## UVOD

V publikaciji **Mesečni statistični pregled Republike Slovenije** objavljamo rezultate mesečnih in četrtnih statističnih raziskovanj, poleg teh pa tudi podatke Ministrstva za notranje zadeve Republike Slovenije, Urada za priseljevanje in begunce, Rdečega križa Slovenije, Zavoda RS za zaposlovanje, Ministrstva za delo, družino in socialne zadeve, Banke Slovenije, Ministrstva za finance Republike Slovenije, ker želimo uporabniku ponuditi **celovito mesečno informacijo o družbeno-ekonomskih gibanjih v Republiki Sloveniji**.

Publikacija obsega **tri vsebinske sklope**:

- četrtni in mesečni zbirni prikaz indeksov posameznih statističnih področij;
- **grafični prikaz**, ki ponazarja, večinoma z indeksi, spremembe družbeno-ekonomskih pojavov v obdobju zadnjih petih let in kratkoročne kvalitativne kazalnike;
- **tabelarni del**, v katerem so v ustaljeni obliki prikazani rezultati mesečnih in četrtnih statističnih raziskovanj po posameznih področjih. Objavljeni podatki se večinoma nanašajo na časovno vrsto zadnjih petih let, podatki za tekoče leto pa na posamezne mesece oziroma četrtnetja.

Vsaka številka vsebuje tudi najnunejša **metodološka pojasnila**, potrebna za pravilno razumevanje prikazanih podatkov. Tu navajamo vire, pojasnjujemo metode zbiranja podatkov in obseg statističnega zajetja ter podajamo osnovne statistične definicije.

Na koncu objavljamo seznam Statističnih informacij, ki smo jih izdali v preteklem mesecu po vsebinskih področjih. Statistične informacije redno prinašajo tudi strokovne komentarje o tekočih socialnih kazalnikih in gospodarskih gibanjih v državi. Obe publikaciji se vsebinsko dopolnjujeta.

Nenehno pa se trudimo, da bi publikacijo izboljšali in uporabnikom podatkov bomo iskreno hvaležni, če nam bodo pri tem pomagali in nam sporočili svoje predloge za vsebinske dopolnitve ali druge pripombe, ki nam bodo pomagale izboljšati to publikacijo.

## INTRODUCTION

**Monthly Statistical Review of the Republic of Slovenia** shows results of monthly and quarterly statistical surveys. In addition, it also shows data from the Ministry of the Interior, Office of Immigration and Refugees, Red Cross of Slovenia, National Employment Office, Ministry of Labour, Family and Social Affairs, Bank of Slovenia, and Ministry of Finance. Our intention is to offer to the user **comprehensive monthly information on socio-economic trends in the Republic of Slovenia**.

The publication is divided into **three parts**:

- **quarterly and monthly review** of indices for individual fields of statistics;
- **graphic review** showing, mostly with indices, the changing of socio-economic phenomena in the last five years and short-term qualitative indicators.
- **tables** showing the results of monthly and quarterly statistical surveys by fields of statistics. Data are mostly published for the last five years and for the current year by months or quarters.

Each issue also contains the most important **methodological explanations** necessary to understand the presented data correctly. We list sources, explain methods of data collection and coverage, and provide basic statistical definitions.

At the end one can find the list of Rapid Reports published by our office in the previous month. Rapid Reports regularly bring comments on current social indicators and economic trends in the country. The two publications complement each other.

We constantly strive to improve the publication. We would therefore greatly appreciate it if our users could assist us in our efforts by communicating their suggestions for improvements and other remarks that could help us improve this publication.

Mag. Irena Krizman

generalna direktorica Statističnega urada Republike Slovenije  
Director-General of the Statistical Office of the Republic of Slovenia

ZBIRNI PRIKAZ NEKATERIH INDEKSOV / SUMMARY REVIEW OF SOME INDICES

Četrtletne vrednosti indeksov

Quarterly indices

|   | 2003<br>2002 | Četrtletja / Quarters |       |       |        |       |       |       |        |   |

- 1) Dodatek za nego otroka je bil uveden v sredini leta 1996. Podatki zajemajo obdobje od 1. maja do 31. decembra. Število družin se z junijem 2002 ne spremlja več.  
Allowance for nursing a child was introduced in mid-1996. Data cover the period from 1 May to 31 December. From June 2002 on the number of families is no longer monitored.
- 2) Zmanjšanje števila upravičenk in sredstev za pomoč ob rojstvu otroka v mesecu decembru 2001 je posledica sprememb v zakonodaji. S 1. 1. 2002 je začel veljati Zakon o starševskem varstvu in družinskih prejemkih (Uradni list RS, št. 97/01), v katerem je za leto 2002 predvidena višina pomoči ob rojstvu v znesku 50.000 sit. V skladu z zakonom se lahko tovrstna pravica uveljavlja tudi 60 dni po rojstvu otroka, zato so upravičenci počakali na uveljavitev zakona.  
Decreases in the number of eligible persons and funds paid at childbirth in December 2001 is the result of changes in legislation. On 1 January 2002 the Parenthood and family Earnings Act (OJ RS, NO. 97/01) entered into force with which the expected amount of this assistance in 2002 is SIT 50,000. In accordance with the Act, the right to this assistance can be exercised up to 60 days after the childbirth, so beneficiaries waited for the enforcement of the new Act.

1) Vir: Poslovni register Slovenije

Source: Business Register of Slovenia

2) Vir: Statistični register delovno aktivnega prebivalstva - SRDAP

Source: Statistical Register of Employment (SRDAP)

3) Do razlike v podatkih prihaja zato, ker so v PRS vključene tudi trenutno neaktivne fizične osebe, v SRDAP pa so vključene tudi fizične osebe, ki se še niso prijavile v PRS, vendar so pokojninsko in zdravstveno zavarovane.

The discrepancy in data between both registers arises due to the fact that PRS comprises also at present inactive natural persons and SRDAP comprises natural persons who have not yet been registered into PRS but have pension and health insurance.

1) Podatki za cestni blagovni prevoz za leti 1999 in 2000 so ocenjeni na podlagi prejšnjega raziskovanja, pilotnih projektov, tekočega raziskovanja in nekaterih drugih kazalnikov (glej Metodološka pojasnila, Transport).  
 Data for road goods transport for 1999 and 2000 are estimated on the basis of the previous survey, pilot surveys, current survey and other indicators (see Methodological explanations, Transport).  
 2) Od leta 2001 sprememba v seriji: v podatkih so upoštevana tudi prvič registrirana stara vozila.  
 Since 2001 break in series: old vehicles registered for first time are included.  
 3) Od aprila 2002 so vključena tudi kolesa z motorjem.  
 Since April 2002 mopeds are included.

1) Podatki za leti 2003 in 2004 so začasni; glej Metodološka pojasnila, Zunanja trgovina. / Data for 2003 and 2004 are provisional; see Methodological explanations, External trade.  
2) S 1. 3. 2003 je Hrvaška postala članica CEFTA, vendar je v naših prikazih podatkov zaradi tehničnih razlogov za zdaj obravnavana še med državami na ozemlju nekdanje Jugoslavije. On 1 March 2003 Croatia became a CEFTA member, but due to technical reasons in our data it is still treated among countries on the territory of former Yugoslavia.

1) Podatki za leti 2003 in 2004 so začasni; glej Metodološka pojasnila, Zunanja trgovina. / Data for 2003 and 2004 are provisional; see Methodological explanations, External trade.

2) S 1. 3. 2003 je Hrvaška postala članica CEFTA, vendar je v naših prikazih podatkov zaradi tehničnih razlogov za zdaj obravnavana še med državami na ozemlju nekdanje Jugoslavije.  
On 1 March 2003 Croatia became a CEFTA member, but due to technical reasons in our data it is still treated among countries on the territory of former Yugoslavia.

**METODOLOŠKA POJASNILA / METHODOLOGICAL EXPLANATIONS****PREBIVALSTVO****Število prebivalstva**

Statistični urad Republike Slovenije objavlja podatke o številu prebivalstva za stanja od 30. 6. 1995 dalje po definiciji prebivalstva, ki zajema vse osebe, ki dejansko prebivajo na ozemlju Slovenije, vendar je s predlogom nove definicije prebivalstva<sup>1)</sup> iz leta 1996 le delno usklajena.

**V podatkih o prebivalstvu Slovenije so tako od leta 1995 dalje upoštevani:**

- državljani Republike Slovenije s stalnim prebivališčem v Sloveniji, brez tistih, ki so odšli v tujino za več kot tri mesece in so svoj odhod prijavili v upravni enoti svojega stalnega prebivališča;
- tujci z izdanim dovoljenjem za stalno prebivanje v Republiki Sloveniji, ki so prijavili stalno prebivališče;
- tujci z izdanim dovoljenjem za začasno prebivanje v Republiki Sloveniji, ki so prijavili začasno prebivališče;
- tujci z veljavnim delovnim ali poslovnim vizumom, ki so v Sloveniji prijavili začasno prebivališče;
- osebe z začasnim zatočiščem v Republiki Sloveniji;
- begunci, ki sta jim bila po zakonu o azilu priznana pravica do azila in status begunca v Republiki Sloveniji.

Obsežnejša pojasnila so objavljena v Statističnih informacijah št. 166, 26. julij 2000.

Podatke o številu prebivalstva zbiramo po četrtletjih (za marec, junij, september in december), podatke za preostale posamezne mesece pa ocenimo.

**Naravno gibanje prebivalstva**

Podatke o naravnem gibanju prebivalstva zbira Statistični urad po kraju dogodka s statističnimi poročili, ki mu jih pošiljajo oddelki za upravne notranje zadeve pri upravnih enotah in okrožna sodišča, rezultate pa objavlja po stalnem prebivališču, ki je opredeljeno takole:

- pri rojstvu stalno prebivališče matere ob otrokovem rojstvu;
- pri smrti zadnje stalno prebivališče umrle osebe;
- pri sklenitvi zakonske zveze stalno prebivališče ženina pred sklenitvijo zakonske zveze;
- pri razvezi zakonske zveze zadnje skupno stalno prebivališče moža in žene pred razvezo zakonske zveze;
- pri priznanju in ugotovitvi očetovstva stalno prebivališče otroka;
- pri posvojitvi stalno prebivališče posvojitelja oz. posvojiteljev.

**POPULATION****Number of population**

The Statistical Office of the Republic of Slovenia publishes the data on the number of population since 30 June 1995 according to the population definition that covers all persons actually living on the territory of the Republic of Slovenia. However, this definition is only partly harmonised with the population definition adopted in 1996.

**Data on the population in Slovenia since 1995 cover:**

- citizens of the Republic of Slovenia with permanent residence in Slovenia, excluding those who went abroad for more than three months and gave notice of their departure at the administrative unit of their permanent residence,
- foreigners with issued permission for permanent residing in the Republic of Slovenia, who registered a permanent residence,
- foreigners with issued permission for temporary residing in the Republic of Slovenia, who registered a temporary residence,
- foreigners with a valid work permit or a business visa, who registered a temporary residence in Slovenia,
- persons under temporary protection in the Republic of Slovenia,
- refugees according to the Law on Asylum to whom the asylum and the refugee status were granted in the Republic of Slovenia.

More detailed explanations are published in Rapid Reports, No. 166, 26 July 2000.

Data on the number of population are collected quarterly (for March, June, September and December). Data for other months are estimated.

**Natural increase of population**

SORS collects data on natural increase of population by the place of event with statistical reports sent by departments for administrative internal affairs at local government units and by regional courts. The results are published by permanent residence, which is:

- at childbirth permanent residence of mother,
- at death the last permanent residence of the deceased,
- at marriage permanent residence of groom before marriage,
- at divorce the last common permanent residence of husband and wife before divorce,
- at acknowledgement and ascertainment of paternity permanent residence of child,
- at adoption permanent residence of adopter.

### Nekateri demografski kazalniki

Demografski kazalniki za posamezna leta so izračunani na podlagi podatkov o številu prebivalstva sredi leta (30. junij), za četrtoletja let 1997-1999 pa iz ocen števila prebivalstva: za 1. četrtoletje iz ocene števila prebivalstva za februar, za 2. četrtoletje iz ocene števila prebivalstva za maj, za 3. četrtoletje iz ocene števila prebivalstva za avgust, za 4. četrtoletje iz ocene števila prebivalstva za november.

### Selitve prebivalstva

Individualne podatke o selitvah državljanov RS posreduje Statističnemu uradu Republike Slovenije Ministrstvo za notranje zadeve na podlagi podatkov o prijavi, odjavi, spremembi stalnega prebivališča v Sloveniji ter o prijavi začasnega prebivanja v tujini oziroma o vrnitvi iz tujine v elektronski obliki. Isto ministrstvo mu vsake tri mesece na podlagi svojih evidenc posreduje tudi podatke o priselitvah tujcev, in sicer v agregirani obliki. Podatke o odselitvah tujcev smo ocenili na statističnem uradu.

V podatkih o notranjih selitvah so upoštevane le selitve državljanov Republike Slovenije. Od leta 1995 do 1998 so kot notranje selitve upoštevane selitve med naselji in občinami po teritorialni razdelitvi občin, ki je nastala z uvedbo lokalne samouprave 1. 1. 1995, za leto 1999 pa med naselji in občinami po teritorialni razdelitvi občin, ki je nastala po zakonu o spremembah in dopolnitvah zakona o ustanovitvi občin ter o določitvi njihovih območij konec leta 1998. Zaradi teritorialnih sprememb podatki o notranjih selitvah niso neposredno primerljivi.

Definicije splošnih demografskih pojmov, uporabljenih v tem poglavju, so objavljene v Rezultatih raziskovanj in na spletni strani: [www.gov.si/zrs/slo/index.html](http://www.gov.si/zrs/slo/index.html).

Vsi podatki za posamezna leta so končni.

### Some demographic indicators

Demographic indicators for the individual years are calculated on the basis of data on the number of midyear population (as of 30 June). For the quarters of 1997-1999 demographic indicators are calculated from estimates of the number of population: for 1st quarter - estimates for February, for 2nd quarter - estimates for May, for 3rd quarter - estimates for August and for 4th quarter - estimates for November.

### Migration

Data on migration of citizens of the Republic of Slovenia are mediated on electronic media by the Ministry of the Interior to the Statistical Office of the Republic of Slovenia, based on information on registrations, departure notices, and changes of permanent residence in Slovenia and also on registrations of temporarily residing abroad and returning from abroad. Data on immigrated foreigners are mediated by the same ministry in aggregated form every three months on the basis of the records on foreigners in Slovenia. Data on emigrated foreigners are estimated by the Statistical Office.

Data on internal migration include only migration of citizens of the Republic of Slovenia. From 1995 to 1998 internal migration was migration between settlements and municipalities according to the territorial division of municipalities which is the result of the introduction of local self-government on 1 January 1995. For 1999 internal migration is migration between settlements and municipalities according to the territorial division of municipalities by the Law on Changes and Completion on Establishment of Municipalities and Definition of their Areas from the end of 1998. Therefore data on internal migration are not directly comparable.

Definitions of general demographic concepts used in this chapter are published in Results of Surveys and on the web page [www.gov.si/zrs/eng/index.html](http://www.gov.si/zrs/eng/index.html).

All data for individual years are final.

**BRUTO DOMAČI PROIZVOD (BDP)**

Ocene dodane vrednosti v stalnih cenah so izražene v osnovnih cenah; to pomeni, da so v dodano vrednost po dejavnostih vključene obračunane subvencije, izločeni pa davki na proizvodnjo. Bruto domači proizvod je tako enak vsoti dodane vrednosti po dejavnostih (v osnovnih cenah), plus davki na proizvodnjo in uvoz minus subvencije.

Za četrtno ocenjevanje dodane vrednosti je uporabljena metoda enojne ekstrapolacije. Dodana vrednost iz baznega obdobja (leta 2000) je ekstrapolirana z ustreznimi kazalniki sprememb obsega proizvodnje. Ti so bodisi originalni količinski indeksi, izvedeni količinski indeksi (indeksi vrednosti, deflacirani z indeksi cen) ali indeksi inputov. Ocena dodane vrednosti je narejena za približno 60 skupin dejavnosti. Osnovna industrijska področja zajemajo dejavnosti od A do F, storitvene dejavnosti pa dejavnosti od G do P po Standardni klasifikaciji dejavnosti.

Glavni viri podatkov so osnovna statistična raziskovanja (kmetijska, industrijska statistika, statistika gradbeništva, prometa in zvez, trgovine, gostinstva, podatki o zaposlenih in plačah, indeksi cen, podatki o uvozu), davčne evidence in drugi.

**GROSS DOMESTIC PRODUCT (GDP)**

Estimates of value added at constant prices are prepared at basic prices. In value added by activities at basic prices all subsidies are included and taxes on production are excluded. Gross domestic product thus equals value added by activities (at basic prices) plus taxes on production and import minus subsidies.

For quarterly estimation of value added method of single extrapolation is used. Value added from the base period (year 2000) is extrapolated using indicators of changes of the volume of output. These may be original quantity indices, derived volume indices (current price indices deflated by price indices) or indices of inputs. Estimate of value added is prepared for about 60 groups of activities. Basic industries cover activities from A to F and service activities from G to P from the Standard classification of activities.

The most essential data sources are basic statistical surveys (agriculture, manufacturing, construction, transport, trade and tourism statistics, data on employment and wages, price indices, data on import), tax records and others.

## TRG DELA

### AKTIVNO PREBIVALSTVO (anketa gospodinjstev)

#### Anketa o delovni sili (ADS)

Anketa o delovni sili je najboljše uradno anketiranje gospodinjstev v Sloveniji. Njen namen je zbrati podatke o stanju in spremembah na slovenskem trgu dela. Daje nam podatke o velikosti, sestavi in značilnostih aktivnega in neaktivnega prebivalstva Slovenije. Podatki so mednarodno primerljivi, saj se anketa izvaja skladno z navodili Mednarodne organizacije za delo in Evropskega statističnega urada.

**Zbiranje podatkov:** Anketa o delovni sili je bila od 1993 do 1996 letna, izvajali smo jo v maju. Od aprila 1997 anketiranje poteka nepretrgoma, in sicer na terenu in po telefonu. Vsako gospodinjstvo je anketirano tri zaporedna četrletja, po četrletju premora pa še dve zaporedni četrletji (skupaj torej petkrat). Podatke objavljamo četrletno.

**Vzorec:** Vzorec ADS obsega okrog 6 000 gospodinjstev na četrletje. Izberemo jih z enostavnim naključnim izborom. Uspešnost anketiranja je zadovoljiva: celotna stopnja neodgovorov je bila v 2. četrletju 1997 14,4-odstotna, stopnja zavračanja pa 9,2-odstotna (v letu 1996 10,0 % oz. 7,6 %).

**Delovno sposobno prebivalstvo** so vse osebe, stare najmanj 15 let.

**Delovno aktivno prebivalstvo** so osebe, ki so v zadnjem tednu (od ponedeljka do nedelje) pred anketiranjem opravile kakršno koli delo za plačilo (denarno ali nedenarno), dobiček ali za družinsko blaginjo. Med delovno aktivno prebivalstvo sodijo tudi vse tiste zaposlene ali samozaposlene osebe, ki jih v zadnjem tednu pred anketiranjem ni bilo na delo, prav tako tudi zaposlene osebe, ki so začasni presežki ali zaposlene osebe, ki so trajni presežki, in sicer do prenehanja delovnega razmerja, osebe na porodniškem dopustu ter pomagajoči družinski člani.

**Pomagajoči družinski člani** so osebe, ki niso formalno zaposlene niti samozaposlene, a so v zadnjem tednu pred anketiranjem delale na družinski kmetiji, v družinski obrti, družinskem podjetju ali v drugi obliki družinske pridobitne dejavnosti pa za svoje delo praviloma ne prejema rednega plačila.

**Druge oblike dela** zajemajo osebe, ki formalno niso zaposlene ali samozaposlene, a so v zadnjem tednu pred anketiranjem delale po pogodbi o delu, po avtorski pogodbi ali za neposredno plačilo.

**Delovno aktivno prebivalstvo, ki dela s skrajšanim delovnim časom**, so osebe, ki običajno delajo manj kot 36 ur na teden.

**Brezposelne osebe** so tiste, ki v zadnjem tednu pred anketiranjem:

- niso delale (niso bile zaposlene ali samozaposlene in niso opravile nikakršnega dela za plačilo);
- aktivno iščejo delo (v zadnjih štirih tednih so se zglasile na zavodu za zaposlovanje, poslale prošnjo za zaposlitev ipd.);
- takoj (v dveh tednih) so pripravljene sprejeti delo.

## LABOUR MARKET

### LABOUR FORCE (household survey)

#### Labour Force Survey (LFS)

The Labour Force Survey (LFS) is the most comprehensive official household survey in Slovenia. It is aimed to collect data on the situation and changes on the Slovenian labour market. It provides data on size, structure and characteristics of Slovenian labour force and inactive population. Data are internationally comparable, because the survey is conducted in compliance with ILO and Eurostat guidelines.

**Data collection:** Labour Force Survey was an annual survey from 1993 to 1996 and was carried out in May. Since April 1997 it is a continuous survey. Data are published quarterly. The survey is implemented face to face and by telephone. Each household is surveyed in three consecutive quarters and after one quarter break another two consecutive quarters (all together five times).

**The sample:** The sample size of the LFS is about 6,000 households per quarter. Households are selected with simple random selection. The overall non-response rate in the second quarter of 1997 was 14.4% and the refusal rate was 9.2% (in 1996 the non-response rate was 10.0% and the refusal rate 7.6%).

**Working age population** are all persons aged at least 15 years.

**Persons in employment** are those who during the last week (from Monday to Sunday) prior to the interview did any work for payment (in cash or kind) or family gain. Persons who were not working but had a job from which they were temporarily absent are also included. The same applies to workers on lay-offs, persons on maternity leave and unpaid family workers.

