Pred 2000 leti proti Severnemu tečaju

Grk Pytheas potuje proti severu in pride v Skandinavijo

Ko bi kdo trdil, da je pred 2000 leti kdo poskusil priti na Severni tečaj, bi bila to norost. Resnica pa je ta, da je l. 330 pr. Kr. Grk, ki se je imenoval Pytheas, nastopil veliko potovanje proti severu in je, po vseh okoliščinah sodeč, prišel morda celo do skandinavske obale. Gotovo Pytheas ni iskal Severnega tečaja, saj Grki o Severnem tečaju niso še nič vedeli. Stari narodi so si mislili zemljo kot trdno stoječo ploščev, ki je na obeh robovih obdana od oceana. Če pa Grki niso poznali zemeljskega Severnega tečaja, so pa vendarle nekaj slutili o nebesnem Severnem tečaju. Saj so trdili, da je na severni strani nebesa nekaka trda točka (okoli severnice). Okoli te trdne osi se premikava ves nebesni svod, po mnenju Grkov seveda. Grki so bili prepričani, da je pod tisto točko nekje na zemlji otok, kjer prebiva pravilčno ljudstvo, katero so nazivali Hiperborejci — to je ljudi, ki prebivajo zadaj za severnim vetrom. Take predstave so torej Grki imeli o severnih krajih naše zemlje.

Zato si lahko mislimo, da je tedanje zemeljske raziskovalce in pa zvezdoznance silno zanimalo najti ta pravilčni otok Hiperborejcev, zlasti, ker je grška pravljica trdila, da je med Hiperborejci doma grški bog svetlobe Apolon. Pytheas, ki je bil gotovo sam zemljepisec in astronom, je zato sklenil, da to zadevo preišče. Ze Homer je vedel nekaj o neki deželi, kjer se srečujeta poleti dan in noč. Sploh je v zgodovinski dobi med starimi narodi sever igral veliko vlogo. Grkom je bil sever domovina Apolona, katerega so častili v svojem glavnem svetišču v Delfih. Grkom luč ni prihajala od vzhoda, ampak od severa. O Apolonu je bilo polno bajk in pravljic. Pytheas je gotovo poznal te pravljice, ki so pripovedovale, da Bog Apolon potuje 6 mesecev proti Del-

fom in 6 mesecev nazaj v svoj "stari vrt" na sever. Njegov čolnič, ki plove po nebesnem svodu, pa vlečeta s seboj dva pojača labuda. Kadar se Apolon vrne v svojo severno domovino, se vsakih 19 let za nekaj časa naseli na "svojem otoku," kjer nekaj časa igra citre in pleše. Na tem otoku prebiva ljudstvo Hiperborejcev. Tako so trdile grške pravljice in bajke. Vsekakor so morale izvirati iz severnih krajev, ker si drugače ne moremo misliti, da bi bili mogli Grki v pravilčno obliko zaviti sicer nesluteno resničnost. Da je Pytheas tem pravljicam verjel, dokazuje dejstvo, da je hotel na licu mesta ugotoviti, kaj in kako. Dosegel je svoj cilj. Priplul je na sever in odkril skandinavsko obalo na Norveškem. S seboj je pa prinesel spoznanje, katero je dobil na severu, da se luna vsakih 19 let v skrajnih severnih krajih kaže tudi podnevi in tedaj nekaj časa neprestano kroži po nebu. Čim više severu, tem delj časa traja ta prikazen, katero je mogoče opazovati že blizu Dronthaima. Iz tega bi sledilo, da je stari Grk Pytheas pred kratkimi 2000 leti res prodrl do današnjega Dronthaima, vendar pa sam te prikazni ni videl, ker ni prišel ob takem času, ampak so mu o tej prikazni pripovedovali domačini, s katerimi je govoril.

