SECOND CLASS POSTAGE PAID AT CLEVELAND, OHIO

No. 109 Friday, July 18, 1975

Poskus politizacije Cerkve

Reški nadškof dr. Pavlišič je bil v začetku letosnjega leta v Argentini, kjer je obiskal svojega brata, pa se srečal tudi z raznimi ljudmi, zlasti s hrvaškimi izseljeniki, ter jin večkrat tudi govoril. Zaradi teh srečanj ga je komunistični tisk v Jugoslaviji ponovno ostro napadel. Na te napade je odgovoril verski list "Glas koncila", ki izhaja v Zagrebu, 8. junija 1975 pod naslovom "Primer Pavlišič — poskus politizacije Cerkve. Tu ga prinašamo v prevodu K. G. našim bravcem.

* * *

"Primer nadškofa Pavlišiča" vnovič polni časopisne stolpcu. Izrabljajo ga časniki in s tem izvajajo našo domačo katoliško Cerkve, da se "izjasni", da zavzame določena politična stališča.

Clovek ima vtič, da ne gre za to, da bi bil neki državljan SFRJ, ki je po svoji službi reški nadškof, klican na odgovor pred sodiščem, marveč da se želi speljati katoliško Cerkve v izrecno politizacijo.

Cudno je, da isti časniki, ki se — spričo načel, katera zastopajo in ki jih je ta družba že zdavnaj sprejela — zavzemajo za depolitizacijo Cerkve, zdaj naenkrat zahtevajo, naj se ta Cerkve s svojimi najodgovornejšimi predstavniki postavi kot forum, ki bi izrekal povsem določene politične ocene in mnenja.

Nadškof Pavlišič je kot član katoliške hiarhije obvestil svoje kolege škofe o svojem potovanju v dežele obeh Amerik. Toda škofovska konferenca napram nadškofu Pavlišiču ne more igrati vlogo sodišča, pa tudi on se ne želi skrivati za ugled škofovske konference. Nikaki časopisni članki in tudi ne protesti različnih skupin ne bodo katoliške Cerkve v naši deželi pripravili do tega, da bi igrala vlogo političnega foruma in da bi izrekala politična mnenja. Cerkve si ne lasti pravice nalagati svojim udom določena politična stališča ali pripadnost določenim političnim informacijam. Predočevati ji danes, da v preteklosti pri tem ni bila zmeraj dosledna, bi pomenilo pehati jo na staru poto, na katera se ne želi vračati.

V razgovorih odgovornih cerkvenih ljudi z odgovornimi predstavniki družbenega in državnega življenja v SFRJ so bila večkrat jasno izrečena in vzajemno sprejeta neka temeljna načela o vedenju katoliških funkcionarjev (škofov, duhovnikov, socialnih delavcev in drugih), ki se na svojih potovanjih po tujini srečujejo z ljudmi hrvatskega porekla in katoliške veroizpovedi in to ne glede na njih ideološko ali politično prepričanje.

Vse do sedaj se je zdelo, da je jasno, kako ti katoliški funkcionarji, ki iz te države odhajajo v inozemstvo in se vanjo svobodno vračajo, ne morejo v inozemstvu nastopati, kakor da so izvršni organi jugoslovenskih preiskovalnih služb ali sodišč.

Ljudje se tamkaj zbirajo okoli njih v glavnem pri mašah in raznih svečanostih v zvezi z mašami kot tudi na običajnih zakuskah po mašah. Prijahajo ljudje, ki se tam svobodno gibljejo, a katoliški duhovnik jim tam državljanovih pravic ne more jemati ali omejevati. Medtem ko se mu predstavljajo ali ga pozdravljajo, ni njegov posel raziskovati njihovo politično preteklost.

Ne glede na vsebin in ton njihovih priložnostnih govorov on kot pastor Cerkve izhaja iz dejstva, da se ti ljudje predstavljajo kot katoliki in Hrvati, pri čemer jih poziva, naj poglobijo in pravilno osmislijo zvestobo Cerkvi in ljubezen do domovine.

