- A steady, but manageable, stream of coaching and training that helps you **build career-changing skills** in areas like leadership, team building, personal effectiveness, and more.
- Access to the Mind Tools Full Toolkit, with more than 600 industrial-strength life- and career-enhancing skills.
- Downloadable MP3-based Book Insights and Expert Interviews, helping you **stay up-to-date with the latest thinking** and giving you deep insights into key career issues.
- And **four must-have bonuses**, the Career Booster Workbook, Team Tools, the Get It Done! Workbook and How to Lead: Discover the Leader Within You. With a value of **US$ 143.98**, these are yours to keep – even if you decide to cancel your membership.

Try Everything at OUR Risk, Not Yours

The best way to evaluate the Career Excellence Club is to try it out. You may cancel at any time (with no hidden charges) by contacting our **members' helpdesk**. If you're not happy, we'll return your last month's fees.

We're confident that you'll think the Club is great value and that you'll want to stay a member. However, that's your decision – all we ask is that you give us a try!

And just think how much faster you'll get ahead in your career when you do!

First steps tutorial
Our first steps tour and our FAQ will help you a lot after registration. They explain how to customize the interface (for example the language), how to upload files and our basic licensing policy. You don't need technical skills in order to contribute here. Be bold contributing here and assume good faith for the intentions of others. This is a wiki—it is really easy.
Getting help
More information is available at the community portal. You may ask questions at the help desk, village pump or on IRC channel #wikimedia-commons (direct access). You can also contact an administrator (find an active one) on their talk page. If you have a specific copyright question, ask at Commons talk:Licensing.
Goodies, tips and tricks
Put Babel boxes on your user page so others know what languages you can speak and indicate your graphic abilities.
All your uploads are stored in your personal gallery
Please sign your name on Talk pages by typing ~~~~
Use the CommonSense tool to find good categories for your files (then other people can find them too!)
To link to an image page without embedding the image, type: [[:File:Foo.jpg]], which produces: File:Foo.jpg
If you're copying files from another project, be sure to use the CommonsHelper
Made a mistake?
Do you want to have a file renamed or moved? Simply mark it like this: {{rename|the_new_name|reason_for_renaming}} and wait for an administrator or filemover to rename it.
Do you want to have your picture removed, for other reasons? Simply tag it as {{speedy|reason for deletion}}.
For more information read the full deletion guidelines.
(P.S. Would you like to provide feedback on this message?)

Evaluation Criteria Definitions

Ability to Execute

Product/Service: Core goods and services offered by the vendor that compete in/serve the defined market. This includes current product/service capabilities, quality, feature sets and skills, whether offered natively or through OEM agreements/partnerships as defined in the market definition and detailed in the subcriteria.

Overall Viability (Business Unit, Financial, Strategy, Organization): Viability includes an assessment of the overall organization's financial health, the financial and practical success of the business unit, and the likelihood that the individual business unit will continue investing in the product, will continue offering the product and will advance the state of the art within the organization's portfolio of products.

Sales Execution/Pricing: The vendor's capabilities in all pre-sales activities and the structure that supports them. This includes deal management, pricing and negotiation, pre-sales support and the overall effectiveness of the sales channel.

Market Responsiveness and Track Record: Ability to respond, change direction, be flexible and achieve competitive success as opportunities develop, competitors act, customer needs evolve and market dynamics change. This criterion also considers the vendor's history of responsiveness.

Marketing Execution: The clarity, quality, creativity and efficacy of programs designed to deliver the organization's message to influence the market, promote the brand and business, increase awareness of the products, and establish a positive identification with the product/brand and organization in the minds of buyers. This "mind share" can be driven by a combination of publicity, promotional initiatives, thought leadership, word-of-mouth and sales activities.

Customer Experience: Relationships, products and services/programs that enable clients to be successful with the products evaluated. Specifically, this includes the ways customers receive technical support or account support. This can also include ancillary tools, customer support programs (and the quality thereof), availability of user groups, service-level agreements and so on.

Operations: The ability of the organization to meet its goals and commitments. Factors include the quality of the organizational structure, including skills, experiences, programs, systems and other vehicles that enable the organization to operate effectively and efficiently on an ongoing basis.

Completeness of Vision

Market Understanding: Ability of the vendor to understand buyers' wants and needs and to translate those into products and services. Vendors that show the highest degree of vision listen to and understand buyers' wants and needs, and can shape or enhance those with their added vision.

Marketing Strategy: A clear, differentiated set of messages consistently communicated throughout the organization and externalized through the website, advertising, customer programs and positioning statements.

Sales Strategy: The strategy for selling products that uses the appropriate network of direct and indirect sales, marketing, service and communication affiliates that extend the scope and depth of market reach, skills, expertise, technologies, services and the customer base.

Offering (Product) Strategy: The vendor's approach to product development and delivery that emphasizes differentiation, functionality, methodology and feature sets as they map to current and future requirements.

Business Model: The soundness and logic of the vendor's underlying business proposition.

Vertical/Industry Strategy: The vendor's strategy to direct resources, skills and offerings to meet the specific needs of individual market segments, including vertical markets.

Innovation: Direct, related, complementary and synergistic layouts of resources, expertise or capital for investment, consolidation, defensive or pre-emptive purposes.

Geographic Strategy: The vendor's strategy to direct resources, skills and offerings to meet the specific needs of geographies outside the "home" or native geography, either directly or through partners, channels and subsidiaries as appropriate for that geography and market.

Mestna knjižnica Ljubljana razpolaga z vohunskim računalniškim programom za nadzor nad uporabniki oz. njihovo aktivnostjo, katerega uporaba je pravno sporna... kar bom posebej utemeljil po slovenskem in evropskem veljavnem pravu. a

Vložila bova tožbo proti Mestni knjižnici Ljubljana zaradi:

- kiber vohunjenja
- kršenja človekovih pravic,
- posegov v zasebnost,
- posegov v komunikacijsko zasebnost,
- posegov v integriteto posameznika,
- kršitve avtorskega prava in avtorskih pravic,
- kršitve tajnosti občil
- nezakonitega in neupravičenega spremljanja dejavnosti
- prestrezanja elektronskih komunikacij

Programska oprema namreč omogoča, da skrbnik(i) vidi, kaj posameznik počne na računalniku oz. v živo spremlja uporabnikov zaslon, kot da bi mu stal za ramenom... Z delom na računalnikom lahko morebitnemu opazovalcu razkrivamo osebne in poslovne podatke, ki so zasebne narave, to so besedila, ki jih pišemo in beremo, elektronska pošta, spletno brskanje, nalaganje datotek in ostalo delo z datotekami, vse kar počnemo, so smiselno podatki, ki razkrivajo našo integriteto.

Zasebnost pa bi morala biti zagotovljena,

- po 35. členu (varstvo pravic zasebnosti in osebnostnih pravic) Ustave RS, ki pravi:

"Zagotovljena je nedotakljivost človekove telesne in duševne celovitosti, njegove zasebnosti ter osebnostnih pravic.",

- po 37. členu (varstvo tajnosti pisem in drugih občil) Ustave RS, ki pravi:

"Zagotovljena je tajnost pisem in drugih občil.

Samo zakon lahko predpiše, da se na podlagi odločbe sodišča za določen čas ne upošteva varstvo tajnosti pisem in drugih občil in nedotakljivost človekove zasebnosti, če je to nujno za uvedbo, ali potek kazenskega postopka ali za varnost države.",

- po 8. členu (Pravica do spoštovanja zasebnega in družinskega življenja) Evropske konvencije o varstvu človekovih pravic in temeljnih svoboščin, ki pravi:

"Vsakdo ima pravico do spoštovanja svojega zasebnega in družinskega življenja, svojega doma in dopisovanja.

Javna oblast se ne sme vmešavati v izvrševanje te pravice, razen če je to določeno z zakonom in nujno v demokratični družbi zaradi državne varnosti, javne varnosti ali ekonomske blaginje države, zato, da se prepreči nered ali zločin, da se zavaruje zdravje ali morala ali da se zavarujejo pravice in svoboščine drugih ljudi.",

- kazenski zakonik pa po 149. členu (Neupravičeno slikovno snemanje) predvideva sledeče kazni:

(1) Kdor neupravičeno slikovno snema ali naredi slikovni posnetek drugega ali njegovih prostorov brez njegove privolitve in pri tem občutno poseže v njegovo zasebnost, ali kdor takšno snemanje neposredno prenaša tretji osebi ali ji takšen posnetek prikazuje ali ji kako drugače omogoči, da se z njim neposredno seznani, se kaznuje z denarno kaznijo ali z zaporom do enega leta.
(2) Če stori dejanje iz prejšnjega odstavka uradna oseba z zlorabo uradnega položaja ali uradnih pravic ali poskusi to storiti, se kaznuje z zaporom do dveh let.
(3) Pregon za dejanje iz prvega odstavka tega člena se začne na predlog.

Tako verjetno preostaneta samo dve dopustni, torej zakoniti poti, kako pridobiti (omejeni) nadzor:

- sodna odredba, ki praviloma velja za naprej,
- ali pa pridobitev soglasja uporabnikov - in je kakršnakoli drugačna uporaba sporna.

COMMENTARY

HOUSTON — Now that the last shuttle has landed, the roster of space shuttle astronauts is complete — and it's a good list of 355 people.

By my count, 299 of those shuttle riders were Americans, compared to the 43 Americans who were launched in the Mercury, Gemini, Apollo, and Skylab programs. Seven of those fliers from the pre-shuttle space programs also made shuttle flights, so they count twice.

Christa McAuliffe gets a preview of microgravity on NASA's specially equipped KC-135 "zero gravity" aircraft on Jan. 13, 1986. McAuliffe and six crewmates died in the Challenger explosion two weeks later.

Roughly 90 percent of all Americans who have ever gone into orbit did so in the shuttle program. Despite the size and diversity of this group, there are some additional people I wish we could have seen go into space on the shuttle. There were people who *almost* got to fly, or

Iskanje

Delite svoj prostor v spletu z nami.

Nova spletna mesta dodajamo in posodabljamo v našem indeksu vsakič, ko preglejujemo splet, in vas vabimo, da nam pošljete svoj URL. V indeks ne dodajamo vseh poslanih naslovov URL in ne moremo predvideti ali zagotoviti, kdaj, če sploh, jih bomo prikazali.

Vpišite celoten URL, vključno s predpono `http://` . Na primer: `http://www.google.si/`. Dodate lahko komentarje ali ključne besede, ki opisujejo vsebino strani. Uporabljamo jih samo za našo informacijo in ne vplivajo na to, kako bo Google indeksiral ali uporabil vašo stran.

Opozorilo: Vnesti morate samo vrhovno stran gostitelja. Posameznih strani vam ni treba pošiljati. Naš odjemalec Googlebot bo sam našel ostale strani. Google redno posodablja index, zato vam ni treba pošiljati posodobljenih ali neaktivnih povezav. Mrtve povezave bodo »ugasnile« pri naslednji indeksaciji, ko bomo posodabljali celoten indeks.

Izbirno: Pomagajte nam razlikovati med stranmi, ki jih pošiljajo posamezniki, in stranmi, ki jih samodejno vpisujejo programski roboti. Prepišite zavite črke s slike v spodnje polje.

Current Events in Context: Worldwide Course on AI

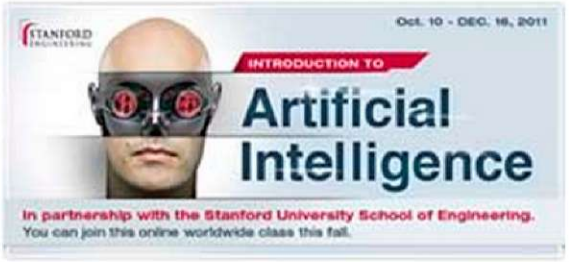

Image of Stanford Engineering's Artificial Intelligence course.

Stanford Engineering has announced an innovative experiment in open education: Three classes offered openly online to the public, including an Artificial Intelligence course by Sebastian Thrun and Peter Norvig. The courses will offer interactivity and feedback from the professors. Learn more at www.ai-class.com.

If you are taking the Stanford Artificial Intelligence course, OCW has some great resources to supplement your study. If taking a structured course is more of a commitment than you are ready for, these courses are great opportunity to explore the field:

- 6.034 Artificial Intelligence
- 6.825 Techniques in Artificial Intelligence
- 6.001 Structure and Interpretation of Computer Programs
- 6.436J Fundamentals of Probability
- 6.801 Machine Vision
- 6.803 The Human Intelligence Enterprise
- 6.867 Machine Learning
- 6.871 Knowledge-Based Applications Systems
- 6.864 Advanced Natural Language Processing
- 18.06 Linear Algebra
- 2.017J Design of Electromechanical Robotic Systems
- 2.12 Introduction to Robotics
- ESD.86 Models, Data and Inference for Socio-Technical Systems

How To Set Up a Meeting With ANY Executive

Never has it been so difficult to get through to an executive to make a formal appointment. Nevertheless, with persistence, it's possible to GET THROUGH and GET THAT MEETING. Here's an easy 10-step process to help you master this key selling skill.

- **Step 1. Research Your Target's Business.** Gather enough understanding of the target so you can clearly communicate exactly how you and your firm can add value to your target's company and career. Use the Internet to review the major challenges in the prospect's industry, the role your prospect's firm plays in that industry, and the role that an executive with that job title typically plays inside his or her firm.
- **Step 2. Research the Target's Life.** Compile some extra information that will help you access to the prospect and differentiate you from other callers. Search on the target's name, business and likely city of residence, to uncover additional information, such e-mail addresses, telephone numbers, fax numbers, work addresses, home addresses, personal interests, trade association memberships, colleague relationships, etc.
- **Step 3: Craft a Custom Message.** Create a solutions-focused business message that will appeal to the target, based upon what you've learned in steps 1 and 2. Make certain that the message leads your sales process forward. It should consist of three parts: 1) a title line "teaser" or headline, 2) a paragraph of concise content, and 3) a call to action. Avoid words or phrases that sound like "sales talk." Instead, use the tone and vocabulary that you would expect to find within an internal memo sent inside your prospect's firm.
- **Step 4: Create a Voice Mail Version.** Unless you're insanely lucky, you're going to be leaving at least one voice mail. Get

Google Closes Google Labs
CEO Larry Page says the company is putting "more wood behind fewer arrows."
By Thomas Claburn InformationWeek
July 21, 2011 06:49 PM
Google CEO Larry Page has been cleaning house at the company he co-founded. During his company's recent earnings conference call and in a transcription of his remarks on that call posted to Google+, Page described his campaign for greater corporate focus as putting "more wood behind fewer arrows."
Or if you prefer a pasta metaphor, Google is throwing less spaghetti against the wall in the hope that some of it will stick. Until recently, that would've been a fair way to describe Google's product strategy, outside of its core search advertising business: The company's engineers deployed interesting and often unexpected software and services, often with relatively little direction from above, and hoped that people would use it.
But as the company has

The WTF Of The Day: Po...
CamStudio - Free Screen ...
camstudio.org
that's not the case. CamStudio can be learned in a matter of minutes and comes with a comprehensive built-in helpfile, so if you **do** manage to get stuck, you can simply hit "Help" and get the answers you need.
So where can I get it and how much does it cost?
You can download and use it completely free - yep - completely 100% free for your personal and commercial projects as CamStudio and the Codec are released under the GPL (for more details on this license, click here.)
There are no royalties or any monies to pay - although if you do use it for a commercial product, I wouldn't say no to a copy of whatever you produce
Download Links
CamStudio 2.0: CamStudio20.exe

FAQ:
http://camstudio.org/faq.htm
Designed for Windows® XP
Windows Vista™ Capable
To manually install the codec, download the zipfile version, extract the contents to a folder, right click the camcodec.inf file and select Install.
If you don't have a lot of experience or just plain can't be bothered with all that mucking around [grin], download the EXE version and double click it to begin the install process.
Here is the project page on SourceForge where you can download the files if the above links don't work:

provide contact between neighbouring cells, between a cell and the extracellular matrix, or they build up the paracellular barrier of epithelia and control the paracellular transport.[citation needed]
Classification of epithelial tissue
[edit]
Epithelial tissues are generally classified by the morphology of their cells, and the number of layers they are composed of.[2][4][6] Epithelial tissue that is only one cell thick is known as simple epithelium.[7] If it is two or more cells thick, it is known as stratified epithelium.[8] However, when taller simple epithelial cells (see columnar, below) are viewed in cross section with several nuclei appearing at different heights, they can be confused with stratified epithelia. This kind of epithelium is therefore described as "pseudostratified" epithelium.[9]

Simple epithelium
[edit]
Simple epithelium is one cell thick, that is, every cell is in direct contact with the underlying basement membrane. It is generally found where absorption and filtration occur. The thinness of the epithelial barrier facilitates these processes.[2]
Simple epithelial tissues are generally classified by the shape of their cells. The four major classes of simple epithelium are: (1) simple squamous; (2) simple cuboidal; (3) simple columnar; (4) pseudostratified.[2]
Type
Description
Squamous
Squamous cells have the appearance of thin, flat plates. They fit closely together in tissues; providing a smooth, low-friction surface over which fluids can move easily. The shape of the nucleus usually corresponds to the cell form and helps to identify the type of epithelium. Squamous cells tend to have horizontally flattened, elliptical (oval or shaped like an egg) nuclei because of the thin flattened form of the cell. Classically, squamous epithelia are found lining surfaces utilizing simple passive diffusion such as the alveolar epithelium in the lungs. Specialized squamous epithelia also form the lining of cavities such as the blood vessels (endothelium) and pericardium (mesothelium) and the major cavities found within the body.
Cuboidal
As their name implies, cuboidal cells are roughly cuboidal in shape, appearing square in cross section. Each cell has a spherical nucleus in the centre. Cuboidal epithelium is commonly found in secretive or absorptive tissue: for

The difficult job market has forced more Americans into a state of underemployment, accepting positions below their skill levels or taking on several jobs to make ends meet. Those who find themselves in such positions say it can be a blow to their self-esteem, but some are finding satisfaction by starting their own companies or helping others. FoxNews.com (7/6)

Recruiter offers a slew of suggestions to boost your job board odds
Include job boards as part of your job-search strategy, but improve the odds of them being the secret of your success by taking steps such as contacting a recruiter after you submit your application and using keywords in your resume, advises Chris Havrilla, a talent acquisition/recruiting consultant. "Make no mistake about it, job boards are not dead; plenty of candidates, recruiters, and companies use them," he said. U.S. News & World

Spoštovani,
vabimo vas, da prvo polovico leta zaokrožite z udeležbo na marketinškem dogodku z najdaljšo tradicijo, ki mu udeleženci zaupajo že deseto leto!
Sredi junija bo namreč zadnji fokus v prvem polletju, skupno pa že 50. marketinški fokus. Ob svojem jubileju prinaša tudi posebno ponudbo:
za ceno enega prideta dva.
Kaj odlikuje 50. izvedbo:
Znova bo ponudila sveže ideje, nove primere, kako se razvija marketing v praksi, o čem razmišljati, če želite napredovati, pogled v prihodnost marketinga, obračati poslovne modele, izkoriščati poznavanje potrošnikov, inovirati izdelke, odnose, ...
Tokrat smo prazničnemu fokusu namenili ves dan in mu dodali vzporedno sekcijo.
Čaka vas še več praktičnih prispevkov, kar 12 jih bo, in provokativen zaključni pogovor.
Akcijska ponudba: za ceno enega udeležba za dva. Prijava
Iz vsebine (program v celoti najdete tukaj):
"Disruptive" marketing - vaša sedanjost in prihodnost
Vedno bodo lahko zmagali tisti, ki bodo bolje poznali potrošnika
Pravočasno razumevanje podatkov o strankah - vpliv na strategijo interakcije s strankami
Že pridobljene stranke - kako prilagajamo komunikacijo in kako do uspešne navzkrižne prodaje
Kaj bo pomembno za uspešen marketing v prihodnosti?

