: in January, April, July and October. The reference period is the quarter before the month in which the survey is implemented. This means that the trip should have been finished in this period, while it can start one year before at the most.

Every quarter a sample of telephone numbers (households) is selected from the list of telephone subscribers. We send a letter and a brochure to the address of the owner of the telephone to inform the household that an interviewer from the Statistical Office would call. We also inform the household about the content of the survey.

Of all household members we select the respondent according to the "first birthday" method. The interviewer thus talks to the household member aged 15 or more who is the first in the household to have (celebrate) his/her birthday after the date of the interviewer's call. All questions, except the question on expenditure for travelling, can refer only to the selected member of the household. The question on expenditure for private travelling refers to all participants who went on the trip.

Sample

The sampling frame is the directory of private telephone subscribers in the Republic of Slovenia. The sample is stratified systematic. Strata are defined with statistical region (12 regions) and type of settlement within the region (6 types). Each stratum was sampled independently. The number of units (telephone numbers) in each stratum is proportional to the share of persons aged 15 or more living in the area of statistical region and the size of settlement. In the first, second and third quarter 3,000 telephone numbers are selected in the sample and in the fourth 6,000.

(Non)response rates

In the 4th quarter of 2006, 5,945 numbers were eligible and 3,849 persons took part in the survey. This means that the eligibility rate was 99.1% and

dosegla 99,1 %, stopnja odgovora pa 64,7 %. Stopnja neodgovora je znašala 35,3 %, od tega stopnja zavračanja 21,3 %.

Uteževanje

Podatki so uteženi glede na velikost gospodinjstva, ker imajo osebe, ki živijo v gospodinjstvih z več člani, manjšo verjetnost izbora. Poleg osnovnega uteževanja uporabimo dodatno uteževanje (kalibracijo), ki prilagodi porazdelitev kontrolnih spremenljivk znani populacijski sestavi. Za prilagoditev smo uporabili naslednje spremenljivke: spol, starost, izobrazbo, velikost gospodinjstva, statistično regijo in tip naselja.

Natančnost ocen

Natančnost ocen za nekatere ciljne spremenljivke je bila ocenjena s pomočjo programskega paketa Sudaan 9.0. Natančnost preostalih objavljenih podatkov je bila ocenjena s pomočjo modela.

Merila natančnosti:

- ocene s koeficientom variacije, manjšim od 0,10 ($CV \leq 0,10$) ali enakim tej vrednosti, so objavljene brez omejitev;
- ocene s koeficientom variacije od 0,10 do 0,15 ($0,10 < CV \leq 0,15$) so objavljene v enojnih oklepajih;
- ocene s koeficientom variacije od 0,15 do 0,30 ($0,15 < CV \leq 0,30$) so objavljene v dvojnih oklepajih;
- ocene s koeficientom variacije, večjim od 0,30 ($CV > 0,30$), niso objavljene, nadomeščene so s piko.

Uporabnik ocen (podatkov) iz ankete naj bi pri uporabi rezultatov upošteval, da so ocene, objavljene brez omejitev, dovolj zanesljive, tiste v oklepajih pa manj.

Seštevki se zaradi zaokroževanja ne ujemajo vedno.

Definicije in druga pojasnila

Turizem je splet dejavnosti oseb, ki potujejo in bivajo najmanj en dan v kraju zunaj njihovega običajnega okolja (z najmanj 1 prenočitvijo), vendar ne več kot eno leto (365 dni) brez presledka, in sicer zaradi preživljanja prostega časa, poslovnih ali drugih razlogov. Po dogovoru so izločeni določeni neprostovoljni nameni potovanja, npr. bivanje v bolnišnici ali podobni medicinski ustanovi, ki zagotavlja klinično/medicinsko zdravljenje, kot ga je določil zdravnik, bivanje v zaporih ipd.

To je osnovna definicija, ki jo je sprejela Svetovna turistična organizacija (WTO) in s tem tudi naša država, ki je članica te organizacije. Definicijo so prevzele tudi članice Evropske unije in je navedena v zakonskih aktih, ki zadevajo statistiko turizma.

Turist je oseba, ki potuje v kraj, ki ni del njenega običajnega okolja, in tam vsaj enkrat prenoči, vendar zaporedno ne več kot 365-krat, in sicer zaradi preživljanja prostega časa, poslovnih ali drugih razlogov, vendar ti

the response rate was 64.7%. The non-response rate was 35.3%, of that the refusal rate was 21.3%.

Weighting

Data are weighted regarding the household size because persons living in households with more members are less likely to be selected. Besides the basic weighting additional weighting is used (calibration), which adjusts the distribution of control variables to the known population structure. For adjustment we used the following variables: sex, age, level of education, household size, statistical region and size of settlement.

Precision of estimates

Precision of estimates for some target variables was estimated with the help of Sudaan 9.0 software. For other published data the precision is estimated with the help of a model.