Že samo s tem jih navaja, naj opuste vsak ekstremizem, vsako mržnjo in maščevanje, naj vnovič premislijo dejstva in perspektive. Ko jih poziva k neprestanemu spreobračanju, jih opominja, da morebitne dosedanja zmorete ali napačni koraki ne smejo postati vzrok za okorelost, obup ali brezizhodnost; da nam je do zadnjega trenutka življenja dana možnost in naloga, zavzeti pravilnejše stališče.

Clovek namreč za živih dni lahko napravi mnogo napačnih korakov, je poražen v mnogih bitkah, ali najodločilnejša je "poslednja bitka", in to je zadnji dih življenja, soočenja v večnosti.

Ne vidimo, da bi bil nadškof Josip Pavlišič na svojem potovanju po Argentini storil kaj drugega. Tudi ko bi bil vse vedel o politični preteklosti ljudi, s katerimi je sedel za mizo, jih zagotovo ne bi bil odgnal od mize niti bi od mize sam bežal.

Naj se zdi to komu še tako neverjetno, človek, ki kot nadškof Pavlišič za časa vojne ni živel v Nezavisini državi Hrvatski, ni dolžan imeti v ušehim imena takratnih ministrov. Tudi nima nobenega misla analizirati besede, izrecne v priložnostnih zdravicih in jih tolmačiti tako, kot da so to vnaprej napisani teksti z dobro premišljenimi sintaktičnimi odtenki.

Razen tega se ne bi smelo pozabiti, da je nadškof Pav-

lišić eden tistih istrskih duhovnikov, ki so v najodločilnejših trenutkih resnično mnogo storili, da se Istra priključi Hrvatski v Jugoslaviji. Človek s takšno politično preteklostjo zares ni imel razloga niti tam v Argentini biti strahovno oprezen, niti ni imel razloga tehtati svoje besede, kot da bi jih izgovarjal pred sodiščem.

Tak človek ima tudi danes pravico pričakovati, da se tudi ta primer presoja v celotnem sklopu njegovega življenja, da se s tem primerom ne manipulira — zlasti ko je vse bolj očitno, da člankarji v VUS (Vjesniku u srijedu) ne nameravajo klicati na kazensko odgovornost njega, pač pa vrše težko razumljiv pritisk na našo domačo katoliško Cerkve.

nastop našega Miklavža (vsako li smo tri bralci pasijona, učeneto ga ima na skrb g. Rus), rajaranje angeljčkov, čudoviti nastop parkeljčkov napravlja leta za letom nepozaben vtis na tujce. Slovenska družina obhaja v kmečkom domu naš Božič: postavljanje jaslic, krasitev božičnega drevesa, molitev, kropljene in kajenje. Na mizi leži portnjk. Vsi v narodnih nošilih.

Družnica Antonia Gabra mi že nekaj let predstavlja slovensko družino, ki je pa vsakokrat krepko pomnožena. Vse dogodke na otru v lepi angleščini spremlija in napoveduje Lenčka Gregorič.

Te prizore so že filmali in oddajali na čikaškem TV pod imenom: Slovensi! Nato naše čudovite božične pesmi! Pevci so pod strokovnim vodstvom g. Fischingerja, g. Arka, ge. Humar! Matere pomagajo pri neprestanem oblačenju otrok. Prizor Božiča je vsako leto v režiji Metode Fischinger, prav tako v muzejski avli veliko slovensko božične drevo, pod katerim so jaslice in veliko božično voščilo v slovenskem jeziku. Smenakovredni med velikimi narodi.