Kar Pytheas pripoveduje, dokazuje, da so stari Skandinavci bili bistri opazovalci zvezd in nebesa. Vse to svoje dognanje pa je stari Pytheas popisal v svojem spisu "Po Okeanosu." Žal, da ta spis ni ohranjen, ampak se nanj nanašajo le nekateri stari pisatelji, v kolikor so ti ohranjeni. Pytheas je prinesel s tega potovanja domov v Grčijo veliko senzacija, da se

tam mesec vsakih 19 let za nekaj dni vidi na nebesu noč in dan. Iz tega dejstva so najbrže stari prebivalci severa spletili tudi pravljico, da se Apolon vsakih 19 let naseli na svojem svetlobnem otoku, kjer prebivajo Hiperborejci. Tudi Grkom Apolon ni bil vedno bog sonca, ampak je bil prvotno tudi bog meseca. Grška pravljica je trdila, da Apolon potuje v Delfe in nazaj ter ga vozita dva labuda. Ta dva labuda sta očitno luna in sonce, kateri v skrajnih severnih krajih skupaj nastopata. Zato ni čudno, če so Grki prebivalce teh krajev, kjer se bratita luna in sonce, blagorivali in so jih imenovali otroke svetlobe. Vsekakor je to zanimivo dejstvo, ki kaže, kako se je človeški duh že pred mnogimi tisočletji ukvarjal z neznanimi ugankami, skušal dometi skrivnosti svetovlja, katerih pa do dna še do danes ni razvozljaj in jih navzlic vsem dognanjem najbrže ne bo do dna razvozljaj do konca sveta.

15,000 CEKINOV SO IZKOPALI

V Katovicah na Poljskem so delavci te dni kopali kanal na neki cesti. Pri delu je neki delavec s krampom zadell ob trd železen predmet. Začeli so kopal bolj previdno in so kmalu našli globoko v zemlji veliko železno skrinjo, katera pa je bila precej poškodovana. Ko so jo dvignili, se je iztreslo iz nje 15,000 zlatnikov. Delavci so bili vsi iz sebe in bi se bil vsak rad čimbolj okoristil z ugodno priliko. Ker pa so vsi hoteli imeti čimveč cekinov, so se začeli prepirati. Nastal je pretep, ki je končno nanj postala

pozorna tudi policija. Tako se je zgodilo, da so delavci izkopali zaklad in se zanj celo stepili, ampak zaklad je končno odnesla policija in s tem končala tudi prepir.

Zaboj tigrov padel na glavo

V Londonu so jemali s tovrnega avta kletke divjih zveri za neki zverinjak. Otroci — kakršni že so! — so se gnetli krog avta. Baš je stala na robu avta kletka z dvema bengalskima tigrima in otroci so vsi radovedni stopili tik nje. Tedaj se je zaboj zamajal in začel drčati z avta. Otroci so zakričali in se razkropili. Le nekega fantka, ki se je bil preveč približal avtu, je zadell vozel zaboja in ga podri na tla. Tedaj se je vse dognanem najbrže ne bo do dna razvozljaj do konca sveta.

Meeting with Frank Sustar of Cleveland and Joe Waigus of Gowanda, the trio went galloping all over town — forgetting, of course, about the girls they brought along — did they get fooled the Sunday about 4 a. m., but the best happened Sunday afternoon, when they made another get-away. Stopping before an inviting beer parlor Joe and Frank got out, but Charlie seemed to be glued, try as he would, he couldn't get up, when his pals noticed that his pants got stuck in the door which just wouldn't open. It took them an hour before they took off the entire door to free Charlie, as the only alternative to free him was to strip his pants off. And was Charlie's face red when the girls found out —

Twilights, Crucibles In Possible Tie For Comm. Top; Bees, Agents Out

The Twilight Ballrooms finished their two round St. Clair Community schedule with a decisive 4 to 1 victory over the Bee Bees, Wednesday night at Gordon Park, to assure themselves of at least a tie for the league's pennant. The Crucibles have one more game to play before they finish the second round, that with the Kollander Agents, Wednesday evening.

game, the two teams had played day night. When the eighth round of the game arrived both teams were deadlocked at 4 all. Three Kollander hits produced three runs in the half of the eighth to clinch the decision. Pitcher Mike Ivas of the Twilights did his bit by clinching homer and a double, to no avail, as winners smashed out ten runs, three going to Tony Ucakar, who Nagode also garnered two hits in Agents.

Following the game between Kollanders and the Crucibles Tuesday night, the St. Clair Community League Managers will meet at Gordon Park, to draw up plans for either playoffs of tied top or the start of the elimination. In either case, the first two withdrawn from the hat with the following Wednesday at Gordon Park for the only scheduled game of the week.