C:\WP51>loaddskf.exe intall.dsk
LoadDskF 1.16r 01-14-93
(c) Copyright IBM Corporation 1989, 1993
Syntax:
LoadDskF [D:][path]filename.dsk d: [options]
The file must contain an image of the diskette that you wish to create
in the specified drive. The destination diskette is checked to ensure
the same format as the diskette from which the file was originally created.
The file must not be on the diskette in the destination drive.
Options:
/F The target diskette will be formatted to match the input image.
/Y Bypasses the user input (y/n) prior to overwriting the target diskette.
/Y/Q Omits the warning message before overwriting the target diskette.
/S Silent Mode - Don't Beep after writing diskette.
/C Used to write 3.5" images to 5.25" diskettes or vice versa.
See the documentation for usage and limitations.
This program will work on DOS and OS/2 Operating Systems.

Creating Subject Guides for the 21st-Century Library

Buffy Hamilton

One 90-minute session
Tuesday, September 20, 2011
4:00-5:30P Eastern | 3:00-4:30P Central
2:00-3:30P Mountain | 1:00-2:30P Pacific

The subject guide has been a valuable tool for school and academic librarians for decades, first as a print resource and more recently as web pages and web-based documents. In this ALA TechSource Workshop, Buffy Hamilton of The Unquiet Library will show how to revitalize the subject guide as a dynamic, customizable, social resource by integrating it into the web.

Topics include:

- How to use free resources such as widgets, RSS feeds, mashups, cloud computing, videos, and social bookmarking to create streams of quality information.
- Understanding the concept of social scholarship
- How to use non-traditional social media sources of information, such as blogs, Twitter streams, podcasts, and YouTube into your subject guides
- Free and subscription-based tools you can use to host these information portals/research guides.

90 minutes of interactive learning for only $50!

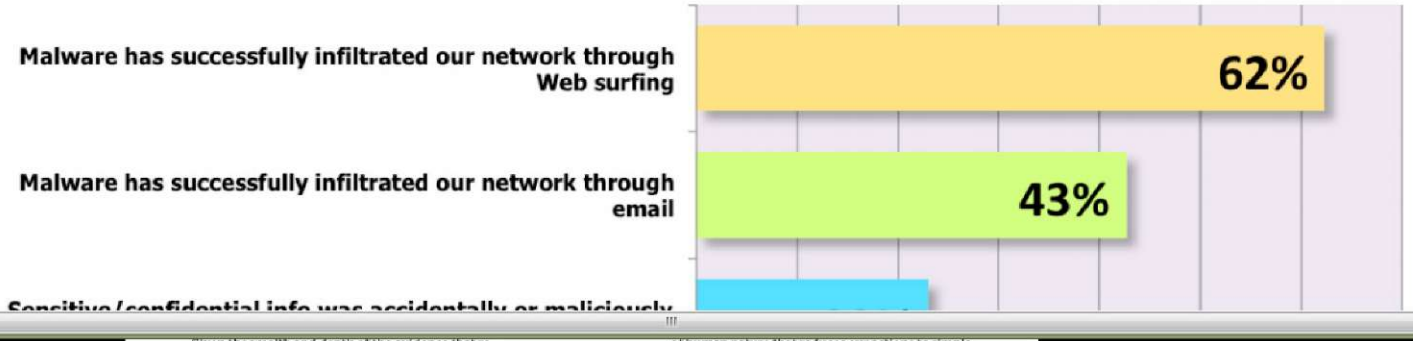
Electronic Communication and Collaboration is Dangerous

MOST ORGANIZATIONS HAVE EXPERIENCED MALWARE INFILTRATION

Most organizations have experienced some sort of malware infiltration through a variety of sources, as shown in the following figure from an Osterman Research survey[vi] conducted during 2010.

Security Problems That Occurred During the Previous 12 Months



Given the wealth and depth of the evidence that refutes the model of self-interested rationality, why does it still dominate? Four reasons account for its persistence.

of human nature that reduces our actions to simple, predictable responses to rewards and punishments is appealing to the human mind. But our experiences are more complex.

tion the red appears redder and the green actually greener. Both stand out more brilliantly because of the relationship. But pluck a red rose and place it against a wall of dull-red brick, and it loses much of its brilliance.
As in arranging complementary colors in painting, compose your photographic subjects with the same eye for colors. Here are six color combinations that will be easy to remember and of immeasurable value in color photography because the 12 colors in them occur frequently:
Crimson ..... Green
Scarlet ..... Blue-Green
Orange ..... Blue
Yellow ..... Blue-Violet
Green-Yellow ..... Red-Violet
will create contrast. Harsh and brilliant colors, as well as very dark ones including black, should be avoided because they obscure important detail and may be otherwise unpleasing. Children dressed in light colors photograph well against pastel shades. Men in blue may be placed against a background of maroon. Try pastel green for women in lavender, or jade green for women in pink.
Faces, tending toward yellow-orange, usually photograph well against blue sky, but many portraits, particularly close-ups, can be improved greatly by make-up. In general, application of make-up offers no difficult problem—provided you can get any males in the picture to stand for the stuff.
Make-up obscures blemishes such as slight

not, the symptoms of stress and negative emotion came back again, didn't they?

The Question Is Why?

Recent research has produced some startling discoveries on this.

And more important, when you know what's really causing negative emotions like stress, anxiety and frustration, you will be one step closer to letting them go forever and feeling great throughout your day.

The key discovery I'm about to share with you may upset or even offend some people. However, I'm sharing it with you now because I believe this can make a massive difference in your life.

First of all, allow me to introduce myself. My name is Kevin Schoeninger. I am a:

** Certified holistic fitness trainer
** Meditation instructor
** And Reiki practitioner

I've been teaching real meditation on a one-to-one and group basis for over 30 years... and guess what? ...

I've seen a lot of personal growth tools come and go in that time, but what I want to tell you about today is very different. I'll be sure to tell you why, so it makes sense to you.

So here is the key discovery....

The mind is **NOT** the main cause of these negative emotions. Research shows that the mind is only a small piece of the puzzle. Let me explain. Stop for a moment... and picture an iceberg, if you will...

Just as the bulk of an iceberg is under water, so it is for negative emotions. 95% of what causes stress, frustration and anxiety exists below the surface of your mind – hidden to most people.

So What Really Causes Your Negative Emotions, Stress And Pain?

First of all, it's important to realize that the human body emits a powerful "electromagnetic field". This "bio-energy field" has been measured by scientists in the United States and many other countries. What they discovered has profound implications for anyone who wants to balance their emotions and find true happiness.

Uncover Salesforce.com's Marketing Secrets

FROM: Brian Halligan, HubSpot
TO: vid_gajsek@yahoo.com

HubSpot

Hi Vid,

Whoa! Prepare yourself for the most amazing sales and marketing webinar ever. I am pumped! We have been able to get George Hu, Vice President of Marketing at Salesforce.com, to join me for an hour-long webinar to explain how social media has fundamentally changed sales and marketing playbooks-forever.

Most Expensive Photograph

by TOM *on* FEBRUARY 16, 2006 · COMMENTS (18)

The *Pond-Moonlight* by Edward Steichen has become the most expensive photograph ever, as it was just recentely sold for more than **$2,900,000** during a Sotheby's sale which began in New York on February 14, 2006. The expensive photograph was taken on Long Island in 1904. There are three known copies of the most expensive photograph in , and the picture is valued for its rarity because it is an early example of color autochrome photography. The other two copies of the photograph are held by the Metropolitan Museum of Art in New York and the Museum of Modern Art.

Apple eases rules for publishers as some bypass App Store
After Apple laid out strict subscription pricing guidelines for its App Store in February, publishers were up in arms, with some, like the Financial Times, even deciding to strike out on their own with HTML5, web-based tablet apps. The guidelines, which compelled publishers to sell their subscriptions in the App Store, with Apple taking a 30 percent cut, "seemed aimed at ensuring Apple had a

Publisher: Springer | ISBN: 185233777X | edition 2004 | Scan PDF | 398 pages | 14 mb
Click to LOOK INSIDE!
Limit theorems for stochastic processes are an important part of probability theory and mathematical statistics and one model that has attracted the attention of many researchers working in the area is that of limit theorems for randomly stopped stochastic processes. This volume is the first to present a state-of-the-art overview of this field, with many of the results published for the first time. It covers the general conditions as well as the basic applications of the theory, and it covers and demystifies the vast, and technically demanding, Russian literature in detail. A survey of the literature and an extended bibliography of works in the area are also provided. The coverage is thorough, streamlined and arranged according to difficulty for use as an upper-level text if required. It is an essential

This past weekend American and Swiss scientists announced that they may have detected "hints" or first glimpses of the hypothetical Higgs boson, or more commonly referred to by media outlets as the God particle.

The clues that surfaced this past weekend give scientific believers, that is those that adhere to the Standard Model of particle physics, hope that their long quest to find a God particle may be answered sooner rather than later.

Scientists expect to know the results of the recent findings within a month, following a period of data verification.

SuperGoogle: When All Is Known

Hans-Peter Brøndmo | May 3, 2004 | 4 comments

I call it SuperGoogle. It's a search engine that knows everything. In fact, it's less search engine and more oracle. You and I don't have access to it (yet). If we did, we would turn to it to learn everything about everything and everybody. No information, public or private, is concealed from SuperGoogle. It knows what we write in our email and what we say on the phone. It surely knows everything we buy and everywhere we travel. It knows our medical histories; maybe it's even seen our DNA. SuperGoogle knows our faces. It can recognize us on a street camera when we stroll on by.

How would you feel about a SuperGoogle knowing almost everything about you? Because soon, it will. It doesn't take a whole lot of imagination to construct SuperGoogle. Take the Google we know, give it access to a large marketing database such as one of Acxiom's, throw in the white pages; LexisNexis; our medical records; credit card transactions; location information from our mobile phone operators; INS, IRS, and DMV records; and we're getting close.

If we want to get really fancy, add some speech-to-text technology at the local phone companies and pile on face-recognition software. Now, SuperGoogle can hear and see. It's all digital and therefore all searchable. What's more, all the necessary information sources are connected to the Internet today, albeit some of them behind firewalls and with restricted access.

Does SuperGoogle exist? The answer is complicated. The Defense Advanced Research Projects Agency (DARPA)-initiated Total Information Awareness (TIA) project purportedly was going to scan information sources said to include communications, country entry, critical resources, education, financial, government, housing, medical, place-event entry, transportation, travel, and veterinary. The project was "cancelled" due to public outcry over its privacy implications and the threat of congressional review. Yet most or all of its many subcomponents continue to flourish, led by a mixture of private and government entities.

We know information about us is collected and analyzed at every turn, and we know we get many

Time travel: Light speed results cast fresh doubts

COMMENTS (600)

Physicists have confirmed the ultimate speed limit for the packets of light called photons - making time travel even less likely than thought.

The speed of light in vacuum is the Universe's ultimate speed limit, but experiments in recent years suggested that single photons might beat it.

If they could, theory allows for the prospect of time travel.

Now, **a paper in Physical Review Letters** shows that individual photons too are limited to the vacuum speed limit.

That means that photons maintain the principle of causality laid out in **Einstein's theory of special relativity** - that is, an event's effect cannot precede its cause by travelling faster than light. It is violation of this causality that would, in principle, permit time travel.

The speed of light in extremely cold gases of atoms can be varied widely

While the limit in vacuum is a fixed number - some 300,000km per second - the speed of light can vary widely in different materials.

These differences explain everything from why a straw looks bent in a glass of water to **experiments in cold gases of atoms** in which light's speed is actively manipulated.

Some of those experiments showed "superluminal" behaviour, in which photons travelled faster than the speed of light in a given medium.

It remained, however, to determine whether or not individual photons could exceed the vacuum limit.

A Developer's Job Mirrors The Project Lifecycle
Rob Diana
The topic of what is a software developer's job comes up quite often. Obviously, they are paid to write code, but that is a very narrow definition. As a developer gets more senior, they are asked to design the various components of a system, instead of just coding a task. With agile development, the idea of unit tests crept into the job description as well. Lastly, the developers need to be able to deploy the application in a local development environment on their computer as well as possibly deploying it to a testing server as well. So, even though the primary task of most developers is to write code, their whole job mirrors the software project lifecycle of Analysis, Design, Development, Testing, and Deployment.

zveza dobrote deluje aktivistično socialno mimo ohlokratskih in juristokratskih gazdinskih vladajočih razredov in skupin, je torej svobodna skupnost in kot taka dejansko prostovoljna – v Bogu. Posebna srečanja brezdomstva potekajo praznično ali ob obiskih, tako primeroma za - miklavževanje, ko je brezdomce prišel obiskat sv. Miklavž in jim prinesel darila, nadalje ob tako imenovanem državno proslulem kakor - »kulturnem prazniku« si priredijo svoj literarni nastop z recitacijami in petjem, - tudi se srečajo na križevem potu v prostorih Dnevnega centra in predstavijo štacijone in čustvena razmišljanja, kakor jih brezdomci kot utrinke napišejo sami, sicer pa se kdaj brezdomci pomerijo - v šalu, v igri Človek ne jezi se in tarokirajo... Delovanje dobrodelnega prostovoljstva sega od andragoških do psiholoških, kulturnih, izletniških in drugih dejavnosti, ne le v prehranjevanje obrobnega socialnega sloja, kar pomeni, da se je družbena izrinjenost soočila s pristnim človeškim odnosom. Med drugim zlasti mladi prostovoljci v Dnevnem centru za brezdomce Vincencijeve zveze dobrote kot humanitarna organizcija širijo nadzorovano in urejeno oziroma odgovorno delo obenem v krščanski veri, kar jim pomaga za obdobje ljubljanstva, ki se kaže celo primeroma v letu 2011 kot po svoje tranzicijsko. Prostovoljska opravila kažejo na zaposlenost socialnosti, skrbeče za izgubljene sloje meščanstva, ki so sicer odtujeni sebi in drugim in se le stežka vključujejo v državni sistem. Tako je ne le socialna, ampak humanitarna pomoč vsestransko učinkovita, kot pokaže evalvacija društva prostovoljcev Vincencijeve zveza dobrote, pomoč - brezdomcem za aktivno vključevanje v družbo, alkoholikom, drugim odvisnikom, hazarderjem, neprilagojenim tujcem, ki bivajo v Ljubljani ilegalno, beguncem, drugorasnim, največ temnopoltim, še romsko plemenskim ljudem, ob celostni pomoči mladim iz nefunkcionalnih družin, revežem, lačnim, ostarelim, bistveno osamelim, bolnim, deložiranim ali deportiranim in drugim, potrebnim pomoči.

Sector3 Games - FAQ
www.sector3.com.au/faq.aspx#a0
Where is my Serial Number?
When you purchase a game from us that requires a serial number to activate, your serial number will be sent to you in your purchase receipt email (please check your junk mail/spam if you don't receive it). The serial number will also be next to your game download link when you login to download your full version game.
What are the optimum settings to play our games?
Though we don't restrict you from playing our games at any resolution or quality setting, we optimise our games to run at 1024x768 in beautiful quality mode.
We give you Game Options to allow you to increase and decrease the visual quality of our games, IF YOUR MACHINE CAN SUPPORT IT. Please understand that the more you crank up the game resolution, quality settings and the more features you turn ON in the game options screen, the slower your game will run, possible making it NOT work at all or run too slow to play.
If you are experiencing slow game performance, please lower your settings BEFORE you email support with an issue.
Do you support older hardware?
Well, we test our games to make sure they run on machines as old as eMac's and Pentium 2.4 computers, but our games may not perform outstandingly on these specifications.
Are you making more games, or is this it?
Yes, I am not only updating my current games, but creating fantastic new titles. As I progress further with my new titles, I might let some details slip on my Dev Blog. Subscribe to the RSS feed on my Blog if you want to make sure you don't miss out any of the news.
Why do you offer family pack licensing on your games that are not multi-player?
Well, just because some of our games are not multi-player, it doesn't mean that you shouldn't get a discount for buying more than one license. Our family pack offers you a great value choice where you can own three licenses for the price of two, and use them on either Mac or PC. Most homes these days have more than one computer, so we wanted to offer a fair prices solution to those that want to run our games on more than one machine.
Why do you have such strict licensing?
Well, as much as we love making games for everyone to enjoy, it costs us a lot of money to develop them, so we need to ensure our hard work isn't destroyed by the small group of software pirates that love to crack games like ours and distribute them for free.
So, if I buy a single license, can I not install it on more than one machine?
Yes, you can move your single and family pack licences around, you just cant play a single licence game on more than one machine at a time. To move your license to a new machine, login and go to your downloads/licenses page an click Reset next to your current license and it will be free to re-activate again.
Do you offer refunds?

When That Little Voice Whi...
/when-that-little-voice-whispers-this-is-stupid/
Ever tell yourself that? This is stupid.
retweet
This post? This deck? This presentation? This proposal? This paper? This project? This idea? This (you fill in the blank).
If you are following the script or playbook to the letter the internal conversation may not occur frequently.
When you are writing the script or inventing the playbook the "this is stupid" conversation happens.
It happens to some of the most talented people I know.
I just discovered this recently. I thought it was just me. I thought there simply couldn't be other people that, at 1 a.m. the night before a presentation, would look at the deck they have been preparing for the last 3 weeks and suddenly convince themselves "this is stupid." {TIP: don't rebuild the deck from scratch at 1:00 a.m., trust me, that really is stupid}
I have given literally thousands of presentations. I can still get throw up nervous.
That voice. That fear. That doubt. That insecurity. The Lizard Brain. It exists. Inside most of us that are creating.
When the voice whispers I am trying to answer with a resounding, SO WHAT! (I didn't invent the idea but I like the advice).
So what if this post is stupid? Tomorrow I will write another.
So what if someone thinks this speech is stupid? Later this week I will give another.
So what if this proposal is stupid ? I will learn from it and I will make the next one better.
This is stupid? So what? In truth it just doesn't matter all that much to anyone else. It comes. It goes.
The good news is I am not stupid. Neither are you.
The next time that voice whispers, answer with a resounding, So What! And keeping right on going.
Chances are it really isn't all that stupid. And the little voice?