MIKLAVŽ in njegov prihod v dvorano sv. Štefana. Letos kar takoj v nedeljo dne 8. decembra 1974, kakor v muzeju smo ponavili nastop sv. Miklavža z dodanim veličastnim prihodom v dvorano. Kot pozdrav je šolski pevski zbor zapel izbrane pesmi pod vodstvom g. Humar. Kot zastopnica velikih učenk je nastopila Magda Simryah, manjših pa Helanca Puc. Dostojanstveno je Miklavž predstavil dr. Lojze Arko. Vsa prireditve je bila v režiji Lig pod vodstvom g. Andreja Remca.

SLOVENSKA nedelja in sestanek 29. decembra 1974: V cerkvi božično krasno petje; na sestanku govor p. Vendelina, v katerem je bobil starš, naj doma ohranjajo slovenski jezik, s dolčovanjem podpirajo slovensko šolo in ohranjajo zvestobo slovenski fari.

SLOVENSKA nedelja in sestanek 26. januarja 1975: zelo lepa udeležba starš, naj doma ohranjajo slovenski jezik, s dolčovanjem podpirajo slovensko šolo in ohranjajo zvestobo slovenski fari.

SLOVENSKA nedelja in sestanek 29. oktobra 1974: zelo lepa udeležba staršev in mladine. P.

Tomaž je posvetil pridigo samo mladini. Ima izreden čut, kako govoriti in se približati otrokom. Na sestanku je p. Vendelin govoril o slovenskih vafikanskih oddajah. Sam je na njih govoril in sestavil več predavanj o cerkveni glasbi.

KOMEMORACIJA ob 15. obletici smrti škofa Gregorija Rožmanja v Lemontu 10. novembra 1974. Pri spominski proslavi je poleg p. Fortunata sodelovala slovenska šola in farni cerkveni zbor. Višja skupina šole je pod vodstvom Jožeta Rusa recitirala iz dr. Debeljakove "Crne mašo" odломek "Oče naš". Mlajša in srednja skupina sta za vse pokončile zrcilne ljubke otroške motilive. Pevski zbor je občuteno zapel koroško "Rož, Podjuna, Zila." Zaradi slabega vremena je samo zastopstvo odraslih in otrok odneslo na grob slovenski šopek in ga položilo na grob našega škofa.

SLOVENSKA nedelja in sestanek 24. novembra 1974: p. Tomaž je pristopil prav k mladini (je v sprednjih klopetih na desni strani) ter ji govoril o hvaležnosti do Boga in staršev. Na sestanku je ga Krista predstavila najmlajša učenke srednje skupine. V večini nevezani besedi so povedali, kaj vse so se naučili. Zelo posrečen je bil nastop vnučkov ge. dr. Puceve, ki je izvrstna njihova učiteljica in idealna stara mama.

CVETNA nedelja 23. marca 1975: slovensko slovenska z butaricami in v narodnih nošilih. Pravi praznik za slovenske otroke in njihove starše! Blagoslovitve butaric in palm v malih dvoranih, nato procesija v cerkev.

Slovensko šolo smo zaključili s piknikom v Lemontu na prvo soboto v juniju, na katerem so zopet starši nosili "težo dneva". Ana Gaber

**Euclidski upokojenci
živahni in delovni**

EUCLID, O. — Mesec julij je prinesel pravo vročino. Žito zori in težko klasje rizi in pšenice se lahko zible v vetru... Spomini uhajajo v mladostna leta, ko smo dekleta doma še ob luninem svitu žela, fantje pa so nam brusili srpe. O, čas beži, beži!

Klub vročini je bila seja Kluba slovenskih upokojencev v Euclidu dobro obiskana. Poleg humorističnega predsednika Johna Kauseka, ki ima v ciklbi izlete v Slovenijo. Tudi naša podpredsednica Ann Mrak ne zaostaja. Ona skrbi za izlete naši bližnji in daljni oklici. Sedaj pripravlja izlet v Enon Valej, Pa. Najete ima tri avtobuse in za vse ima že dovolj potnikov. Včasih se zgodi, da kdo zaradi bolezni ali drugih nepredvidenih vzrokov ne more na pot. V takem slučaju je mogoče vzeti s seboj koga, ki bi moral sicer ostati doma. Kličite torej Ann Mrak, tel. 531-0083, če se zanimate za ta izlet! Avtobusi bodo odpeljali izpred SDD na Recher Avenue 13. avgusta ob 9. dopoldne.