Error criteria:

- estimates with the coefficient of variation under or equal to 0.10 ($CV \leq 0.10$) are published without limitations;
- estimates with the coefficient of variation between 0.10 and 0.15 ($0.10 < CV \leq 0.15$) are published in single parentheses;
- estimates with the coefficient of variation between 0.15 and 0.30 ($0.15 < CV \leq 0.30$) are published in double parentheses;
- estimates with the coefficient of variation over 0.30 ($CV > 0.30$) are not published, but each one is substituted by a dot.

The user of survey estimates (data) should take into account that estimates published without limitations are sufficiently reliable, while those in parentheses are less reliable.

Totals are not always accurate due to rounding.

Definitions and other explanations

Tourism includes the activities of people travelling and staying away from their place of usual environment for at least one day (spending at least one night), but not more than a year (365 days) continuously, for leisure, business or other reasons. Some non-voluntary purposes of trips are excluded by convention: non-voluntary stays in hospital or other medical institutions providing clinical/medical treatment, which is prescribed by doctor, stays in prison, etc.

This is the basic definition adopted by the World Tourism Organisation (WTO) and thus also by our country since Slovenia is a member of this organisation. Definition was also adopted by members of the European Union and it is quoted in regulations concerning tourism statistics.

Tourists are persons who travel to and stay in a place that is not part of their usual environment and who spend at least one night there (but not more than 365 nights consecutively) for leisure, business or other

v kraju potovanja niso pridobitnega značaja (turist ne prejme plačila, nagrade). značaja (turist ne prejme plačila, nagrade).

Običajno okolje osebe sestavljajo neposredna okolica njenega doma in kraja dela ali študija ali drugih krajev, ki jih oseba stalno obiskuje. Oseba ima samo eno "običajno" okolje, zato razna počitniška in podobna bivališča niso del običajnega okolja in se tudi večdnevni odhodi tja, zlasti ob koncu tedna, obravnavajo kot turistična potovanja. Le izjemoma, če so ti odhodi redni (vsak konec tedna v opazovanem obdobju), se običajno okolje lahko razširi tudi na počitniško bivališče in se zato ti odhodi ne uvrščajo med turistična potovanja.

V Anketi o turističnih potovanjih domačega prebivalstva smo spraševali tudi o rednih, vsakotedenskih odhodih vedno v isti kraj. Ta potovanja smo upoštevali v prikazu skupnega števila potovanj, vendar s pogojem, da v referenčnem obdobju anketiranec ni odšel v ta kraj več kot 10-krat, torej ne vsak konec tedna.

Turistična potovanja so vsi odhodi od doma z najmanj 1 prenočitvijo, vendar ne z več kot 365 zaporednimi prenočitvami, in to iz prej navedenih razlogov. Vsako potovanje zajema pot in bivanje. Lahko ima več vmesnih točk postanka, a glavni cilj je le eden. Prav tako je možen le en glavni razlog, in to je tisti, brez katerega tega potovanja ne bi bilo.

Turistična potovanja delimo glede na glavni razlog na:

- poslovna potovanja in
- zasebna potovanja.

Poslovna potovanja so tista, katerih glavni razlog za odhod je poklicne ali študijske narave, npr. kongresi, seminarji, poslovna srečanja, poklicna športna udeležba, zaposlenost v prevoznih dejavnosti, npr. vozniki tovornjakov ipd.

Zasebna potovanja so tista, katerih glavni razlog za odhod na potovanje je:

- preživljanje prostega časa (počitnice, dopust, potovanje),
- obisk sorodnikov in prijateljev (pogrebi, poroke in drugi podobni razlogi) in
- drugi razlogi (neznani).

Pri zasebnih potovanjih zaradi preživljanja prostega časa so se udeleženci lahko odločali za naslednje možne aktivnosti med potovanjem:

- sprostitvev, počitek, zabava,
- rekreativne dejavnosti,
- ogled naravnih in kulturnih znamenitosti,
- ogled kulturnih, zabavnih, športnih prireditev,
- sodelovanje na kulturnih, zabavnih in športnih prireditvah (neprofesionalno),
- nakupovanje,
- izobraževanje,
- skrb za zdravje, bivanje v zdravilišču,
- romanje in religiozne dejavnosti,
- drugo.

Potovanja, ki **niso uvrščena** med turistična potovanja:

- tedenske migracije ali odhodi na delo ali šolanje,
- sezonsko delo,
- bivanja v bolnišnicah ali zdraviliščih kot podaljšano bolnišnično zdravljenje,
- odhodi v zapor,
- begunstvo in iskanje azila,
- enodnevni izleti brez prenočitve.

Trajanje potovanja se meri v številu prenočitev. Po številu prenočitev delimo potovanja na *krajša* in *daljša*. Na krajših potovanjih je turist

reasons, but not to make profit in the place visited (they are not remunerated).