Title
Consultation on scientific information in the digital age
Policy field(s)
Research and innovation, information society
Target group(s)
All citizens and organisations concerned with access to and preservation of digital scientific information are welcome to contribute to this consultation. Contributions are particularly sought from governments, research institutions and universities, libraries, scientific publishers, research funding organisations, businesses, individual researchers and other interested parties.
Period of consultation
From 15.07.2011 to 09.09.2011
Objective of the consultation
In late 2011, the European Commission intends to adopt a Communication and Recommendation on access to and preservation of digital scientific information. This initiative builds on earlier policy developments in this area, and is being developed within the policy contexts of the EU Flagship Initiatives Innovation Union and Digital Agenda for Europe, and of the push for improved knowledge circulation in the European Research Area.
The Communication will take stock of the developments in the area of scientific information, and set out the actions that the Commission intends to take on open access to publications and data in the context of research projects funded by the Union budget. The Recommendation will detail specific actions to be taken at Member State level.
Consultation of interested parties forms part of the policy process. The purpose of this open consultation is to gather information from as many sources as possible. The consultation will feed into the development of possible policy options to be considered, and will contribute to the

38 ager autem est mundus; bonum vero semen, hi sunt filii regni; zizania autem filii sunt Mali;
39 inimicus autem, qui seminavit ea, est Diabolus; messis vero consummatio saeculi est; messores autem angeli sunt.
40 Sicut ergo colliguntur zizania et igni comburuntur, sic erit in consummatione saeculi:
41 mittet Filius hominis angelos suos, et colligent de regno eius omnia scandala et eos, qui faciunt iniquitatem,
42 et mittent eos in caminum ignis; ibi erit fletus et stridor dentium.
43 Tunc iusti fulgebunt sicut sol in regno Pa tris eorum. Qui habet aures, audiat.
44 Simile est regnum caelorum thesauro abscondito in agro; quem qui invenit homo abscondit et prae gaudio illius vadit et vendit universa, quae habet, et emit agrum illum.
45 Iterum simile est regnum caelorum homini negotiatori quaerenti bonas margaritas.
46 Inventa autem una pretiosa margarita, abiit et vendidit omnia, quae habuit, et emit eam.
47 Iterum simile est regnum caelorum sagenae missae in mare et ex omni genere congreganti;
48 quam, cum impleta esset, educentes secus litus et sedentes collegerunt bonos in vasa, malos autem foras miserunt.
49 Sic erit in consummatione saeculi: exibunt angeli et separabunt malos de medio iustorum
50 et mittent eos in caminum ignis; ibi erit fletus et stridor dentium.
51 Intellexistis haec omnia? ". Dicunt ei: " Etiam ".
52 Ait autem illis: " Ideo omnis scriba doctus in regno caelorum similis est homini patri familias, qui profert de thesauro suo nova et vetera ".
53 Et factum est, cum consummasset Iesus parabolas istas, transiit inde.
54 Et veniens in patriam suam, docebat eos in synagoga eorum, ita ut mirarentur et dicerent: " Unde huic sapientia haec et virtutes?
55 Nonne hic est fabri filius? Nonne mater eius dicitur Maria, et fratres eius Iacobus et Ioseph et Simon et Iudas?
56 Et sorores eius nonne omnes apud nos sunt? Unde ergo huic omnia ista? ".
57 Et scandalizabantur in eo. Iesus autem dixit eis: " Non est propheta sine honore nisi in patria et in domo sua ".
58 Et non fecit ibi virtutes multas propter incredulitatem illorum.

- Develop next generation of leaders in the organization = 5.41 out of 7
- Improve employee/associate retention = 5.42 out of 7
- Other = 6.11 out of 7

The answers in the "Other" category ranged from global consistency to employee engagement to identifying talent gaps. It is not surprising that customers felt that they were the most successful in automating EPM processes — it is the easiest benefit to achieve, as well as the most common we find in our inquiries. The other benefits are harder to achieve. In addition, EPM applications are delivered as "empty shells." That is, the benefits you derive are based on how you use them and what inputs go in. If you do not have the right goals and objectives or the right competencies defined, for example, then you will not achieve desired business outcomes (garbage in equals garbage out). It is as important to have the right content driving the system as it is to have good process design.

We found that 59% of customers surveyed used at least performance and succession management from the same vendor, up from 46% from the 2009 Magic Quadrant customer reference survey. In addition, we found that 37% used performance and compensation management from the same vendor, up from 31% in our previous survey

Book Name : Sustainability: A Biological Perspective
Cambridge University Press | August 16, 2010 | ISBN-10: 0521543002 | 274 pages | PDF | 2.76 MB
Encouraging students to engage in the challenges and complexity of sustainability, this text considers not only the theories underlying sustainability, but more importantly how theories are translated into practice and the difficulties of achieving this in the world in which we live. This pragmatic focus gives students a greater understanding of the practice of sustainability and highlights the challenges involved. Models and theories are illustrated throughout with real world examples to help students move away from the abstract and connect with genuine issues. The text begins by focusing on sustainable production and consumption

Google Labs Frequently Asked Questions

1. What is Google Labs?
2. What should I expect from experiments in Labs?
3. Why is Google using googlelabs.com?
4. Who builds these things, anyway?
5. What will happen to these experiments over time?
6. Why in the world did Google decide to do this?
7. What happened to that cool thing I was playing around with last week?
8. I know how to make one of the experiments really useful. Whom do I contact?
9. Why isn't my favorite experiment available in my language?

1. **What is Google Labs?**

   Google Labs is a playground where our more adventurous users can play around with prototypes of some of our wild and crazy ideas and offer feedback directly to the engineers who developed them. Please note that Labs is the first phase in a lengthy product development process and none of this stuff is guaranteed to make it onto Google.com. While some of our crazy ideas might grow into the next Gmail or iGoogle, others might turn out to be, well, just plain crazy.

2. **What should I expect from experiments in Labs?**

   At Google, we believe in launching early and often and Labs takes that philosophy to the max. The projects in Labs are intended to showcase some of our cool and wacky ideas but are *not* intended to be full-blown Google products. Labs experiments may be unavailable or be even removed without notice and you may not be able to access any of your data. We recommend that you not use sensitive information in a Labs experiment.

   Google Labs is our playground. We try to keep is safe and orderly, but still keep it informal and, above all, fun.

3. **Why is Google using googlelabs.com?**

   We chose to isolate Labs on a separate site at googlelabs.com to make sure none of the bubbling test tubes we created actually overflowed onto the rest of Google. If we do spill something, we'd rather just have to clean up the lab.

4. **Who builds these things, anyway?**

   Google engineers and researchers do. Because many of these projects are supported only in their spare time, we ask for your indulgence if a demo refuses to run, or even walk quickly. In fact, every once in a while some of these demos may crash. If they do, we'll pick them up, dust them off, and try to send them back out into the playground as quickly as possible.

5. **What will happen to these experiments over time?**

   That depends in part on you. Your comments and feedback can elevate a project to consideration for integration into Google.com — or cause it to disappear and never be spoken of again.

6. **Why in the world did Google decide to do this?**

   Google engineers and researchers are always looking for a way to show off their pet projects, and Google Labs seemed like a great way for them to get feedback without forcing every new feature on all of our users. So, please follow the "Details and Feedback" link under each experiment and post a comment to let them know what you think of how they're been spending their time — and be frank. It doesn't help anyone if a bad idea is encouraged to spread like a noxious weed.

7. **What happened to that cool thing I was playing around with last week?**

   The prototypes on Google Labs are meant to be low-maintenance experiments. If one disappears it may be because no one was interested enough to use it, or because it wasn't stable enough for users to try it out, or because it was so wildly successful that heavy usage brought the server to its knees. Don't worry — while that particular application may not reappear, there will be something just as interesting to replace it shortly.

8. **I know how to make one of the experiments really useful. Whom do I contact?**

   If you have something to say about a Google Labs product, we can't encourage you strongly enough to comment on the experiment and let us know at google-labs-support@google.com. Your feedback on these prototypes is an essential part of the development process and is greatly appreciated.

9. **Why isn't my favorite experiment available in my language?**

   Experiments in Labs are often developed by one or two engineers working independently, using few resources, to bring their ideas to life quickly. We translate the name and description of each experiment into many languages, but translating the experiments themselves is a more involved process. During the experimental phase, we want engineers to concentrate on their ideas. However, some experiments may be specially tailored for specific languages, and some engineers may choose to translate their experiments early.

13.7.2011
FROM: Brad Callen
TO: Vid
Wednesday, July 13, 2011 4:01 PM
Hey Vid, today I wanted to give you my #1 product recommendation for 2011.
There have been A LOT of products released this year, as always, but there is one product (not mine) that I have first hand experience with and know actually makes money, and a lot of it.
It works so well that I created my own product (only for my private use) to help me make a bit more from the system. I always like building new things, and this gave me the perfect opportunity.
Anyway, the program I'm giving my "best of 2011" recommendation for is Greg Jacob's new Monster Mage product.
And, like I said, the only reason I can give it such a high recommendation is because I use it, and it works REALLY well.
I believe so much in this product that anyone that gets a copy through my recommendation, I'll give you a free copy of the private product I developed only for myself, to compliment the use of Monster Mage. I could easily sell this for $200+ a copy (but I'm not going to. I'm only giving it away through this email and never again)
So, here are the steps you need to take to get my private software:
1. Go here and get Monster Mage:
http://www.bryxensoftware.com/monster.htm
* Note, there are only 500 copies ever being sold and I know for a fact that at least 90% are gone already.

13.7.2011
FROM: Brad Callen
TO: Vid
Wednesday, July 13, 2011 4:01 PM
Hey Vid, today I wanted to give you my #1 product recommendation for 2011.
There have been A LOT of products released this year, as always, but there is one product (not mine) that I have first hand experience with and know actually makes money, and a lot of it.
It works so well that I created my own product (only for my private use) to help me make a bit more from the system. I always like building new things, and this gave me the perfect opportunity.
Anyway, the program I'm giving my "best of 2011" recommendation for is Greg Jacob's new Monster Mage product.
And, like I said, the only reason I can give it such a high recommendation is because I use it, and it works REALLY well.
I believe so much in this product that anyone that gets a copy through my recommendation, I'll give you a free copy of the private product I developed only for myself, to compliment the use of Monster Mage. I could easily sell this for $200+ a copy (but I'm not going to. I'm only giving it away through this email and never again)
So, here are the steps you need to take to get my private software:
1. Go here and get Monster Mage:
http://www.bryxensoftware.com/monster.htm
* Note, there are only 500 copies ever being sold and I know for a fact that at least 90% are gone already.
2. Submit a support ticket to Charlie in our support desk and give him your name and receipt number. He'll then set you with a free copy of my personal software:
http://www.bryxensoftware.com/support/
3. That's it!
Like I said above, there are only 500 copies of Monster Mage beings sold, and I know that at least 90% are gone

(AP) WASHINGTON — The Senate is moving to cast away a budget cutting plan passed by the Republican controlled House, clearing the way for increasingly urgent government talks over raising the nation's debt ceiling.
President Barack Obama and House Speaker John Boehner are searching once more for an ambitious $4 trillion grand bargain. Officials said wide differences remain.
The government is less than two weeks from an Aug. 2 deadline that could precipitate a first-ever default.

Book Name : Nonunion of the Long Bones

Springer; 1 edition | March 8, 2006 | ISBN-10: 884700408X | 352 pages | PDF | 5.68 MB

In 2%-7% of bone fractures, union of the bones is delayed or fails. This can have a severe psychological impact on the patients, and represents a multitude of challenges for orthopedic surgeons. This book discusses currently available tools for diagnosing long bone nonunions, illustrates means of prevention, and specifies the indications for management using compression-distraction techniques. Based on hundreds of cases treated personally by the authors.

one offered by scientists Thursday is truly out of this world.

A team of American researchers have produced a range of scenarios in which aliens could attack the earth, and curiously, one revolves around climate change.

They speculate that extraterrestrial environmentalists could be so appalled by our planet-polluting ways that they view us as a threat to the intergalactic ecosystem and decide to destroy us.

The thought-provoking scenario is one of many envisaged in a joint study by Penn State and the NASA Planetary Science Division, entitled "Would Contact with Extraterrestrials Benefit or Harm Humanity? A Scenario Analysis."

It divides projected close encounters into "neutral," those that cause mankind "unintentional harm" and, more worryingly, those in which aliens do us "intentional harm."

Extraterrestrial intelligence (ETI) "could attack and kill us, enslave us, or potentially even eat us. ETI could attack us out of selfishness or out of a more altruistic desire to protect the galaxy from us. We might be a threat to the galaxy just as we are a threat to our home planet," it warns.

One such scenario is the stuff of many a Hollywood blockbuster, a "standard fight-to-win conflict: a war of the worlds." But another might resonate more with fans of Al Gore's documentary film "An Inconvenient truth."

It speculates that aliens, worried we might inflict the damage done to our own planet on others, might "seek to preemptively destroy our civilization in order to protect other civilizations from us."

"Humanity may just now be entering the period in which its rapid civilizational expansion could be detected by an ETI because our expansion is changing the composition of Earth's atmosphere (e.g. via greenhouse gas
emissions), which therefore changes the spectral signature of Earth," the study says.

"While it is difficult to estimate the likelihood of this scenario, it should at a minimum give us pause as we evaluate our expansive tendencies."

But before we brace ourselves for alien annihilation, the report suggests things could turn in humanity's favor.

Last Chance for the Live Event
By Joy Curtis

At 2:00 EDT on Thursday, July 21 Folio: is hosting a webinar entitled "Case Studies in Custom Publishing."

Why should you attend? Because if you're in the content publishing business, you need to find ways to get your material ahead of the rest. Custom publishing helps you offer new services to your audience to generate buzz, offer an immersive user experience, and to help you leap past your competition. It gives you the ability to marry your company's marketing and distribution goals with new services created to wow and inform your target audience. With "Case Studies in Custom Publishing" you'll have the opportunity to learn from other businesses who have successfully used custom projects and to ask the speakers any questions you may have. Of course, you can ask the Nxtbook Creative Services Team for their technical and creative expertise before, during, and after the event.

Success Team Workshops: A Must for Clients
By Joy Curtis

As a service to our clients, the Nxtbook Success Team hosts monthly webinars geared toward helping clients tackle tasks associated with publishing. Today's "Success Team Workshop," as Success Manager Todd Reinhart calls it, focused on building circulation and featured Success Managers Todd Reinhart and Adam Grim, Project Manager Angela Bauman, and Director of Email Campaigns Mallory Weiss.

Though I probably should have been live-blogging the material, here are a few snippets of the conversation clients in attendance heard:

"40-50% of visits to your digital edition is going to come from your email campaign." - Angela

"[Email] reaches your busy readers who don't have time to search for you." - Mallory

"Some say social media is the panacea that is going to save our industry," while others say there's no way to measure ROI. - Adam

"[Website promotion] enhances your digital publication's opinion in the eyes of search engines." - Angela

When considering email, consider all elements: subject line, branding, consistency, text v. image, free marketing

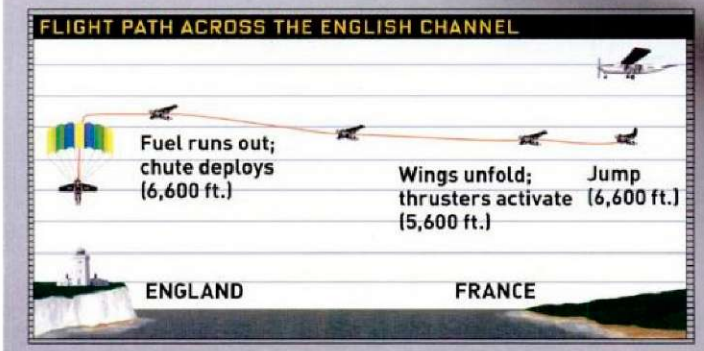
A NEW KIND OF JETPACK

Pilot Yves Rossy has one dream, and that's to fly like a bird, or at least like a Boeing 737. The key to making it happen is this 121-pound jet-powered wing that he and his friends built from scratch. It holds 3.5 gallons of gas—enough to rocket Rossy through the air for 22 miles after he jumps from a plane at 6,600 feet. Should one of the wing's four engines fail and send him into a tailspin (a fate that has befallen Rossy dozens of times), a cutaway harness ensures him a fast getaway when he ejects the wing. A future version of the flying machine, now under construction, will probably feature a more aerodynamic delta shape, along with more-powerful engines, to facilitate Superman-style takeoffs from the ground. Birds? Who needs birds?



"I DON'T KNOW WHERE IT COMES FROM, BUT I CANNOT STOP."

"You always want more—that's human," he tells me, his voice cracking. "I would like to reach the full technical potential."

That will entail a lighter, more powerful wing that gives him the ability to swoop off the ground Superman-style and climb vertically. To hear Rossy, building it sounds entirely doable, a simple matter of going step by step. But he may

COMMIT! Forum 2011
September 26th - 27th

CR Magazine and NYSE Euronext organized the Forum to be *the* definitive event on Corporate Responsibility and Sustainability. It's called the COMMIT!Forum because it calls people to commit to changing the world. How? By inspiring, educating, and engaging them in ways that prepare them to make the commitments necessary to change themselves and their organizations.

Future 500 is partnering with *CR* Magazine to secure 100 commitments from companies in the 100 days leading up to the COMMIT!Forum. As part of this campaign, non-governmental organizations are calling for commitments in three areas: Reporting & Disclosure, the Environment, and Shareholder & Competitive Advantage. These will drive the COMMIT!Forum program, where companies can

denar in položaje in uradnikovalsko pozerske predrznosti,
vse krajšega diha in bodo pihljali le še upravno uradovalno ali urednikovalno s sapicami... Intelyway pa jih je presegel že na samem začetku!

Kakorkoli že, danes je četrtek... začel sem urejati dnevnike... - Odpiši, prosim! Ob 16:00 sem v KOŽ/I, učilna steklena, namreč kabina ali boks za umno jahalne konje in osle. Morda pride naokoli še Ivan Č., pesnik?