Na julijski seji je bila navzoča najstarejša članica kluba Mrs. Plemel, ki živi sicer v Florida, pa je bila tu na obisku. Doživelja je že 96 pomlad... Prav tako sta bila med nami Mr. in Mrs. Kebe iz Floride. Vsem želimo, da bi se dobro imeli pri svojih sorodnikih in med nami!

Na julijski seji je bila navzoča najstarejša članica klubu Mrs. Plemel, ki živi sicer v Florida, pa je bila tu na obisku. Doživelja je že 96 pomlad... Prav tako sta bila med nami Mr. in Mrs. Kebe iz Floride. Vsem želimo, da bi se dobro imeli pri svojih sorodnikih in med nami!

Na julijski seji se postavijo, ko mečajo krogle. Nekateri so načrtnost odlični. Proti koncu polje bodo imeli likof s kisolom.

Na julijski seji je bilo sprejetih 11 novih članov, v juniju pa so nam umrli John Cernelic, Francis Kog, Frank Kondric, J. Debeljak in Elizabeth Mihelich. Naj jim bo lahka ameriška grudalna.

Naš klub ima sedaj skupno 890 članov in članic. Vsekakor velika družba!

Mary Bozich

IZ NAŠIH VRST

San Francisco, Calif. — Sprejanje uredništvo! V prilogi pošiljam enoletno naročino za zelo priljubljeni list "Ameriška Domovina", katerega vsi z veseljem prebiramo. Dodajam dva dollarja za Vaš tiskovni sklad z željo, do nadaljnega uspeha.

Uredništvo in vsem bralcem lista iskrene pozdrave. Z odličnim spoštovanjem!

Družina Turk

*
Ambridge, Pa. — Spoštovanji! Friložen Vam pošiljam poštno nakaznico v znesku 28 dolarjev in sicer za obnovo naročnine in dar v podporo listu, ker vem, da imate ogromne izdatke v tej veliki draginji.

Jaz sem dolgoletni naročnik Ameriške Domovine, katero vedno prebiram z velikim veseljem in zanimanjem. Veseli me tudi, da list piše v pravem slovenskem in katoliškem duhu. Res je, da prihaja z zamudo, a to ni Vaša krivda, zato me to ne vnemirja.

Ne zamerite moji slabli pisavi, sem 83 letnik in že šest let bolzen, tako, da se mi roke tresejo.

Uredništvo, upravi, vsem sodelavcem in naročnikom moj najlepši pozdrav in vse dobro v bodoče!

George Pavlešić

Paterson, N.J. — Pošiljam ček za naročnino, kar je več, je za tiskovni sklad. Zelo so mi všeč dopisi s. Lavoslave in želim, da bi jo Bog še dolgo ohranil. Tudi "Totega Štajerca" rada berem. Zanimiv so misijonski pomenki. Želim listu veliko dobrih dopisnikov in sodelavcev ter vse či tatelje AD lepo pozdravljam!

Marija Stojaković

BESEDA IZ NARODA**Slovenska skupnost v Chicagu strnjena
okrog šole in fare**

Chicago, Ill. — Svoje delo smo dobri raznašalci vabil, kajti pred poletjem uradno zaključili starši so radi prihajali z njimi 22. junija na sestanku, katerega "še" v nedeljo v Chicago. Nato se udeležili zastopniki učiteljev več naših družin ali že skoraj slovenske šole, Lige slovenskih Amerikancev in staršev.

