# CONDITIONS

### By Vera Candon

I am very interested in this industrial panic, which every one of us is experiencing. Its causes, its results, and above all a solution to this great problem are all so vitally important that each individual ought to be

which a few years ago men did. We inquired about this and our guide told us that women could be obtained for almost nothing, today conditions in thousands of homes made it necessary for women to work so they are willing to do any work.

At the American Steel & Wire Co. we learned that of the twelve blast furnaces which the company owns, only four of them are being operated.Just a word about this place. It probably was the most interesting of all the places which we visited. I thought that the blast furnaces were the most remarkable fireworks which I have ever witnessed. The beautiful star-shaped sparks and the white hot flame are quite thrilling to watch. I even got so close at one time that I carried a souvenir spark home with me. But I didn't go back for another. Then the way in which the wire is made is quite ingenious. Can you imagine a five hundred pound block of molten iron sufficiently compressed and stretched until it is a wire? Well, that is exactly what happens. These huge blocks are slowly compressed and finally when they come out at the end of the factory, we find that our block is gone and that in it's place we have a thin wire.

also be severely criticized because they have not tried to put a stop to some of the corruptive moves which have been made recently. In fact, they have urged them on. How can people believe in such an administration?

Other factories which we visited were Nela Park and Fisher Body. The same impressions were left with us throughout our trip. No one had any solution to offer and each had his own reasons for the causes of

The whole world is sitting back watching to how soon we'll break. And why shouldn't they. own government is doing the same thing. Instead doing something, they keep wondering about W they should do. They are as bad as the small chap w has a penny to spend in a large confectionary su He can't decide because there are so many different kinds.

### interested in it.

Last week I attended an inspection trip with the industrial engineers from Ohio State University. Our chief purpose was to see ourselves in just what condition the factories are in. How many men and women they are employing, what they are doing to try to solve this unemployment situation.

But first of all let me tell you just what impressions were left with me by the end of the week. Our first visit was to the Lincoln Electric Co. We were first taken to the fourth floor, where we witnessed a very interesting demonstration on the different types of weldings and how to distinguish them. There things, after we came there I believe, looked fairly good. There seemed to be quite a few men working; but when we got down to the lower floors, we felt as though we had intruded upon some deserted house. The entire place was morose and lonely. Here and there, there was a man and he actually was a treat to our eyes.

Our guide explained that their selling is at a complete standstill and that at the present time they are employing only twenty-five percent of the normal number of men. Even those are working only a few days a week.

So, we continued through the National Acme and the Cleveland Twist Drill. Although things were a little brighter in these places still that same feeling of empti-

Our next trip was to the White Motor Co. Here again the same tale prevailed. A number of the departments here had been completely "wiped out" because of this industrial struggle. I was particularly interested in the reasons which our guide gave to us for the causes of this crisis.

"This panic," he said, "is not due to the industrial over-supply, but to our corruptive political parties."

The existing political parties, he claimed, have caused an uneasiness and mistrust in the government of our country. They have forced the people to hoard their money rather than to spend it as they previously did.

this condition into which our country has fallen.

Our only relief from depression and emptiness was the Richman Bros. Co. It actually was a relief to go there merely because everything was busy. Much like old times. Sewing machines were purring as hard as they ever have. The girls worked faster than I ever supposed that a human being could. Everything was cheerful there. The girls' faces were bright and alert; each one in earnest to do her best and as much as possible. There seemed to be no "hanging on" for the sake of life or death as there was in the other places. Everyone seemed to be pretty sure of himself.

Maybe they weren't as happy as they seemed to us. Maybe we were just so glad to see one place at least working that we thought they were cheerful. I don't know, but I certainly hope that it really is as bright as it looked to us.

And so, we covered a number of Cleveland's largest factories, and with the exception of one place we left very unhappy and wondered what this world is coming to. Who has a solution and when will it be presented was all that we could think of.

I shall in just as few words as possible tell you what I think of the entire situation. First of all I think that it is a lot worse than what the papers and the government pretend that it is. I don't know whether they are trying to fool themselves or the public by

It is terrible to think that our government is s such a small thing that it can't make it's decision little more quickly, especially in a time of need.

If a mother were so slow about attending to sick and hungry child as our administration is to m the needy I'm afraid that few of us would live to more than a few years old. And so unless if sometime happens pretty soon, our nation will soon be a th of the past also.

But, since so many of these things are beyond of control let us at least try to help our own association There are hundreds of Slovenes who are suffering " this panic, who are begging for a piece of bread. Let co-operate and help to relieve these people. Remeine that in this case differences in opinion and por cal disagreements should make no difference.

One of the greatest faults of the Slovenes is some very insignificant difference will cause the peop to side up and soon they are enemies. Then no man how good the cause and purpose of some undertakt the other side does its best to "boo" the undertaking And this condition unfortunately prevails through the laboring class. Why can't we as the aristocrats as one rather than as small incompetent of ms.

Without unison and co-operatio attain our goal of equality with th