Hello Google Friends. We hope you enjoy this month's update on our newest products and services.
POWER TIP
Voice Search on Desktop
You can now speak your web searches instead of typing them by clickin on the microphone icon on the right side of the search box. This can be particularly useful for hard-to-spell searches like [spaghetti with bolognese sauce] or complex searches like [translate to spanish where can I buy a hamburger]. Voice Search is currently available for Chrome users in U.S. English only.

NEW PRODUCTS & UPDATES
Search by Image
You now have the option of searching with a photo instead of words at images.google.com. Click the camera icon in the search box and upload a photo from your computer or paste the URL of an image from the web. You can also drag and drop pictures from websites or your computer into the search box. You'll get relevant results about your image as well as similar images or the same image in different sizes or resolutions.

should consider PeopleSoft Enterprise 9.1. In addition, customers that want improved compensation management and succession management functionality should also consider 9.1, but may want to implement it toward the end of the upgrade/implementation project. In addition, global organizations that want to purchase a core HRMS with integrated EPM functionality should consider PeopleSoft Enterprise 9.1.

Strengths

- Performance management has very good functionality. Customers cited integration with other applications as a particular strength.

delivered with PeopleTool releases in the interim that include new functionality.

Peopleclick Authoria

Authoria, founded in 1997 and headquartered in Waltham, Massachusetts, has been owned by the private equity firm Bedford Funding since late 2008. Since the last Magic Quadrant, Bedford Funding has also acquired Peopleclick, and merged it with Authoria to form Peopleclick Authoria. Charles Jones, CEO of Bedford Funding, has assumed the responsibilities as CEO of Peopleclick Authoria, succeeding Joe Licata and Jim McDevitt; Jones has served continuously in his role as Chairman since September 2008. In addition to solutions for EPM, Peopleclick Authoria offers two

e-recruitment solutions dependent on customer needs (the original Authoria e-recruitment solution, as well as the Peopleclick solution) and knowledge base/communication, vendor management, and workforce compliance and diversity solutions.

Version 10 of Peopleclick Authoria's EPM solution is built on a Java EE platform. Peopleclick Authoria delivers its solutions to new clients only via a SaaS model. Peopleclick Authoria's EPM solutions are best-suited for large U.S.-based organizations that want strong functionality across EPM, as well as a broader talent management suite that includes e-recruitment. Peopleclick Authoria is also an emerging EPM solution in Europe and the Asia/Pacific region as it builds out its infrastructure and grows through its Mercer

Plateau

Plateau, founded in 1996, is a privately held vendor based in Arlington, Virginia. It is a leader in the e-learning market, and has expanded into performance management, succession management and compensation management (through the acquisition of Nuvosoft in February 2007). Version 6.3 is built on a Java EE platform and runs on the Oracle database. Plateau offers a perpetual license/on-premises installed solution, as well as a SaaS solution. Close to 50% of its EPM customers have chosen the SaaS solution (up from 35% in the last Magic Quadrant). Plateau's EPM solutions are appropriate for global customers of all sizes that want strong functionality across the full spectrum of EPM capabilities, in addition to best-in-class learning solutions.

99% of Android phones leak secret account credentials
'Impersonation attacks' target Google services
By Dan Goodin in San Francisco · Get more from this author

The vast majority of devices running Google's Android operating system are vulnerable to attacks that allow adversaries to steal the digital credentials used to access calendars, contacts, and other sensitive data stored on the search giant's servers, university researchers have warned.
The weakness stems from the improper implementation of an authentication protocol known as ClientLogin in Android versions 2.3.3 and earlier, the researchers from Germany's University of Ulm said. After a user submits valid credentials for Google Calendar, Contacts and possibly other accounts, the programming interface retrieves an authentication token that is sent in cleartext. Because the authToken can be used for up to 14 days in any subsequent requests on the service, attackers can exploit them to gain unauthorized access to accounts.
"We wanted to know if it is really possible to launch an impersonation attack against Google services and started our own analysis," the researchers in the university's Institute of Media Informatics wrote on Friday. "The short answer is: Yes, it is possible, and it is quite easy to do so."
The findings build off previous findings of Rice University professor Dan Wallach, who in February uncovered similar Android privacy shortcomings affecting Twitter,

ing the heart. Soon they will start testing this idea on humans with a machine that would let emergency-medical technicians run a "frozen slushee" IV into patients. In Becker and Abella's ideal world, at least 15 percent of the 166,000 people who have a cardiac arrest outside the hospital every year will be frozen and paralyzed before they even reach the ER.

WHY COLD WORKS

Becker, the director of the Penn Center for Resuscitation Science, seems like a friendlier version of TV's Gregory House—a detective in a white coat and scrubs. As a medical resident in Chicago in the early 1980s, he found himself attracted to the ER (to the "really, really sick patients," he says) because he found the task of deducing what was wrong with them more interesting than the treatment.

After spending his early career at Michael Reese Hospital in Chicago, Becker started questioning the published statistics about cardiac arrest. (A heart attack is what happens when blood flow to the heart is restricted; cardiac arrest means the heart has suddenly just stopped. The latter is much rarer.) He had read that 18 percent of patients survive, but, he says, "I knew after working in the emergency department for a while that [that figure] wasn't anything close to reality." So in 1989 he analyzed data from hospital and paramedic reports for more than 3,000 local cases. He found that the rates were off by a factor of 10—only 1.8 percent of cardiac-arrest victims in Chicago lived. (The earlier studies were performed in small cities, where patients were typically reached more quickly and were more likely to receive CPR from a bystander.) Three years later, a study in New York City came up with a similar number: 1.4 percent.

But why were people dying even after their hearts had restarted? The question nagged at Becker as he began his assistant professorship at the University of Chicago Hospital in the early 1990s. Scientists believed that when the heart stopped pumping oxygen-rich blood, cells started to die. If that were true, then cells should fare better when the heart starts pumping again. "What we saw was almost the opposite," he says. Becker watched heart cells under a microscope as he deprived them of oxygen for an hour. Then he gave them oxygen, or "reperfused" them, for another three hours. Only 4 percent of the cells showed damage initially, but 73 percent showed signs of injury immediately *after* the oxygen came back. He realized that there was something destructive about the sudden recirculation of oxygen.

Two more years of experiments revealed one of the key mechanisms. Tiny organelles called mitochondria use oxygen to produce energy, and they do so very carefully—add or subtract an electron from an oxygen atom at the wrong time, and it becomes a free radical, an ion powerful enough to damage cell structures and mutate DNA. Cells have systems in place to prevent these dangerous chain reactions, and to maintain other delicate ion balances, but without oxygen those systems break down. When oxygen flow returns, the mitochondria start producing hordes of free radicals; other cellular ion levels also go awry. The injured cells start dying, and in response, the immune system releases chemicals that worsen the effect. The problem is most pronounced in the heart and the brain, which use more oxygen than other organs.

"THERAPEUTIC HYPOTHERMIA SEEMS LIKE A GOOD IDEA," SAYS BARCO'S CARDIOLOGIST. "BUT THERE ARE JUST SO MANY VARIABLES."

Around the same time, Becker made another surprising observation. As all scientists do, he kept his cells in incubators at 98.6°. But when he left them out for a few hours and they cooled a bit, "we found that there were differences in rates of cell death," he says, because the mitochondria and the immune system aren't as active at low temperatures.

Although doctors had theorized as far back as the 1950s that cooling patients after cardiac arrest could help them survive, Becker's reperfusion research was one of the first good explanations of why it worked at the cellular level. "But we had to ask ourselves this very difficult question," he says. "Did what we were seeing in cells translate to people?" So after publishing his findings, he began experimenting on mice and, by 1999, pigs. All the results were consistent with what he'd seen in cells, and with what other researchers were finding. In 2002, doctors in Europe and Australia published the first human studies, showing that the treatment saved one out of every five patients who would have otherwise died. By 2003, Becker was using the treatment on his own patients in Chicago. In 2005 he and Abella even helped convince the American Heart Association to endorse hypothermia in its recommended guidelines. Today, ambulances in New York, Miami, Boston and Seattle will take cardiac-arrest victims only to hospitals that have cooling protocols. Freezing your patients has gained official acceptance.

THE TROUBLE WITH HYPOTHERMIA

But if the AHA endorsement represented a mainstreaming of the treatment, it didn't result in widespread use, especially outside those urban areas. According to a 2006 survey by Abella, just 26 percent of U.S. emergency-room and cardiology doctors had ever cooled a patient after cardiac arrest. The guidelines advise doctors to use cooling, but they don't go into detail about how best to do it. In addition,

Hey Vid!
Check this out:
We all know that hypnosis is one of the fastest, easiest, and most effective ways to get that positive (and often critical) change you need. Whether you're trying to loose weight, reduce stress, find happiness, or overcome any stubborn mental block, hypnosis is THE way to transform your life on the spot.
Now imagine all that ... but happening faster, easier, and even more effective.
Welcome to the scientifically proven power of subliminal hypnosis. And all you have to do is choose what you want to change, pop in the audio, and go about your day... the subliminal technology will do everything else. Suddenly you'll stop and realize that something is different... you're different. Wouldn't that be nice?
So here's the best part:
World-renowned hypnotherapist to the stars, Steve G. Jones has created 223 subliminal hypnosis audio programs (yes, 223!) all focused on letting YOU overcome what's held you back for months, years, even your entire life.
Normally they sell for $19.95 EACH... but as a gift to you, my subscriber, I'm getting YOU access to all Steve's proven subliminal hypnosis audios for only $1 each! That's 95% off!
So stop for a second, think about what your free, ideal self would look like, and go to the link below to get started:

Magic Quadrant for Employee Performance Management Software

Gartner RAS Core Research Note G00208633, James Holincheck, Thomas Otter, Jeff Freyermuth, 28 March 2011, V1RA2 08102011

The market for employee performance management software continues to grow, despite economic challenges. New releases from ERP and HR management system vendors increase the competition with emerging talent management suite providers. Leaders continue to prosper, but market consolidation continues.

WHAT YOU NEED TO KNOW

Employee performance management (EPM) software includes performance, succession and compensation management capabilities. It is a segment of a broader, emerging talent management suite (which includes workforce planning, talent acquisition/e-recruitment and learning solutions, in addition to EPM) market. Integrated EPM deployments continue to grow, and customers are increasingly implementing EPM solutions enterprisewide. Through our analysis, we have identified several market leaders — Halogen Software, StepStone Solutions, SuccessFactors, Taleo, Plateau and Cornerstone OnDemand. However, the market remains dynamic, and many promising vendors have good solutions.

MAGIC QUADRANT

Market Overview

The EPM software market is a subset of the emerging talent management application suite market, which is a subset of the broader human capital management (HCM) software market.

Gartner estimates that the market for EPM software was approximately $970 million in 2009, down slightly from $979 million in 2008 (see Note 1). Even in the down economy, some vendors grew their EPM software revenue more than 25%. SuccessFactors continues to be the clear market share leader.

During client inquiries, we found that customers typically want to buy new EPM solutions to automate their EPM processes, improve the linkage between pay and performance, help support the development of the next generation of leaders in the organization, and/or improve employee/associate retention (and engagement). As part of the research for this Magic Quadrant, we surveyed 109 customers (primarily from North America and Europe) that use EPM solutions from the vendors evaluated. We asked the customers how successful their EPM implementations had been at meeting those objectives on a scale of 1 to 7, with 1 being "Not at All Successful" and 7 being "Completely Successful." The following shows the mean of the respondent pool that had that objective:

- Automate EPM processes = 5.99 out of 7
- Improve linkage between pay and performance = 5.59 out of 7

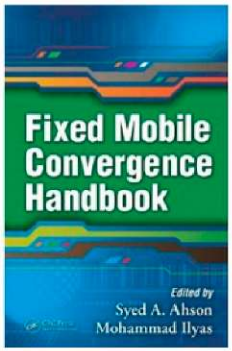
Book Name : Fixed Mobile Convergence Handbook
Publisher: CRC Press | 2010 | ISBN: 1420091700 | Pages: 492 | PDF | 11,05 MB



Requirements for next generation networks (NGNs) are fueling an architectural evolution. Service providers are obliged to give users access to content anytime, anyhow, anywhere, on any device. This requires a converged infrastructure in which users across multiple domains can be served through a single unified domain and all network services and business units can be consolidated on a single IP infrastructure.

Facebook hires Geohot
Hang on, we've heard that name before
By Dave Neal
Tue Jun 28 2011, 09:05
PRIVACY SHREDDING Facebook has hired the celebrated hacker Geohot, or George Hotz, according to reports.
Hotz is the computer expert who came up with a way of cracking Sony Playstations. He was also indirectly the cause of hacker attacks on Sony that bought its online gaming network to its knees, due to Sony's heavy handed legal bullying. Now, according to reports, he has a much more sedate occupation - working at Facebook.
Early reports have been confirmed by the Wall Street Journal, which got word from Facebook that indeed the young hacker is working there. However, Facebook stopped short of saying what he is up to.
Hotz though is a talented computer expert so it was more or less inevitable that one or another of the big technology firms would have wanted to hire him.
Hotz recently settled with Sony after it had sued him for alleged Playstation 3 (PS3) copyright violations. Although he became a motive for the following attacks on the company, he went on record to say that he wasn't responsible for hacking its Playstation Network and Qriocity services.
What he will do at Facebook remains a mystery. µ

Google Acquires 1,000 IBM Patents

Search giant is tight-lipped about the purpose of the transaction, but the filings cover everything from chips to databases.

By **Paul McDougall** InformationWeek
July 29, 2011 12:40 PM

Google has purchased more than 1,000 patents from IBM in an effort to build up its intellectual property portfolio, possibly with an eye to fending off the increasing number of IP lawsuits the search giant faces from competitors such as Microsoft.

The 1,030 patents cover a wide range of technologies, including "the fabrication and architecture of memory and microprocessing chips," according to the blog SEO By The Sea, which first spotted the filings.

They also pertain to several other key aspects of computing infrastructure, including servers and routers. Google does not make such hardware, but has built a number of massive data centers that use such technology internally to store and serve up terabytes of data through its search engine and other cloud products.

Some of the patents also apply to relational databases, object oriented programming, and certain business processes.

Theories [edit]

This section requires expansion.

Many different theories of "peace" exist in the world of peace studies, which involves the study of conflict transformation, disarmament, and cessation of violence.[3] The definition of "peace" can vary with religion, culture, or subject of study.

Peace is a state of balance and understanding in yourself and between others, where respect is gained by the acceptance of differences, tolerance persists, conflicts are resolved through dialog, people's rights are respected and their voices are heard, and everyone is at their highest point of serenity without social tension.

Game theory [edit]

Main article: Peace war game

The Peace War Game is a game theory approach to peace and conflict studies. An iterated game originally played in academic groups and by computer simulation for years to study possible strategies of cooperation and aggression.[4] As peace makers became richer over time, it became clear that making war had greater costs than initially anticipated. The only strategy that acquired wealth more rapidly was a "Genghis Khan", a constant aggressor making war continually to gain resources. This led to the development of the "provokable nice guy" strategy, a peace-maker until attacked, improved upon merely to win by occasional forgiveness even when attacked. Multiple players continue to gain wealth cooperating with each other while bleeding the constant aggressor. Such actions led in essence to the development of the Hanseatic League for trade and mutual defense following centuries of Viking depredation.[5]

Democratic peace theory [edit]

Main article: Democratic peace theory

The democratic peace theory holds that democracies will never go to war with one another.

Active Peace Theory [edit]

Borrowing from the teachings of Johan Galtung, Norwegian co-founder of the field of Peace Research, on 'Positive Peace',[6] and on the writings of Maine Quaker Gray Cox, a consortium of researchers and disputants in the experimental John Woolman College initiative have arrived at a theory of Active Peace. This theory posits that Peace is part of a triad, which also includes justice and wholeness (or well-being), consonant with scriptural scholarly interpretations of the meaning of the early Hebrew word S-L-M or 'Shalom', called by some the Bible's word for salvation, justice, and peace. Furthermore, the consortium have integrated Galtung's teaching of the meanings of the terms peacemaking, peacekeeping, and peace building, to also fit into a triadic formulation. Vermont Quaker John V. Wilmerding, Jr., founder of John Woolman College, posits five stages of growth applicable to individuals, communities, and societies, whereby one transcends first the 'surface' awareness that most people have of these kinds of issues, emerging successively into acquiescence, pacifism, passive resistance, active resistance, and finally into Active Peace, dedicating themselves to peacemaking, peacekeeping, and/or peace building.[7]

Many Peaces [edit]

Following Wolfgang Dietrich,Wolfgang Sützl[8] and the Innsbruck School of Peace Studies, some peace thinkers have abandoned any single and all-encompassing definition of peace. Rather, they promote the idea of Many Peaces. They argue that since no singular, correct definition of peace can exist, peace should be perceived as a plurality. This post-modern understanding of peace(s) was based on the philosophy of Jean Francois Lyotard. It served as a fundament for the more recent concept of trans-rational peace(s) and elicitive conflict transformation.

Google is the latest online site to make news reading competitive by offering badges for reading a certain number of stories through the company's news site. (Jeff J Mitchell, Getty Images / July 18, 2011)

July 18, 2011

Reading news articles just became "gamified." With new features on **Google** News, reading news articles has turned into a game where readers are rewarded with news badges based on their reading habits.

"On Google News, the average reader of political news has read 20 articles about politics in the last six months. Where do you stand?" Natasha Mohanty, an engineer at Google News, wrote on The Official Google Blog.

Here's how you can find out. By signing into Google and clicking on news articles on news.google.com, Google will keep track of what you read.

Topics
Google Inc.
Periodicals
CNN (tv network)

You earn badges by reading articles on specific topics. The more you read, the more stars appear on a badge. The stars start at the bronze level and move up to silver, platinum and ultimate. There are more than 500 badges available to suit a wide range of topics.

Google's badges are private by default, meaning only you can see which awards you've won. But as soon as you are ready to show off how many articles you have

BIO

Maintaining a killer figure while working as a pastry chef is not a problem for Hillary, whose dress size is zero. "I believe everything in moderation is the key to staying fit," says the South Carolina beauty. She balances the occasional indulgence in her favorite desserts and snacks with cardio workouts followed by crunches, squats and lunges. "I also love

How Fireworks Work
The Grucci family of New York has been creating fireworks displays since 1850 for everything from presidential inaugurations to Olympics to, of course, the Fourth of July. Here's how they do it.