Po načrtih za prihodnjo leto, po pogostitev, za kavo, domače p

činec in klobase. Že nekaj let vse leto skrbele za učencev so vse leto skrbele za

brez vsakega pritiska; letos smo imeli prostovoljke: Marija Remec, Vera Gregorič, Mara Martinčič, Anka Krivograd. Rade so

na domestovale: Ivanka Buh, Nežka Gabor in učenke višje

skupine. Očetje in fantje se pripravili dvorano. Vse kar ne

moremo imenovati, saj jih sami

MISIJONSKA SREČANJA IN POMEMKI

266. Tajnik Frank Rozina

je iz Milwaukeeja poslal 17. junija tole vabilo: "V imenu misijonskega krožka v Milwaukeeju Vas prijetljivo vabim na naš misijonski piknik, ki se bo vršil dne 20. julija t.l. Istočasno pa Vas tudi lepo narošam, če Vam bi bilo mogoče za to priliko darovati sv. mašo v Triglavskem parku pri kapeli ob 11 do poldne in za to imeti priložnosti govor, kakor ste to že storili vsa druga leta nazaj. Ostali spored dneva bo isti, kakor smo jih imeli do sedaj. Z go. Mici Coffelt sva mnenja, da bi po pikniku imeli razgovor o zadevah, ki zadevajo ostalo krožko - delovanje in načrte zanaprej.

Pred nekaj časa sem poslal glavni tajnici poročilo o delovanju našega krožka v Milwaukeeju, kjer je na kratko navezeno vse delovanje od začetka do danes."

Vsa poročila raznih misijonskih odsekov in krožkov, kot jih sodelujoči posiljavajo, bodo polagoma objavljena v enem listov, ki MZA gibanje priporočajo.

Gornje vabilo je prislo malo prepozno, da bi mogel rezervirati to nedeljo za svoje počitnice. Pa drugo leto, če bo Bog dal življenje v piknik omogočil. Vemo, da bo pionir dr. Jože Gole rad vskočil in misijonsko ogrel žejna srca rojakov. Pa tudi o. Klavdija OFM mis. ljubezen nismo pozabili, ko je na prvem mis. pikniku izročeno mu mašno nabirkovo vrnili in dejal: "Danes je v Triglavskem parku vse za naše misijonarje. Vsak pennes, ki pride notri, na kakršen koli način." Fara ni nič trpela. V duhu se celotna MZA raduje, da bo Milwaukee zopet dal lep zgled sodelovanja. Posnemajmo in za njih delo molimo!

Nenadno je hudo zbolela

s. Anica Miklavčič in prosi za molitev iz bolnice v prestolnici Taipei na Formozu. Zelo je hvalježna za vso pomoč od naše MZA, posebno od Mrs. Agnes Leskovec. Poslali smo ji \$5, dar g. Stankota Mraka, iz Gary, Indiana.

Misijonar Silvo Česnik je 2. julija priletel v Pariz. Predčasno že se je odločil, da vstopi k francoskim Lazaristom za malgško provinco, napravi novicijater se jim pridruži za delo na otoku. No, novicijat je sedaj samo eno leto. Preje smo moralni svetni duhovniki, ki smo vstopili, skozi dve leti novicijata. Gospodu Silvotu, ki je dobro zastavil pionirske delo na otoku Madagaskar, želimo zdravja, uspeha in uslušanja vseh želja, ki jih ima.

Misijonsko pismo št. 7, z dne 18. aprila, od Medškofijskega misijonskega odbora v Ljubljani (V. Fajdiga), omenja med dopisujoci misijonarji dva, ki smo zanje prosili za naslov in nimamo še v MZA z njima stikov: g. Janez Mihaelčič, letoski novomisnik iz Japonske, in s. Magdalena Črne, ki jim je poročala o pionirskem delu za novo bolnišnico iz Slonokoščene obale v Afriki. S. Goretti bo poslala naslova. Čim dobimo več informacij, bomo o teh izčrpne poročali.