**Unpaid family workers** are those who were not in paid employment or self-employed during the last week prior to the interview, but did some work on the family farm, in the family enterprise or some other kind of family gainful activity; they normally do not receive regular payment.

**Other forms of work** include persons who are not in paid employment or self-employed, but during the last week prior to the interview worked on contract or were engaged in the informal sector.

**Persons in part-time employment** are those who usually work less than 36 hours per week.

**Unemployed persons** are those who during the last week prior to the interview:

- did not work (were not in paid employment or self-employed and did not do any paid work);
- were actively seeking work (specific steps taken in the past four weeks to seek paid employment or self-employment);
- were currently available for work (within two weeks).

Med brezposelne osebe štejemo tudi tiste, ki so že našle delo, pa ga bodo začele opravljati po anketiranju.

**Aktivno prebivalstvo** so delovno aktivni prebivalci in brezposelne osebe.

**Neaktivno prebivalstvo** so osebe, stare najmanj 15 let, ki niso razvrščene med delovno aktivno prebivalstvo ali brezposelne osebe.

**Stopnja aktivnosti** je odstotni delež aktivnega prebivalstva v delovno sposobnem prebivalstvu.

**Stopnja delovne aktivnosti** je odstotni delež delovno aktivnega prebivalstva v delovno sposobnem prebivalstvu.

**Stopnja brezposelnosti** je odstotni delež brezposelnih oseb v aktivnem prebivalstvu.

#### Uporabljene klasifikacije:

Standardna klasifikacija dejavnosti, primerljiva z mednarodno klasifikacijo dejavnosti NACE Rev. 1;

Standardna klasifikacija poklicev, primerljiva z mednarodno klasifikacijo poklicev ISCO-88.

#### Aktivno prebivalstvo (anketa podjetij in registri)

Podatke o delovno aktivnem prebivalstvu objavlja Statistični urad Republike Slovenije na podlagi mesečnega statističnega raziskovanja ZAP-M (Mesečno poročilo o plačah in zaposlenih osebah v družbah, podjetjih in organizacijah) in Statističnega registra delovno aktivnega prebivalstva.

Podatke o brezposelnih osebah in njihovem vključevanju v delo nam posreduje Zavod RS za zaposlovanje.

Za **zaposlene osebe** v družbah, podjetjih in organizacijah štejemo osebe, ki so sklenile delovno razmerje za določen ali nedoločen čas, ne glede na to, ali delajo v družbi, podjetju oz. organizaciji poln delovni čas ali delovni čas, ki je krajši od polnega (tudi nerefundirane pripravnike), in osebe, zaposlene pri zasebnikih.

K zaposlenim ne štejemo oseb, ki opravljajo začasno ali občasno delo po pogodbi o delu ali po avtorski pogodbi, in zaposlenih oseb, državljanov Slovenije s stalno zaposlitvijo v slovenskih predstavništvih, na gradbiščih ipd. v tujini.

**Brezposelne osebe** so osebe, ki še niso bile v delovnem razmerju (in so se prijavile območnim enotam Zavod RS za zaposlovanje, kjer so jih vpisovali med brezposelne osebe), in tiste, ki so ostale brez dela.

#### PLAČE

Podatke o plačah zaposlenih oseb zbira Statistični urad Republike Slovenije mesečno z raziskovanjem ZAP-M (Mesečno poročilo o plačah in zaposlenih osebah v družbah, podjetjih in organizacijah).

V raziskavo so zajete vse družbe, podjetja in organizacije na območju Slovenije, razen zasebnih z enim ali dvema zaposlenima. Zajete so tudi plače zaposlenih oseb z delovno vizo. Upoštevane so plače vseh zaposlenih oseb v družbah, podjetjih in organizacijah oziroma enotah v sestavi ne glede na trajanje zaposlitve (določen ali nedoločen čas) in ne glede

Persons who had found a job to start later are also included among unemployed persons.

**The labour force** are persons in employment and unemployed persons.

**Inactive persons** are those, aged at least 15 years, who are not classified as persons in employment or as unemployed persons.

**Activity rate** represents the labour force as a percentage of the working age population.

**Employment/population ratio** represents persons in employment as a percentage of the working age population.

**Unemployment rate** represents unemployed persons as a percentage of the labour force.

#### Classifications used:

Slovenian Standard Classification of Activities, comparable to NACE Rev. 1;

Slovenian Standard Classification of Occupations, comparable to ISCO-88.

#### Labour force (enterprise survey and registers)

The Statistical Office of the Republic of Slovenia collects data on the employed persons with the monthly ZAP-M survey (Monthly Report on Earnings and Persons in Paid Employment in Companies, Enterprises and Organisations) and from the Statistical Register of Persons in Employment.

Data on unemployed persons and their inclusion in work are mediated by the National Employment Office.

**Persons in paid employment** in companies, enterprises and organisations are those who have signed a temporary or permanent work contract, irrespective of whether they work in the company, enterprise or organisation full time or part time (including trainees), and persons in paid employment in private establishments.

Persons performing temporary or occasional contract work and citizens of the Republic of Slovenia employed permanently in Slovenian missions, on constructions sites, etc., abroad are not considered to be persons in paid employment.

**Unemployed persons** are those persons who have never had a job and are registered at regional employment offices as unemployed persons and those persons who are out of work.

#### WAGES

The Statistical Office of the Republic of Slovenia collects data on earnings of persons in paid employment with the monthly ZAP-M survey (Monthly Report on Earnings and Persons in Paid Employment in Companies, Enterprises and Organisations).

The survey covers all companies, enterprises and organisations on the territory of Slovenia except private enterprises with only one or two persons in paid employment. Covered are also earnings of persons with work visas. Taken into consideration are earnings of all persons in paid employment in companies, enterprises and organisations and

na to, ali delajo poln delovni čas ali manj. Upoštevani so tudi pripravniki in zaposlene osebe, ki imajo zaradi posebnih pogojev krajšo delovno obveznost, a se jim ta šteje kot poln delovni čas (letalci, učno osebje in podobno). Plače zaposlenih oseb v delovnih enotah naših družb, podjetij in organizacij v tujini niso zajete.

**Bruto plača** so osebni prejemki zaposlenih oseb za delo v polnem delovnem času in krajšem ali daljšem od polnega delovnega časa. Poleg prejemkov za dejansko opravljeno delo v rednem delovnem času zajemajo tudi vse druge prejemke, ki se oblikujejo na tej osnovi: prejemke za delo nad polnim delovnim časom (nadure), nadomestila za letni dopust, plačani za izredni dopust do 7 dni, državne praznike, bolniške odsotnosti do 30 dni, za strokovno izobraževanje, za delovne zastoje brez krivde zaposlenih oseb, plačane odsotnosti ipd., zaostala izplačila, bruto plače in nadomestila bruto plač za predhodne mesece, prejemke za minulo delo, stimulatивne dodatke, nagrade, premije ter prejemke po periodičnem obračunu in zaključnem računu.

Bruto plače ne vsebujejo:

- nadomestil, ki ne bremenijo podjetja oziroma organizacije (refundacije - to so nadomestila za porodniške odsotnosti, bolniške odsotnosti, daljše od 30 dni, pripravništvo, ki ga plačuje zavod za zaposlovanje, nego, invalidnin nadomestil za opravljanje državljskih dolžnosti, vojaških vaj in vaj civilne zaščite itd.),
- izplačil, ki bremenijo materialne stroške (na primer povračila stroškov za prevoz na delo in z dela, nadomestila za prehrano, za službena potovanja, za terenske dodatke, dnevnice in nočnine, za avtorske honorarje, za izplačila za pogodbeno delo itd.),
- izplačil iz sklada skupne porabe (regres, jubilejne nagrade, odpravnine itd.),
- plač, ki so bile izplačane zaposlenim osebam kot lastninski deleži.

**Neto plača** je bruto plača, zmanjšana za prispevke za socialno varnost in davek od osebnih prejemkov.

**Indeks nominalnih plač** je razmerje podatkov povprečnih mesečnih plač v nekem obdobju.

**Indeks realnih plač** je razmerje med indeksom nominalnih plač in indeksom rasti cen življenjskih potrebščin v istem obdobju.

their branch units irrespective of duration of employment (temporary or permanent) and irrespective of whether they work full time or part time. Considered are also trainees and persons in paid employment who due to special working conditions work part time but their work is counted as full time work (pilots, teaching staff, etc.). Earnings of persons in paid employment in branch units of Slovenian companies, enterprises and organisations abroad are not covered.

**Gross earnings** are receipts of persons in paid employment for full time, part time and overtime work. In addition to income for actually performed work during the regular working hours, gross earnings also cover all other receipts formed on this basis: income from overtime work, supplements for annual leave, paid leave for up to seven days, public holidays, sick leave for up to 30 days, job training, slowdown through no fault of the person in paid employment, paid leave, etc., payment for previous months, gross earnings and supplements of gross earnings for previous months, income for past work, incentive bonuses, awards, premiums and bonuses after periodic and final account.

Gross earnings do not include:

- supplements which are not against the account of the enterprise or organisation (reimbursement), maternity leave, sick leave of over 30 days, traineeship paid for by the National Employment Office, nursing, disability benefits, supplements for national guard, military service and performing civic duties,
- payments against the account of material costs such as reimbursement of costs for coming to work and leaving it, food money, reimbursement of travel expenses for business trips, daily allowances and overnight stays, royalties, contract work, etc.,
- payments from the Common Consumption Fund (annual leave reimbursement, jubilee rewards, indemnity money, etc.), and
- earnings paid out to persons in paid employment as ownership shares.

**Net earnings** are gross earnings less contributions for social security and the earnings tax.

**Index of nominal earnings** is the ratio between data on average monthly earnings in a period.

**Index of real earnings** is the ratio between the index of nominal earnings and the consumer price index in the same period.

## SOCIALNA ZAŠČITA

### Starševsko varstvo in družinski prejemki, upravičenci in izplačana sredstva

Podatke o upravičencih in sredstvih, namenjenih za starševsko varstvo in družinske prejemke, nam posreduje Ministrstvo za delo, družino in socialne zadeve.

Zakonska osnova za upravičenost do teh prejemkov je Zakon o starševskem varstvu in družinskih prejemkih.

Po tem zakonu imajo upravičenci:

- pravice do prejemkov iz naslova zavarovanja za starševsko varstvo in
- pravice do družinskih prejemkov.

Pravice do prejemkov po tem zakonu uveljavlja eden od staršev, če zakon ne določa drugače. Te pravice so vezane na otroka in prenehajo s smrtjo otroka.

Prispevek za starševsko varstvo plačujeta zavarovanec in delodajalec. Prispevek se vplačuje v proračun Republike Slovenije. Višina tega prispevka je določena z zakonom.

**Starševsko nadomestilo** je pravica iz naslova zavarovanja za starševsko varstvo. Obsega:

- porodniško nadomestilo (105 dni)
- očetovsko nadomestilo (90 dni)
- nadomestilo za nego in varstvo otroka (260 dni)
- posvojiteljsko nadomestilo  
(za otroka, starega od 1 do 4 let, 150 dni,  
za otroka, starega od 4 do 10 let, 120 dni)

Starševska nadomestila se usklajujejo z rastjo izhodiščne plače za negospodarske dejavnosti.

**Družinski prejemki** so pravica iz naslova družinskih prejemkov. Ta pravica zajema:

- otroški dodatek,
- pomoč ob rojstvu otroka (denar ali zavitek)
- starševski dodatek
- dodatek za nego otroka
- dodatek za veliko družino
- delno plačilo za izgubljeni dohodek.

Družinski prejemki se usklajujejo enkrat letno z indeksom rasti cen življenjskih potrebščin.

Tu prikazujemo povprečno mesečno število upravičencev oziroma prejemnikov, ki so jim bila v tistem letu odobrena ta sredstva.

Podatki o izplačanih sredstvih, namenjenih za starševsko varstvo in družinske prejemke, pa se nanašajo na celo leto in so izraženi v 1000 SIT.

**Starševsko nadomestilo** je nadomestilo plače oziroma osebni prejemek, ki izhaja iz zavarovanja za starševsko varstvo po Zakonu o starševskem varstvu in družinskih prejemkih (Ur. l. št. 97/2001). Starševsko nadomestilo obsega: porodniško nadomestilo, nadomestilo za nego in varstvo otroka, očetovsko nadomestilo ter posvojiteljsko nadomestilo.

## SOCIAL PROTECTION

### Parenthood, family receipts, beneficiaries and funds paid

Data on beneficiaries and funds for parenthood and family receipts are sent to us by the Ministry of Labour, Family and Social Affairs.

The legal basis for family receipts is regulated by the Parenthood and Family Earnings Act.

Rights according to this act are:

- rights derived from insurance for parenthood
- rights to receive family receipts.

According to this act, rights are exercised by one of the parents unless the law provides otherwise. Rights are linked to the child and stop with the child's death.

The parenthood insurance contribution is paid by insured persons and by employers. The contribution is paid into the budget of the Republic of Slovenia. The amount is determined by law.

**Parental compensation** is the right derived from insurance for parenthood and covers:

- maternity leave compensation (105 days)
- fathers' compensation (90 days)
- compensation for child nursing (260 days)
- adoptive parents' compensation  
(150 days for children aged 1-4 years and  
120 days for children aged 4-10 years)

Parental compensation is adjusted with the growth of the wage rate for non-economic activities.

**Family receipts** are the right derived from family receipts and covers:

- child allowance
- assistance for goods for a new-born child
- parental allowance
- allowance for nursing a child
- large family allowance
- partial payment for lost income

Family receipts are adjusted once a year with the consumer price index.

We are showing the average monthly number of beneficiaries, i.e. persons receiving these funds in the observed year.

Data on funds paid for parenthood and family receipts refer to the whole year and are given in thousand SIT.

**Parental compensation** is wage compensation or remuneration derived from insurance for parenthood according to the Parenthood and Family Earnings Act (OJ RS, No. 97/2001). Parental compensation covers: maternity leave compensation, compensation for child nursing, fathers' compensation and adoptive parents' compensation.

Za upravičence, ki so dobili pravico do nadomestila plače za čas porodniškega dopusta, dopusta za nego in varstvo otroka ter podaljšanega dopusta za nego in varstvo otroka pred uveljavitvijo Zakona o starševskem varstvu in družinskih prejemkih, to je pred 1. 1. 2002, veljajo določila Zakona o družinskih prejemkih (Ur. l. RS. 65/93) ter Zakona o spremembah in dopolnitvah zakona o družinskih prejemkih (Ur. l. 71/94, 73/95, 26/99).

**Otroški dodatek** je dopolnilni družinski prejemek, namenjen kot pomoč za delno poravnavanje stroškov pri vzdrževanju otroka.

Upravičenec do otroškega dodatka je eden izmed staršev, ki uveljavlja pravico do te pomoči, prejemnik pa otrok, ki mu je ta dodatek dodeljen. Do otroškega dodatka so bili upravičeni otroci, če dohodek na družinskega člana ni presegal 43 % (to je veljalo od 1. 1. do 30. 4. 1994) oziroma 50 % povprečne plače v Sloveniji (to je veljalo od 1. 5. 1994 do 1. 5. 1999).

Od 1. 5. 1999 je bila višina otroškega dodatka odvisna od dohodka na družinskega člana, za kar je bilo predvideno 8 dohodkovnih razredov. Višina je bila odvisna tudi od števila otrok v družini, ki so prejeli otroški dodatek; najnižja je bila za prvega otroka, višja za drugega, za tretjega in naslednje otroke pa je bila najvišja. Višina otroškega dodatka je bila določena v nominalnih zneskih, ki so se dvakrat letno usklajevali z rastjo cen življenjskih potrebščin.

Po Zakonu o starševskem varstvu in družinskih prejemkih, ki je pričel veljati s 1. 1. 2002, je višina otroškega dodatka odvisna od višine dohodka na družinskega člana. Predvidenih je 8 dohodkovnih razredov.

Ti so določeni v odstotku od povprečne mesečne plače vseh zaposlenih v Republiki Sloveniji za koledarsko leto pred vložitvijo zahtevka. Višina otroškega dodatka se določi glede na uvrstitev družine v dohodkovni razred.

Višina otroškega dodatka je odvisna tudi od od števila otrok v družini, ki prejema otroški dodatek: najnižji je za prvega otroka, višji za drugega, za tretjega in naslednje otroke pa najvišji.

Višina otroškega dodatka je določena v nominalnih zneskih in se usklajuje enkrat letno z indeksom rasti cen življenjskih potrebščin.

Nominalne meje dohodkovnih razredov se določijo v mesecu marcu za preteklo koledarsko leto.

Kadar otrok živi v enostarševski družini, se posamezni znesek otroškega dodatka poveča za 10 %.

Če predšolski otrok ni vključen v predšolsko vzgojo v skladu s predpisi, ki urejajo vrtnice, se posamezni znesek otroškega dodatka poveča za 20 %.

Kadar otrok po 18 letu starosti sam uveljavlja pravico do otroškega dodatka, mu pripada otroški dodatek v višini, ki velja za prvega otroka (65. čl.).

**Pomoč ob rojstvu otroka** (oprema za novorojenca) je enkratni prejemek (v obliki denarja ali v obliki zavitka za novorojenca). Predpiše ga minister. Upravičenci so otroci,

For beneficiaries who obtained the right to receive wage compensation for maternity leave, child nursing leave and extended child nursing leave before the Parenthood and Family Earnings Act entered into force, i.e. before 1 January 2002, provisions of the Family Earnings Act (OJ RS, No. 65/93) and Act Amending the Family Earnings Act (OJ RS, No. 71/94, 73/95, 26/99) are valid.

**Child allowance** is supplementary family receipt for partial coverage of expenses for supporting a child.

The beneficiary of this allowance is one of the parents exercising the right to this type of assistance, while the recipient is a child. Children are entitled to child allowance if monthly income per family member does not exceed 43% (from 1 January to 30 April 1994) or 50% of the average salary in Slovenia (from 1 May 1994 to 1 May 1999).

Since 1 May 1999 the amount of the child allowance depended on income per family member. To this end there were 8 income classes. The amount also depended on the number of children in the family receiving child allowance. It was the lowest for the first child, higher for the second child and the highest for the third and any subsequent child. The child allowance was defined in nominal amounts, which were adjusted with the growth of consumer prices twice a year.

According to the Parenthood and Family Earnings Act, which came into force on 1 January 2002, the amount of child allowance depends on the income per family member. To this end there are 8 income classes.

They are defined as percentage of average monthly salary of all persons in paid employment in the Republic of Slovenia for the calendar year before the application was submitted. The amount of the child allowance depends on the family ranking in these income classes.

The amount of the child allowance also depends on the number of children in the family receiving child allowance. It is the lowest for the first child, higher for the second child and the highest for the third and any subsequent child.

The child allowance is defined in nominal amounts and is adjusted once a year with the consumer price index.

The nominal income classes are determined in March for the previous calendar year.

If a child lives in a one-parent family, the amount of the child allowance is increased by 10%.

If a pre-school child does not attend kindergarten in accordance with regulations for kindergartens, the amount of the child allowance is increased by 20%.

If a child after completing 18 years of age exercises the right to receive child allowance, the amount is the same as for the first child (Article 65).

**Assistance for goods for a newborn child** is a one-time assistance at childbirth. It can be financial assistance or it can be given as a package for the newborn. Beneficiaries

katerih oče ali mati imata stalno prebivališče v Republiki Sloveniji.

Višina pomoči ob rojstvu otroka je bila ob uvedbi novega zakona določena s 1. 1. 2002 in je znašala 50 000 SIT. Višina pomoči ob rojstvu otroka se usklajuje enkrat letno z indeksom rasti cen življenjskih potrebščin.

**Starševski dodatek** je denarna pomoč staršem, kadar po rojstvu otroka le-ti niso upravičeni do starševskega nadomestila.

Pravica do starševskega dodatka je bila uveljavljena z Zakonom o družinskih prejemkih (18. 12. 1993). Upravičenke so imele pravico do starševskega dodatka v trajanju, kot je bilo določeno v predpisih o delovnih razmerjih v zvezi s pravico do zadržanosti z dela zaradi porodniškega dopusta in dopusta za nego in varstvo otroka. Starševski dodatek je znašal 52 % zjamčene plače.

Po Zakonu o starševskem varstvu in družinskih prejemkih ima pravico do starševskega dodatka mati, ki nima pravice do starševskega nadomestila oziroma nadomestila plače po drugih zakonih in pravice do delnega plačila za izgubljeni dohodek.

Mesečna višina starševskega dodatka je bila ob uvedbi novega zakona določena s 1. 1. 2002 in je znašala 35 000 SIT.

Višina starševskega nadomestila se usklajuje enkrat letno z indeksom rasti cen življenjskih potrebščin.

**Dodatek za nego otroka**, ki potrebuje posebno nego in varstvo, je denarni dodatek za nego, ki se izplačuje enemu od staršev hudo bolnega otroka ali otroka s telesno ali duševno prizadetostjo in je namenjen poravnavanju povečanih stroškov, ki jih ima družina zaradi nege in varstva hudo bolnega otroka ali otroka z motnjami v telesnem ali duševnem razvoju.

Pravica do tega dodatka je bila uveljavljena z Zakonom o družinskih prejemkih s 1. 5. 1996. Upravičenec do dodatka za nego otroka je hudo bolan otrok ali otrok s telesno ali duševno prizadetostjo, ki je državljan Republike Slovenije in ima v Republiki Sloveniji stalno prebivališče. Dodatek za nego otroka se kot denarni dodatek izplačuje na podlagi mnenja izvedenske komisije enemu od staršev hudo bolnega otroka ali otroka s telesno ali duševno prizadetostjo. Višina dodatka za nego otroka znaša 30 % zjamčene plače, oz. 20 % zjamčene plače, če je otrok v dnevnem institucionalnem varstvu, v katerem ima brezplačno oskrbo.