Laboratory Safety for Chemistry Students

Book NAME : Laboratory Safety for Chemistry Students
Robert H. Hill , Wiley | 2010 | ISBN: 0470344288 | English | 546 pages | PDF | 3 MB
Click to LOOK INSIDE!
"...this substantial and engaging text offers a wealth of practical (in every sense of the word) advice...Every undergraduate laboratory, and, ideally, every undergraduate chemist, should have a copy of what is by some distance the best book I have seen on safety in the undergraduate laboratory." Chemistry World, March 2011
Laboratory Safety for Chemistry Students is uniquely designed to accompany students throughout their four-year undergraduate education and beyond, progressively teaching them the skills and knowledge they need to learn their science and stay safe while working in any lab. This new principles-based approach treats lab safety as a distinct, essential discipline of chemistry, enabling you to instill and sustain a culture of safety among students. As students progress through the text, they'll learn about laboratory and chemical hazards, about routes of exposure, about ways to manage these hazards, and about handling common laboratory emergencies. Most importantly, they'll learn that it is very possible to safely use hazardous chemicals in the laboratory by applying safety principles that prevent and minimize exposures.
Continuously Reinforces and Builds Safety Knowledge and Safety Culture
Each of the book's eight chapters is organized into three tiers of sections, with a variety of topics suited to beginning, intermediate, and advanced course levels. This enables your students to gather relevant safety information as they advance in their lab work. In some cases, individual topics are presented more than once, progressively building knowledge with new information that's appropriate at different levels.

One of the underlying, almost philosophical, assumptions behind much of the debate about the Big Society and localism in general is that residents both want and are prepared to engage with councils and other providers of services in a radically different way; that mirrors the formers' own service transformation plans.
But what if residents don't want to 'transform'? What if they are fundamentally unsure about engaging with their local councils in anything other than between that of service provider and 'consumer' with only a little bit of democratic engagement thrown in during the May elections?
We can't follow the advice of the Bertolt Brecht chararcter who said that when the "people vote the wrong way, change the people".
So the challenge for councils is to engage with individuals, communities and other organisations - especially those previously disengaged from councils either at all or for everything excpet the receipt of services - to help them understand how decisions are made and they can interact to influence them.
Obviously councillors have a key role, but so do PR & communications professionals, alongside councillors.
Indeed, I wonder if proper boundary-spanning PR & comms professionals are the very people needed to be embedded in communities to help them learn new campaigning and persuasion skills, the better to engage with transformed councils?
What do people think: the Peoples' PR Army? Communications Commissars working with councillors and others to ensure communities can better get what they want from councils?

Ingrid, I think Paul's last paragraph is doing exactly that - enabling and engaging a section of community and listening to the outcome. We are starting to think about "localism enablers" embedded in the community, much like the outreach models used by youth services. Hence I was very interested in

Anonymous hackers claim to have launched another attack. This time they've targeted the North Atlantic Treaty Organization (NATO).
"Hi NATO. Yes we haz more of your delicious data. You wonder where from? No hints, your turn. You call it war; we laugh at your battleships," wrote the hackers from their Twitter account, @AnonymousIRC.
The hackers say they have stolen an entire gigabyte of information from NATO.
The FBI arrested some 21 alleged hackers were arrested this week, according to the LA Times. "Arresting people won't stop us, FBI. We will only cease fire when you all wear shoes on your heads. That's the only way this is ending," wrote @LulzSec.

See More About: sex in marriage troubled marriages low sex drive sexuality low libido consequences
Back in 2003, an article in the U.K. by Mariella Frostrup, "Sexual Healing" caused a lot of comments on our Marriage Forum about living without sex.
The author's conclusion was, "Just saying no is not acceptable unless you are prepared to discuss it. You can't turn the other way for 10 years and expect someone to come home to you every night."
We started a poll and asked the question "Do you have a low sex marriage?" So far, out of around 15,000 votes, 88% are saying yes.
The comments on this blog post and reader submissions about the issue of no sex or low sex marriages reflect a great deal of heartache with no easy solutions.

It's easy to know what the superstar looks like after the person's star already is shining. But it's much harder to identify that diamond in the rough. *BusinessWeek* reports that 90% of managers believe they are in the top 10% in performance.

This is hilarious. Until you are working with one of those people. And then you start to ask yourself: *Am I like this? Am I delusional? How strong a performer am I really?*

It's hard to look at yourself objectively, but a while back, I noticed that I was good at recognizing talent. The last company that I founded, Brazen Careerist, focuses on identifying high performers for companies, and helping people early in their career reach their potential. So I have a lot of experience in this area, and I've noticed that there are a few telltale signs of "star" potential.

How to get the freedom you want in your career

To attain a career that feels like a good fit and offers you the freedom to do the things you want, you should take steps such as defining your ideal work and then determining how to get the boss to support you in that effort, writes Caroline Ceniza-Levine. "Career freedom requires a proactive strategy, introspection, good business sense, negotiating skill, and a strong personal foundation." Forbes/Career Talk for Women blog (7/6)

The art of choosing a new career path

When you need to reinvent yourself and change careers, begin by thinking about your special talents and then researching job possibilities that would allow you to use them, experts say. This story highlights several people who changed careers, including a real estate agent who became a stand-up comedian and a singer who became a private investigator. 7 Facebook apps for your job search

Heather R. Huhman reviews several job-search applications on Facebook, including BeKnown, BranchOut and Cachinko, weighing the pros and cons of each. For example, she writes that while BranchOut allows you to find job opportunities from multiple online sources, the biggest drawback is spam. "It's like a weed that cannot be killed, taking over your Facebook status updates and sending messages to your friends," she writes. The Business Insider/War Room (7/6)

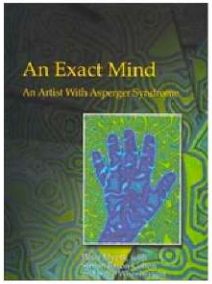
The Exact Mind: An Artist With Asperger Syndrome (repost)

0

Posted by **freebook** at July 12, 2011



Book Name : The Exact Mind: An Artist With Asperger Syndrome (repost)
English | Jessica Kingsley Publishers | ISBN: 1843100320 | 2004 | PDF | 80 pages | 53.76 MB

The widespread belief that people with autism spectrum conditions can neither plan ahead nor perceive illusions is challenged in this book by bringing the reader face-to-face with the extremely intricate and precise artwork of Peter Myers, an adult with Asperger Syndrome (AS). The multifaceted artwork shows the artist's complete control of form and color – talents that are not normally thought to be present in the AS mind. In an accompanying chapter the editors discuss the psychological interest and implication of Peter's work, demonstrating that it provides a valuable insight into the talents and strengths that make up the autistic mind.

He's made his name with a controversial show that catches would-be internet sex perverts in televised stings.

But now Chris Hansen has found himself on the receiving end of his own hidden camera tactics, after the married NBC anchor was secretly filmed on an illicit date with a blonde television reporter 20 years his junior.

Hansen, 51, has allegedly been having an affair with Kristyn Caddell, a 30-year-old Florida journalist, for the last four months.

The Truth About Sitting Down
Whether tending our crops or hunting wild boar, most of our lives as humans were lived on our feet. But with the advent of TV, computers, and the desk job, we're sitting down more than ever before in history: 9.3 hours a day, even more time than we spend sleeping (7.7 hours). Our bodies weren't built for that, and it's starting to take its toll. You might want to stand up for this.
SITTING INCREASES RISK OF DEATH UP TO 40%
Sitting 6+ hours per day makes you up to 40% likelier to die within 15 years than someone who sits less than 3. Even if you exercise.

The Malignant Hero
Every parent's worst nightmare is entrusting his or her child into the care of a person who intends it harm. Few people would ever suspect that someone who enters the healing profession and swears on the nurse's oath would rather see children die than be healthy. It took a lengthy investigation, breaking through walls of professional denial, and the near-destruction of a doctor's career before the truth about this malicious caregiver was discovered.
In 1982, Dr. Kathleen Holland opened a pediatrics clinic in Kerrville, Texas. Needing help, she hired a licensed vocational nurse named Genene Ann Jones, who had recently resigned from the Bexar County Medical Center Hospital. Many parents were happy to have this clinic available, but during a period of two months that first summer, seven different children succumbed to seizures while in Holland's office. She transferred them by ambulance for treatment at Sid Peterson Hospital, never

By Ellen Nakashima, Thursday, July 14, 2:03 AM

The Pentagon is set to unveil Thursday a strategy for protecting its computer systems that goes beyond erecting firewalls and stresses the use of sensors, software and data collected by U.S. intelligence, U.S. officials said.

At the same time, officials have labored to make their "Cyber 3.0" strategy not appear too bellicose in an effort to counter perceptions that the United States is militarizing cyberspace, according to people briefed on the process.

Those perceptions have been driven by the creation of U.S. Cyber Command, a military organization that is allied with the government's largest and most technologically sophisticated spy agency, the National Security Agency. The Pentagon also has declared that cyberspace is a new "domain" of warfare — alongside air, land, sea and space.

But drafts of a speech introducing the policy, set for delivery Thursday by Deputy Defense Secretary William J. Lynn III, suggest that officials want to tamp down criticism that U.S. cybersecurity policy is more offensive than defensive. "Far from militarizing cyberspace, our strategy of securing networks to deny the benefit of an attack will help dissuade military actors from using cyberspace for hostile purposes," reads one section of a draft obtained by the online publication Nextgov.

The strategy's rollout was delayed by more than six months, in part to avoid preempting the White House's release of a

Behind every child's wish, there exists a very special individual, corporation, student organization or foundation that makes it possible. Wishes do not come true without people who care and at every step of a wish there is a person or group of people behind the magic. Some volunteer, some donate, while others allow wish kids to take part in and touch their busy lives. Either way, their contribution allows us to share the power of a wish®.
In fact, every unforgettable wish we grant is funded by private contributions. The average value of a wish is $7,500; however, any gift, large or small, will impact a family and create hope, strength and joy during a time when a family in our community needs it most.
Many local corporations recognize the importance of the communities in which they operate. In turn, they encourage employee involvement with various area programs, including the Make-A-Wish Foundation® of Greater Virginia. Involvement with our chapter offers many opportunities for employees to make a positive and personal impact right in their own backyard.
By sponsoring a wish experience through the Make-A-Wish Foundation® of Greater Virginia you have the opportunity to connect to a local child's wish. Sponsoring a child's wish creates a deep emotional response knowing your contribution is making a positive and immediate impact on the life of a Make-A-Wish® child.
We sincerely appreciate your continued support of our mission, and invite you to get to know some of our current supporters and sponsors!

Even Marked Up, Luxury Goods Fly Off Shelves

By STEPHANIE CLIFFORD
Published: August 3, 2011

Nordstrom has a waiting list for a Chanel sequined tweed coat with a $9,010 price. Neiman Marcus has sold out in almost every size of Christian Louboutin "Bianca" platform pumps, at $775 a pair. Mercedes-Benz said it sold more cars last month in the United States than it had in any July in five years.

Lissette Gutierrez chose a pair of $1,495 Louis Vuitton shoes at Bergdorf Goodman in Manhattan.

Even with the economy in a funk and many Americans pulling back on spending, the rich are again buying designer clothing, luxury cars and about anything that catches their fancy. Luxury goods stores, which fared much worse than other retailers in the recession, are more than recovering — they are zooming. Many high-end businesses are even able to mark up, rather than discount, items to attract customers who equate quality with price.

"If a designer shoe goes up from $800 to $860, who notices?" said Arnold Aronson, managing director of retail

Master control
From Wikipedia, the free encyclopedia
For the Cartoon Network programming block, see Cartoon Network#Master Control.
Master control is the technical hub of a broadcast operation common among most over-the-air television stations and television networks. It is distinct from a production control room (PCR) in television studios where the activities such as switching from camera to camera are coordinated. A transmission control room (TCR) is usually smaller in size and is a scaled down version of centralcasting.
Master control is the final point before a signal is transmitted over-the-air for terrestrial television or cablecast, satellite provider for broadcast, of sent on to a cable television operator. Television master control rooms include banks of video monitors, satellite receivers, videotape machines, video servers, transmission equipment, and, more recently, computer broadcast automation equipment for recording and playback of television programming.
Master control is generally staffed with one or two operators around-the-clock, every day to ensure continuous operation. Master control operators are responsible for monitoring the quality and accuracy of the on-air product, ensuring the transmission meets government regulations, troubleshooting equipment malfunctions, and preparing programming for playout. Regulations include both technical ones (such as those against over-modulation and dead air), as well as content ones (such as indecency and station ID).
Fox Business Network's Master Control
Many television networks and radio networks or station groups have consolidated facilities and now operate multiple stations from one regional master control or centralcasting center. As an example of this centralized broadcast programming system on a large scale is NBC's "hub-spoke project" that enables "hub" cities such as New York City, Los Angeles, California, and Miami, Florida to originate television commercial, breaks and programming for many of its smaller individual stations, thus reducing or eliminating some responsibilities and employees of the local master control at NBC owned & operated (O&O) stations.
Outside of the United States, the Canadian Broadcasting Corporation (CBC) manages four radio networks, two broadcast television networks, and several more cable/satellite radio and television services out of just two master control points (English language services at the Canadian Broadcasting Centre and French language at

mind-reading" (Gallese & Goldman 1998:498). Furthermore, they speculated that "a cognitive continuity exists within the domain of intentional-state attribution from non-human primates to humans, and that MNs represent its neural correlate" (Gallese & Goldman 1998:500). The existence of the MN system is taken as an argument in favor of ST. It is speculated that human subjects modeling mental states of others in order to predict and/or explain the behavior of others use their own mental states to predict or explain mental processes of others (Gallese & Goldman 1998:496), thus following the general line of ST in contrast to the TT concept, according to which subjects performing TOM use a specific commonsense psychological theory, also referred to as "folk psychology".

In fact, these studies provide a strong empirical argument that a simulation component is involved during observation of movements. However, this particular finding is not a proof for the *exclusive* validity of ST. This aspect was also emphasized by the authors themselves, in fact, they do not claim that ST is a "full-scale realization of the simulation heuristic" (Gallese & Goldman 1998:498). So they are

not able to completely reject the conceptual counterpart TT. In the case that ST

more social and is quickly becoming an integrated part of our lives. With ever-evolving devices, social networks, and online video capabilities, we're increasingly moving toward an "always on" existence.
Yet it's almost as if a strange dichotomy exists: on one hand, we're steadily moving in this new direction where Facebook and Twitter are a central part of our lives, but on the other, many of us are still slow to adopt video and video conferencing. While a great number of people are embracing constant connectivity, others seem to be too leery of the close-up.
The spy in your living room
An acquaintance of mine has a bad habit of recording people on his cell phone without their knowledge or consent. While casually hanging out with friends or family, it's common to catch him capturing video of someone in the group and jokingly saying that he's posting it to Facebook. It's really annoying, but it also shows how when we could innocently be in the company of others without worrying that the things we say or do will end up broadcasted online are gone.
We advise teenagers and college students not to post lewd or indecent photos of themselves online, as they might come back to haunt them in future job searches and so on, but what about our own everyday conduct? Are we comfortable having that streamed live to the world 24/7?

- About This Issue: What's Wrong with Expert Predictions

LEAD ESSAY

- Overcoming Our Aversion to Acknowledging Our Ignorance by Dan Gardner and Philip E. Tetlock.

Dan Gardner and Philip E. Tetlock review the not-too-promising record of expert predictions of political and social phenomena. The truth remains that for all our social science, the world manages to surprise us far more often than not. Rather than giving up or simply declaring in favor of populism, however, they suggest several ways to improve expert predictions, including greater attention to styles of thinking as well as a "forecasting tournament" in which different methodologies will compete against one another to gain empirical data about the process. Still, they concede that our ability to predict the future will probably always be sharply limited.

RESPONSE ESSAYS

- Who Cares about Forecast Accuracy? by Robin Hanson

Robin Hanson argues that most people aren't interested in the accuracy of predictions because predictions often aren't about knowing the future. They are about affiliating with an ideology or signaling one's authority. The outcomes of predictions have nothing to do with either, of course, especially in the present. He suggests that one way to make predictions more accurate might be to lift both the social stigma and legal prohibitions against gambling. Unlike mere predictions, wagers carry real consequences for those who make them. Which, Hanson argues,

Čebašek Travnikova: Revnim omejen dostop do nekaterih ključnih pravic
Gantar: Manjka nam redna presoja učinkov posameznih zakonov
19. julij 2011 ob 11:43
Ljubljana - MMC RTV SLO
Predsednik DZ-ja Pavel Gantar je sprejel varuhinjo človekovih pravic Zdenko Čebašek Travnik, ki mu je izročila redno letno poročilo varuha človekovih pravic za leto 2010.
"Želel bi izpostaviti, da je vsako poročilo boljše v smislu, da je bolj profesionalno in bolj podrobno. Marsikaj se spreminja, vendar nekateri problemi ostajajo. Rad bi omenil, da je slovenski zakonodajni postopek sicer dobro urejen, vendar mu manjka ena točka - redna presoja učinkov posameznih zakonov. Dokler to ne bo urejeno, bomo sprejemali zakone, o posledicah katerih si ne bomo znali dobro odgovoriti," je ob prejetju poročila dejal Gantar.
Zdenka Čebašek Travnik: Nadzora pogosto sploh ni
Varuhinja je poudarila pomen dveh sistemskih vprašanj, in sicer vprašanje učinkovitosti naše zakonodaje za uveljavljanje človekovih pravic in vprašanje nadzora, "za katerega v poročilu ugotavljajo, da je pomanjkljiv, neučinkovit, ali pa ga sploh ni, kar predstavljajo tudi na primerih".
Pojasnila je, da je med tistimi, ki se obračajo na njihovo institucijo veliko revnih, ki imajo omejen dostop do nekaterih ključnih pravic, ki naj bi jih zagotavljala

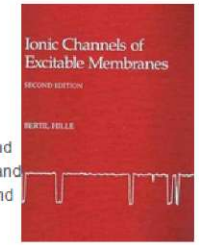
Ionic Channels of Excitable Membranes

0

Posted by **rain** at July 6, 2011



Book Name : Ionic Channels of Excitable Membranes
Publisher: Sinauer Associates Inc | ISBN: 878933239 | edition 1992 | PDF | 617 pages | 43,4 mb

This new, fully revised and expanded edition of "Ionic Channels of Excitable Membranes" includes new chapters on fast chemical synapses, modulation through G protein coupled receptors and second messenger systems, molecules cloning, site directed mutagenesis, and cell biology. It begins with the classical biophysical work of Hodgkin and Huxley and then weaves a description of the known ionic channels together with their biological functions. The book continues by developing the physical and molecular principles needed for explaining permeation, gating, pharmacological modification, and molecular diversity, and ends with a discussion of channel evolution. "Ionic Channels of Excitable Membranes" is written to be accessible and interesting to biological and physical scientists of all kinds.

