Novci (denarji).

1. Pred létom 1858. se je računilo v Avstriji na goldinarje tako zvanega dogovornega (konvencijskega) denarja, tako da je po dvajset goldinarjev imelo v sebi 233·87 *g* čistega srebra; 1 goldinar srebra („C. M.“) je imel 60 kr. po 4 (stare) vinarje, 100 goldinarjev C. M. je veljalo toliko, kakor 105 goldinarjev av. v. ali 210 K.

2. Od 1. novembra 1858. l. se je računilo na goldinarje avstrijske vrednosti, ter iz 500 *g* čistega srebra kovalo po 45 goldinarjev. Goldinar je imel 100 krajcarjev (kr.).

3. Po zákonu (postavi) z dne 2. avgusta 1892. l. je obveljala kronska vrednota, ki je od dne 1. januarju 1900. l. edina zakonita deželna vrednota. Njena računska enota je krona (K) po 100 vinarjev ali beličev (h).

Za deželne zlate novce ali zlatnike se kujejo:

a) dvajsetkronski novci, *b)* desetkronski novci.

Oboji zlatniki imajo v sebi po $^9/_{10}$ čistega zlata; iz 1 *kg* (novčnega) zlata kujejo po 164 dvajsetkronskih ali 328 desetkronskih novcev.

Za srebrne novce:

a) petkronski novci, *b)* enokronski novci (krone).

Za nikljeve novce:

a) dvajsetvinarski novci, *b)* desetvinarski novci.

Bronasti novci:

a) dvovinarski novci, *b)* enovinarski novci.

Izmed novcev avstrijske vrednote ostanejo, dokler se ne ukrene drugače, srebrni goldinarji v obteku; 1 gl. = 2 K.

Sedaj, ko so se iz obteka potegnile vse državne note in bankovci po 10 gl., 100 gl. in 1000 gl., ostane v obteku naslednji papirnati denar, i. t. nove note avstr. ogr. banke po 10 K, 20 K, 50 K, 100 K in 1000 K.

Razen téh se kujejo kot trgovinski novci:

a) Avstrijski cekini = 11 K 29 h, ki imajo v sebi čistega zlata po $986^1/_9$ tisočín. Na 1 *kg* novčnega zlata jih gre po 290·492.

b) Levantinski t. j. jutrovski ali Marije Terezije tolarji, ki kažejo podobo cesarice Marije Terezije in letno številko 1780, ter nimajo določene vrednosti.