S 1. majem 1999 so bile uveljavljene spremembe in dopolnitve zakona, s katerimi je bilo določeno, da so do dodatka za nego otroka upravičeni tudi hudo bolni otroci ali otroci s telesno ali duševno prizadetostjo, ki so starejši od 18 let, če se šolajo, najdlje pa do 26. leta starosti.

Po Zakonu o starševskem varstvu in družinskih prejemkih je dodatek za nego otroka, denarni dodatek za otroka, ki potrebuje posebno nego in varstvo in je namenjen poravnavanju povečanih življenjskih stroškov, ki jih ima družina zaradi nege in varstva takega otroka. Izplačuje se v denarni obliki enemu izmed staršev, na podlagi mnenja zdravniške komisije.

are children whose father or mother has permanent residence in the Republic of Slovenia.

At the introduction of the new act on 1 January 2002, the amount of assistance was determined at SIT 50,000. The amount is adjusted once a year with the consumer price index.

**Parental allowance** is financial assistance to parents when they are not entitled to receive parental compensation after the birth of the child.

The right to receive parental allowance was introduced by the Family Earnings Act on 18 December 1993. The duration of receiving this allowance was defined by the regulations on labour relations in connection with the right to be absent from work due to maternity leave or leave for the care and nursing of the child. The parental allowance amounted to 52% of the guaranteed salary.

According to the Parenthood and Family Earnings Act, every mother who does not have the right to receive parental compensation or wage compensation according to other laws and the right to partial payment for lost income has the right to receive parental allowance.

At the introduction of the new act on 1 January 2002 the monthly amount of the parental allowance was determined at SIT 35,000.

The amount of the parental allowance is adjusted once a year with the consumer price index.

**Allowance for nursing a child** who needs special care and nursing is a financial allowance for nursing, paid to one of the parents of a severely ill child or a physically or mentally handicapped child. It is intended for covering increased expenses that the family has due to nursing and caring for a severely ill or a physically or mentally handicapped child.

The right to receive this allowance was introduced with the Family Earnings Act on 1 May 1996. Beneficiaries of this allowance are severely ill children or physically or mentally handicapped children, on condition that they are citizens of the Republic of Slovenia and have permanent residence in Slovenia. This allowance is paid to one of the parents of the severely ill or physically or mentally handicapped child on the basis of an expert opinion of a special commission. If the child lives at home with parents, the allowance amounts to 30% of the guaranteed salary. If the child is in daily institutional care with free nursing, the allowance amounts to 20% of the guaranteed salary.

On 1 May 1999 changes and supplements of the mentioned act were enforced with which it was determined that severely ill children or physically or mentally handicapped children over 18 years of age and in training are also entitled to receive this allowance, but not after they complete 26 years of age.

According to the Parenthood and Family Earnings Act, the allowance for nursing a child is given to children who need special care and nursing and is intended for covering increased expenses that the family has due to nursing and caring for such a child. It is paid to one of the parents on the basis of the expert opinion of a medical board.

Višina dodatka za nego otroka se usklajuje enkrat letno z indeksom rasti cen življenjskih potrebščin.

**Dodatek za veliko družino** je letni dodatek družini s tremi ali več otroki. Pravica je opredeljena z Zakonom o starševskem varstvu in družinskih prejemkih. Izplačuje se enkrat letno v enkratnem znesku. Dodatek za veliko družino je bil uveden s 1. 1. 2002. Višina je bila določena v vrednosti 70 000 SIT in se izplačuje glede na 122 člen zakona (v letu 2002 v vrednosti 25 000 SIT).

Višina dodatka za veliko družino se usklajuje enkrat letno z indeksom rasti cen življenjskih potrebščin.

**Delno plačilo za izgubljeni dohodek** je osebni prejemek, ki ga prejme eden od staršev, kadar prekine delovno razmerje ali prične delati s krajšim delovnim časom zaradi nege in varstva otroka s težko motnjo v duševnem razvoju ali težko gibalno oviranega otroka. Pravica do tega prejemka je pričela veljati s 1. 1. 2003.

The amount of the allowance for nursing a child is adjusted once a year with the consumer price index.

**Large family allowance** is an annual benefit for families with three or more children. The right is granted according to the Parenthood and Family Earnings Act. It is paid once a year as a lump sum. The large family allowance was introduced on 1 January 2002. The amount was determined at SIT 70,000 and is paid in accordance with Article 122 (in 2002 in the amount of SIT 25,000).

The amount of the large family allowance is adjusted once a year with the consumer price index.

**Partial payment for lost income** is remuneration received by one of the parents breaking the labour relation or starting to work part time because of nursing or caring for a severely physically or mentally handicapped child. This right was introduced on 1 January 2003.

## POSLOVNI SUBJEKTI

Vir podatkov o poslovnih subjektih na območju Slovenije je **Poslovni register Slovenije** (PRS), ki ga na podlagi 71. člena Zakona o plačilnem prometu (Ur. l. RS št. 30/02) od 15. 07. 2002 vodi Agencija Republike Slovenije za javnopravne evidence in storitve (AJPES). Podatke pridobiva iz primarnih registrov, evidenc in razvidov, ki jih vodijo različni registrski organi (okrožna sodišča, upravne enote, ministrstva, zbornice, davčni uradi, organi za notranje zadeve in drugi organi), pooblašeni za vodenje registrov, evidenc in razvidov o poslovnih subjektih.

V PRS-u so evidentirani vsi poslovni subjekti, ki so bili registrirani, evidentirani ali ustanovljeni po zakonu, ne glede na njihovo sedanjo poslovno aktivnost.

Leta 1995 sta bila sprejeta **Zakon o Poslovnem registru Slovenije** (Ur. list RS, št. 13/95) in **Uredba o vodenju in vzdrževanju Poslovnega registra Slovenije** (Ur. list RS, 70/95), ki urejata vzpostavitev, vodenje in vzdrževanje omenjenega registra, opredeljevanje enot v njem in način določitve njihove matične (identifikacijske) številke ter določata tudi obvezno uporabo le-te. Določata tudi varstvo in vsebino podatkov o enotah v PRS-u ter Standardno klasifikacijo dejavnosti (Ur. list RS, št. 34/94, 3/95, 33/95, 15/96, 89/98 in 12/99) kot podlago za razvrščanje teh enot v PRS, pri čemer je odločilna njihova glavna dejavnost.

Upravljelec PRS-a določi ob vpisu v PRS vsakemu poslovnemu subjektu **matično (identifikacijsko) številko** ter po Standardni klasifikaciji dejavnosti še šifro in ime podrazreda njegove registrirane glavne dejavnosti, določene z zakonom ali z aktom o ustanovitvi poslovnega subjekta, ne glede na njegovo pravnoorganizacijsko obliko, status, lastništvo ali način proizvodnje in storitev.

**Pravnoorganizacijska oblika** je ena od zakonsko veljavnih oblik organiziranja poslovnih subjektov, ki je razvidna iz akta o ustanovitvi poslovnega subjekta ali predpisa, na podlagi katerega je poslovni subjekt ustanovljen.

PRS zajema vse pravnoorganizacijske oblike poslovnih subjektov ter njihove enote v sestavi.

**Poslovni subjekti so pravne in fizične osebe**, ki na podlagi vpisa v ustrezne primarne registre, evidence, razvide ali na podlagi zakona opravljajo registrirane ali s predpisom ali z aktom o ustanovitvi določene dejavnosti v zakonsko določeni pravnoorganizacijski obliki in so vpisane v PRS.

**Pravne osebe** so gospodarske družbe, zavodi, društva, organi in organizacije, ki z vpisom v konstitutivni register, ustrezno evidenco ali ustrezni razvid ali z zakonom pridobijo status (lastnost) pravne osebe.

**Fizične osebe** so samostojni podjetniki posamezniki in druge fizične osebe, ki na prostem trgu samostojno in trajno opravljajo različne, izključno pridobitne dejavnosti.

**Dejavnost** je osnovna funkcija poslovnega subjekta, s katero le ta ustvarja dobiček ali dposega temeljni namen svoje ustanovitve.

**Glavna dejavnost** poslovnega subjekta je registrirana oziroma s predpisom ali z aktom o ustanovitvi določena

## BUSINESS SUBJECTS

The source of data on business subjects in Slovenia is the **Business Register of Slovenia** (BRS), which has been kept since 15 July 2002 by the Agency for Public and Legal Records and Services (AJPES) on the basis of Article 71 of the Payment Transactions Act (OJ RS No. 30/02). It obtains data from primary registers and records kept by different register bodies (regional courts, administrative units, ministries, chambers, bodies of internal affairs, inland revenues and other register bodies) authorised for keeping registers and records on business subjects.

BRS keeps records of all business subjects registered, recorded or created by law, irrespective of their present business activity.

In 1995 a new **Law on the Business Register of Slovenia** (OJ RS, No. 13/95) and the **Decree on Keeping and Maintaining of the Business Register of Slovenia** (OJ RS, No. 70/95) were adopted. The two regulate the setting up, keeping and maintenance of the mentioned register, definition of register units, definition of their identification number and its obligatory use. They also define the confidence and contents of data on units and their classification by activities of the Standard Classification of Activities (OJ RS, No. 34/94, 3/95, 15/96, 89/98, 12/99). The deciding factor is their main activity

The keeper of the BRS assigns to each business subject its **identification number** as well as by the Standard Classification of Activities the code and name of the subclass of its registered main activity defined by law or the foundation document, irrespective of its legal organisational form, status, ownership or method of production or service.

**Legal organisational form** is one of the legally valid forms of organising business subjects, which is evident from the foundation document or regulation, on the basis of which the business subject was created.

The BRS covers all legal organisational forms of business subjects and their constituent parts.

**Business subjects are legal and natural persons** that on the basis of entry into a corresponding primary register or record or on the basis of laws in a legally defined organisational form perform registered activities or activities defined by a foundation regulation or document and are registered in the BRS.

**Legal persons** are companies, institutions, associations and other organisations that obtain the status of legal persons by registration in an adequate constitutive register or record or by law.

**Natural persons** are individual private entrepreneurs and other natural persons that permanently and independently perform various exclusively profit activities on the free market.

**Activity** is the basic function of a business subject with which it creates profit or realises the basic purpose of its foundation.

**Main activity** of a business subject is registered activity or activity defined in the foundation regulation or document. If a

dejavnost. Če poslovni subjekt opravlja eno dejavnost, je ta njegova glavna dejavnost. Če poslovni subjekt opravlja več dejavnosti, je njegova dejavnost tista, s katero ustvarja največji delež dodane vrednosti.

**Standardna klasifikacija dejavnosti (SKD)** je obvezen nacionalni standard, ki se uporablja pri evidentiranju, zbiranju, obdelovanju, analiziranju, posredovanju in izkazovanju podatkov, pomembnih za spremljanje stanj in gibanj na ekonomskem, demografskem, socialnem, okoljskem, naravnem in drugih področjih. SKD se uporablja za določanje glavne dejavnosti in za razvrščanje poslovnih subjektov in njihovih delov za potrebe uradnih in drugih administrativnih zbirk podatkov (registri, evidence, baze podatkov ipd) ter za potrebe statistike in analitike v državnem in mednarodnem merilu na različnih ravneh primerjanja in odločanja.

Podatke o poslovnem subjektu vpisuje AJ PES v PRS na podlagi ustrezne **odločbe** (ali drugega ustreznega akta pristojnega primarnega registrskega organa) o ustanovitvi ali prenehanju poslovnega subjekta ali o spremembi podatkov o poslovnem subjektu.

Ko AJ PES vpiše v PRS vse podatke o novoustanovljenem poslovnem subjektu ali spremembi podatkov o poslovnem subjektu, izda AJ PES **obvestilo** o identifikaciji in razvrstitvi po dejavnosti (**PRS-3**).

Stanje o poslovnih subjektih ob koncu četrtrletja je presek stanja podatkov o poslovnih subjektih do kritične ure, ki je praviloma zadnji dan v četrtrletju do določene ure. Pri tem upoštevamo podatke o poslovnih subjektih v predhodnem četrtrletju ter podatke o ustanovitvah in prenehanjih poslovnih subjektov, evidentiranih v PRS do omenjene kritične ure ne glede na dejanski datum ustanovitve ali prenehanja poslovnih subjektov o primarnih registrih.

**Statistični register delovno aktivnega prebivalstva** je bil v Statističnem uradu Republike Slovenije vzpostavljen v letu 1986. Je redno ažuriran na podlagi podatkov iz obrazcev Prijava podatkov za uvedbo in vodenje matične evidence pokojninskega in invalidskega zavarovanja, evidence zdravstvenega zavarovanja, evidence o sklenitvi delovnega razmerja (M-1, M-2, M-1A, M-3, M-3A).

**Zaposlene osebe, vključene v Statistični register delovno aktivnega prebivalstva (SRDAP), so:**

- zaposlene osebe, ki so v delovnem razmerju (pokojninsko in invalidsko ter zdravstveno zavarovane), pri poslovnih subjektih - pravnih osebah ne glede na njihovo lastnino,
- lastniki poslovnih subjektov - pravnih oseb, če jih osebno vodijo in če niso zavarovani iz drugega naslova,
- izvoljeni ali imenovani nosilci javnih ali družbenih funkcij,
- matere, ki delajo po posebnih predpisih.

business subject performs only one activity, this is its main activity. If a business subject performs several activities, its main activity is the one with which it creates the biggest share of value added.

**Standard Classification of Activities** is the obligatory national standard used for recording, collecting, processing, analysing, mediating and disseminating data important for monitoring the situation and trends in the fields of economy, demography and social service as well as in the field of environment and natural resources. It is used for defining the activity and classifying business subjects and their units for the needs of official and other administrative data collections (registers, records, databases, etc.) and for the needs of national and international statistics and analyses.

Data on a business subject are entered by AJ PES into the BRS on the basis of the **decree** or some other adequate document on establishment, change or cessation of the business subject, issued by the competent primary register body.

When AJ PES enters all data on a newly created business subject or a change of data on a business subject into the BRS, it issues a **notice** on its identification and classification by activity (**BRS-3**).

The situation of business subject at the end of the quarter represents a cross-section of the situation of data on business subjects up until the reference hour, which is as a rule on the last day of the quarter. We take into consideration data on business subjects in the previous quarter and data on establishment and cessation of business subjects registered in the BRS up until the mentioned reference hour, irrespective of the actual date of establishment or cessation of business subjects at primary registers.

**The Statistical Register of Employment** was set up at the Statistical Office of the Republic of Slovenia in 1986. It is regularly updated on the basis of data from the forms Registration of Data for Introducing and Keeping Pension and Disability Insurance Records, Health Insurance Records and Employment Records (M-1, M-2, M-1A, M-3, M-3A).

**Employed persons in the Statistical Register of Employment are:**

- persons in paid employment who are employed (insured at the pension and disability insurance and health insurance) in business subjects - legal persons, irrespective of who owns them,
- owners of business subjects - legal persons, if they manage them personally and if they are not insured somewhere else,
- elected or appointed public officials,
- mothers working under special regulations.

## KMETIJSTVO IN RIBIŠTVO

### Zakol živine v klavnicah

Mesečna poročila o zakolu živine izpolnijo vse klavnice na območju Slovenije. Poročila temeljijo na klavniških zapisnikih. Klavnice poročajo o številu in masi vse zaklane živine v opazovanem mesecu v skladu z določili pravilnikov o kakovosti klavne živine in kategorizaciji mesa. Upoštevana sta tudi storitveni in zasilni zakol.

### Ulov morskih rib, glavonožcev, rakov in školjk

Podatke o ulovu morskih rib, glavonožcev, rakov in školjk zberemo z mesečnimi poročili o morskem ribolovu. Poročila izpolnjujejo poslovni subjekti, ki se ukvarjajo z ulovom ali vzrejo morskih živali, in registrirani zasebni ribiči, ki jim je ribolov glavna ali dopolnilna dejavnost.

## AGRICULTURE AND FISHING

### Slaughter of livestock in slaughterhouses

Monthly reports on slaughter of livestock are filled in by all slaughterhouses on the territory of Slovenia. Reports are based on records of slaughterhouses. Slaughterhouses report on the number and weight of all livestock slaughtered in the observed month in accordance with regulations on the quality of livestock for slaughter and categorisation of meat. Also included are service slaughter and forced slaughter.

### Catch of marine fish, cephalopods, crustaceans and shells

Data on catch of marine fish, cephalopods, crustaceans and shells are collected with monthly reports on marine fishing. Reports are filled in by business entities engaged in catching or breeding of sea animals and registered private fishermen whose main or supplementary activity is fishing.

## RUDARSTVO IN PREDELOVALNE DEJAVNOSTI

Podatke za industrijske dejavnosti zbira Statistični urad Republike Slovenije s statističnim raziskovanjem **Mesečno poročilo industrije (IND/M)**. V raziskovanje so zajeta proizvodna podjetja in proizvodni obrati neproizvodnih podjetij, v katerih je zaposlenih vsaj deset oseb, ki opravljajo eno ali več dejavnosti iz področja Rudarstva (C), Predelovalnih dejavnosti (D) in Oskrbe z elektriko (del E) Standardne klasifikacije dejavnosti.

Osnova za računanje **indeksov industrijske proizvodnje** so podatki o količinski proizvodnji v različnih merskih enotah, zbrani po *Nomenklaturi industrijskih proizvodov*. Indeksi obsega industrijske proizvodnje za proizvode in različne ravni Standardne klasifikacije dejavnosti se računajo v dveh stopnjah: v prvi stopnji se s pomočjo *ponderacijskih koeficientov* izračunajo indeksi proizvodnje za posamezne razrede in pripadajoče proizvode, temu pa sledi izračun indeksov industrijske proizvodnje na višjih ravneh Standardne klasifikacije dejavnosti, v katerem je tudi posameznim višjim ravnam s pomočjo *ponderacijskih faktorjev dejavnosti* določena njihova relativna pomembnost in hkrati izravnana različna stopnja zajetja med njimi. Tako ponderacijski koeficienti kot ponderacijski faktorji pomenijo oceno dodane vrednosti za proizvode oziroma višje ravni Standardne klasifikacije dejavnosti.

Za desezoniranje izvirmih indeksov in ugotavljanje trenda uporabljamo metodo TRAMO - SEATS, ki temelji na t.i. modelih ARIMA za dekompozicijo časovnih vrst na posamezne sestavine. To metodo uporablja tudi Evropski statistični urad.

Osnova za računanje **indeksov zaposlenih oseb po dejavnosti proizvodnje** so podatki o zaposlenih osebah, ki delajo tako neposredno v proizvodnji kot tudi tistih, ki so servis tem dejavnostim, npr. zaposleni v upravi, strokovnih službah itd. Če se podjetje ukvarja z različnimi proizvodnimi dejavnostmi naštetih področij, so tudi zaposlene osebe razporejene proporcionalno po teh dejavnostih.

## MINING AND MANUFACTURING

Data on industrial activities are collected by the Statistical Office of the Republic of Slovenia with the statistical survey **Monthly Industrial Report (IND/M)**. The survey covers industrial enterprises and production units which have at least ten persons in paid employment and perform one or more activities which belong to the field of Mining and quarrying (C), Manufacturing (D) and Electricity supply (part of E) of the Standard Classification of Activities.

The basis for calculating **industrial production indices** are data on production in units of measure collected according to the *National Nomenclature of Industrial Products*. Industrial production volume indices for products and different levels of the Standard Classification of Activities are calculated in two steps: in the first step production indices of individual products are calculated with the help of *weighting coefficients*. This is followed by the calculation of industrial production indices of higher levels of the Standard Classification of Activities by defining relative importance of individual levels (with *weighting factors of activities*) and levelling different degrees of coverage among them. Both weighting coefficients and weighting factors represent the estimation of value added for products and higher levels of the Standard Classification of Activities.

For seasonal adjustment of original data we use the TRAMO-SEATS method, which is based on the so called ARIMA models for decomposing time series into individual components. This method is also used by the Statistical Office of the European Communities.

The basis for calculating the **indices of persons in paid employment by activities of production** are data on persons in paid employment working in production and those working in services to these production activities, e.g. administrative workers, expert services, etc. If an enterprise is engaged in several different production activities belonging to the mentioned fields, persons in paid employment in this enterprise are proportionally distributed among these activities.

## GRADBENIŠTVO

**Gradbeno dejavnost** opazujemo s statističnim raziskovanjem *Mesečno poročilo o izvajanju gradbene dejavnosti v državi (GRAD/M)*. V letih 1999 do 2003 so bila v raziskovanje zajeta podjetja, družbe in organizacije, ki so opravljala gradbena, obrtna in inštalacijska dela in ki so imela deset ali več zaposlenih. Poročali so glavni izvajalci del, v svojih poročilih pa so prikazovali tudi deleže, ki so jih opravili podizvajalci.

V letih 1999 do 2003 je bilo v statistično raziskovanje zajeto okrog 300 poročevalskih enot vsako leto.

V letu 1999 je v raziskovanju sodelovalo natančno 332 enot, v letu 2000 277 enot, v letu 2001 280 enot, v letu 2002 272 enot in v letu 2003 322 poročevalskih enot.

Leta 2004 smo spremenili kriterij za izbiro poročevalskih enot. Enote smo izbrali na podlagi vrednosti proizvodnje po zaključnih računih 2002 in ne več glede na število zaposlenih. Posebno pozornost smo namenili tvorbi adresarja in izbiri poročevalskih enot temu, saj smo želeli nadaljevati dosedanje serije podatkov.