J. Blaauwendraad, "Plates and FEM: Surprises and Pitfalls" (repost)

0

Posted by **rain** at July 6, 2011

Book Name : Plates and FEM: Surprises and Pitfalls
Publisher: Springer | ISBN: 9048135958 | edition 2010 | PDF | 413 pages | 21.6 mb

This textbook aims to be the bridge between plate theory and FE-software. Structural engineers must translate elastic analysis results into economic structure dimensions and reinforcement, which raises difficulties. Not all engineers are well enough equipped for the increasingly easy-to-use powerful programs. The problem is not lack of FE-knowledge, but rather ignorance of plate behaviour. Therefore, the book starts with classical plate theory for membrane and bending states, and proceeds to FE-practice. The text can be used for university courses, acts as practical preparation for the engineering profession, and as a guide to structural designers.

To all of you who create, receive, upload and download content every day, we salute you! There have been some terrific presentations published recently about content marketing. Sharing content for brand and credibility building is valuable for-profit and non-profit organizations alike. This is demonstrated in Joe Pulizzi's presentation, delivered at a recent workshop on content marketing for non-profits. We've listed more examples of content marketing on our blog. Take a look >>
Content and the new Gov 2.0
Livewell Oxygen Injection
Sometimes a slideshow jumps out for its usefulness to a limited, specific audience. Texas Parks and Wildlife Department has published its guide to maintaining health of black bass retained in livewells. In just 14 slides, the agency delivers technical specifications, equipment specs and resources for ensuring the safety of sick fish. By making the guide available online, they are assured that anyone who needs this critical information has access to it.
Attention researchers: The White House has recently transitioned from publishing on its transparency websites to its SlideShare channel, as a platform for documentation. There are currently 1240 documents now available to the public on the White House channel.
Tap into our API to access SlideShare content
Have you tried using our open API to integrate content within your own context? Ross gives some examples for doing just that in his blog post 'Building Context for Professional Content'. We are always interested in hearing how organizations are using the API. Please let us know if you're trying it out.

Rocky Surprises on the Far Side of the Moon

By SINDYA N. BHANOO
Published: July 25, 2011

The broad, dark plains on the Moon's near side, visible to the naked eye, have long been known to be volcanic deposits made of basaltic lava flows.

Now researchers report that in addition to these deposits, the Moon has unusual dome-shaped volcanic deposits of a different composition on its far side. These rocks are rich with silica, and their origins are still unknown.

The domes are half a mile to three miles across, and some have steeply sloping sides.

Being 'Unplugged' Leaves People Upset, Lonely

Published July 25, 2011 | FoxNews.com

What if you completely unplugged yourself from your smartphone and denied yourself access to the Internet? Do you think you'd feel empowered or depressed?

Well, according to a new survey of 1,000 people, 53 percent said they felt upset when they were denied access to the Internet, and 40 percent said they felt lonely when they were unable to log on to the World Wide Web, the Daily Mail reported.

The survey, done by the consumer research firm Intersperience, asked the participants about their "attitudes" towards the Internet, and went even further, by requesting that they go without technology for 24 hours. That meant no Facebook, Twitter, emails and text messages.

After the 24 hours were up, some volunteers compared the experience to quitting smoking or drinking, and one even described it as "having my hand chopped off."

"Online and digital technology is increasingly pervasive, influencing our friendships, the way we communicate, the fabric of our family life, our work lives, our buying habits and our dealings with organizations," Paul Hudson, chief executive of Intersperience, told the Daily Telegraph.

According to statistics from 2010, The Central Intelligence Agency (CIA), estimated that there were 2.1 billion Internet users worldwide.

Welcome to OCLC Article Exchange
Using the form below, upload files for pick up anywhere in the world. Only people with the URL/password combination will be able to download the file.
Select the file you would like to drop off, click the Drop File button, and you will receive a URL and a password with which the file can be retrieved anywhere in the world (and off-planet where internet access available).
You can either save the URL and password and insert them into the Lender workform in Lending Notes or you can click on the email button and insert the borrowing library's email address. Don't forget to update the ILL request to YES. Once the file has been picked up for the first time, it will remain available on this site for five days. After five days, the file will be removed. A file can be picked up a maximum of three times for each URL/password combination. Files that are never picked up will be removed after 30 days.
Enjoy!

LOS ALAMOS, N.M. -- Firefighters worked through the night and into Tuesday hoping to put out spot fires erupting ahead of a wildfire in the mountains above the northern New Mexico town that is home to a government nuclear laboratory.
"That's the biggest threat we have right now to homes in the community," Deputy Los Alamos County Fire Chief Mike Thompson said late Monday of the fires that left hillsides above the town of Los Alamos glowing.
The ominous orange haze was visible at night from deserted Trinity Drive in Los Alamos, from which 12,500 residents were evacuated. The evacuation was so calm and orderly that there wasn't even a traffic accident, Police Chief Wayne Torpy said.

A crew that had been working at the Arizona wildfires took over efforts at the New Mexico fire Monday, about 18 hours after the blaze started. It has quickly grown to 44,000 acres - or 68 square miles - and ignited a spot fire on lab property.
Another firefighting team was expected to arrive Tuesday because of the potential for the blaze to more than double in size.
The wildfire has destroyed 30 structures south and west of Los

APOSTOLI AD ROMANOS EPISTULA SANCTI PAULI

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

1

1 Paulus servus Christi Iesu, vo catus apostolus, segregatus in evangelium Dei,
2 quod ante promiserat per prophetas suos in Scripturis sanctis
3 de Filio suo, qui factus est ex semine David secundum carnem,
4 qui constitutus est Filius Dei in virtute secundum Spiritum sanctificationis ex resurrectione mortuorum, Iesu Christo Domino nostro,
5 per quem accepimus gratiam et apostolatum ad oboeditionem fidei in omnibus gentibus pro nomine eius,
6 in quibus estis et vos vocati Iesu Christi,
7 omnibus, qui sunt Romae dilectis Dei, vocatis sanctis: gratia vobis et pax a Deo Patre nostro et Domino Iesu Christo.
8 Primum quidem gratias ago Deo meo per Iesum Christum pro omnibus vobis, quia fides vestra annuntiatur in universo mundo;
9 testis enim mihi est Deus, cui servio in spiritu meo in evangelio Filii eius, quomodo sine intermissione memoriam vestri faciam
10 semper in orationibus meis obsecrans, si quo modo tandem aliquando prosperum iter habeam in voluntate Dei veniendi ad vos.
11 Desidero enim videre vos, ut aliquid impertiar gratiae vobis spiritalis ad confirmandos vos,

NOTICE OF CHANGES TO THE PAYPAL USER AGREEMENT
Dear Vid Gajšek,
We're constantly working to make PayPal safer, simpler and more convenient for our customers. This means that from time to time we have to make changes to the terms of our User Agreement. To make sure you are always informed we have posted recent updates on our website.
What do I need to do?
1. Click here Policy Update or type www.paypal.com into a new browser window, go to 'Legal Agreements' at the bottom of the page and then click 'Policy Update'.
2. Please read the Policy Update carefully. It contains important legal information about when and how the changes to our User Agreement will become effective. Click here to read
3. If you agree to the changes, you don't need to do anything as any updates will automatically come into effect. If you do not wish to accept the changes,

First steps tutorial
Our first steps tour and our FAQ will help you a lot after registration. They explain how to customize the interface (for example the language), how to upload files and our basic licensing policy. You don't need technical skills in order to contribute here. Be bold contributing here and assume good faith for the intentions of others. This is a wiki—it is really easy.
Getting help
More information is available at the community portal. You may ask questions at the help desk, village pump or on IRC channel #wikimedia-commons (direct access). You can also contact an administrator (find an active one) on their talk page. If you have a specific copyright question, ask at Commons talk:Licensing.
Goodies, tips and tricks
Put Babel boxes on your user page so others know what languages you can speak and indicate your graphic abilities.
All your uploads are stored in your personal gallery
Please sign your name on Talk pages by typing ~~~~
Use the CommonSense tool to find good categories for your files (then other people can find them too!)
To link to an image page without embedding the image, type: [[:File:Foo.jpg]], which produces: File:Foo.jpg
If you're copying files from another project, be sure to use the CommonsHelper
Made a mistake?
Do you want to have a file renamed or moved? Simply mark it like this: {{rename|the_new_name|reason_for_renaming}} and wait for an administrator or filemover to rename it.
Do you want to have your picture removed, for other reasons? Simply tag it as {{speedy|reason for deletion}}.
For more information read the full deletion guidelines.

BIO

Avid Playboy readers already know what Sara Jean Underwood did last summer: The angel-faced 22-year-old posed for the October 2005 issue's Girls of the Pac 10 cover. What the native of Scappoose, Oregon didn't anticipate was the reaction at her college, Oregon State University. "Maybe it's because I wear a baseball cap and sweatpants to class, but I didn't know other students knew I existed," she says. "Now they come up and hug me and ask me to sign the magazine." After she graduates this year, with a degree in business marketing, Sara and her best friend plan to celebrate by backpacking through Europe. "I'm a spontaneous, outdoorsy type who has traveled a lot, but Oregon is the perfect place to live," she says. "I love its greenness, fresh air and beauty. I like to ride my horse up a trail to this

SuperGoogle: When All Is Known
Hans-Peter Brøndmo | May 3, 2004 | 4 comments
I call it SuperGoogle. It's a search engine that knows everything. In fact, it's less search engine and more oracle. You and I don't have access to it (yet). If we did, we would turn to it to learn everything about everything and everybody. No information, public or private, is concealed from SuperGoogle. It knows what we write in our email and what we say on the phone. It surely knows everything we buy and everywhere we travel. It knows our medical histories; maybe it's even seen our DNA. SuperGoogle knows our faces. It can recognize us on a street camera when we stroll on by.
How would you feel about a SuperGoogle knowing almost everything about you? Because soon, it will. It doesn't take a whole lot of imagination to construct SuperGoogle. Take the Google we know, give it access to a large marketing database such as one of Acxiom's, throw in the white pages; LexisNexis; our medical records; credit card transactions; location information from our mobile phone operators; INS, IRS, and DMV records; and we're getting close.
If we want to get really fancy, add some speech-to-text technology at the local phone companies and pile on face-recognition software. Now, SuperGoogle can hear and see. It's all digital and therefore all searchable. What's more, all the necessary information sources are connected to the Internet today, albeit some of them behind firewalls and with restricted access.
Does SuperGoogle exist? The answer is complicated. The Defense Advanced Research Projects Agency (DARPA)-initiated Total Information Awareness (TIA) project purportedly was going to scan information sources said to include communications, country entry, critical resources, education, financial, government, housing, medical, place-event entry, transportation, travel, and veterinary. The project was "cancelled" due to public outcry over its privacy implications and the threat of congressional review. Yet most or all of its many subcomponents continue to flourish, led by a mixture of private and government entities.
We know information about us is collected and analyzed at every turn, and we know we get many

If the American Library Association were inclined to burn people in effigy, I might well have gone up in smoke these past few days. ALA members, mostly librarians and other book-industry folk, are concluding their annual conference today in New Orleans, and it's a fair bet that some of them are still fuming about an article of mine that appeared in these pages earlier this month.
The essay, titled "Darkness Too Visible," discussed the way in which young-adult literature invites teenagers to wallow in ugliness, barbarity, dysfunction and cruelty. By focusing on the

Google Tags Content Creators: Are Publishers Now It?

Google (GOOG) announced that it will support authorship HTML tags, a way to associate Web content with the individuals who create it. The company has already worked with **The New York Times**, **The Washington Post**, **Entertainment Weekly**, **The New Yorker**, and our sister site **CNET** to implement the tags. Google also added it to Blogger and YouTube, which will automatically include the data going forward.

Although this may seem like HTML geekery, Google's step has serious business repercussions, particularly as other companies include the tags. Suddenly, search engines could know when one person created a set of works, no matter where they appeared on the Web. That takes on some interesting meaning when Google might incorporate the result into page relevance and ranking. Such a change could significantly change the balance of power between those who create and those who publish

Dobro veste, da o igrah vzhodnega porekla dostikrat nimamo lepih besed. Če ne zaradi drugega, zavoljo vseobsegajoče hroščave šlamparije, ki pokvari dober vtis. Hacker Evo in Untold ne bi mogla biti dlje od tega žalostnega dejstva. Igri sta na oko preprosti, minimalistični, a spolirani do visokega sijaja. Le kratkost je tista, ki vrže malo sence na vse skupaj.

Hacker Evolution v nasprotju z imenom ni simulacija hekerja. V resnici gre za hibrid med tekstovno pustolovščino in reševanjem zagonetk, le da so slednje postavljene v hekersko okolje in zakamuflirane v vlamljanje v sisteme. Hacker te, kot pred leti legendarni Uplink, posadi v sedež za nadebudnega hekerja. Ta skuša izslediti neznanega krekerja, ki je vdrl v sistem megakorporacije Xenti in tam napravil štalo. Tvoje orodje je precej uborno računalo, katerega komponente lahko kasneje nadgradiš s procesorjem, pomnilnikom, požarnim zidom in hitrejšim modemom. Tvoja povezava v svet pa je ukazna vrstica. Jap, za razliko od večine špilov, ki se ukvarjajo z vdiranjem v sisteme, se Evolution najbolj približa pravi stvari. Praktično vse ukaze, ki jih, roko na srce, ni kaj dosti, tipkamo. Miš uporabimo le pogojno, ker je laže poklikati kak strežnik na karti sveta kot pisati dolg ukaz.

Vse torej postoriš na konzoli. Skeniraš serverje za odprtimi porti, odstranjuješ šifrirne ključe in vlamljaš. Tu ni posebne znanosti, le ukazi SCAN, DECRYPT in CRACK. Vsake toliko na kakem terminalu najdeš kak program, s katerim zaščite zaobideš, kar ti delo precej olajša. Omenjeni ukazi namreč dvigajo stopnjo tvoje izsledljivosti in ko ta doseže 100 %, si v temi. Če imaš novce, lahko za ne tako majhno plačilo stopnjo sledljivosti znižaš – kar pomeni, da je treba občasno vdreti v kak bankomat ali podatke prodati sumljivim kupcem. Vsi strežniki niso enako močno zavarovani, zato moraš vnaprej splanirati, kako boš k problemu pristopil. Shekane mašine namreč uporabiš kot posredniške strežnike, da si teže izsledljiv. A vsako računalo lahko kot proxy uporabiš le trikrat ...

Tako te špil prisili v mozganje. Naenkrat ni važno, kaj moraš narediti (navodila, ki jih dobivaš po elektronski pošti znajo včasih žlehtno kazati v napačno smer), ampak KAKO boš izpeljal postopek, da boš privabil čim manj pozornosti in prihranil novce za prepotrebne nadgradnje računala. Da končaš vseh devet stopenj, resda ne potrebuješ najhudejših komponent, a vedno se loviš med tem, ali bi kupil hitrejši procesor ali pa boš nemara potreboval denar za brisanje sledi. Tudi zato ni nič čudnega, če boš stopnjo tik pred koncem prekinil in pričel znova, ker si odkril boljši način, kako speljati zadevo. Za razliko od Uplinka, kjer so se podatki v misijah generirali naključno, je Hacker Evo namreč statičen. V tretjem poskusu lahko stopnjo rešiš praktično na pamet, ker že poznaš gesla in kje boš kaj našel. Je to slabost? Morda. A Evolution od igralca hoče, da sprevidi svoje napake in do konca izkoristi vse, kar mu je na voljo. Konec koncev šteje samo rezultat in to je čista dizajnerska odločitev. Vsak odstop od idealne poti je kaznovan in ves špil obrniti brez ene same napake je mojstrstvo.

No, kak kiks se najde. Recimo to, da moraš nivo preigrati v enem šusu, kar ti vzame od četrt do pol ure. Torej lahko vso igro obrneš v treh do petih urah. Prav tako se ne moreš vračati na rešene nivoje, da bi izboljšal rezultat. A to je namerno, kajti končni točkovni izplen roma na spletno lestvico. To spremeni izziv, saj moraš zaobvladati celotno igro naenkrat. Za tiste, ki jim to ni dovolj, je v Steamovo inačico že vključen dodatek Reinsertion s tremi novimi stopnjami, ki hkrati rabijo kot učna podlaga za izdelavo modov s priloženim

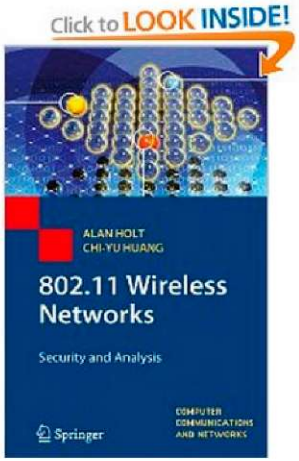
802.11 Wireless Networks: Security and Analysis

0

Posted by rain at May 18, 2011

Book Name : 802.11 Wireless Networks: Security and Analysis
Alan Holt , Publisher: Springer | 2010 | ISBN: 184996274X | File type: PDF | 212 pages | 5.34 mb



This book shows how to build and analyse wireless networks, exploring how an enterprise wireless network with the highest levels of security can be built. The book also explains how to configure wireless network equipment in order implement various network architectures and levels of security. The contents describe how to set up every component of the network, from the client supplicant and the access-points, through to the supporting servers (e.g. RADIUS). Much of the infrastructure is based upon Linux and open source software, but the book also addresses configuration of equipment from three of the largest wireless network equipment providers: Cisco, Alacatel-Lucent (Aruba) and Meru. Furthermore, the book contains coverage of more theoretical topics on performance analysis and monitoring wireless LANs, including the new 802.11n standard.

World's Most Expensive Cameras

by TOM *on* JANUARY 28, 2010 · COMMENTS (4)

by Hunter Davis and Jeremy Harris

When you hear the phrase "most expensive camera in the world," you probably imagine a super high-tech digital camera—maybe one used by NASA to take pictures of Mars or the moon or some cool camera capable of going underwater to extreme depths.

That couldn't be further from the truth.

The first cameras used the daguerreotype process, pioneered by Jacques Mande Daguerre, to form images. A daguerreotype image is achieved by producing a direct image onto a polished silver surface. Unfortunately, a daguerreotypist couldn't produce copies by means other than daguerreotyping the original and the process was obsolete within a decade.

Gopher tortoises are in trouble but won't get federal protection

By Kevin Spear / The Orlando Sentinel
Wednesday, July 27, 2011 - Added 1 hour ago

E-mail Print (0) Comments Text size Share Všeč mi je

ORLANDO, Fla. — The long-awaited message from federal authorities Tuesday to a shrinking population of gopher tortoises: Sorry, but we don't have the time and money to protect you.

U.S. Fish and Wildlife officials said the ailing gopher tortoise, declining in Florida and elsewhere in the Southeast because of land development and poor management of conservation lands, probably is at risk of extinction.