Usual environment of a person is immediate surroundings of the person's home and place of work or study, or other places that the person regularly visits. Each person has only one "usual" environment, therefore various holiday homes and similar dwellings are not part of the usual environment; even spending several days there, especially during the weekends, is treated as tourism trip. Only exceptionally, if departures are regular - i.e. every weekend in the observed period - the usual environment can be expanded to the holiday home and therefore these departures are not counted as tourism trips.

In the Survey on Tourism Travels of Domestic Population we asked also about regular, weekly departures to the same place. These trips were taken into account in the total number of trips only if the respondent did not go there more than 10 times in the reference period, i.e. not every weekend.

Tourism trip is every departure from home for the above reasons when at least one night is spent but not more than 365 nights consecutively. Every trip covers journey and staying. It can have several stops on the way but there is only one final destination. There is also only one main reason, i.e. the one without which the trip would not take place.

Tourism trips are divided by the main reason into:

- business trips and
- private trips.

Business trips are those the main reason of which is of professional or study nature, e.g. congresses, seminars, business meetings, professional sport participation, employment in transport activity (e.g. lorry drivers), etc.

Private trips are those the main reason of which is:

- leisure time (holidays, travels),
- visiting relatives and friends (funerals, marriages and similar reasons),
- other reasons (unknown).

In private trips for which the reason was leisure the participants could decide among the following activities during the trip:

- relaxation, resting,
- recreation,
- sight-seeing,
- culture, entertainment, sports as spectator,
- culture, entertainment, sports as participant (unprofessional),
- shopping,
- education,
- health reasons,
- pilgrimages, religious events,
- other.

These trips are **not considered** to be tourism trips:

- weekly migration or departure for work or schooling,
- seasonal work,
- staying in hospitals or health resorts as extended hospital treatment,
- departure to prison,
- refugees and asylum seekers,
- one-day trips without spending the night.

Duration of trip is measured with nights spent. With regard to the number of nights spent, we distinguish between *shorter and longer* trips.

prenočil od enkrat do trikrat, na daljših pa najmanj štirikrat.

Povprečni izdatki oz. povprečna poraba na turističnih potovanjih zajema potne stroške, nastanitvene stroške, stroške za hrano, pijačo, vstopnine ipd.

V anketi smo spraševali tudi po vrsti glavnega prevoznega sredstva, vrsti prenočitvenih zmogljivosti, datumu odhoda in ali so bila potovanja kakor koli organizirana s pomočjo potovalnih agencij. Pri domačih zasebnih potovanjih smo spraševali, v katerem kraju je anketiranec prenočeval, pri potovanjih v tujino pa po državi, kjer je preživel večino časa. Tako pri poslovnih kot zasebnih potovanjih smo spraševali, koliko denarja so porabili za potovanje.

Anketa o turističnih potovanjih domačega prebivalstva ni namenjena le zbiranju podatkov o potovanjih, temveč odgovarja tudi na vprašanje, zakaj nekateri prebivalci Slovenije ne odhajajo na turistična potovanja. Ti podatki prispevajo k natančnejši socialni sliki prebivalstva.

Bistveni podatki v statistiki turizma so tudi podatki o značilnostih oseb, ki se udeležujejo turističnih potovanj, in o njihovem gospodinjstvu: o stopnji izobrazbe, statusu aktivnosti (med samozaposlene so uvrščeni tudi kmetje), letu rojstva in spolu anketiranca ter številu članov v gospodinjstvu in mesečnem neto dohodku gospodinjstva. Tudi te podatke smo pridobili s to anketo.

Mesečni neto dohodek na člana gospodinjstva je izračunan iz skupnega mesečnega neto dohodka gospodinjstva: plač, pokojnin, dohodkov iz dejavnosti, lastnine, kmetijstva, nadomestil za brezposelnost, štipendij, otroških dodatkov ipd.

On shorter trips tourists spend 1-3 nights and on longer ones 4 or more nights.

Average expenditure on tourism trips comprises travelling expenses, expenses for accommodation, food and beverage, shopping, entrance fees, etc.

In the survey we asked about the main means of transport, type of accommodation, departure date and whether trip was in any way organised with the assistance of travel agencies. In private trips in Slovenia we asked about the locality where the respondents spent the night, while in trips abroad we asked about the country where they spent most of the time. Both for business and private trips we asked about the amount of money spent for the trip.

The aim of the Survey on Tourism Travels of Domestic Population is not only to collect data on travels, but also to answer the question why the people of Slovenia do not go on tourism trips. These data contribute to more accurate social portrait of the population.

The essential data in tourism statistics are also the data on the profile of a tourist. We collected the data on the respondents and their households: level of education, activity status (farmers are counted as self-employed), year of birth and sex of the respondent, the number of household members and monthly net income of the household.

Monthly net income per household member is calculated from the total monthly net income of the household: wages/salaries, pensions, income from activity, property, farming, unemployment benefits, scholarships, child benefit.