V raziskovanje so bila leta 2004 zajeta gradbena podjetja, katerih proizvodnja je v letu 2002 dosegla vrednost vsaj 300 milijonov tolarjev po zaključnih računih, in enote v sestavi, ki se ukvarjajo z gradbeno dejavnostjo in ki zaposlujejo vsaj 20 oseb ter še nekatera negradbena podjetja, ki izvajajo gradbeno dejavnost.

**Vrednost opravljenih del** je izražena v tekočih cenah brez davka. Vanjo je vključena tudi vrednost vgrajenega materiala in opreme ter vsa obrtniška in/ali inštalacijska dela, ne zajema pa stroškov nabave zemljišča, komunalnega opremljanja, stroškov selitev in najemnin za čas nadomestne gradnje, projektnih storitev in stroškov notranje opreme stavbe.

**Vrednost pogodb** in drugih oblik naročil zajema vrednost pogodb iz preteklih let, ki še niso bile realizirane, in tistih, ki so bile sklenjene v letu poročanja ne glede na realizacijo, in sicer po stanju na zadnji dan opazovanega obdobja.

**Vrednost novih pogodb** zajema vrednost tistih pogodb in drugih oblik naročil, ki so jih poročevalske enote sprejele v referenčnem obdobju. V izračunu so upoštevani le podatki podjetij in enot v sestavi, ki so registrirane kot 45.1 in 45.2 po SKD. Vrednosti so prikazane brez DDV, eventualnih popustov ob času sklepanja pogodbe in brez subvencij.

**Objekti** so s tlemi povezane stavbe ali gradbeni inženirski objekti, narejeni iz gradbenih proizvodov in naravnih materialov, skupaj z vgrajenimi inštalacijami in tehnološkimi napravami.

**Stavbe** so objekti z enim ali več prostori, v katere ljudje vstopajo in so namenjene prebivanju ali opravljanju dejavnosti.

**Gradbeni inženirski objekti** so objekti, namenjeni zadovoljevanju tistih človekovih materialnih in duhovnih potreb ter interesov, ki niso prebivanje ali opravljanje dejavnosti v stavbah.

**Gradnja stanovanj:** Vsako četrtletje zberemo od istih poslovnih subjektov tudi podatke o gradnji stanovanj. Prikazani so ne glede na namen, lastništvo, začetek gradnje in stopnjo dograditve stavbe, v kateri so stanovanja. Za dokončano štejemo stanovanje, v katerem so končana vsa gradbena in obrtna dela ter napeljave, določene v načrtu.

## CONSTRUCTION

**Construction activity** is monitored with the statistical survey *Monthly Report on Construction Activity in the Country (GRAD/M)*. Reporting units are enterprises, companies and organisations performing construction work, craft work or installation work and having at least ten persons in paid employment. Reporting are main contractors performing construction work.

In years 1999 to 2003 was in the statistical survey included around 300 reporting units.

In year 1999 data were sent to us by 245 of reporting units, in 2000 277 reporting units, in 2001 280 reporting units, in 2002 272 reporting units and in 2003 322 of them.

In year 2004 the criterium for selection of reporting units was changed. Units were selected on the basis of value of production instead on the basis on persons in paid employment. Special attention was paid to selection of reporting units due to our intent to proceed with the current series.

In 2004 the survey covers all construction enterprises whose value of construction put in place was at least 300 million tolar according to Final Accounts in 2002 and their units having at least 20 persons in paid employment and some other enterprises that perform construction work.

**The value of construction put in place** is given at current prices and without tax. It covers the value of built in material and equipment, all finishing and/or installation works, but not the costs of purchasing the land, public infrastructure facilities, moving costs and costs of rents for the time of construction, project services and costs of interior decoration..

Contractual value covers the **value of contracts** concluded in previous years yet still not realised and those concluded in the reporting year, irrespective of whether they were realised or not, as of the last day of the observation period.

Contractual **value for new contracts** covers the value of contracts concluded by reporting units in the reference period. Reporting units are only enterprises and their units that are registered as 45.1 and 45.2 (SKD). The values are shown without VAT, discounts in the moment of order and subsidies.

**Constructions** are buildings or civil engineering works made from construction products and natural material, including built-in installations and technological equipment.

**Buildings** are constructions with one or more rooms into which people enter and are intended for residence or for performing activities.

**Civil engineering works** are constructions intended for satisfying material and spiritual needs and interests of people other than residence or performing activities in buildings.

**Housing construction:** Each quarter we collect from the same business entities data on housing construction. Data are shown irrespective of the purpose, ownership, start of construction and the stage of completion of the residential building. A dwelling is completed when all construction work, craft work and installation work according to the construction plan is finished.

## Gradbena in uporabna dovoljenja za stavbe

Podatke o stanju na področju gradnje stavb pridobivamo tudi iz gradbene dokumentacije, in sicer iz gradbenih in uporabnih dovoljenj (za novogradnjo, povečavo ali spremembo namembnosti), ki jih izda upravni organ.

Podatke zbiramo na osnovi vprašalnikov Poročilo o dovoljenju za gradnjo stavbe (GRAD-PGD/M) in Poročilo o uporabnem dovoljenju stavbe (GRAD-PUD/M).

Vir podatkov je dokumentacija projekta za pridobitev gradbenega in uporabnega dovoljenja, s katero razpolaga oddelek za okolje in prostor v okviru upravnega organa.

V opazovanju so vse stanovanjske in nestanovanjske stavbe. Pri povečavah stanovanjskih stavb ne upoštevamo prizidave sobe ali kakšnega pomožnega prostora.

Pri razvrščanju gradbenih objektov na stavbe in inženirske objekte se ravnamo po Enotni klasifikaciji vrst objektov (Uradni list RS št. 33/03, CC - SI).

Začasne četletne podatke objavljamo po datumu prejema gradbenega in uporabnega dovoljenja. Pri končnih podatkih upoštevamo uradni datum izdaje dovoljenja.

**Stavbe** so objekti z enim ali več prostori, v katere ljudje vstopajo in so namenjene prebivanju ali opravljanju dejavnosti.

**Stanovanjske stavbe** so zgradbe, od katerih se vsaj polovica skupne površine stavbe uporablja za stanovanjske namene. Če se za stanovanjske namene uporablja manj kot polovica skupne površine stavbe, se ta uvrsti k nestanovanjskim stavbam.

**Nestanovanjske stavbe** so zgradbe, ki se večinoma uporabljajo ali so pretežno namenjene za nestanovanjske namene. Če se vsaj polovica skupne površine stavbe uporablja v stanovanjske namene, se ta uvrsti k stanovanjskim stavbam.

**Površina stavbe** obsega vsoto površin vseh etaž stavbe, ki jo določa veljaven tehnični predpis.

**Prostornina stavbe** obsega vsoto prostornin vseh etaž stavbe, ki jo določa veljaven tehnični predpis.

**Stanovanje** je vsaka gradbeno povezana celota, ki je namenjena za nastanitev in ima eno ali več sob z ustreznimi pomožnimi prostori (kuhinjo, shrambo, kopalnico, straniščem) ali je brez njih ter ima vsaj en poseben vhod.

Rezultati o številu stanovanj so prikazani drugače kot v prejšnjih objavah, in sicer po metodologiji iz leta 2002, po kateri so upoštevana tudi tista stanovanja, ki se uporabljajo le občasno (počitniška stanovanja). Ne upoštevamo pa stanovanj v stavbah za posebne namene (npr. domovi za ostarele, študente, delavce itd.).

V **površini stanovanja** je upoštevana uporabna površina sob, kuhinje in drugih pomožnih prostorov, površina zaprtih teras in verand ter površina pod vgrajenimi omarami. Površine kleti, podstrešja (nepripravnega za stanovanje), skupnih prostorov v večdružinskih hišah niso upoštevane.

## Building permits and safety permits

We obtain data on the situation in the field of construction of buildings from the construction documentation, namely building permits and safety permits (for new construction, extension and conversion-improvement) issued by the administrative body.

Data are collected on the basis of questionnaires Report on Building Permits (GRAD-PGD/M) and Report on Safety Permits (GRAD-PUD/M).

The source of data is the project documentation for obtaining the building permit and safety permit, which is available at the department for environment and spatial planning within the administrative body.

Covered are all residential and non-residential buildings. At extensions of residential buildings we do not take into consideration extension of room or utility space.

Classification of constructions into buildings and civil engineering works is determined by the Classification of Types of Constructions (OJ RS, No. 33/03, CC - SI).

Provisional quarterly data published by the date of the receipt of the building permit or safety permit. In publishing the final data we take into consideration the official date of the issue of the building permit or safety permit.

**Buildings** are constructions with one or more rooms into which people enter and are intended for residence or for performing activities.

**Residential buildings** are constructions at least half of which is used for residential purposes. If less than half of the overall useful floor area is used for residential purposes, the building is classified under non-residential buildings.

**Non-residential buildings** are constructions that are mainly used or intended for non-residential purposes. If at least half of the overall useful floor area is used for residential purposes, the building is classified as a residential building.

**Floor area of buildings** is the sum total of floor area of all storeys of the building defined by the valid technical regulation.

**Volume of building** is the sum total of the volume of all storeys of the building defined by the valid technical regulation.

A **dwelling** is any structurally unified whole intended for residence, with one or more rooms, with or without appropriate utility spaces (kitchen, larder, hallway, bathroom, and toilet) and with at least one separate entrance.

In contrast to previous issues, results are shown according to the 2002 methodology, which takes into account dwellings used only occasionally (e.g. holiday homes). Dwellings in collective accommodation facilities (e.g. old people's homes, student residence, etc.) are not taken into account.

The **useful floor area of a dwelling** covers the usable area of the rooms, kitchen and other auxiliary interiors, the area of enclosed terraces and verandas, and the area enclosed by fitted cupboards. The areas of cellar, attic (unfit for a dwelling) and collective areas in apartment houses are not taken into account.

**TRGOVINA IN DRUGE STORITVENE DEJAVNOSTI**

**Indeksi prihodka, katerih glavna dejavnost je trgovina na drobno, prodaja motornih vozil in goriva ter vzdrževanje in popravilo motornih vozil, prikazujejo mesečno poslovanje v omenjenih podjetjih.**

Podatke o poslovanju celotnega podjetja sporočajo s poročilom TRG/M podjetja, ki so po glavni dejavnosti razvrščena v trgovino na drobno, prodajo motornih vozil in goriva ter vzdrževanje in popravilo motornih vozil. Ker v praksi ni mogoče zbrati podatkov od vseh poslovnih subjektov omenjene dejavnosti, jih pridobimo iz vzorca podjetij; podjetjem, ki ne odgovorijo na vprašalnik, podatke pripišemo na podlagi znanih podatkov in tako rezultate vzorca povečamo na vso ciljno populacijo.

Rezultate objavljamo v obliki indeksov, ki kažejo na dinamiko poslovanja, ločeno kot indekse nominalnih vrednosti in indekse realnih vrednosti. Spremembe cen pri slednjih izločimo tako, da nominalne indekse deflaciramo z ustreznimi skupinami indeksov cen na drobno. Objavljamo tudi desezonirane indekse. Desezonirane vrednosti so vrednosti, pri katerih je izključen vpliv sezone, tj. vrednosti, ki vsebujejo trend-cikel in naključno komponento. Pri desezoniranju indeksov smo upoštevali tudi vpliv delovnih dni in slovenskih praznikov.

Prvi rezultati za opazovani mesec so na voljo praviloma 25. v mesecu za predpretekli mesec. Prvi podatki so začasni. Morebitne kasnejše popravke in dopolnitve vključujemo v podatke za mesec opazovanja na katerega se nanašajo.

Posamezni razredi dejavnosti so v tej publikaciji združeni na agregate podjetij, ki prodajajo pretežno živila, neživila, goriva in motorna vozila (pri prodaji motornih vozil sta zajeti tudi vzdrževanje in popravilo motornih vozil). Skupine dejavnosti SKD, na katere se nanašajo objavljeni podatki, objavljamo v metodoloških pojasnilih v Statističnih informacijah.

**Trgovina na drobno** je nakupovanje ter nadaljnja prodaja blaga končnim porabnikom (za osebno porabo in potrebe gospodinjstev) ali drugim, ki nabavljeno blago uporabljajo za opravljanje dejavnosti pod določenimi pogoji.

**Trgovina z motornimi vozili** vključuje trgovino na debelo, posredništvo, trgovino na drobno in vzdrževanje in popravila motornih vozil.

**Prihodek** je skupni znesek, ki ga podjetje obračuna za prodajo blaga in za opravljene storitve v enem mesecu. Obsega vse stroške in obremenitve, vezane na kupca, ne zajema pa davka na dodano vrednost, morebitne prodaje osnovnih sredstev in drugih izrednih prihodkov. Prodaja na posojilo se šteje v mesec fakturiranja.

**Podatki o indeksih prihodka trgovine na drobno in debelo po skupinah dejavnosti so rezultati četrletnega poslovanja trgovine na drobno in debelo, vključno s trgovino, ki posluje v okviru netrgovinskih podjetij (ne glede na glavno dejavnost podjetja).**

Podatke o četrletnem poslovanju dejavnosti (ali dela dejavnosti), ki jo lahko opredelimo kot trgovino (nakup blaga za nadaljnjo prodajo), poročajo podjetja, katerih glavna dejavnost je trgovina, pa tudi podjetja z drugimi dejavnostmi, z vprašalnikom TRG/ČL. Storitve v prometu blaga (agen-

**DISTRIBUTIVE TRADE AND OTHER SERVICE ACTIVITIES**

**Indices of turnover show monthly operation in enterprises whose main activity is retail trade and motor trade.**

Data on operation of the whole enterprise are mediated with TRG/M report by enterprises whose main activity is classified in retail trade, sale of motor vehicles and fuel, and maintenance and repair of motor vehicles. Because it is not possible to collect data from all business entities in the mentioned activity, we obtain them from a sample of enterprises: we impute data to enterprises which did not answer the questionnaire on the basis of known data and thus increase results of the sample to the whole target population.

Results are published as two types of indices, value indices and volume indices, which show dynamics of operation. In volume indices we eliminate the influence of prices by deflating value indices with corresponding groups of retail price indices. We publish also the seasonally adjusted indices. By seasonally adjusting the indices, we took into account the impact of working-days and Slovenian holidays.

As a rule, first results are available at the 25<sup>th</sup> day of the month for the month before the last. First data are provisional and eventual corrections and supplements are included in the processing for the subsequent months.

Individual classes of activity are in this publication combined into aggregates of enterprises selling food, non-food, fuels and motor vehicles (sale of motor vehicles covers also maintenance and repair of motor vehicles). Groups of activities by the Standard Classification of Activities are published in methodological explanations of Rapid Reports.

**Retail trade** is purchase and further sale of goods to final users (for personal use and household needs) or to others who use purchased goods for performing their activity under fixed conditions.

**Motor trade** includes wholesale, commission trade, retail trade and maintenance and repair of motor vehicles.

**Income** is total amount which the enterprise settled with sale of goods and performed services in the month. It includes all costs and charges linked to the buyer and excludes the value added tax, eventual sale of fixed assets and other extra income. The sale for loan is registered in the month of invoicing.

**Data on turnover indices in retail trade and wholesale by groups of activities are the result of quarterly operation of retail trade and wholesale, including trade within the framework of non-trade enterprises (irrespective of the enterprise's main activity).**

Data on quarterly operation of the activity (or part of activity) which can be defined as trade - purchase of goods for further sale - are mediated with TRG/ČL questionnaire by enterprises whose main activity is trade as well as by enterprises with other activities. Goods transport services

cijske, posredniške, ...) v podatke niso zajete kakor tudi ne vzdrževanje in popravilo motornih vozil.

Rezultate o indeksih prihodka objavljamo kot nominalne indekse, pri čemer sprememba cen ni izločena. Prikazujemo jih po agregatih opazovanih enot, ki prodajajo pretežno živila, neživila, motorna vozila in goriva.

Poleg indeksov prihodka in prodaje objavljamo še gibanje zalog. Pregled trgovine na drobno dopolnjujemo z razdelitvijo prihodka po načinu plačila in s številom prodajalnih, pregled trgovine na debelo pa z razdelitvijo prihodka po vrstah kupcev in s podatkom o izvozu.

**Trgovina na debelo** je nakupovanje ter nadaljnja prodaja blaga trgovcem, predelovalcem ali velikim porabnikom doma ali v tujini. Blago se lahko prodaja nespremenjeno ali po obdelavi, pakiranju, prepakiranju, ki je značilno za trgovino na debelo.

**Vrednost prodaje** vsebuje prihodek in davek na dodano vrednost (do vključno prve polovice 1999 davek na promet blaga in storitev). Prikazana je po tekočih cenah.

**Vrednost zalog** ob koncu četrtertletja je vrednost blaga, ki je bilo ob koncu četrtertletja v zalogah. Zaloge trgovine na debelo se vrednotijo po nabavnih cenah, zaloge v trgovini na drobno pa po prodajnih cenah.

Definiciji trgovine na drobno in prihodka ustrezata definicijam za mesečno raziskovanje (glej spredaj).

### Odkup kmetijskih pridelkov

**Skupni odkup** kmetijskih pridelkov zajema podatke o odkupu od zasebnih pridelovalcev ter o prodaji kmetijskih pridelkov iz lastne pridelave podjetij, zadrug in drugih organizacij.

**O odkupu** kmetijskih pridelkov poročajo podjetja, zadruge, gozdna gospodarstva in druge organizacije, ki odkupujejo kmetijske pridelke od zasebnih pridelovalcev. Niso pa tu zajete tiste količine, ki jih le-ti sami prodajo neposredno večjim potrošnikom ali na prostem trgu (prodaja na domu, sejmihi ali na živilskih trgih).

**Vrednost odkupa** je vrednost, ki jo pridelovalec prejme za oddane pridelke. Stroški organizacije v zvezi s prevzemom kmetijskih pridelkov od zasebnih pridelovalcev, s prevozom do skladišč, hrambo ali z uskladiščenjem se ne štejejo v vrednost odkupa.

**O prodaji** kmetijskih pridelkov poročajo vse organizacije, ki prodajajo kmetijske pridelke iz lastne pridelave (kmetijska podjetja, šole, zavodi in druge organizacije). V prodajo pa ne štejemo pridelkov, če so bili dani za predelavo lastnim enotam. V tem primeru štejemo kot prodajo izdelke teh enot (mlečne izdelke, alkoholne pijače, suho sadje itd.).

V **vrednost prodaje** kmetijskih pridelkov so všteti stroški, ki nastanejo v zvezi s pripravo pridelkov za dobavo do nakladalnega kraja (sortiranje, pakiranje ipd.). V vrednosti prodaje niso upoštevani vračljiva embalaža, transportni stroški od nakladalne do razkladalne postaje in olajšave, ki jih organizacije odobrijo kupcem.

(mediation, etc.), and maintenance and repair of motor vehicles are not covered.

Results on turnover indices are published as absolute indices, not excluding change of prices. They are shown by aggregates of observed units selling mainly food, non-food, motor vehicles and fuels.

In addition to turnover and sale indices, we also publish change of stocks. The review of retail trade is supplemented with the breakdown of turnover by mode of payment and with the number of sales outlets. The review of wholesale is supplemented with the breakdown of turnover by kinds of buyers and with data on exports.

**Wholesale** is purchase and further sale of goods to merchants, manufacturers or big users at home or abroad. Goods can be sold unchanged or after processing, packing or re-packing which is characteristic for wholesale.

**Sales value** comprises turnover and value added tax (until first half of 1999 turnover tax on goods and services. It is shown at current prices.

**Value of stocks** at the end of the quarter is value of goods which were in stock at the end of the quarter. Stocks of wholesale are valued at purchase prices and stocks of retail trade at selling prices.

Definitions of retail trade and turnover correspond to definitions for the monthly survey stated above.

### Purchase of agricultural products

**Total purchase** of agricultural products contains data on purchase from private producers and data on sale from own production of companies, cooperatives and other organizations.

**Reports on the purchase** of agricultural products are submitted by companies, cooperatives, forestry and other organizations that purchase agricultural products directly from private producers. These reports do not contain the quantities of agricultural products sold directly to larger consumers and also not the quantities sold on the free market (on the farm, on stock fairs or markets).

**Value of purchase** is the value that private producers get for sold agricultural products. Manipulation costs related to the delivery of agricultural products from farmers, with transport to the storage, are not included in the value of purchased products.

**Reports on the sale** of agricultural products are submitted by organizations that sell agricultural products from their own production (agricultural companies, schools, institutions and other organizations). Not considered as sale in giving of raw materials to own units for processing. In this case only products of these units are considered as sale (dairy products, alcoholic drinks, dried fruit, etc.).

**Value of sold agricultural products** includes costs of preparation of products for delivery and transport to the loading place (sorting, packing, etc.). The price of packaging which is returned, the costs of transport to the loading and unloading station and other facilities of payment granted to the buyer are also not included.

**Premije, regresi, kompenzacije** ipd., ki jih pridelovalci dobijo za določene pridelke, niso zajeti v vrednosti odkupa in prodaje.

V tabeli "**Odkup pomembnejših skupin kmetijskih pridelkov**" so navedene vrednosti samo nekaterih pomembnejših skupin. Vrednost odkupa drugih, manj pomembnih skupin (žit, industrijskih rastlin, krmnih rastlin, sadik sadnega drevja in vinske trte, kože, volne in perje, meda in voska, rib in drugih pridelkov) je upoštevana le v stolpcu "Ves odkup", ni pa posebej prikazana.

V tabeli "**Količinski odkup kmetijskih pridelkov**" je pri prašičih, govedu in teletih zajeta samo masa klavnih živali (brez živali za plemo in pitanje), pri jajcih so šteta samo konzumna jajca (brez valilnih), pri jabolkih pa so poleg namiznih jabolk šteta tudi jabolka za predelavo.

**Bonuses, reimbursements, compensations**, etc., which producers obtain for certain products, are not included in the value of purchase or sale.