But the reptile won't be declared a threatened species without further review — and that won't happen soon because the Fish and Wildlife Service said it can't afford the time or expense and is tied up by court-ordered actions on behalf of other species.

"This determination does mean we believe the species needs to be listed, but we do not have the resources to pursue the listing," said

Waltzing with the Elephant – eBook for the weekend
IT Governance EU – 27 August 2011
Change email settings / Unsubscribe
Hi Vid
Do you know what it's like to waltz with the elephant?
You do it on a day-to-day basis; you depend on the elephant for routine operations and future performance. The elephant helps you manage your computer network, store your corporate data and communicate within and outside your network.
The elephant is IT.
Waltzing with the Elephant (eBook) explores and informs you about the importance of top level understanding of, and engagement in the processes for directing and controlling the use of IT as a tool of business. It aims at building a shared understanding that leads to a well-integrated system for the governance of IT from the boardroom to the coalface, framed around the guidance in ISO/IEC 38500 standard.
The book lays the foundations for consistent, effective conversation about the use of IT across all levels of the enterprise, from boardroom to coalface. It is straight-forward and easy to understand, addressing issues about living with existing IT solutions and investing in new ones.

that turn out 600 an hour. Used in fine instruments, they cost about $100 an ounce (more than 4,200 screws).

$100-AN-OUNCE SCREWS MAKE GOLD LOOK CHEAP

A MERE spoonful of little screws as a day's work for a man and a complicated machine would seem to be a poor output, but when the tiny screws are worth more than their weight in gold it's a different story. Though they are made of brass or steel, these little screws cost around $100 an ounce. Gold is worth $35 an ounce.

Automatic screw machines do what the ancient alchemists could not—they take base metal and turn it into something more

These miniature screws for watches and instruments are all made individually. To turn out one of them is just as much labor for man and machine as to make the largest machine screw. And, of course, they are as important as the big ones, for without them we would not have many fine instruments that are essential to the machine age of today.

A firm that takes pride in the smallness of its products, having specialized for three

U.S. law enforcement adopting new smartphone criminal recognition tech

eyescan via Bi2 technologies

law enforcement agencies all over the U.S. are planning on adopting new smartphone attached tech called MORIS to streamline identifying the bad guys.

U.S. law enforcement agencies are planning on implementing a new mobile gadget that will be used to identify criminals. The new technology will snap onto the back of a smartphone and be able to search records based on a scan of a suspects' face or eyes.

The accessory is called MORIS, an acronym which stands for Mobile Offender Recognition and Information System. Officers use the special camera on MORIS and take a picture of a person's iris from 5 to 6 inches away. The system then analyzes unique features in the iris and uses that data to find a possible match in the criminal database.

6 signs you're headed for stardom
Wondering if you're destined to be a star at work? Those who are tend to take risks, stay laser focused on what they want to do and read a lot, Penelope Trunk writes. "It doesn't matter what you read," she writes. "But unproven hotshots spend a lot of time reading because they have a natural curiosity and level of engagement."

SIMPLIFY FIREWALL AND NETWORK MANAGEMENT
While firewall vendors such as Cisco, Check Point and Netscreen provide interfaces for managing access control rules, they mostly do not provide analytic tools for optimizing performance, auditing security, or recommending changes to impact traffic flows. Athena leads the market with the most advanced traffic flow analysis using offline configuration data. This allows users to determine actual firewall behavior without interfering with the day to day change process or injecting any packets into the network.

And The Most Popular 'Damn You Auto Correct' Text Of All Time Is ...

We've written about Damn You Auto Correct before, namely because it managed to eloquently capture the modern zeitgeist of text-based communication failures. I mean this stuff sucks! Just this morning I sent a dm to the wrong person because of Seesmic autofill text and just two hours later had to delete and resend a tweet because of a typo GAH. Fact is the more we type the more chances we have to typo (have you read my posts ever?) and the collective anxiety surrounding these moments of embarr...

Thus, *ras*, *myc* and *neu* oncogenes code for proteins involved in signal transduction, gene transcription and cell membrane receptor, respectively. The transgenic approach showed that the *ras* gene generated breast tumours in some but not all mice and that other cell types did not become cancerous (Figure 2.4). In the context of tumour pathogenesis, this indicates that single gene changes can inefficiently generate cancers and that cell-specific influences exist that determine which cells can be transformed into cancers. The *myc* gene had a similar effect to that of *ras*, but together the two were synergistic. This cooperation between oncogenes fits well with multistage models of carcinogenesis. The third oncogene, *neu*, generated breast cancers in all the female offspring. This example illustrates the multiple ways in which a cancer type can be generated.

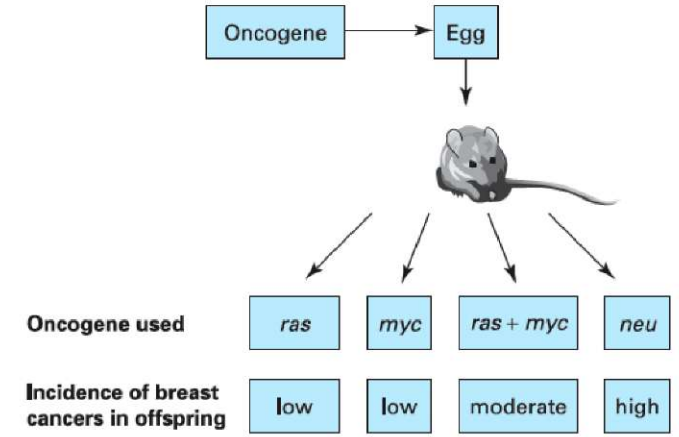

Figure 2.4
Transgenic mice are used to analyse oncogene effects. (Source: Based on data from Muller, W.J., *et al.* (1988) *Cell*, 54, 105–15, Copyright © 1988. Reproduced with permission from Elsevier.)

How Twitter tracked the News of the World scandal
Rupert Murdoch's decision to close the News of the World was greeted with a frenzy on Twitter. The Guardian has analysed half a million tweets sent with the #notw hashtag over the past four days to capture how the scandal has resonated with the online community

About Spinoff
As a result of a 1958 congressional mandate, NASA, in 1962, created the Technology Utilization Program. It was supported by Technology Utilization Offices at each of the field centers and four Industrial Applications Centers (IACs). The number of IACs grew rapidly to seven by the early 1970s and ten in the early 1980s.
Early studies of Tech Briefs, the publication dedicated to informing the scientific community about available NASA technologies, and ongoing requests received for supporting information, indicated a strong need in the private sector for new technology to aid in the development of commercial products and services.
When spinoff products began to emerge from space technologies, NASA considered the possibility of an annual report to present at congressional budget hearings. The result was a black and white "Technology Utilization Program Report," published in 1973, followed by another one in 1974. The technologies in these reports created interest in the technology transfer concept, its successes, and its use as a public awareness tool. The reports generated such keen interest by the public that NASA decided to make them into an attractive publication. Thus, the first four-color edition of Spinoff was published in 1976.
Each year since, a new issue has highlighted the transfer of NASA technology to the private sector. The Agency distributes copies to politicians, economic decision makers, company CEOs, academics, professionals in technology transfer, the news media, and the general public.
NASA's Spinoff publication accomplishes several goals. First, it is a convincing justification for the continued expenditure of NASA funds. It serves as a tool to educate the media and the general public by informing them about the benefits and dispelling the myth of wasted taxpayer dollars. It reinforces interest in space exploration. It demonstrates the possibility to apply aerospace technology in different environments. It highlights the ingenuity of American inventors, entrepreneurs, and application engineers, and the willingness of a government agency to assist them. And finally, it continues to ensure global competitiveness and technological leadership by the United States.
The total number of stories published since 1976 is over 1,700, which does not include approximately 100 stories featured in the 1973 and 1974 reports.

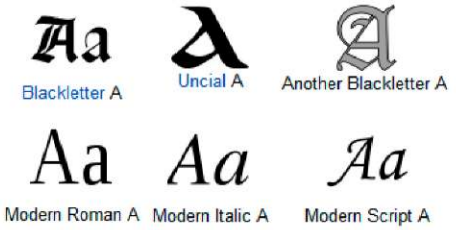
In 1600 B.C., the Phoenician alphabet's letter had a linear form that served as the base for some later forms. Its name must have corresponded closely to the Hebrew or Arabic aleph.

When the Ancient Greeks adopted the alphabet, they had no use for the glottal stop that the letter had denoted in Phoenician and other Semitic languages, so they used the sign to represent the vowel /a/, and kept its name with a minor change (alpha). In the earliest Greek inscriptions after the Greek Dark Ages, dating to the 8th century BC, the letter rests upon its side, but in the Greek alphabet of later times it generally resembles the modern capital letter, although many local varieties can be distinguished by the shortening of one leg, or by the angle at which the cross line is set.

The Etruscans brought the Greek alphabet to their civilization in the Italian Peninsula and left the letter unchanged. The Romans later adopted the Etruscan alphabet to write the Latin language, and the resulting letter was preserved in the modern Latin alphabet used to write many languages, including English.

The letter has two minuscule (lower-case) forms. The form used in most current handwriting consists of a circle and vertical stoke ("ɑ"), called Latin alpha or "script a". Most printed material uses a form consisting of a small loop with an arc over it ("a"). Both derive from the majuscule (capital) form. In Greek handwriting, it was common to join the left leg and horizontal stroke into a single loop, as demonstrated by the Uncial version shown. Many fonts then made the right leg vertical. In some of these, the serif that began the right leg stroke developed into an arc, resulting in the printed form, while in others it was dropped, resulting in the modern handwritten form.



Usage

Main article: a (disambiguation)

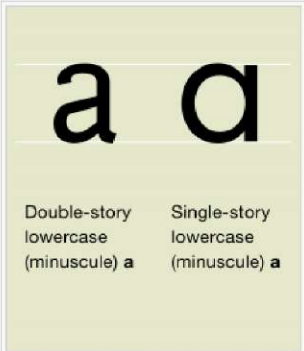
In English, "a" by itself frequently denotes the near-open front unrounded vowel (/æ/) as in *pad*, the open back unrounded vowel (/ɑː/) as in *father*, or, in concert with a later orthographic vowel, the diphthong /eɪ/ as in *ace* and *major*, due to effects of the great vowel shift.

In most other languages that use the Latin alphabet, "a" denotes an open front unrounded vowel (/a/). In the International Phonetic Alphabet, variants of "a" denote various vowels. In X-SAMPA, capital "A" denotes the open back unrounded vowel and lowercase "a" denotes the open front unrounded vowel.

"A" is the third common used letter in English, and the second most common in Spanish and French. In one study, on average, about 3.68% of letters used in English tend to be ‹a›s, while the number is 6.22% in Spanish and 3.95% in French.[3]

"A" is often used to denote something or someone of a better or more prestigious quality or status: A-, A or A+, the best grade that can be assigned by teachers for students' schoolwork; A grade for clean restaurants; A-List celebrities, etc. Such associations can have a motivating effect as exposure to the letter A has been found to improve performance, when compared with other letters.[4]

A turned "a", ‹ɐ› is used by the International Phonetic Alphabet for the near-open central vowel, while a turned capital "A" ("∀") is used in predicate logic to specify universal quantification.



Typographic variants include a double-story and single-story a.

Computing codes

In Unicode, the capital "A" is codepoint U+0041 and the lower case "a" is U+0061.[5]

The ASCII code for capital "A" is 65 and for lower case "a" is 97; or in binary 01000001 and 01100001, respectively.

The EBCDIC code for capital "A" is 193 and for lowercase "a" is 129; or in binary 11000001 and 10000001, respectively.

The numeric character references in HTML and XML are "A" and "a" for upper and lower case, respectively.

Abnormal Heart Rhythms & EP
Abnormal heart rhythms, or atrial fibrillation, are commonly known as arrhythmia disorders. Afflicting over 2 million Americans, arrhythmias may indicate a serious problem that could lead to heart disease, stroke or sudden cardiac death.
The expert cardiac staff at St. John Health System can determine whether there is cause for concern through electrophysiology (EP) testing, which are studies that record the electrical activity and pathways of your heart.
This study can help your doctor find an irregular heart rhythm, show how well medications work, and help determine treatment for any rhythm problems.
The EP test can:
determine the cause
locate the origin
assist the doctor in identifying the best treatment for an abnormal heart rhythm, if necessary.

What if science fiction became science?

Since the 1920's, quantum physicists have been trying to make sense of an uncomfortable and startling possibility—that an infinite number of alternate universes exist.

Leading scientists like **Stephen Hawking**, **Michio Kaku** and **Neil Turok**, all of whom are responsible for life-changing breakthroughs in the field of

The hypersonic flow regime is characterized by a number of effects which are not found in typical aircraft operating at low subsonic. The effects depend strongly on the speed and type of vehicle under investigation.

Classification of Mach regimes [edit]

While the terms "subsonic" and "supersonic" in the purest verbal sense refer to speeds below and above the local speed of sound respectively, aerodynamicists often use the same terms to talk about particular ranges of Mach values. This occurs because of the presence of a "transonic regime" around M=1 where approximations of the Navier-Stokes equations used for subsonic design actually no longer apply, the simplest of many reasons being that the flow locally begins to exceed M=1 even when the freestream Mach number is below this value.

Meanwhile, the "supersonic regime" is usually used to talk about the set of Mach numbers for which linearised theory may be used, where for example the (air) flow is not chemically reacting, and where heat-transfer between air and vehicle may be reasonably neglected in calculations.

In the following table, the "regimes" or "ranges of Mach values" are referred to, and not the "pure" meanings of the words "subsonic" and "supersonic".

Generally, NASA defines "high" hypersonic as any Mach number from 10 to 25, and re-entry speeds as anything greater than Mach 25. Aircraft operating in this regime include the Space Shuttle and various space planes in development.

Regime	Mach	mph	km/h	m/s	General plane characteristics
Subsonic	<0.8	<610	<980	<270	Most often propeller-driven and commercial turbofan aircraft with high aspect-ratio (slender) wings, and rounded features like the nose and leading edges.
Transonic	0.8-1.2	610-768	980-1,470	270-410	Transonic aircraft nearly always have swept wings, delaying drag-divergence, and often feature design adhering to the principles of the Whitcomb Area-Rule.
Supersonic	1.2-5.0	768-3,840	1,470-6,150	410-1,710	Aircraft designed to fly at supersonic speeds show large differences in their aerodynamic design because of the radical differences in the behaviour of flows above Mach 1. Sharp edges, thin aerofoil-sections, and all-moving tailplane/canards are common. Modern combat aircraft must compromise in order to maintain low-speed handling; "true" supersonic designs include the F-104 Starfighter and BAC/Aérospatiale Concorde.
Hypersonic	5.0-10.0	3,840-7,680	6,150-12,300	1,710-3,415	Cooled nickel-titanium skin; highly integrated (due to domination of interference effects: non-linear behaviour means that superposition of results for separate components is invalid), small wings, see X-51A Waverider
High-hypersonic	10.0-25.0	7,680-16,250	12,300-30,740	3,415-8,465	Thermal control becomes a dominant design consideration. Structure must either be designed to operate hot, or be protected by special silicate tiles or similar. Chemically reacting flow can also cause corrosion of the vehicle's skin, with free-atomic oxygen featuring in very high-speed flows. Hypersonic designs are often forced into blunt configurations because of the aerodynamic heating rising with a reduced radius of curvature.[*disambiguation needed*]
Re-entry speeds	>25.0	>16,250	>30,740	>8,465	Ablative heat shield; no wings; blunt capsule shape

TalentSoft

TalentSoft, privately held and based in France, started to offer an integrated EPM solution in 2007. In addition to EPM, TalentSoft also offers solutions for workforce planning, e-recruitment and learning. The solution is built on a Microsoft-based technology stack. It is also aggressively pursuing delivery through Microsoft's Azure platform-as-a-service offering through a partnership with Logica. The solution is delivered via the SaaS model. TalentSoft is best-suited to European multinationals wanting an integrated EPM suite (and other talent management applications) that has strong support for EU social regulations.

The victory of major film studios in forcing the U.K.'s largest Internet service provider, BT, to block access to pirate-links website Newzbin2 gets fast and detailed analysis from The Register. It pulls no punches with the headline: "Film studios thrash BT in Newzbin site-block test case."
The author of the article, Andrew Orlowski, comments:
What's interesting is how many planks of BT's defence were kicked away. The

Terrestrial television is a mode of television broadcasting which does not involve satellite transmission or cables — typically using radio waves through transmitting and receiving antennas or aerials. The term is more common in Europe, while in the United States it is referred to as broadcast television or sometimes over-the-air television.
Terrestrial television broadcasting dates back to the very beginnings of television as a medium itself with the first long-distance public television broadcast from Washington, D.C., on April 7, 1927. The BBC began broadcasting television to the public in 1929, and had a regular schedule of programmes in 1930. Aside from transmission by high-flying planes moving in a loop using a system developed by Westinghouse called Stratovision, there was virtually no other method of television delivery until the 1950s with the beginnings of cable television, or community antenna television (CATV). The first non-terrestrial method of delivering television signals that in no way depended on a signal originating from a traditional terrestrial source began with the use of communications satellites during the 1960s and 1970s.

We at the Church of Google believe the search engine Google is the closest humankind has ever come to directly experiencing an actual God (as typically defined). We believe there is much more evidence in favour of Google's divinity than there is for the divinity of other more traditional gods.
We reject supernatural gods on the notion they are not scientifically provable. Thus, Googlists believe Google should rightfully be given the title of "God", as She exhibits a great many of the characteristics traditionally associated with such Deities in a scientifically provable manner.
We have compiled a list of nine proofs which definitively prove Google is the closest thing to a "god" human beings have ever directly experienced.

and free will. If the English garden was the symbol of a fallen Eden in the sixteenth century, in *FHTE* it is the golf course, where the main character meets his end. Jones's characters also unabashedly question the American mythologies of racial "settling" of the Civil War (Prewitt's full name is "Robert E. Lee Prewitt"), the myth of the American frontier (several characters discuss who makes the best movie cowboy), and the substituting of factitious athletics for true combat (boxing, baseball, football, golf, horseback riding).

Thank heaven for the development of digital books and the desire to include the dirty bits that were omitted from the original publication. Perhaps this will give *FHTE* a new life with a new generation. In terms of the depiction of a broad array of sin, it's all dirty bits, actually. Digital publication has its advantages: Just enter the search term "queer" and one-by-one your device will take you to references to gay sex. In most cases, the digital version only adds a line or two that might have seemed off-color in 1951. But don't expect it to be erotic. When Maggio--the Sinatra character--needs money for a prostitute but loses all his winnings gambling, he decides to go downtown and pick up a gay man. "At least I'll get a few drinks and get my gun off," he says in the unexpurgated digital version. Or the following: "Aw, [queers] all right. They just peculiar is all. They maladjusted. Besides, they'll buy you preparation all night long. Just to get to blow you. 'Ats a lot a preparation, friend." "I don't like to be blowed," says Prewitt.