Table **Value of purchased products by groups** contains data only for some main groups of agricultural products. Value of purchased other, less important groups (cereals, industrial plants, fodder plants, fruit and vine plants, hides, wool and feathers, honey and wax, fishes and other products) is included in the value of total purchase.

Table **Purchase of main agricultural products** weights of pigs, cattle and calves include only animals for slaughter (without animals for fattening and breeding), number of eggs do not include hatching eggs and apples include dessert apples and apples for industry.

## GOSTINSTVO IN TURIZEM

### Gostinstvo

Indeksi prihodka v gostinstvu so rezultat mesečnega raziskovanja GO/Ma,b. Z njim spremljamo poslovanje podjetij z gostinstvom kot glavno dejavnostjo, torej podjetij, ki z gostinstvom ustvarijo pretežni del dodane vrednosti. Pri tem se podatki nanašajo na celo podjetje, kar pomeni, da zajemajo tudi tisto morebitno dejavnost podjetja, ki ni povezana z gostinstvom.

Ker v praksi ni mogoče zbrati podatkov od vseh takih podjetij, v raziskovanje vključujemo le vzorčna podjetja. Ta so bila za opazovanje v letu 2004 izbrana med 5 194 potencialnimi enotami.

Vzorec je razdeljen na stratum, in sicer po dejavnosti in po velikosti podjetij. Po tem izboru predstavlja vzorčna populacija 1 200 podjetij.

Podjetjem, ki na vprašalnik ne odgovorijo, podatke ocenimo (pripisemo ali imputiramo) glede na njihove podatke o prihodu in številu oseb, ki delajo, v prejšnjem mesecu ter glede na porezno povprečno razmerje med prihodom v tekočem in prejšnjem mesecu tistih podjetij v isti stratumski celici, ki so odgovorila. Če je podjetje v vzorcu novo in ni odgovorilo, mu podatke ocenimo s pomočjo ostalih odgovorov v isti stratumski celici ter njegovih registrskih podatkov.

Podatki so uteženi zaradi verjetnosti izbora, uteži pa so nato še popravljene glede na razmerje rojstev in smrti v populaciji.

Rezultate objavljamo v obliki indeksov, ločeno kot indekse nominalnih vrednosti in kot indekse realnih vrednosti, ki so pomembni za oceno dinamike poslovanja. Pri slednjih izločimo spremembo cen, tako da nominalne indekse deflaciniramo z ustreznimi skupinami indeksov cen gostinskih storitev.

Indeksi niso obdelani glede na sezono in število delovnih dni. Prikazani so na ravni **sestavljanih skupin dejavnosti**, za katere so podatki še reprezentančni:

| Skupine dejavnosti                      | Dejavnosti (razredi SKD), na katere se nanašajo objavljeni podatki |   |
|---|--|---|
|   | Šifra  | Dejavnost   |
| Gostinstvo skupaj                       | 55.  | Gostinstvo skupaj   |
| nastanitev in z njimi povezane storitve | 55.10,<br>55.21,<br>55.22,<br>55.23                                | dejavnost hotelov in podobnih obratov; dejavnost planinskih domov in mladinskih prenočišč; dejavnost kampov; dejavnost drugih nastanitvenih obratov (otroških letovišč in sindikalnih domov, turističnih kmetij z nastanitvenimi zmogljivostmi ...)   |
| priprava in serviranje jedi             | 55.30,<br>55.51,<br>55.52  | dejavnost prehrabnenih gostinskih obratov, dejavnost restavracij in gostiln, dejavnost okrepčevalnic, samopostrežnih restavracij, picerij, dejavnost slaščičarn, kavarn, dejavnost premičnih gostinskih obratov, dejavnost drugih prehrabnenih obratov; dejavnost menz, priprava in dostava hrane |
| točenje pijač                           | 55.40  | točenje pijač in napitkov v barih in v drugih lokalih   |

**Prihodek** je skupni znesek, ki ga celotno podjetje obračuna za opravljene storitve v enem mesecu. Ne zajema davka na dodano vrednost, morebitne prodaje osnovnih sredstev in drugih izrednih dohodkov. Prihodek je prikazan po tekočih cenah glede na obdobje, v katerem je bil izdan račun.

Zaradi načina oblikovanja vzorca, reorganizacij in drugih

## HOTELS, RESTAURANTS AND TOURISM

### Hotels and restaurants

Indices of turnover in hotels and restaurants are the result of the monthly survey GO/Ma,b, with which we monitor operation of enterprises whose main activity - the one with which they create the main part of their turnover - is activity of hotels and restaurants. The data refer to the whole enterprise, which means that they also cover the activities not linked with the activity of hotels and restaurants.

Because it is not possible to collect data on all enterprises, we use sampling. For 2004 the enterprises included in the sample were selected from among 5,194 potential units.

The sample was divided into strata by activity and by enterprise size. After the selection the population was reduced to 1,200 enterprises.

We estimate (impute) the data for enterprises which did not answer the questionnaire, taking into account their register data on turnover and number of persons working in them in the previous month, and the levelled average ratio between the turnover in the current and previous month of enterprises in the same stratum that answered the questionnaire. If the enterprise is new in the sample and did not answer, we estimate its data with the help of other answers in the same stratum and its register data.

Data are weighted because of probability of selection and weights are corrected.

Results are published as two types of indices, value indices and volume indices, which are imported for estimating the dynamics of operation. In volume indices we eliminate the change of prices by deflating the value indices with corresponding groups of hotels and restaurants price indices.

Indices are not seasonally and working day adjusted. They are shown at the level of **groups of activities** for which the data are still representative

| Groups of activities                 | Activities (SKD classes) to which the published data relate |  |
|--------------------------------------|---|--|
|                                      | Code  | Activity   |
| Hotels and restaurants total         | 55.   | Hotels and restaurants total   |
| overnight and corresponding services | 55.10,<br>55.21,<br>55.22,<br>55.23                         | accommodation services supplied by hotels and similar facilities: youth hostels and mountain refuges, camping sites and other short-stay accommodation services (vacation facilities for children, company vacation facilities, tourism in villages, etc.) |
| food serving services                | 55.30,<br>55.51,<br>55.52                                   | food serving services in restaurants and inns, pubs and self-service restaurants, pizza parlours, confectioneries, cafes, mobile and other food serving facilities, canteens, and preparation and delivery of food   |
| Drinks serving services              | 55.40   | drinks serving services in bars and other drinks serving facilities  |

**Turnover** is the total amount that the enterprises settled for performed services in the month. It excludes the value added tax, eventual sale of fixed assets and other extra income. The turnover is shown at current prices of the month of invoicing.

Due to the method of sample design, reorganisation and

sprememb nekatera vprašana podjetja ne ustrezajo zahtevam raziskovanja. Vsa taka podjetja štejemo kot neustrezna. Razmerje med številom ustreznih in številom v vzorec zajetih enot je izraženo s **stopnjo ustreznosti**.

Razmerje med številom prejetih odgovorov in številom ustreznih enot v vzorcu je **delež odgovorov**. Tako stopnja ustreznosti kot delež odgovorov nihata iz meseca v mesec. Za tokrat objavljene podatke so bili stopnje in deleži naslednji:

| Obdobje        | Stopnja ustreznosti<br>Eligibility rate | Delež odgovorov<br>Response rate | Period         |
|----------------|---|----------------------------------|----------------|
| februar 2003   | 90,7                                    | 88,3                             | February 2003  |
| marec 2003     | 90,6                                    | 88,4                             | March 2003     |
| april 2003     | 89,8                                    | 88,9                             | April 2003     |
| maj 2003       | 89,7                                    | 88,3                             | May 2003       |
| junij 2003     | 88,8                                    | 88,7                             | June 2003      |
| julij 2003     | 87,8                                    | 89,0                             | July 2003      |
| avgust 2003    | 87,1                                    | 89,1                             | August 2003    |
| september 2003 | 87,3                                    | 89,9                             | September 2003 |
| oktober 2003   | 86,7                                    | 89,0                             | October 2003   |
| november 2003  | 85,4                                    | 88,0                             | November 2003  |
| december 2003  | 85,7                                    | 87,0                             | December 2003  |
| januar 2004    | 94,1*                                   | 87,8*                            | January 2004   |
| februar 2004   | 93,8                                    | 84,8                             | February 2004  |

Z vnosom podatkov za opazovani mesec po potrebi dopolnjujemo in popravljamo tudi podatke za predhodne tri mesece (izjemoma tudi za daljše obdobje). To pomeni, da so podatki zadnjih štirih mesecev začasni, končni letni podatki pa bodo objavljeni v juliju.

## Turizem

**Turizem** je dejavnost oseb, ki potujejo v kraje zunaj svojega običajnega okolja in tam tudi ostanejo, vendar manj kot eno leto brez prekinitve, zaradi preživljanja prostega časa, sprostitve, poslov ali iz drugih razlogov.

**Prihodi turistov** v nastanitveni objekt so opredeljeni s številom oseb, ki prispejo v nastanitveni objekt in se tam prijavijo. Štejejo se vse osebe ne glede na starost, torej tudi otroci in tudi če so njihove prenočitve brezplačne. Prihodi se registrirajo po državi prebivališča turista in po mesecu prihoda.

**Prenočitev** je vsaka noč, ki jo turist dejansko preživi v nastanitvenem objektu (prespi ali se tam le zadržuje) ali ko je tam le prijavljen (njegova fizična navzočnost ni nujna). Število prenočitev se izračuna po državi potnega lista turista in po mesecu prenočitve. Običajno se datum prihoda razlikuje od dneva odhoda. Oseba ne sme biti hkrati prijavljena v dveh nastanitvenih objektih.

other changes, some enterprises do not meet the survey requirements. They are labelled uneligible. The number of eligible units in the total number of units in the sample is the **eligibility rate**.

The number of received responses in the total number of eligible units in the sample is the **response rate**. Both the eligibility rate and the response rate can change between months. For the published results the rates were:

By entering the data for the observed month, we supplement and correct, if needed, the data for the previous three months (for longer period exceptionally). This means that the data for the last four months are temporary and that the final annual data are published in July.

## Tourism

Tourism are activities of persons travelling to and staying in places outside their usual environment for not more than one consecutive year for leisure, business and other purposes.

**Arrivals** are defined as a number of persons who arrive at a tourist accommodation and check in. No age limit is applied: children are counted as well as adults, even in the case when the overnight stays of children might be free of charge. Arrivals are registered by country of residence of the tourist and by month.

**An overnight stay** is each night that a tourist actually spends (sleeps or stays) or is registered (his/her physical presence there being unnecessary) in a collective accommodation establishment or in private tourism accommodation. Overnight stays are calculated by country according to the passport of tourist and by month. Normally the date of arrival is different from the date of departure. A person should not be registered in two tourist accommodations at the same time.

## TRANSPORT

Večino podatkov smo zbrali z rednimi statističnimi raziskovanji s področja statistike transporta. Podatke o registriranih motornih vozilih nam je posredovalo ministrstvo za notranje zadeve, podatke o transportu plina pa oddelek za statistiko energetike.

Kot poročevalske enote so zajeti poslovni subjekti, ki so registrirani v ustrezni dejavnosti oziroma imajo v svoji sestavi vsaj eno poslovno enoto s to dejavnostjo.

**Prevoz potnikov v vseh transportnih panogah** zajema prevoz potnikov po železnici, cesti in zraku.

**Indekse** računamo iz ustvarjenih **potniških km** v železniškem, cestnem in zračnem transportu.

**Potniški km** je merska enota, ki pomeni prevoz enega potnika na razdalji enega kilometra.

**Prevoz blaga v vseh transportnih panogah** zajema prevoz blaga po železnici, cesti in morju.

**Indekse** računamo iz ustvarjenih **tonskih km** v železniškem, cestnem in pomorskem prevozu.

**Tonski km** je merska enota, ki pomeni prevoz ene tone blaga na razdalji enega kilometra.

Podatke o **železniškem prevozu** blaga in potnikov nam posredujejo Slovenske železnice.

O **cestnem potniškem prevozu** v javnem prevozu nam poročajo poslovni subjekti, registrirani za to dejavnost. Izbor poročevalskih enot pripravimo v januarju tekočega leta, tako da določimo spodnji prag na osnovi doseženega prihodka v določenem preteklem obdobju in števila zaposlenih oseb (pet in več). Prevoza potnikov, ki ga opravljajo samostojni podjetniki in prevoza potnikov s taksiji in osebnimi avtomobili nismo upoštevali.

O **cestnem blagovnem prevozu** nam od leta 2001 redno poročajo poslovni subjekti (**pravne in fizične osebe**), ki imajo v lasti, najemu ali upravljanju registrirana tovorna motorna vozila z vsaj eno tono nosilnosti, in sicer tako v **javnem prevozu kot tudi prevozu za lastne potrebe**. Osnova za izdelavo četrtrletnega vzorca je Register motornih vozil, ki ga vodi Ministrstvo za notranje zadeve. Dobljene podatke uparimo s Poslovnim registrom Slovenije in jim dodelimo šifro dejavnosti (SKD) ter jih vzorčimo glede na tip lastnine (pravne in fizične osebe) in glede na nosilnost (4 razredi za tovrstne avtomobile in specialna tovorna vozila ter ločeno vlačilci - skupaj 5 razredov). Opazovana enota je registrirano tovorno motorno vozilo z vsaj eno tono nosilnosti v določenem tednu opazovanja.

Poslovne subjekte, izbrane v določenem četrletju, predhodno obvestimo z obvestilnim pismom "invitation letter", na katerem je seznam registrskih števil tovornih motornih vozil s pripadajočimi tedni opazovanja. Poslovnim subjektom pošljemo vprašalnik skupaj z navodili in okrožnico ter kuverto s plačano poštino (za vračilo) približno 10 dni pred določenim tednom opazovanja. Vprašalnik mora biti vrnjen v 8 dneh po koncu določenega tedna opazovanja. V primeru nevraila, pošljemo I. opomin približno 10. dan, II. opomin pa 23. dan po koncu določenega tedna opazovanja, 30. dne pa

## TRANSPORT

Most of the data are compiled from regular statistical surveys in the area of transport. Data on registered motor vehicles were supplied by the Ministry of the Interior and data on transport of gas by department for energy statistics.

Reporting units are business entities registered in defined activity or having at least one of its units perform this activity.

**Passengers carried in all modes of transport** include transport of passengers by rail, road and air.

**Indices** are calculated from created **passenger-km** in railway, road and air transport.

**Passenger-km** is a unit of measure representing the transport of one passenger over one kilometre.

**Goods carried in all modes of transport** include transport of goods by rail, road and sea.

**Indices** are calculated from created **tonne-km** in railway, road transport and in maritime traffic.

**Tonne-km** is a unit of measure representing the transport of one tonne of goods over one kilometre.

Data on **railway transport** of goods and passengers are supplied by the Slovenian Railways.

Under **road passenger transport** for hire and reward we cover selected business subjects whose registered activity is road carriage of passengers. The selection of units is made in January and the lower threshold is defined on the basis of the turnover achieved in a certain past period and the number of employees (at least five). Transport of passengers by buses by individual entrepreneurs and transport of passengers by taxis and passenger cars are not included.

Since 2001 under **road goods transport** we cover selected business subjects (**legal and natural persons**) which are owner, leaseholder or manager of registered goods motor vehicle with at least one tonne of load capacity **for hire or reward and own account**. The basis of the quarterly sample is the Register of Motor Vehicles at the Ministry of the Interior. We match the data with the Business Register of Slovenia, allocate the data of code of activities (SCA) and sample the data in view of type of ownership (legal entities and natural persons) and loading capacity (4 classes for goods vehicles and special goods vehicles and separately for road tractors - 5 classes in total). The observation unit is the registered goods motor vehicle with at least one tonne of load capacity in the defined week of observation.

We notify the selected in a certain quarter with an invitation letter, which listed the numbers of registered goods motor vehicles with appurtenant weeks of observation. We send the questionnaire with instructions and post-paid envelope to business objects about 10 days before defined week of observation. The questionnaire has to be returned not later than 8 days after defined week of observation. In the case of non-return, we send the first reminder 10 days after the end of defined week of observation, the second one 23 days after the end of defined week of observation and call the

sledi še telefonski opomin.

Podatki o cestnem blagovnem prevozu se objavljajo po četrletjih. Skupna količina prepeljanega blaga in opravljenih tonskih kilometrov se dodatno deli po mesecih.

Letni podatki o cestnem blagovnem prevozu za leta 1995–2000 so ocenjeni na podlagi prejšnjega raziskovanja cestnega blagovnega prevoza, pilotnih projektov, izvedenih v letih 1999 in 2000, tekočega raziskovanja prevoza blaga po cestah, podatkov o mejnih prehodih tovornih vozil, rezultatov štetja prometa in podatkov o poslovnih subjektih, ki se ukvarjajo s cestnim tovornim prevozom.

Podatki o **mestnem potniškem prevozu** se nanašajo na prevoz v Ljubljani in Mariboru.

O **zračnem in pomorskem prevozu** potnikov in blaga poročajo poslovni subjekti, ki so registrirani za posamezno transportno panogo. Pri **pomorskem prevozu** blaga moramo zaradi seštevanja podatkov pretvoriti tonske milje v tonske kilometre. Tonske milje pomnožimo s koeficientom 1,852.

O **letališkem prometu** nam poročajo letališča: Ljubljana, Maribor in Portorož.

O **pristaniškem prometu** nam poroča Uprava republike Slovenije za pomorstvo.

V **žičniškem transportu** obravnavamo kot prepeljanega potnika prevoz enega potnika po eni žičnici. Če se npr. isti potnik pelje trikrat z isto žičnico, ga štejemo trikrat (torej kot 3 potnike).

V informaciji o **prekladalni dejavnosti** je zajeta pristaniška in kopenska prekladalna dejavnost. O prvi poroča Luka Koper, o drugi pa poročajo podjetja in druge organizacije, registrirane za to dejavnost.

O **cestnih mejnih prehodih** nam poroča devet carinskih uradov v Sloveniji; te zbirajo poročila s 102 cestnih mejnih prehodov. Carinski organi na mejnih prehodih, ki so zadolženi za poročanje statistiki, pridobijo podatke o potniškem mejnem prometu od mejne policije. V podatke o mejnih prehodih v cestnem prometu so zajeti mednarodni, meddržavni in obmejni prehodi. Pri obmejnih prehodih upoštevamo tiste, prek katerih je mogoč prehod s cestnimi vozili. Planinskih mejnih prehodov in prehodov po posebnem sporazumu ne upoštevamo.

V podatkih o **prvič registriranih cestnih motornih vozilih** upoštevamo motorna kolesa, osebne avtomobile, avtobuse, tovorne avtomobile, vlačilce, tovorna specialna vozila, kombinirana vozila, specialna vozila (osebna specialna in delovna vozila) ter kmetijske traktorje ne glede na leto izdelave. Od aprila 2002 upoštevamo tudi kolesa z motorjem.

business objects on the 30<sup>th</sup> day.

Data on road goods transport are published quarterly. Total number of tonnes carried and tonne kilometres made are additionally divided on monthly basis.

Yearly data on road goods transport for 1995–2000 are estimated on the basis of the previous survey on road goods transport, pilot projects performed in 1999 and 2000, the current survey on transport of goods by road, data on cross-border traffic of goods vehicles, results of the road census and data on business subjects performing road goods transport.

Data on **urban passenger transport** relate to transport in Ljubljana and Maribor.

Reports on **air and maritime transport** of passengers and goods are sent by business entities registered for these modes of transport. For the purpose of adding up the data on **maritime transport** into total, conversion of tonne-miles into tonne-kilometres is needed. It is necessary to multiply tonne-miles with a coefficient 1.852.

Reports on **airport traffic** are sent by airports: Ljubljana, Maribor and Portorož.

Reports on **harbour traffic** are sent by the Slovenian Maritime Directorate.

In **cableway transport** one passenger carried is one passenger cartage by one cableway. For example, if a passenger takes three rides with the same cableway (s)he is counted three times (i.e. as three passengers).

Information on **transshipment activity** covers harbour and land transshipment. Reports on the first are sent by the Koper Port, and reports on the second are sent by enterprises and companies registered for this activity.

Reports on **cross-border traffic by road** are sent by nine customs directorates in Slovenia, which collect reports from 102 road border crossings. Customs bodies at border crossings which have to report to the Statistical Office obtain data on passenger cross-border traffic from border police. Under cross-border traffic by road we take into consideration international, interstate and local border crossings. We take into consideration those local border crossings, where cross-border traffic by road vehicles is possible. We do not take into consideration mountain crossings and other crossings according to special agreements.

Motor cycles (mopeds are excluded), passenger cars, buses, lorries, road tractors, special lorries, combined vehicles (special passenger cars and service vehicles) and agricultural tractors irrespective of the year of making are included in **road motor vehicles, registered for the first time**. Since April 2002 mopeds are also included.

## ZUNANJA TRGOVINA

### IZVOZ IN UVOZ BLAGA

Vir podatkov za statistiko zunanje trgovine so carinske deklaracije. Podatke iz carinskih deklaracij nam mesečno sporoča Carinska uprava Republike Slovenije v elektronski obliki.

Statistika dopolni podatke iz carinskih deklaracij z dodatnimi podatki in klasifikacijami, potrebnimi za statistično raziskovanje. Pri tem upoštevamo priporočila Statističnega urada OZN - tako v obsegu zajetja transakcij kot tudi glede drugih metodoloških elementov, ki določajo način prikaza zunanjetrgovinskih podatkov, tako da so mednarodno čim bolj primerljivi.

Statistika zunanje trgovine obsega **le blagovno menjavo s tujino**.

V Sloveniji spremljamo zunanjetrgovinsko statistiko **po razširjeni definiciji specialne trgovine**, ki poleg drugih rednih izvoznih in uvoznih transakcij vključuje tudi aktivne in pasivne posle oplemenitenja kot tudi posle oplemenitenja, ki se izvajajo v prostocarinskih conah. Pri sistemu specialne trgovine zajema statistično območje le določen del ekonomskega območja države.

**Izvoz** zajema:

- blago, izvoženo iz Slovenije, ki izvira iz proizvodnje v naši državi oziroma iz notranjega blagovnega prometa;
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem odloga);
- izvoz pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem povračila);
- blago, začasno izvoženo zaradi oplemenitenja.

**Uvoz** zajema:

- blago, uvoženo v Slovenijo, ki je bilo sproščeno v prosti promet in deklarirano za domačo porabo;
- blago, uvoženo zaradi proizvodnje za izvoz (sistem odloga);
- blago, uvoženo zaradi proizvodnje za izvoz (sistem povračila);
- blago, uvoženo po oplemenitju.

Statistika določa zajetje transakcij v zunanjetrgovinsko statistiko glede na vrsto carinskega postopka. Pri zajetju se v določeni meri upošteva tudi vrsta posla (njegove komercialne značilnosti). Zaradi spremembe carinskih postopkov za izvoz pridobljenih proizvodov po začasnem uvozu zaradi oplemenitenja se te transakcije od leta 2000 dalje ne spremljajo več ločeno (kot poseben statistični postopek), ampak skupaj z drugimi transakcijami izvoza pridobljenih proizvodov po uvozu zaradi proizvodnje za izvoz (sistem odloga), od leta 2002 dalje pa delno tudi v okviru rednega izvoza. Podobno je tudi pri uvozu: blago, začasno uvoženo zaradi oplemenitenja, se od leta 2000 dalje ne spremlja več ločeno, temveč skupaj z drugimi transakcijami blaga, uvoženega zaradi proizvodnje za

## EXTERNAL TRADE

### EXPORTS AND IMPORTS OF GOODS

The source of data for external trade statistics are customs declarations. Data from customs declarations are reported to the Statistical Office by the Customs Administration of the Republic of Slovenia monthly on electronic media.

Statistical Office completes data from customs declarations with the additional data and classifications, required for statistical surveys. At this process the recommendations of the Statistical Office of the United Nations are taken into consideration - from the aspect of data coverage as well as other methodological elements which determine the manner of presentation of external trade statistics with the aim of achieving maximum international comparability.

External trade statistics covers only **trade in goods with foreign countries**.

In Slovenia we monitor external trade statistics according to the **relaxed definition of special trade system**, which means that beside regular export and import transactions also inward and outward processing as well as processing carried out in customs free trade zones are included. Under the special trade system the statistical territory comprises only a particular part of the economic territory of a country.

**Exports** cover:

- all goods exported from Slovenia, originating from the production in Slovenia or from free circulation in internal market;
- export of compensating products after import for export production (suspension system);
- export of compensating products after import for export production (drawback system);
- temporary export for outward processing.

**Imports** cover:

- all goods imported into Slovenia and released into free circulation and consumption;
- import for export production (suspension system);
- import for export production (drawback system);
- import after outward processing.

Statistics defines the coverage of external trade statistics by kinds of customs procedures. Commercial characteristics of transactions are also taken into consideration to a certain extent. Due to the changes in the customs procedures for export of compensating products after temporary import for inward processing, from 2000 on these transactions are no longer monitored separately (as a special statistical procedure), but together with other transactions in the statistical procedure export of compensating products after import for export production (suspension system), from 2002 on also partially in the framework of normal exports. The situation is similar at imports: from 2000 on goods temporary imported for inward processing are no longer monitored as a special statistical procedure, but together with other

izvoz (sistem odloga), od leta 2002 dalje pa delno tudi v okviru rednega uvoza, predvsem če blago ni zavezano plačilu carine in zanj ne veljajo ukrepi trgovinske politike.

V statistiki zunanje trgovine ne upoštevamo: začasnega uvoza in izvoza blaga, ki se bo v določenem času vrnilo v nespremenjenem stanju, storitev, popravil, denarja kot plačilnega sredstva, denarnega zlata, oskrbe tujih vozil z gorivom v naši državi in naših vozil v tujini, oskrbe tujih diplomatskih predstavništva v Sloveniji, osebne prtljage potnikov, komercialnih vzorcev in poštnih pošiljk manjše vrednosti.

**Statistična vrednost blaga** temelji na carinski vrednosti, tj. na transakcijski vrednosti blaga. Faktorna vrednost se preračuna na pariteto franko slovenska meja, tako da se faktorni vrednosti v celoti ali delno prištevajo ali se od nje odštevajo stroški prevoza, natovarjanja in zavarovanja glede na prikazano pariteto dobave v pogodbi. Statistična vrednost izvoženega blaga je prikazana po pariteti tipa FOB, statistična vrednost uvoženega blaga pa po pariteti tipa CIF. Tako definirane izvozne in uvozne vrednosti se preračunajo po tekočih tečajih, ki veljajo na dan predložitve carinske deklaracije oziroma na drug datum, ki je posebej določen za izvajanje carinskih predpisov. Vrednostni podatki o izvoženem in uvoženem blagu se objavljajo v nacionalni valuti (tolarih) in od leta 2002 dalje v evrih. Serije primerljivih podatkov v evrih so bile narejene od leta 1996 dalje.

Kot država trgovinska partnerica je **pri izvozu prikazana namembna država, pri uvozu pa država porekla**. Kadar ta ni znana, je pri uvozu prikazana država, od koder je blago prispelo, pri izvozu pa država, kamor je blago naslovljeno, in sicer vedno zadnja še znana država.

**Namembna država** je tista, v kateri je blago dano v notranji promet za uporabo ali nadaljnjo predelavo.

**Država porekla** je tista, v kateri je bilo blago proizvedeno. Za blago, ki je bilo predelano ali obdelano drugje, kot je bilo proizvedeno, je kot država porekla prikazana država, v kateri je bila opravljena predelava.

Podatki o namenu porabe izvoženih in uvoženih proizvodov so prikazani po nacionalni statistični klasifikaciji, ki ni usklajena s klasifikacijo Združenih narodov o končni porabi proizvodov. Namen porabe se določa za vsak proizvod statistične klasifikacije po načelu pretežnosti.

**Mesečni podatki za tekoče leto sočasni**. Dopolnjujemo in popravljamo jih vse leto. Dopolnitve in popravke podatkov vključujemo v mesec opazovanja po datumu prejema deklaracije ali po drugem datumu, ki je določen za izvajanje carinskih predpisov, če je ta naveden. **Letne podatke objavljamo dvakrat**: prvič kotčasne v rednem časovnem presledku, drugič kot končne (predvidoma v juniju za prejšnje leto).

Zaradi zaokroževanja se seštevki ponekod ne ujemajo.

transactions in the statistical procedure import for export production (suspension system), from 2002 on also partially in the framework of normal imports, particularly when goods are not liable to payment of duties and if measures of trade policy are not valid for them.

External trade statistics does not cover: temporary exports and imports of goods which will return after a certain period in unchanged condition, services, repairs, money, monetary gold, fuel supply of foreign cars in Slovenia and Slovenian cars abroad, supply of foreign embassies and other diplomatic missions in Slovenia, personal baggage of travellers, commercial samples and postal packages of minor value.

**The statistical value of goods** is based on the customs value, i.e. on the transaction value of goods. Invoice value is recalculated on the value at Slovenian border by adding or subtracting on whole or in part costs of transport, loading, unloading and insurance, depending on terms of delivery set down in the contract. The statistical value of exported goods is thus FOB-type valuation and the statistical value of imported goods is CIF-type valuation. Thus defined statistical values of exported and imported goods are recalculated to the current exchange rates valid on the day of submission of the customs declaration, or, if this date is not used for implementing customs regulations, on the date, which is specially stated for this purpose. Value of exported and imported goods is published in the national currency (tolars) and from 2002 on in euros. Series of comparable data were prepared from 1996 on.

As a trading partner country **in exports the country of destination** is shown and **in imports the country of origin**. In cases where the country of origin or destination is unknown, for imports we show the country from where the goods arrived, and for exports the country to which the goods were dispatched, namely always to the most distant known country.

**The country of destination** is the country in which the goods are released into free circulation for consumption or further processing.

**The country of origin** is the country in which goods were produced. For goods that were not processed in the country where they were produced, the country where the processing took place is shown.

**Exports and imports by end-use** are presented according to the national statistical classification, which is not harmonised with the Classification by Broad Economic Categories of the United Nations. The end-use of each product in the national statistical classification is determined according to the principle of predominance.

**Monthly results for the current year are provisional**. Monthly data are supplemented and corrected throughout the year. Completion and data corrections are included in the month of observation according to the date of submission of the customs declaration. **Annual data are published twice**: the first time as provisional data with the regular delay and the second time as final data (presumably in June for the previous year).

In some cases the totals do not agree with data due to rounding.

## INDEKSI POVPREČNIH VREDNOSTI ZUNANJE TRGOVINE

Vir podatkov za indekse povprečnih vrednosti zunanje trgovine so osnovni statistični podatki zunanje trgovine.

V izračun indeksov povprečnih vrednosti zunanje trgovine je vključeno vse blago, določeno z devetmestno šifro nomenklature carinske tarife, ki je v statistiko zunanje trgovine zajeto po specialnem sistemu, razen izvoza in uvoza blaga, ki se po Standardni mednarodni trgovinski klasifikaciji razvršča v sektor 9 Drugo blago in transakcije. Ta sektor je izločen zato, ker vsebuje zelo raznorodne skupine blaga, katerih vrednostni delež pa ne presega enega odstotka skupne vrednosti izvoza ali uvoza blaga v določenem obdobju. Do konca leta 1999 so iz izračuna izvzeti tudi posli oplenitenja(vključeni s 1. januarjem 2000).

**Povprečna vrednost blaga** je skupna vrednost vsega blaga (ne cena določenega blaga), razvrščenega v isto devetmestno šifro nomenklature carinske tarife, izračunana na količinsko mersko enoto (kilogram). Kadar v eno šifro nomenklature carinske tarife ni razvrščen en sam homogen proizvod, temveč je uvrščenih več proizvodov različnih vrst ali različnih kakovosti, lahko relativna sprememba povprečne vrednosti izraža tako spremembo cene kot spremembo sestave ali kakovosti blaga. Ne glede na to so agregirani indeksi povprečnih vrednosti zunanje trgovine, izračunani za širše skupine blaga, primerni za statistično spremljanje gibanja cen v zunanji trgovini in kot deflatorji.

Indeksi povprečnih vrednosti zunanje trgovine so izračunani kot **verižni indeksi** po Laspeyresovem (**uteži so količine iz baznega leta**), **Paaschejevem** (**uteži so količine iz tekočega leta**) in **Fisherjevem** obrazcu (geometrično povprečje obeh). Objavljamo jih kot **Fisherjev indeks**.

Indeksi se izračunavajo iz stanja zunanjetrgovinskih podatkov, ki velja v obdobju izračuna. Tako se indeksi za prvo četrtletje tekočega leta računajo z začasnimi podatki za bazno leto, indeksi za 2. četrtletje pa že s končnimi podatki za bazno leto. S končnimi podatki za tekoče leto se ponovno izračunajo samo indeksi za 4. četrtletje.

## EXTERNAL TRADE UNIT VALUE INDICES

The source of data for external trade unit value indices are the same data that are used for external trade statistics.

The calculation of the external trade unit value indices includes all goods - determined with a nine-digit code number of the customs tariff nomenclature - covered by external trade statistics according to the special trade system, with the exception of exports and imports of goods classified into section 9 of the Standard International Trade Classification (Commodities and transactions n.e.c.). This section, whose share of value is less than 1% of the total value of exports or imports in a certain period, is excluded because it contains very heterogeneous groups of goods not suitable for index calculation. Until the end of 1999 also processing trade is excluded from the calculation(included from 1 January 2000).

The **unit value** is the average value (not the price of a certain product) per quantity unit (kg) of all products classified under the same nine-digit code of the customs tariff nomenclature. In cases when not only one product but several products of various kinds or various quality are classified into one code of the customs tariff nomenclature, the relative change of the unit value can reflect the change of price as well as the change of composition or quality of goods. Irrespective of this, the aggregated external trade unit value indices, calculated for larger groups of goods, can be used as approximate estimates of price development in external trade and as deflators.

The unit value indices are calculated as **chain indices** by the **Laspeyres** (**the weights are quantities from the base period**), **Paasche** (**the weights are quantities from the current period**) and **Fisher** formulas (the geometrical average of both). They are published as the **Fisher indices**.

The indices are calculated from the version of external trade data that is valid in the period of calculation. Thus the indices for the 1st quarter of the current year are calculated with provisional data for the base year, while indices for the 2nd quarter are calculated already with final data for the base year. Only indices for the 4th quarter are recalculated with final data for the current year.

## CENE

**Lista izdelkov in storitev**, katerih cene so osnova za izračun indeksa cen življenjskih potrebščin, harmoniziranega indeksa cen življenjskih potrebščin in indeksa cen na drobno, v letu 2004 vsebuje 640 predmetov (reprezentantov). Ti so glede na svoje lastnosti in opise razvrščeni v več skupin: na kmetijske pridelke, industrijske živilske in neživilske izdelke, gostinske storitve ter ostale storitve. Za opazovanje so bili izbrani tisti izdelki oz. storitve, katerih deleži v skupni potrošnji so največji in katerih cene lahko najbolje odražajo gibanje cen sorodnih artiklov oz. splošno gibanje cen. Mesečno se tako zbere skupno okrog 11 000 drobnoprodajnih cen.

Podatke o drobnoprodajnih cenah reprezentativnih izdelkov in storitev zberejo vsak mesec v natančno določenem obdobju opazovalci cen, in sicer neposredno na okoli 1100 izbranih prodajnih mestih (kot so trgovine, tržnice, obrtne delavnice, storitvene in druge organizacije) v Kopru, Ljubljani, Mariboru in Novem mestu. Nekatere cene pa zbira urad tudi po telefonu in prek interneta.

**Drobnoprodajna cena** je končna prodajna cena, ki jo plačajo potrošniki za nakup izdelkov ali storitev široke porabe. Vsebuje torej tudi predpisan davek in preostale dajatve.

**Indeksi cen** so izračunani po (modificirani) Laspeyresovi formuli na osnovi povprečnih nacionalnih cen izbranih izdelkov in storitev ter njihovih uteži (ponderjev).

**Uteži** predstavljajo relativne deleže izdelkov in storitev v skupni vrednosti vseh opazovanih izdelkov in storitev in tako določajo relativno pomembnost (težo) spremembe cene posameznega izmed njih glede na skupno spremembo cen.

**Indeks cen življenjskih potrebščin** meri spremembe drobnoprodajnih cen izdelkov in storitev glede na sestavo izdatkov, ki jih domače prebivalstvo namenja za nakupe predmetov končne porabe doma in v tujini (nacionalni princip potrošnje). **Uteži**, ki veljajo za izračun indeksa v določenem letu, temeljijo na izdatkih iz anket o potrošnji gospodinjstev kot glavnemu viru podatkov. Te podatke dopoljujemo in preverjamo še z drugimi statističnimi in ostalimi dosegljivimi viri. Letošnje uteži temeljijo na triletnem povprečju izdatkov iz anket za leta 2000, 2001 in 2002 preračunanih (indeksiranih) na cene decembra 2003, ki je tudi referenčno cenovno obdobje za izračun indeksov.

Za potrebe računanja in objavljanja indeksov cen življenjskih potrebščin in harmoniziranih indeksov cen življenjskih potrebščin so izdelki in storitve razvrščeni **po klasifikaciji individualne porabe sredstev (COICOP/HICP)** v:

- 01 oddelke (npr. Hrana in brezalkoholne pijače)
- 011 skupine (npr. Hrana)
- 0111 razrede (npr. Kruh in izdelki iz žit).

Indeksi so praviloma objavljeni do ravni razreda, razen kadar je njihova utež manjša od 0,1 % ali je razred zastopan le z enim proizvodom. Nova klasifikacija se uporablja od leta 1997, od leta 2000 pa se v skladu s to novo klasifikacijo računajo še indeksi za posebne skupine, kot so blago, blago dnevne rabe, poltrajno blago, trajno blago, storitve, goriva in maziva, sezonski proizvodi.

**Indeks cen na drobno** je indeks, s katerim merimo

## PRICES

**The list of goods and services**, the prices of which are used for calculating the consumer price index, the harmonised index of consumer prices and the retail price index, is in 2004 composed of 640 representative items. Items are according to their characteristics and descriptions divided into several groups, e.g. agricultural products, manufactured foodstuff, manufactured non-foodstuff, catering services and other services. Selected are items with the highest shares in total consumption and whose prices best reflect the changes of prices of similar articles and the general change of prices. On average 11,000 prices are collected per month.

Data on retail prices for representative goods and services are collected each month in exactly defined period of time by price collectors in about 1100 selected outlets (e.g. shops, marketplaces, at craftsmen and other organisations) in Koper, Ljubljana, Maribor and Novo mesto. Some of the prices are also collected centrally and through the Internet.

**Retail price** is the final selling price which customers pay to purchase a product or a service. It includes the prescribed tax as well as all other duties.

**The price indices** are calculated by using the (modified) Laspeyres formula on the basis of average national prices of selected goods and services and their weights.

**Weights** represent relative shares of goods and services in the common value of all monitored goods and services. In this way they determine the relative importance or impact of the change in price of any product or service on the total change.

**Consumer prices index** measures changes in the level of retail prices of goods and services from the point of view of the expenditure structure, which the resident population intends for final consumption at home and abroad (national concept). **Weights** for calculating the index in a certain year are based on expenditure from household budget surveys as a main data source. These data are supplemented and verified with other statistical and non-statistical sources. This year's weights are based on the three-year average of expenditure from surveys in 2000, 2001 and 2002 recalculated (indexed) to the prices of December 2003, which is also the index base month.

For the purpose of calculating and publishing consumer price indices and harmonised indices of consumer prices, items are classified by **the Classification of Individual Consumption by Purpose (COICOP/HICP)** into:

- 01 divisions (e.g. Food and non-alcoholic beverages)
- 011 groups (e.g. Food)
- 0111 classes (e.g. Bread and cereals).

As a rule, indices are published at the level of class, except in cases when the weight of the class is below 0.1% or in cases when the class is represented by one item only. The new classification has been used since 1997, while since January 2000 we have been calculating in accordance with this new classification also indices for special groups such as goods, non-durable goods, semi-durable goods, durable goods, services, fuels and energy, seasonal products.

**The retail price index** shows changes of retail prices of

spremembe drobnoprodajnih cen izdelkov in storitev z vidika strukture prodaje le-teh na domačem trgu ne glede na namen njihove nadaljnje uporabe in ne glede na vrsto potrošnika. Od leta 2003 **ponderiranje** temelji na podatkih o strukturi izdatkov za življenjske potrebščine ter strukturi prodaje v trgovini na drobno. Uteži se spreminjajo vsako leto, ko obenem vnesemo tudi manjše spremembe v seznam proizvodov.

Najpomembnejša razlika med indeksom cen življenjskih potrebščin in indeksom cen na drobno je ponderacijska shema. Obstajajo še nekatere razlike glede zajema izdelkov in storitev. Tako npr. indeks cen življenjskih potrebščin ne zajema izdelkov, ki niso namenjeni končni porabi (npr. določenih predstavnikov za reprodukcijske namene), ki pa so sicer vključeni v spremljanje indeksa cen na drobno. Po drugi strani pa indeks zajema nekatere storitve, ki niso vključene v indeks cen na drobno (npr. hrana in pijača v gostinstvu).

**Cene industrijskih proizvodov** pri proizvajalcih od leta 1997 zbiramo po novi Nomenklaturi industrijskih proizvodov (NIP) ter obdelujemo in objavljamo po Standardni klasifikaciji dejavnosti (SKD).

Podatki o indeksu cen industrijskih proizvodov pri proizvajalcih zajemajo poleg področij C (Rudarstvo), D (Predelovalne dejavnosti), E (Oskrba z elektriko, plinom in vodo) tudi gozdarstvo kot del področja A (Kmetijstvo, lov in gozdarstvo). Gozdarstvo po mednarodnih standardih ni zajeto v indeks cen industrijskih proizvodov pri proizvajalcih.

V SKD so večinoma zajeta vsa podpodročja in oddelki, razen določenih izjem:

- v področje A je vključena le dejavnost gozdarstvo;
- v podpodročje CA je vključena le dejavnost pridobivanje rjavega premoga in lignit, niso pa zajeti oddelki Pri. nafte, zemeljskega plina, stor. ter Pri. uranovih in torijevih rud;
- v podpodročje CB ni vključen oddelk Pri. rud;
- v področje D nista vključena oddelka Pro. pisar. str. in računal. ter Reciklaže;
- v podpodročje DE ni vključena dejavnost založništvo;
- v podpodročje DF je vključena le dejavnost Pro.naftnih derivatov, pri čemer zaradi prenehanja proizvodnje nafte, bencina in kurilnega olja, spremljamo le cene za motorna, hidravlična, mazalna olja ter olja za menjalnike;
- v področje E je vključena le dejavnost oskrba z elektriko.

Cene industrijskih proizvodov pri proizvajalcih zbiramo mesečno z vprašalnikom, ki ga pošljemo izbranim podjetjem s področja industrije, rudarstva, oskrbe z energijo in gozdarstva. Pri proizvajalcih spremljamo približno 2000 industrijskih cen v okoli 320 podjetjih v Sloveniji.

Cena industrijskih proizvodov pri proizvajalcih je cena, po kateri proizvajalec proda svoj proizvod v največjih količinah na domačem trgu, franko kraj proizvajalca. V ceni niso upoštevani davek na dodano vrednost, rabati in trgovski popusti.