This restored edition should be read not because of the movie tie-in, or for its expanded sex scenes, but because *FHTE* is a great American novel, perhaps the best representation of vigorously masculine, muscular writing of consequence in the United States, without the mediating, comic irony that came later. *FHTE*'s gritty realism remains only part of its achievement. The rest lies in its self-aware depiction of the history of history.

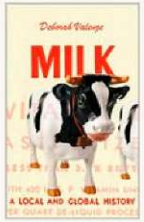
The Gap Year

Single mom, rebellious teen daughter, absent dad. From such simple yet compelling ingredients, Sarah Bird assembles a spicy stew of familial discord, hormonal longings, and troubling maternal regrets. Can mother Cam save daughter Aubrey from making a series of foolish decisions in her senior year of high school, with or without the influence of Aubrey's father? The surprising yet satisfying resolution to this emotional storm defies prediction.



Milk: A Local and Global History

Think about it: is there anything stranger than the fact that humans drink the milk of other mammals? This is the kind of question Deborah Valenze's wide-ranging and comprehensive history of the dairy industry evokes. Regarding our consumption of milk as a cultural artifact rather than any evolved biological necessity, Valenze brings to the table a detailed account of milk's conquests as rich and tasty as a chocolate shake.

OCLC The world's libraries. Connected.

Moving traditional ILS functions to the Web is a revolutionary approach that has positively impacted library services, improved the bottom line, and increased global library visibility and collaboration.

Hear why fellow libraries made the change to OCLC's Web-scale Management Services (WMS), and learn how you, too, can be a part of the Web-scale library management revolution.

Andrew K. Pace, OCLC Executive Director for Networked Library Services, will be joined by special guest speakers—all early adopters and whose libraries are now live in production with WMS:

- **Jill Gremmels**, the Leland M. Park Director of the Davidson College Library
- **Ruth Light**, Technical Services Coordinator at Harrison College
- **Elliot Polak**, Head of Library Technology at Norwich University

Also, Andrew will discuss OCLC Web-scale strategy, recent WMS enhancements and the new License Manager.

Book Name : Neural Theories of Mind: Why the Mind-Brain Problem May Never Be Solved
Lawrence Erlbaum Associates; 1 edition | May 31, 2005 | ISBN-10: 0805854843 | 304 pages | PDF | 18.57 MB
Theory! There is perhaps no more overused and misused word in all of cognitive neuroscience than this one. The purpose of Neural Theories of Mind is to bring some order back to the use of the word "theory" so that it can rise above the trivialities to which it is all-too-often attached by current researchers. The main goal is to assert that however the large multitude of biology-based theories of mind, none has succeeded. In addition, it shows that the three main types of brain-mind theory that have been proposed so far are, at best, preliminary speculations and, at worst, misleading failures. The book's discussion leads to a number of surprising and remote areas of science. Readers will have a deeper understanding of the use and misuse of the word "theory" in the special field of cognitive neuroscience after reading this text. Neural Theories of Mind will appeal to neuroscientists, neuropsychologists, cognitive psychologists, and philosophers interested in mind and consciousness.

Kot sami ugotavljate, je Slovanska knjižnica organizacijska enota Mestne knjižnice Ljubljana. Pravice in dolžnosti uporabnikov in članov glede uporabe delovnih postaj oziroma javnih računalnikov so v Pravilniku o poslovanju Mestne knjižnice Ljubljana določene v 35. členu. Navedeno je, da:

- lahko brezplačno uporabljajo javne računalnike v e-točkah MKL člani knjižnice, ki imajo urejene vse obveznosti do knjižnice,
- lahko brezplačno uporabljajo določene javne računalnike v e-točkah MKL le za uporabo elektronske pošte za čas do 15 minut uporabniki knjižnice, ki niso njeni člani,
- lahko uporabniki, ki niso člani knjižnice, proti plačilu po veljavnem ceniku uporabljajo javne računalnike v e-točkah MKL na enak način kot člani,
- je uporaba javnega računalnika časovno omejena,
- lahko uporabniki knjižnice v nekaterih enotah MKL brezplačno uporabljajo brezžični dostop do interneta prek vstopnih točk javnih brezžičnih omrežij,
- uporaba brezžičnega dostopa do interneta ni časovno omejena,
- je knjižnica dolžna voditi evidenco uporabe računalniške opreme za iskanje po svetovnem spletu v skladu z zakonodajo,
- knjižnica ni odgovorna za točnost podatkov, ki jih je uporabnik prevzel s svetovnega spleta,
- so uporabniki v času uporabe javnega računalnika odgovorni za namerno povzročene okvare strojne in programske opreme,
- so podrobnejša pravila za uporabo osebnih računalnikov in brezžičnih omrežij opisana v navodilih o uporabi osebnih računalnikov v MKL.

Navedena ureditev določa okvir uporabe javnih računalnikov v splošnih knjižnicah. Da bi knjižnice zadostile pravicam uporabnikov do brezplačnih knjižničnih storitev, ga morajo kljub številnim željam in pritiskom posameznikov po drugačni ureditvi, upoštevati.

Vlade Republike Slovenije je z izdajo Uredbe o osnovnih storitvah knjižnic (Uradni list RS, št. 29/03) uporabnikom knjižnic že omogočila javni dostop do informacijske in komunikacijske tehnologije, katere nakup država tudi že vrsto let sofinancira in tako skupaj z občinami ustanoviteljicami in pogodbenimi partnericami knjižnicam zagotavlja pogoje za delovanje »funkcionalnega in dostopnega sistema informacijsko komunikacijskih tehnologij za uporabnike«.

Zadeva: Odgovor na Predlog za priporočilo Vlade Republike Slovenije Slovanski knjižnici o vzpostavitvi funkcionalnega in dostopnega sistema informacijsko komunikacijskih tehnologij za uporabnike
Zveza: elektronska pošta (17.06.2010 12:43 , Vid Gajšek <vid_gajsek@yahoo.com>)

Spoštovani!

Dne 17. junija smo prejeli vaše elektronsko sporočilo, v katerem ste nam poslali vaš predlog za priporočilo Vlade Republike Slovenije Slovanski knjižnici o vzpostavitvi funkcionalnega in dostopnega sistema informacijsko komunikacijskih tehnologij za uporabnike. Kot ministrstvo, pristojno za splošne knjižnice, katerih ustanoviteljice so občine, spremljamo delo in delovanje splošnih knjižnic, njihove dosežke pa tudi težave in zaplete, ki nastajajo iz takih ali drugačnih razlogov. Preučili smo vaš predlog in glede vaših navedb ugotavljamo:

Za zagotavljanja pravic uporabnikov v zvezi z izvajanje določb Zakona o knjižničarstvu, ki knjižnicam med drugim nalagajo tudi zagotavljanje dostopa do elektronskih publikacij ter informacijsko opismenjevanje, splošnim knjižnicam pa tudi zagotavljanje dostopnosti in uporabo gradiv javnih oblasti, ki so splošno dostopna na elektronskih medijih, je Vlada Republike Slovenije izdala Uredbo o osnovnih storitvah knjižnic (Uradni list RS, št. 29/03). Uredba opredeljuje osnovne storitve knjižnic, namenjene uporabnikom, ki so določene na podlagi 2. člena Zakona o knjižničarstvu (Uradni list RS, št. 87/01 in 96/02 – ZUJIK), med njimi posebej tiste, ki so za uporabnika brezplačne, ter obratovalni čas in način poslovanja knjižnic. Določa tudi, da so osnovne storitve knjižnice dostopne vsakomur v obsegu, ki ga določa uredba sama, vendar v skladu s pravilnikom o splošnih pogojih poslovanja knjižnice. Ker so splošne knjižnice relativno dobro opremljene z informacijsko in komunikacijsko tehnologijo, saj število delovnih postaj z dostopom do interneta za uporabnike s periferno in drugo dodatno opremo, kljub slabšanju javnofinančnega stanja, še vedno narašča in dosega povprečje več kot 0,6 računalnika na 1000 prebivalcev, je mogoče med prebivalci zaslediti precej želja po neomejeni uporabi računalnikov. Tovrstnim željam uporabnikov žal ni mogoče ustreči, saj povzročile kršitev pravice do brezplačnih osnovnih storitev drugih uporabnikov. Zato je pravica in dolžnost knjižnic, da s pravilnikom o splošnih pogojih poslovanja knjižnice določi vsaj: etiko poslovanja, dolžnosti knjižnice do uporabnika in člana, pravice in dolžnosti uporabnika in člana do knjižničnega gradiva, dostopnost in pogoje uporabe knjižnice, časovne in druge omejitve pri izposoji gradiva, storitvah in uporabi knjižnice, jezik poslovanja, vrste storitev in cenik storitev. Uporabnik oziroma član je dolžan spoštovati pravilnik o poslovanju knjižnice. Če uporabnik ravna proti njegovim določilom, ima knjižnica pravico, da ga izključi iz članstva.

$2 Trillion in Cuts in Perspective

Posted by Tad DeHaven

Congressional Republicans have said that spending cuts must be at least as large as an increase in the debt ceiling. Negotiations over lifting the debt ceiling are ongoing, but the "magic number," so-to-speak, would be around $2 trillion in spending cuts.

Cutting $2 trillion in federal spending sounds like a lot, but it's actually relatively small because the cuts would likely occur over ten years. According to the Congressional Budget Office's most recent budget baseline, the federal government will spend almost $46 trillion over the next ten years.

The following chart shows what $2 trillion in spending cuts over the next ten years looks like when measured against the CBO's baseline. Even with the cuts, federal spending would still increase by $1.8 trillion:

I do not know of any original Latin source for it. I rather doubt it has one. (It doesn't sound like real Latin).

Waltzing with the Elephant – eBook for the weekend
IT Governance EU – 27 August 2011
Change email settings / Unsubscribe
Hi Vid
Do you know what it's like to waltz with the elephant?
You do it on a day-to-day basis; you depend on the elephant for routine operations and future performance. The elephant helps you manage your computer network, store your corporate data and communicate within and outside your network.
The elephant is IT.
Waltzing with the Elephant (eBook) explores and informs you about the importance of top level understanding of, and engagement in the processes for directing and controlling the use of IT as a tool of business. It aims at building a shared understanding that leads to a well-integrated system for the governance of IT from the boardroom to the coalface, framed around the guidance in ISO/IEC 38500 standard.
The book lays the foundations for consistent, effective conversation about the use of IT across all levels of the enterprise, from boardroom to coalface. It is straight-forward and easy to understand, addressing issues about living with existing IT solutions and investing in new ones.

Cyber Security

Cyber Security – An Issue Of National Importance

In a **speech** in May 2009, President Obama has declared that the "cyber threat is one of the most serious economic and national security challenges we face as a nation" and that "America's economic prosperity in the 21st century will depend on cybersecurity."

Two years later, in May 2011, the US Government has proposed a **legislative package** focused on improving cyber security for the American people, the Nation's critical infrastructure, and the Federal Government's own networks and computers.

This document recognizes that the cyber security vulnerabilities in the US Government and critical infrastructure are a risk to national security, public safety, and economic prosperity.

A **fact sheet** on the legislative package states that more transparency will be required from critical-infrastructure operators and they will be accountable for their cyber security. Moreover, the cyber security risk mitigation plans of each critical-infrastructure operator will be assessed by a third-party, commercial auditor.

The legislation will help consumers protect themselves against identity theft whilst also motivating businesses to adopt better cyber security measures. Consumers who are affected by a data breach will have to be informed about the leak by the company that suffered the intrusion. In the view of the US government the proposed changes will "(1) improve our resilience to cyber incidents and (2) reduce the cyber threat".

If accepted, the legislative package will create the need for many organizations to review their cyber security strategy (if they have one in place) or they will have to start implementing one.

Download our Free White Paper: Cyber Security – An Issue Of National Importance. Simply enter your details into the form on this page and we'll email it to you right away.

Effective Cyber Security

In today's information economy, the protection of information assets (information security) is a key element in the long-term competitiveness and survival of commercial organizations. With the Internet becoming a ubiquitous communication and application platform, the greatest risk to your business is likely to come from risk of cyber crime.

Effective cyber security depends on co-ordinated, integrated preparations for rebuffing, responding to and recovering from, a range of possible cyber attacks. In an Internet environment where a substantial number of initial attacks are automated, and any assault on critical national infrastructure ("CNI") is likely to be widespread, all organizations need to take steps to prepare themselves.

IT Governance Ltd is committed to the **National Cyber Security Alliance (NCSA)**.

New Techniques to Optimize Depth of Field and Resolution through Digital Microscopy

Digital microscopes have been revolutionizing the field of optical microscopy. By using optimized optics for image capturing, several technical advantages are created: superior depth-of-field, large working distances, and reproducible lighting, all while maintaining exceptional brightness and clarity.

Learn about the concept and history of the technology and how it applies to a wide range of applications - electronics, aerospace, semiconductor, medical device, and more. Imaging and lighting techniques to control glare and reflectivity, enhance surface texture, and view low-contrast targets will be discussed. View this Webcast and you will learn how to reduce analysis time and improve documentation by using a single device.

The Seven Performance Metrics that Matter Most

JUNE 28, 2011

Dealing with the performance measurement challenge

share

In an era of constantly evolving technologies and platforms, companies need a bulletproof game plan for measuring their digital marketing programs. But standing in their way is a big challenge, according to *Digital Impact: The Two Secrets to Online Marketing Success*, a new book written by eMarketer CEO and co-founder Geoff Ramsey and Vipin Mayar, EVP of McCann Worldgroup.

"Digital marketers today are drowning in metrics, but they don't know which ones are important or how to connect the dots in a meaningful way that will drive marketing performance," said Ramsey.

Marketers are desperate for a clear, comprehensive and effective set of metrics and measurement systems for driving marketing performance.

Digital Impact makes a bold proposal: There are only seven metrics that are critical for performance measurement across digital channels. While countless other metrics are available to marketers, these seven are the ones that marketers should seek to master.

Qualified Reach, or Qualified Visits: Qualified Reach is the one critical metric that every marketer should use—specifically because it captures two important dimensions that no other single metric does:

Good Morning, So I was really bored as always hunting on PBSs local career spotlight on last wednesday and read all about this brand new work online career that lets retired soldiers earn around $1300 per week or more of course we did not know if i should believe most of it at first but we just had to give it a try & its a good thing I did because I managed to earn $271.85 by my second full day. It is completely easy Ive already gotten paid once straight into my checking account... it is the greatest thing that's happend to us this year..
Here is the article.. http://jobxogn.tumblr.com/HPQG5 I think just about everyone that has internet can perform this thing so thats why I am filling in all our new friends & those i care about. I want you to join and earn some income your self.. you can also share this email with everyone you know that needs to make more cash so that we can all beat this economic nightmare!!

A BIRD? A PLANE? May 14, 2008: Yves Rossy soars skyward at 134 mph wearing a homemade jet-fueled wingsuit.

WINGMAN

THE WARM AUTUMN SUN has burned a hole in the morning haze and opened up the sky above the South Foreland Lighthouse, a historic beacon along the White Cliffs of Dover, England. It marks the narrowest point of the English Channel. You can't quite make out where the sea meets the coast of France, a tantalizing 22 miles distant, but a

A few minutes ago, we're told, Rossy jumped out of a plane 6,600 feet above Cap Gris Nez, on the French side, unfolded the composite wing on his back to its full 8-foot-2-inch span, and hit the thrusters. Assisted by four model-size jet engines and a slight tailwind, he should be screaming

Using Supernovae to Meas...

space-time itself.
The supernova "PTF 11kly" – marked with an arrow -- in photos taken on the Palomar 48-inch telescope on Aug. 22, 23 and 24. Click to enlarge this image.
Peter Nugent and the Palomar Transient Factory
The astronomical community is buzzing over the discovery of a Type 1a supernova in a nearby galaxy called M101 -- also known as the Pinwheel Galaxy.
There are actually several types of supernova but those of the Type 1a variety are not the result of the explosion of a massive star, but the destruction of a white dwarf orbiting a younger binary partner, or two white dwarfs slamming into one another. In the former case, material is stripped from the binary partner until the material reaches "critical mass" around the white dwarf. At that point, the supernova ignites.
Supernovae of this type have been observed for decades and we have learned that they are very predictable in the way they evolve. For example, it's easy to calculate how much energy they are pouring into the Universe by studying the way their output of energy changes with time. This makes them very useful as a tool to measure cosmic distances.
But they are only good for calculating distances to the galaxies in which they occur. Fortunately, there are a number of other ways that we can measure distances in space and Type 1a supernovae are just one of them.
SLIDE SHOW: The Supercomputer Supernova
Radar and Parallax
Taking a step back, it's easy to measure distances within our solar system as we can bounce radar signals off the nearest planets and, knowing the speed an electromagnetic signal travels (the speed of light) and timing how long it takes for the signal to get to the object and back again, we can get a very good measure of these interplanetary distances.
Measuring the distance to the nearest star, on the other hand, can be a little tricky.
If we were to send a radar signal to the nearest star, Proxima Centauri, it would take about 4 years to get there and 4 years to get back and even then, the signal would be incredibly weak and impossible detect. Instead we use a technique called "parallax."
The concept of parallax measurements of the stars is simple. It takes a year for the Earth to complete one

Checklist: Best Practices for Managing Just-in-time Production
Focus Research (Checklist/Buyer's Guide)
Just-in-time (JIT) manufacturing is "not procrastination, but making a commitment once the scales are tipped in favor of certainty," explains Focus Expert Jerry Durant. How do you keep your company from falling prey to the "deer-in-the-headlights" syndrome and suffering from decision failures? Download this JIT checklist for the top seven best practices for managing JIT manufacturing.

The 2011 Buyer's Guide to Accounting and Financial Software
Intacct Corp
Too often, finance professionals must contend with outdated financial and accounting systems that present spiraling overhead costs, functional limitations, and unnecessary risks. And that makes it challenging for them to respond to complex business issues such as frequent regulatory change and increased compliance challenges--as well as requirements for visibility across multiple entities, currencies, and tax and regulatory frameworks. Download this buyer guide for...

YOU ARE WALKING down a dark street. You are all alone. You hear footsteps behind you. Your heart starts beating faster. You can hear the blood throbbing in your veins.

Do I have your attention now?

You, you, you, you, you, you, you.

You are hungry. *You* are cold. *You* are bored. *Your* ideas are important. *You* want this. *You* want that.

You, you, you, you, you, you, you.