Cene baznega obdobja so osnova za primerjavo s cenami

goods and services from the viewpoint of the sales structure of these on the domestic market, irrespective of both the purpose of their further use and the type of consumer. Since 2003 **the weighting system** is based on the data on the structure of expenditures for consumer goods and on the structure of sale. Weights are being corrected annually. At the same time minor changes in the list of products are made.

The most important difference between the consumer price index and the retail price index is the weighting scheme. There exist some minor differences in view of coverage of goods and services. E.g. the consumer price index does not cover goods that are not intended for final consumption (e.g. certain representatives for breeding purposes in agriculture), but which are covered by the retail price index. On the other hand, some services that are not covered by the retail price index are covered by the consumer price index (e.g. food and beverages in hotels and restaurants).

Since 1997 **producer prices of manufactured goods** have been collected according to the new Nomenclature of Industrial Products (NIP) and processed and published on the basis of the Standard Classification of Activities (SKD).

The data on the producer prices of manufactured goods cover sections C (Mining and quarrying), D (Manufacturing) and E (Electricity, gas and water supply) of the Standard Classification of Activities and Forestry as a part of section A (Agriculture, hunting and forestry). According to international standards, the latter does not belong to the coverage of PPI.

The Standard Classification of Activities covers all subsections and divisions except:

- section A includes only Forestry;
- subsection CA includes only Mining of coal and lignite and does not include Extraction of petroleum, gas and services and Mining of uranium and thorium ores;
- subsection CB does not include Mining of metal ores;
- section D does not include Manufacture of office machinery and computers and Recycling;
- subsection DE does not include Publishing;
- subsection DF covers only one activity, namely manufacture of petroleum products. Because Slovenia stopped producing crude oil, petrol and fuel oil, we only monitor prices of motor oils, hydraulic oils, lubricating oils and transmission gear oils;
- section E includes only Electricity supply.

Producer prices of manufactured goods are collected monthly with a questionnaire at selected enterprises from the fields of manufacturing, mining, energy supply and forestry. At producers we monitor about 2000 industrial prices in around 320 selected enterprises in Slovenia.

Producer prices of manufactured goods are prices at which producers sell their products in largest quantities on the domestic market - Ex Works. Prices do not include VAT (value added tax), rebates and discounts.

Prices of the base period are the basis for comparison with

tekočega obdobja. Do leta 1994 je kot osnova za primerjavo veljalo povprečje cen prejšnjega leta. Od leta 1994 pa velja za bazno cenovno obdobje december prejšnjega leta.

Ponderacijski sistem je oblikovan na podlagi strukture vrednosti prodaje industrijskih proizvodov pri proizvajalcih na domačem trgu iz leta 2000. Osnovni vir podatkov za ponderje je letno poročilo industrije IND/L. Pri oblikovanju ponderjev za ravni oddelkov so podatki IND/L o vrednosti prodaje korigirani, in sicer tako, da so povečani za ocenjen nezajem in zmanjšani za izvoz.

**Cene gostinskih storitev** smo z letom 2002 skoraj v celoti vključili v indeks cen življenjskih potrebščin in sicer tako, da smo v slednjem povečali število do sedaj opazovanih cen gostinskih storitev.

prices of the current period. Until 1994 the price base period was the average of the previous year. In 1994 we changed the price base period to December of the previous year.

The weighting system is designed on the basis of the 2000 structure of sales value of manufactured goods on the domestic market. The basic source of data is IND/L annual industry report. In designing the weights at the class level, IND/L sales value data are corrected by being enlarged by the estimated uncovered goods and reduced by exports.

In 2002 we included almost all prices of catering services in the consumer price index by enlarging the number of observed prices of catering services in the CPI.

## PLAČILNA BILANCA IN JAVNE FINANCE

### Plačilna bilanca

**Plačilno bilanco** Slovenije sestavlja Banka Slovenije na podlagi metodologije Mednarodnega denarnega sklada (MDS) - Priročnika za izdelavo plačilne bilance (Balance of Payments Manual) in v okviru razpoložljivih podatkov.

Plačilna bilanca je statistična bilanca, ki za določeno časovno obdobje sistematično zajema ekonomske transakcije med subjekti gospodarstva države in tujino, praviloma med rezidenti države in nerezidenti. Rezidenti Republike Slovenije so za potrebe sestavljanja plačilne bilance Slovenije opredeljeni kot:

- fizične osebe s stalnim prebivališčem v Republiki Sloveniji in tuje fizične osebe, ki imajo veljavno delovno vizo za šest ali več mesecev;
- pravne osebe in zasebniki s sedežem v Republiki Sloveniji in tuje pravne osebe, ki na ozemlju Republike Slovenije s stalno dejavnostjo pridobivajo dohodek;
- diplomatska, konzularna ter druga predstavništva Republike Slovenije, ki so financirana iz proračuna, in slovenski državljani, ki so zaposleni pri njih, in njihovi družinski člani;
- registrirana predstavništva tujih podjetij in poslovne enote, ki opravljajo na ozemlju Republike Slovenije stalno dejavnost, za tisti del dejavnosti, ki ga opravljajo v Republiki Sloveniji;
- dnevni migranti.

Stopnja usklajenosti plačilne bilance z metodologijo MDS je odvisna od razpoložljive baze podatkov. Spremembe metodologije obračuna plačilne bilance in postopno vključevanje novih virov podatkov v cilju usklajevanja z metodologijo MDS nekoliko slabšajo časovno primerljivost podatkov; vendar so podatki za obdobja, ki jih objavljamo, med seboj večinoma primerljivi.

**Tekoči račun** plačilne bilance zajema vrednosti vseh ekonomskih transakcij med rezidenti v opazovani ekonomiji in nerezidenti, ki ne spadajo v kapitalski in finančni račun. Temeljna razvrstitev tekočih transakcij je: transakcije blaga in storitev, transakcije dohodkov in tekoči transferji. Razlika med vrednostjo aktivnih in pasivnih postavk tekočega računa je **saldo tekočega računa**.

**Blago.** Obračune blagovne menjave s tujino (izvoz blaga valutacija tipa fob in uvoz blaga valutacija tipa cif, vključno z oplemenitenjem po bruto načelu) na podlagi carinskih listin izračunava Statistični urad Republike Slovenije, Banka Slovenije pa te podatke vključuje v plačilno bilanco Slovenije. Podatki o izvozu in uvozu blaga v plačilni bilanci se od podatkov statistike zunanje trgovine razlikujejo za vrednost "prilagoditve zaobjema", podatki o uvozu tudi za prilagoditev na vrednotenje uvoz fob.

Prilagoditev z vrednosti cif na vrednost fob je izvedena s pomočjo koeficienta, ki je enak ponderiranemu povprečju koeficientov med cif in fob vrednostmi uvoza blaga (za razpoložljiv vzorec), ločenim glede na vrsto blaga, vrsto

## BALANCE OF PAYMENTS AND PUBLIC FINANCE

### Balance of payments

**Balance of payments** of Slovenia is being compiled by the Bank of Slovenia on the basis of International Monetary Fund's recommendations (Balance of Payments Manual) and under limitations posed by availability of data sources.

The balance of payments is a statistical statement that systematically summarises, for a specific time period, the economic transactions of an economy (residents) with the rest of the world (non-residents). Residents of the Republic of Slovenia are for the purpose of compiling the balance of payments of Slovenia defined in the following way:

- natural persons with a permanent residence in the Republic of Slovenia and foreign natural persons, who have a working visa valid for six months or more;
- legal entities and private persons who have their headquarters in the Republic of Slovenia, and foreign legal entities, which on the territory of Slovenia acquire income with a permanent economic activity;
- diplomatic, consular and other representative bodies of the Republic of Slovenia, which are financed from the budget, and Slovene citizens employed by them, and their family members;
- representative agencies of foreign enterprises registered in Slovenia and business units, which on the territory of Slovenia implement a permanent activity, for the part which is implemented in the Republic of Slovenia;
- daily migrants.

The concordance of the balance of payments with the IMF methodology depends on the availability of data sources. The successive methodological improvements and gradual inclusion of new data sources influenced the comparability of data for particular accounting years. However, the data for the published periods are mostly comparable.

Covered in **the current account** of the balance of payments are all economic transactions between residents of the observed economy and non-residents other than transactions of the capital and financial account. The basic classification of current transfers is: transactions of goods and services, transactions of income and current transfers. The difference between the value of credit and debit items of the current account is the **balance of current account**.

**Goods.** Calculations of "export the FOB-type valuation" and "import the CIF-type valuation" are prepared by the Statistical Office of the Republic of Slovenia, and then included into the overall balance of payments. Data on export and import of goods in the balance of payments differ from those in external trade statistics for the values of "coverage adjustments" and on the import side additionally for the value of adjustment to FOB valuation.

The adjustment from CIF to FOB valuation is made by coefficient which is equal to the weighted average of coefficients between the c.i.f. and f.o.b. values of imported goods (for the available sample), separately calculated for

prevoznega sredstva in državo partnerja.

Prilagoditev zaobjema vključuje podatke o izvozu in uvozu blaga, ki niso na voljo iz carinskih deklaracij, pač pa so vir zanje sistem poročanja o mednarodnih transakcijah (ITRS) ter poročila prostocarinskih prodajal in carinskih skladišč (za uvoženo blago, prodano nerezidentom).

Bilanca **storitev** zajema naslednje postavke: transport, potovanja, komunikacijske, konstrukcijske storitve, zavarovanje, finančne storitve, računalniške in informacijske storitve, pravice in licence, preostale poslovne storitve, osebne, kulturne in rekreativne storitve ter vladne storitve.

**Dohodki** zajemajo dva tipa transakcij med rezidenti in nerezidenti: "dohodke od dela" in "dohodke od kapitala". Dohodki od dela zajemajo na eni strani prejemke rezidentov, na drugi pa prejemke nerezidentov (npr. mejni, sezonski in drugi kratkoročni delavci) za opravljeno delo, ki ga plačajo nerezidenčne oziroma rezidenčne osebe. Dohodki od kapitala zajemajo prejemke in izdatke na podlagi finančnih terjatev in obveznosti med državo in tujino.

**Tekoči transferji** zajemajo vse transferje med rezidenti in nerezidenti, ki niso transferji kapitala. Značilne vrste tekočih transferjev so: denarni prenosi za financiranje tekočih izdatkov držav, prejemnic tekočih transferjev, socialni transferji v obliki izplačil pokojnin, darila in pomoči v naravi (hrana, obleka, zdravila, vojaška oprema itd.), prispevki držav članic mednarodnim organizacijam itd.

**Kapitalski in finančni račun** plačilne bilance ima dve temeljni sestavini - kapitalski račun in finančni račun, kar je v skladu z računi v Sistemu nacionalnih računov (1993).

Postavki **kapitalski transferji** ter transakcije z neproizvedenimi nefinančnimi sredstvi (**patenti in licence**) sta pglavilni sestavini kapitalskega računa.

Bilance neposrednih naložb, naložb v vrednostne papirje in drugih naložb ter sprememba mednarodnih rezerv so glavne sestavine finančnega računa, razčlenjenega po funkcionalnem načelu.

**Neposredne naložbe** zajemajo vse transakcije med neposrednimi investitorji in podjetji z neposredno naložbo.

Vira za zajemanje transakcij v zvezi z neposrednimi naložbami sta ITRS (podatki bank o prometu s tujino in rezidenčnih prejemnikov naložb) in carinske deklaracije. V podatke za obdobje do leta 1997 so vključeni nakupi in prodaje vseh delnic in deležev.

Od začetka leta 1997 so upoštevani samo nakupi tistih delnic, ki so imetniku zagotavljale večinski delež upravljalških pravic ali kontrolni paket delnic ter ostale naložbe v delnice in deleže za obdobje, daljše od sedmih let. Z novim Deviznim zakonom iz leta 1999 se vloga v lastniški kapital podjetja, večja od desetih odstotkov njegove vrednosti, razvršča med neposredne naložbe.

Od leta 2001 dalje je v postavki neposredne naložbe prelom v

each type of merchandise, transport means and country of the exporter.

The coverage adjustments are made for goods imported without customs declarations and for which data are available from ITRS or reports of duty free shops and consignment warehouses.

The balance of **services** covers the following standard components of the balance of payments: transport, travel, communication services; construction; insurance; financial services; computer and information services; royalties and licence fees; other business services; personal, cultural and recreational services; and government services.

**Income** covers two types of transactions between residents and non-residents: "income from work" and "income from capital". Income from work covers earnings received by residents and non-residents (e.g., border, seasonal, and other short-term workers) and paid by non-residents and residents respectively. Income from capital covers those transactions involving investment income receipts and payments on external financial assets and liabilities.

**Current transfers** consist of all transfers between residents and non-residents that are not transfers of capital. Characteristic types of current transfers are: financial transfers for financing current expenditure of countries recipients of current transfers, social transfers such as pensions paid to residents from abroad, gifts and help in kind (food, clothes, medicines, military equipment, etc.), contributions of member states to international organisations, etc.

**The capital and financial account** has two major components - the capital account and the financial account - that are in concordance with those same accounts in the System of National Accounts (1993).

**Capital transfers** and acquisition/disposal of non-produced, nonfinancial assets (**patents and licences**) are the major components of the capital account.

Balances of direct investment, portfolio investment, and other investment, and change of reserve assets are the main items of the financial account disaggregated on the basis of functional criteria.

**Direct investment** covers transactions between direct investors and direct investment enterprises.

Direct investment is recorded on the basis of reporting of payments through domestic banks and of data from customs declarations. Data before 1997 include purchase and sale of all shares and equity.

From the beginning of 1997, purchase and sale of shares that assure more than 50 percent of company's equity, a control package of shares, shares issued by domestic companies on the primary markets with the purpose to increase the nominal capital of the company and other investments in equity for a period exceeding seven years are included in this item. With the new Foreign Exchange Act in 1999 direct investment 10% rule is applied.

From 2001 onwards inter-company debt transactions

serijah podatkov. Od tega leta dalje so v to postavko vključena posojila med povezanimi podjetji (delež lastništva 10 % ali več). Taka posojila so do leta 2001 vključena v postavko posojila.

**Naložbe v vrednostne papirje** zajemajo transakcije z določenimi lastniškimi in z dolžniškimi vrednostnimi papirji; slednji zajemajo obveznice in instrumente finančnega trga.

Nakupi delnic (lastniški vrednostni papirji), ki ne predstavljajo neposrednih naložb, so v tej postavki vključeni od februarja 1997 dalje.

**Naložbe v finančne derivative** zajemajo transakcije z izvedenimi finančnimi instrumenti (na primer opcije, terminski dogovor in terminska pogodba).

**Druge naložbe** zajemajo kratkoročne in dolgoročne trgovinske kredite, posojila (skupaj s porabo kreditov MDS, posojili MDS in posojili v zvezi s finančnimi najemi), gotovino in vloge ter preostale terjatve oziroma obveznosti.

**Mednarodne denarne rezerve** zajemajo transakcije s tistimi sredstvi, ki so po mnenju denarnih oblasti vedno takoj na voljo za uskladitev plačilnobilančnih neravnovesij. Sredstva rezerv zajemajo denarno zlato, posebne pravice črpanja (SDR), sredstva rezerv v MDS in tuje valute (gotovina in vrednostni papirji).

Pozitivna ali negativna vrednost postavke **neto napake in izpustitve** je posledica uporabe različnih virov za postavke plačilne bilance, napak v poročanju in pomanjkljivosti metodologije za sestavo plačilne bilance.

#### **Konsolidirana bilanca javnega financiranja**

**Konsolidirana bilanca javnega financiranja** Slovenije je statistični prikaz, ki nudi osnovni vpogled v tokove, v katere so vključene enote sektorja država. Bilanca javnega financiranja sistematično izkazuje transakcije, ki so posledica realizacije predpisov o financiranju funkcij države preko proračuna Republike Slovenije, občinskih proračunov in dveh skladov obveznega socialnega zavarovanja - Zavoda za pokojninsko in invalidsko zavarovanje (ZPIZ) in Zavoda za zdravstveno zavarovanje Slovenije (ZZZS) (blagajne "rednega" javnega financiranja).

Konsolidirano bilanco javnega financiranja sestavlja Ministrstvo za finance, in sicer iz bilanc, ki se sestavljajo za posamezne dele državnega sektorja, in je tako ta bilanca konsolidirani zbirni račun prihodkov in odhodkov ter finančnih postavk. (Tokovi med posameznimi javnofinančnimi blagajnami iz konsolidirane bilance javnega financiranja niso razvidni.)

V sklopu reforme sistema javnih financ je Ministrstvo za finance z letom 1999 prešlo na izkazovanje tako delnih bilanc kot konsolidirane bilance javnega financiranja na podlagi nove ekonomske klasifikacije, ki je skladna z metodologijo Mednarodnega denarnega sklada (Government Finance Statistics Manual - GFS, 1986). Tako so tudi podatki konsolidirane bilance javnega financiranja v tej številki MSP prvič prikazani po tej novi klasifikaciji.

Bilanca javnega financiranja pokriva le del popolnega zaporedja

between affiliated enterprises (10 percent or more capital share) are recorded as direct investment – other capital transactions. Until 2001 this kind of transactions are recorded as loans.

**Portfolio investment** covers certain transactions in equity securities and debt securities; the latter are subsectored into bonds and instruments of the financial market.

Since February 1997 equity securities not having the characteristics described in the note on Direct investment are included in this item too

**Financial derivatives** covers transactions in financial derivatives (such as options, futures and forwards).

**Other investment** (claims and liabilities vis-a-vis the rest of the world) covers short- and long-term trade credits; loans (including use of IMF credit, loans from the IMF, and loans associated with financial leases); currency and deposits; and other claims or liabilities.

**Change in reserve assets** covers transactions in those assets that are considered, by the monetary authorities of an economy, to be available for use in meeting the balance of payments. The items covered are monetary gold, special drawing rights (SDRs), reserve position in the IMF and foreign exchange assets (currency and securities).

Positive or negative value of **net errors and omissions** is the result of use of different sources for the components of the balance of payments, reporting mistakes and imperfection of the methodology for the compilation of the balance of payments.

#### **Consolidated balance of public financing**

**The consolidated balance of public financing** for Slovenia is a statistical record, which provides a basic insight into flows between the general government sector units and other units of the economy. It systematically summarises - for each particular accounting period - transactions which are the result of implementing legislation on financing general government functions through the central government budget, municipal budgets and the two compulsory social security funds - the Institute for Pension and Disability Insurance (IPDI) and the Health Insurance Institute of Slovenia (HIIS) (the "cash boxes" of "regular" public financing).

The consolidated balance of public financing is being compiled by the Ministry of Finance from four separate balances and as such is a consolidated collective account of revenues and expenditures and financial transactions items. (Flows between the individual "cash boxes" are not seen from the consolidated balance.)

As part of reforming the system of public financing, in 1999 the Ministry of Finance made the transition to presentation of budget figures according to a new economic classification, which is in line with the IMF methodology (Government Finance Statistics Manual - GFS, 1986). Thus in this issue of MSR consolidated balance of public financing figures are for the first time shown according to this new classification.

The balance of public financing covers only certain parts of

računov za državni sektor, kot je to definirano v Sistemu nacionalnih računov (System of National Accounts - SNA, 1993) in v Evropskem sistemu računov (European System of Accounts - ESA, 1995). V kategorijah SNA in ESA ta bilanca zajema transakcije tekočih računov in kapitalskega računa ter del sprememb v finančnih sredstvih (predvsem zadolževanje za potrebe pokrivanja proračunskega primanjkljaja).

V bilanci javnega financiranja niso upoštevani javni skladi in agencije ter nekatere druge enote, ki v skladu s SNA/ESA sicer spadajo v sektor država, in tudi ne enote, ki jih glede njihove sektorske pripadnosti označujemo kot mejne primere.

Načeloma so v bilanco javnega financiranja za posamezna leta vključeni javnofinančni prihodki in odhodki, ki so bili v obračunskem letu dejansko realizirani ("cash" načelo - načelo toka gotovine).

Glede na temeljno razlikovanje transakcij v sistemu nacionalnih računov (finančne, nefinančne) je bilanca javnega financiranja prikazana z naslednjimi skupinami postavk: s postavkami prihodkov in odhodkov (praviloma nefinančne transakcije) ter s postavkami finančnih terjatev in naložb ter računa financiranja (praviloma finančne transakcije - s temi elementi se izkazujejo viri pokrivanja proračunskega primanjkljaja oziroma načini razporejanja proračunskega presežka).

**Prihodke** po GFS (po novi ekonomski klasifikaciji) sestavljajo naslednje glavne skupine postavk:

- tekoči davčni prihodki (izkazani so z naslednjimi postavkami: davki na dohodek in dobiček, prispevki za socialno varnost, davki na plačilno listo in delovno silo, davki na premoženje, domači davki na blago in storitve, davki na mednarodno trgovino in transakcije ter drugi davki);
- tekoči nedavčni prihodki (izkazani z naslednjimi glavnimi postavkami: udeležba pri dobičku in dohodki od premoženja, takse in pristojbine ter denarne kazni, prihodki od prodaje blaga in storitev, drugi nedavčni prihodki);
- kapitalski prihodki;
- prejete donacije in
- transferni prihodki.

**Transferni prihodki** zajemajo vsa sredstva, ki jih posamezna institucija javnega financiranja (posamezna blagajna javnega financiranja) prejema iz drugih treh javnofinančnih institucij. Tovrstni prihodki niso izvorni javnofinančni prihodki, pač pa predstavljajo transfer sredstev iz drugih blagajn javnega financiranja.

**Odhodki** so glede na GFS (novo ekonomsko klasifikacijo) izkazani z naslednjimi glavnimi postavkami:

- tekoči odhodki (izkazani z naslednjimi postavkami: plače in drugi izdatki zaposlenim, izdatki za blago in storitve, plačila obresti in sredstva, izločena v rezerve);
- tekoči transferji (izkazani glede na vrsto prejemnika sredstev z naslednjimi postavkami: subvencije, transferji

the full sequence of accounts for the government sector as defined in the System of National Accounts (SNA, 1993) and European System of Accounts (ESA, 1995). Using SNA/ESA categories, this balance mainly covers items of the SNA/ESA current accounts and the capital account and one part of financial transactions (incurring debts for the purpose of covering budget deficit).

The balance of public financing does not cover some public funds and agencies and some other units, which according to SNA/ESA belong to the general government sector, and also does not cover units which are regarding their sectoral classification denoted as borderline cases.

Covered in the balance for each period are, on principle, revenues and expenditures that were actually realised in the accounting period (cash basis principle).

According to the items structure in GFS and the new economic classification and according to the basic distinction between two different types of transactions in the system of national accounts (non-financial, financial), the balance of public financing is presented with the following groups of items: revenues and expenditure items (mainly non-financial transactions), lending minus repayments and financing account items (mainly financial transactions - these indicate sources of covering the budget deficit and ways of use of the budget surplus respectively).

**Revenues** are according to GFS and the new economic classification composed of the following main groups of items:

- current tax revenues (presented with the following items: taxes on income and profit, social security contributions, taxes on payroll and workforce, taxes on property, domestic taxes on goods and services, taxes on international trade and transactions, and other taxes);
- current non-tax revenues (presented with the following main items: entrepreneurial and property income, fees, charges, fines and forfeits, revenues from sales of goods and services and other non-tax revenues);
- capital revenues;
- grants received and
- transfer revenues.

**Transfer revenues** cover revenues, which an individual public financing institution ("cash box") receives from the other three institutions. As such these revenues are not original public financing revenues, but transfers from other parts of the general government.

**Expenditures** are according to the GFS and the new economic classification presented with the following main items:

- current expenditure (presented with the following items: wages and other personnel expenditure, purchase of goods and services, interest payments and increase of reserves);
- current transfers (presented - according to the type of the receiver - with the following items: subsidies, current

posameznikom in gospodinjstvom, drugi domači tekoči transferji (tekoči transferji neprofitnim organizacijam in drugim nedržavnim ustanovam) ter tekoči transferji v tujino);

- investicijski odhodki (izdatki za nakup in gradnjo osnovnih sredstev) in
- investicijski transferji.

**Tekoči transferji** zajemajo vsa nepovratna, nepoplačljiva plačila, za katera država (plačnik) od prejemnika sredstev ne pridobi v povračilo nikakršnega materiala ali drugega blaga oziroma prejemnik teh sredstev za plačnika (državo) ne opravi nikakršne storitve. Prejemnik mora tako dobljena sredstva uporabiti za izdatke tekoče ali splošne narave, in ne v investicijske namene.

**Investicijski transferji** zajemajo izdatke države, ki so nepovratna sredstva, namenjena plačilu investicijskih odhodkov prejemnikov sredstev, to je za nakup ali gradnjo osnovnih sredstev, za nabavo opreme ali drugih opredmetenih in neopredmetenih osnovnih sredstev, za investicijsko vzdrževanje, obnove idr. Prejemniki teh sredstev so po GFS enote, ki ne spadajo v državni sektor, skladno z novo ekonomsko klasifikacijo pa subjekti, ki nimajo statusa proračunskega uporabnika.

**S postavkami finančnih terjatev in naložb ter računa financiranja** se izkazujejo naslednje vrste sprememb v finančnih sredstvih in finančnih obveznostih državnega sektorja:

- prejemki in izdatki denarnih sredstev iz naslova povečanja ali zmanjšanja drugih oblik finančnih sredstev (izkazani s postavkami finančnih terjatev in naložb: dana posojila in prejeta vračila danih posojil, prodaje in nakupi kapitalskih deležev ter prejete kupnina iz naslova privatizacije in poraba teh sredstev) ter
- tokovi zadolževanja in odplačil dolgov ter sprememb gotovine in depozitov državnega sektorja, povezanih s financiranjem celotnega javnofinančnega presežka oziroma primanjkljaja (izkazani s postavkami računa financiranja tekočega dela bilance javnega financiranja: domače zadolževanje in odplačila domačega dolga, zadolževanje v tujini in odplačila dolga do tujine ter sprememba denarnih sredstev na računih državnega sektorja).

**Postavke finančnih terjatev in naložb** na eni strani izkazujejo tokove prejemkov na podlagah, ki imajo značaj prejetja vračil posojenih sredstev države, zmanjšanja (prodaje) kapitalskih deležev države v podjetjih, bankah in drugih finančnih institucijah ali zmanjšanja drugih vrst finančnih sredstev. Na strani prejemkov je zajet tudi priliv kupnin iz naslova privatizacije. V teh postavkah se zajemajo tudi izdatki na podlagah, ki imajo značaj danih posojil, pridobitve kapitalskih deležev države v podjetjih, bankah oziroma drugih finančnih institucijah ali vzpostavitve druge vrste finančnega sredstva. V okviru te skupine izdatkov se izkazujejo tudi plačila zapadlih jamstev države podjetjem ali finančnim institucijam, ki prav tako pomenijo vzpostavitev terjatev države do prejemnikov teh sredstev. Na strani izdatkov je zajeta tudi poraba sredstev kupnin iz naslova privatizacije.

transfers to individuals and households, other domestic current transfers (current transfers to non-profit institutions and other non-government institutions), and current transfers to the rest of the world);

- capital expenditure (acquisition of fixed assets) and
- capital transfers.

**Current transfers** cover all unreturnable payments for which the general government (payer) does not receive anything as a compensation from the receiver of these payments, neither in the form of material or other goods nor in the form of service implemented by the receiver. Use of these payments by the receiver should not have a nature of investment consumption.

**Capital transfers** cover unreturnable expenditures of the government sector, which are intended to be used to finance capital expenditures of the receivers, that is for their acquisition of fixed assets. Receivers of capital transfers are - according to GFS - entities that do not belong to the government sector, while according to the new economic classification they are entities other than direct users of the budgetary sources.

**Lending minus repayments and financing account items** cover the following types of change in financial assets and liabilities of the government sector:

- cash transactions which are the result of the increase or decrease of financial assets other than cash (presented with the following items: lending minus repayment items: lending and received repayments of loans, acquisitions and sales of equities, receipts from privatisation and use of these receipts) and
- incurrence of liabilities and repayments of loans and changes in cash and deposits of the government sector related to financing the overall public financing surplus/deficit (presented with the financing account items: domestic borrowing and amortisation of domestic debt, external borrowing and amortisation of external debt and change in cash and deposits)

**Lending minus repayment items** on the one hand show receipts which have the nature of repayments of loans previously given by the government sector, decrease (sale) of government sector capital shares in corporations, banks and other financial corporations or decrease in other types of financial assets. The receipts part also covers receipts from privatisation. On the expenditure side these items show expenditures which have the nature of given loans, acquisition of government capital shares in corporations, banks and other financial corporations or acquisition of other types of financial assets. Covered in this item are payments based on government guarantees previously given to non-financial and financial corporations, which are also a kind of government financial claims vis-a-vis receivers of these payments. The expenditure side of this account also covers part of the use of privatisation receipts.

## KRATKOROČNI KVALITATIVNI KAZALNIKI

S kvalitativnimi anketami mesečno pridobivamo informacije o trenutnih stanjih ekonomskih kazalcev ter oceno o njihovem pričakovanem gibanju v naslednjih mesecih. Rezultati anket so osnova za izračun **kazalca gospodarske klime**. Kazalec gospodarske klime je sintezni kazalec, ki temelji na povprečju kazalca zaupanja v predelovalnih dejavnostih, trgovini na drobno in kazalcu zaupanja potrošnikov.

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci oz. gospodinjstva med 1. in 10. v mesecu. Njihove odgovore pa objavimo že okoli 20. v istem mesecu.

Grafikoni prikazujejo **ravnotežja** po posameznih vprašanjih. Ravnotežje je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalcev.

Za lažje razumevanje ravnotežja navajamo primer. Anketirane vprašamo: Kakšen je vaš sedanjí poslovni položaj? Dobimo sledeče odgovore:

- 35 % jih poroča, da je sedanjí poslovni položaj dober,
- 40 % jih poroča, da je sedanjí poslovni položaj zadovoljiv (nespremenjen),
- 25 % jih poroča, da je sedanjí poslovni položaj slab.

Podjetja, ki so odgovorila, da se situacija ni spremenila, ne vplivajo na rezultat ocene poslovne situacije. Iz ostalih dveh deležev izračunamo ravnotežje (35-25). Rezultat 10 je vrednost ocene situacije, ne pa dejanska velikost kazalca.

Na grafikonih so prikazane **desezonirane vrednosti**. Desezonirane vrednosti so vrednosti, pri katerih je izključen vpliv sezone, vsebujejo pa trend-cikel in naključno komponento. Kazalce smo desezonirali z metodo TRAMO/SEATS, ki temelji na ARIMA modelih. Pri oblikovanju modelov je bilo upoštevano časovno obdobje od začetka izvajanja ankete do januarja 2004.

Ankete o poslovnih tendencah in Anketo o mnenju potrošnikov je sofinancirala Evropska komisija. Za objavljene podatke in besedila je odgovoren izključno Statistični urad Republike Slovenije in ne Evropska komisija.

### Anketa o poslovnih tendencah v predelovalnih dejavnostih

S kvalitativno anketo o poslovnih tendencah v predelovalnih dejavnostih mesečno pridobivamo informacije o trenutnih stanjih glavnih ekonomskih kazalcev ter oceno o njihovem pričakovanem gibanju v naslednjih mesecih. Rezultati ankete so osnova za izračun kazalca zaupanja v predelovalnih dejavnostih in kazalca gospodarske klime.

V Sloveniji anketo izvajamo od aprila 1995 s poenotenim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

## SHORT TERM QUALITATIVE INDICATORS

With qualitative surveys we get monthly information about current situations of economic indicators and evaluation of their movement in the following months. The results of the surveys are the basis for evaluation of the sentiment indicator. **The sentiment indicator** is the average of the confidence indicator in manufacturing, retail trade and the consumer confidence indicator.

Persons responding to the questionnaire are managers of enterprises or other executives or households. They respond between the 1st and the 10th of the month. Their answers are published around the 20th of the current month.

The charts show the **balance** by individual questions. The balance is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

An example to illustrate how the balance is calculated: We consider our business position to be? We get the following answers:

- 35% of respondents appraise their business situation as good,
- 40% of respondents appraise their business situation as satisfactory,
- 25% of respondents appraise their business situation as bad.

The firms that assessed their situation as satisfactory are considered to be "neutral" and do not affect the result of the business-situation appraisal. The two-remaining percentage values (35-25) are now balanced. The resulting value of 10 is the business situation appraisal.

The charts show **seasonally adjusted** values. Values are adjusted for seasonal component, which include trend-cycle component and irregular component. The indicators were seasonally adjusted by TRAMO/SEATS method, which is based on ARIMA models. The designing of the models is based on the time period from the beginning of the survey implementation until January 2004.

The Business Tendency Surveys and the Consumer Survey are co-financed by the European Commission. However, the European Commission accepts no responsibility or liability whatsoever with regard to the material published in this document.

### Business tendency survey in manufacturing

With the Business Tendency Survey we get monthly information about current situations of major economic indicators and evaluation of their movement in the following months. The results of the survey are the basis for evaluation of the confidence indicator in manufacturing.

We have been carrying out the Business Tendency Survey in Manufacturing in Slovenia since April 1995 with the harmonised questionnaire, methodology and periodicity which have been used in EU Member States for several decades. Therefore all data are directly comparable.

Enote opazovanja so podjetja (700), ki so razvrščena v predelovalne dejavnosti, to je oddelke Standardne klasifikacije dejavnosti (SKD) od 15 do 36. Podjetja so bila izbrana na podlagi dveh meril:

- velikosti podjetja (imajo 10 zaposlenih ali več),
- razvrstitve podjetja po SKD-ju.

**Kazalec zaupanja v predelovalnih dejavnostih** je povprečje odgovorov (ravnotežij) na vprašanja o proizvodnih pričakovanjih, skupnih naročilih in zalogah (obrnjen predznak).

#### **Anketa o poslovnih tendencah v trgovini na drobno**

Slovenija je začela izvajati anketo v trgovini na drobno leta 1999. Vprašanja, metodologija in periodika so poenoteni z evropskimi.

Opazujemo podjetja (1100), ki so po Standardni klasifikaciji dejavnosti razvrščena v oddelka:

- 50 - Prodaja, vzdrževanje in popravila motornih vozil; trgovina na drobno z motornimi vozili,
- 52 - Trgovina na drobno, razen z motornimi vozili; popravila izdelkov široke porabe.

Vzorec podjetij je oblikovan na podlagi dveh meril:

- razvrstitve trgovskega podjetja po Standardni klasifikaciji dejavnosti,
- velikosti trgovskega podjetja (prihodku).

**Kazalec zaupanja v trgovini na drobno** je povprečje odgovorov (ravnotežij) na vprašanja o sedanjem in pričakovanem poslovnem položaju in sedanjem obsegu zalog (obrnjen predznak).

#### **Anketa o poslovnih tendencah v gradbeništvu**

Namen kvalitativne Ankete o poslovnih tendencah v gradbeništvu (PA-GRAD/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalcev ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalca zaupanja v gradbeništvu.

Anketo o poslovnih tendencah v gradbeništvu izvajamo v Sloveniji od marca 2002 s poenotenim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

Opazujemo podjetja, ki so razvrščena v gradbeništvu, to je v oddelku Standardne klasifikacije dejavnosti (SKD) 45 in imajo 10 zaposlenih ali več, ter so bila izbrana na podlagi dveh meril:

- velikosti podjetja glede na število zaposlenih, skladno z zakonom o gospodarskih družbah in
- razvrstitve podjetja po SKD-ju.

**Kazalec zaupanja v gradbeništvu** je povprečje odgovorov (ravnotežij) na vprašanja o sedanjih skupnih naročilih in pričakovanemu zaposlovanju.

Units of observation are enterprises (700) that are registered in manufacturing - divisions 15 to 36 of the Standard Classification of Activities (SCA). They were selected into the panel by two criteria:

- size of the enterprise (they have 10 or more persons in paid employment) and
- classification of the enterprise according to SCA.

**The confidence indicator in manufacturing** is an average of responses (balances) to questions on production expectation, total order books and stocks (the latter with inverted sign).

#### **Business tendency survey in retail trade**

Slovenia has been carrying out the monthly survey in retail trade since 1999. The questionnaire, methodology and periodicity are harmonised with EU Member States.

We are monitoring units (1100) that are registered in:

- 50 - Sale, maintenance and repair of motor vehicles, retail sale of fuels,
- 52 - Retail trade, except of motor vehicles, repair of personal and household goods.

They were selected into the panel by two criteria:

- the classification of the enterprise according to the Standard Classification of Activities,
- the size of the enterprises.

**The confidence indicator in retail trade** is an average of responses (balances) to questions on present and expected business trend and present stock (the letter with inverted sign).

#### **Business tendency survey in construction**

The purpose of the qualitative Survey on Business Tendency in Construction (hereinafter: PA-GRAD/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the construction confidence indicator.

We have been carrying out the Survey on Business Tendency in Construction in Slovenia since March 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

We are monitoring units that are registered in construction – division 45 of the Standard Classification of Activities (SKD) and have 5 or more employees. They were selected into by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act) and
- the classification of the enterprise according to the SKD.

**Confidence indicator in construction** is an average of responses (balances) to the questions on order book assessments and employment expectations.

**Anketa o poslovnih tendencah v storitvenih dejavnostih**

Slovenija je začela izvajati anketo v storitvenih dejavnostih leta 2002. Vprašanja, metodologija in periodika so poenoteni z evropskimi.

Opazujemo podjetja, ki so po Standardni klasifikaciji dejavnosti (SKD) razvrščena v storitveno dejavnost, in sicer:

- 55 – Gostinstvo
- 60 – Kopenski promet; cevovodni transport
- 61 – Vodni promet
- 62 – Zračni promet
- 63.3 – Dejavnost potovalnih agencij in organizatorjev potovanj; s turizmom povezane dejavnosti
- 64 – Pošta in telekomunikacije
- 65 – Finančno posredništvo, razen zavarovalništva in dejavnosti pokojninskih skladov
- 66 – Zavarovalništvo in dejavnost pokojninskih skladov, razen obveznega socialnega zavarovanja
- 67 – Pomožne dejavnosti v finančnem posredništvu
- 70 – Poslovanje z nepremičninami
- 71 – Dajanje strojev in opreme brez upravljavcev v najem; izposojanje izdelkov široke porabe
- 72 – Obdelava podatkov, podatkovne baze in s tem povezane dejavnosti
- 73 – Raziskovanje in razvoj
- 74 – Druge poslovne dejavnosti
- 90 – Dejavnosti javne higiene
- 93 – Druge storitvene dejavnosti

Vzorec podjetij je oblikovan na podlagi dveh meril:

- razvrstitve storitvenega podjetja po SKD in
- velikosti storitvenega podjetja (števila zaposlenih po Zakonu o gospodarskih družbah).

**Kazalec zaupanja** je povprečje odgovorov (ravnotežij) na vprašanja o poslovnem položaju ter sedanjem in pričakovanem povpraševanju po storitvah.

**Anketa o mnenju potrošnikov**

Anketo o mnenju potrošnikov izvajamo od marca 1996. Pri tem uporabljamo poenoten vprašalnik po priporočilih Evropske komisije in upoštevamo tudi metodologijo, ki jo uporabljajo članice EU in nekatere druge srednje- in vzhodnoevropske države.

Anketa poteka mesečno na vzorcu 1500 oseb. Vzorčni okvir sestavljajo gospodinjstva izbranih zasebnih telefonskih naročnikov, na anketna vprašanja pa odgovarja tisti član izbranega gospodinjstva, ki bo imel prvi rojstni dan in ki je star najmanj 16 let. Potem ko je bil določen telefonski naročnik

**Business tendency survey in services**

Slovenia has been carrying out the monthly survey in services since 2002. The questionnaire, methodology and periodicity are harmonised with EU Member States.

We are monitoring units that are registered in services according to the Standard Classification of Activities:

- 55 – Hotels and restaurants
- 60 – Land transport; transport via pipelines
- 61 – Water transport
- 62 – Air transport
- 63.3 – Activities of travel agencies and tour operators; tourist assistance activities
- 64 – Post and telecommunications
- 65 – Financial intermediation, except insurance and pension funding
- 66 – Insurance and pension funding, except compulsory social security
- 67 – Activities auxiliary to financial intermediation
- 70 – Real estate activities
- 71 – Renting of machinery and equipment without operator and of personal and household goods
- 72 – Data processing, database activities and other computer related activities
- 73 – Research and development
- 74 – Other business activities
- 90 – Sewage and refuse disposal, sanitation and similar activities
- 93 – Other service activities

The sample of enterprises was selected by two criteria:

- classification of the enterprise according to the Standard Classification of Activities,
- size of the enterprise (the number of employees in accordance with the Companies Act).

The **confidence indicator** is the arithmetic mean of responses (balances) to the questions on business situation, and present and expected demand.

**Consumer survey**

Statistical Office has been carrying out the Consumer Survey since March 1996. We use a harmonised questionnaire recommended by the European Commission. We also use the same methodology as all EU Member States and other Central- and East European Countries.

The Consumer Survey in Slovenia is carried out monthly on the sample of 1,500 persons. The sampling frame is the database of all telephone subscribers that are listed in the directory of the National Telephone Company. A person in the household aged 16 years and older is selected according to the "next birthday method". Numbers selected

izbran, ga iz vzorčnega okvira izločimo za 12 mesecev.

Anketa je kvalitativna. Vsako vprašanje ima od 3 do 5 možnih odgovorov. Tako ima npr. vprašanje o sedanjem finančnem stanju v gospodinjstvu v primerjavi s preteklimi 12 meseci 5 možnih odgovorov in pripadajoče uteži za posamezen odgovor:

|    | odgovor         | utež |
|----|-----------------|------|
| ++ | veliko boljše   | 1    |
| +  | malo boljše     | 0,5  |
| =  | ostalo je enako | 0    |
| -  | malo slabše     | -0,5 |
| -- | veliko slabše   | -1   |

V grafikonih so prikazana ravnotežja z desezoniranimi vrednostmi, razen ravnotežja na vprašanje o pričakovanem finančnem stanju v gospodinjstvu, ker pri tem ravnotežju sezonska komponenta ni prisotna.

**Kazalec zaupanja potrošnikov** je povprečje ravnotežij iz odgovorov na vprašanja o pričakovanem finančnem stanju v gospodinjstvu, o pričakovanem ekonomskem stanju v državi in o tem, o brezposelnosti v Sloveniji v naslednjem letu in varčevanju v prihodnjih 12 mesecih.

in the sample are excluded from the sampling frame for the next twelve months.

The Consumer Survey is qualitative. Each question has between 3 and 5 possible answers. For example, the question about the financial situation now compared to 12 months ago has 5 possible answers and the following weights for a particular answer:

|    | answer              | weight |
|----|---------------------|--------|
| ++ | got a lot better    | 1      |
| +  | got a little better | 0,5    |
| =  | stayed the same     | 0      |
| -  | got a little worse  | -0,5   |
| -- | got a lot worse     | -1     |

The charts show seasonally adjusted balances, with exception for the balance on the question about expected financial situation in the household, because this balance has no seasonal component.

The **consumer confidence indicator** has been calculated as an average of balances to questions on expected household financial situation, expected general economic situation in the country, unemployment expectations and household savings over the next 12 months.

**Statistične informacije, ki jih je izdal Statistični urad Republike Slovenije v aprilu 2004**