Miss Alenka Štipičevič iz Clevelandu je nedavno darovala \$7 za enoletno naročino petkove AD kakemu misijonarju. Tako uprava AD po ge. Lavrisha sporoča in bo kmalu uporabljen, ob novi potrebi.

Usmiljenka Cecilia Prebil, ki smo ji dali od našega St. Joseph's Mission Crusade Unit \$50 za potrebe naših misijonark in misijonarjev na Madagaskarju, je bila poklicana k umirajoči materi v domovino. Molimo za obe! Tuk pred odhodom je dala \$51 iz daru g. Albina Lipolda, v spomin rajne žene Marion, s. Katarini Jančar, da si je nakupil svetinjice in spominke v Parizu za sestre doma.

Mimo moje redne nedeljske

PREDSEDNIK FORD PROGLASIL DAN MOLITVE

Washington, D.C. — Predsednik Gerald Ford je progglasil 24. julij za ameriški Dan molitve v letu 1975. Predsednik Ford je v svojem proglašu Amerikancem priporočal, da svoje molitve posvetijo "Velikemu vladarju sveta" in Ga prosi, da ohrani edinstvo države in zavaruje državljanke in verske svoboščine.

V svojem proglašu za Dan molitve je predsednik Ford Amerikancem polagal na srce: "Ko začenjam prostavljanje 200-letnice neodvisnosti naše države, je več kot prav, da podarimo, da je bila predvsem globoka vera v Boga, ki je navdihnila in dajala pogum ustavniteljem naše države. Pred 200 leti, to je 12. junija 1775, je dru-

gi Kontinentalni kongres pozval prebivalce kolonij, da se ob dolochenem četrtek v juliju združijo v "ponižnosti, postu in molitvi". To je bil naš prvi Dan molitve!"

Predsednik Ford je izrazil upanje, da ob 200-letnici neodvisnosti Amerikanči ne bodo pozabili, da je bila molitev tista, ki je pomagala oblikovati naše svoboščine in dajala pogum v borbi za dosego državljanških pravic.

Predsednik Ford priporoča vsem Amerikancem, da na Dan molitve vsak po svoji veri in na svoj način moli za enotnost in se zahvali za blagodejnosti svobode v naši deželi in za mir po vsem svetu.

NOVOMAŠNIK BOD' POZDRAVLJEN!

Euclid, O. — S to slovensko cerkveno pesmijo te slovenska skupnost fare sv. Kristine sprejema v svojo sredo. S Teboj se združujemo ob oltarju, ko boš med nami ponovil daritev sv. Mašte. S Teboj se bomo Njemu zahvaljevali, da Ti je dal milost duhovništva. S Tvojo prošnjo prosimo Njega, naj Te okrepi v vztrajnostjo in daje pomoč, da bo Tvoja služba Njemu v čast in dala rast setvi Tvoje besede; da bo pritegnila tisto ljudstvo, ki Ti bo zaupano, da ga pripelješ k dobermu Pastirju. Zato Ti kličemo: Bog Te sprejmi in bla-goslov!

V osmem psalmu starozavezni navdihnjenec božji vprašuje: ... "le kaj je vendar človek, da se ga spominjaš; kaj otrok človeški, da skribiš zanj?" Ustvaril si ga malo nižjega od angelov, s slavo in častjo si ga ovenčal, dal mu oblast nad deli svojih rok, vse si podvrgel njegovim nogam." (Psalm 8, 5-7). Ko psalmist primerja ostalo stvarstvo, se upravičeno zaveda, kakšna razlika loči človeka od drugih živilih bitij — spoznava, kako velik je človek.

Kako bi pa v tem primeru se izrazil božji pevec, če bi živel v novi zavezi, ko se obnavlja in nadaljuje do konca časov nedoumljiva skrivnost, da na duhovnikovo besedo, ko posvečuje kruh in vino, se izvrši Spremenjenje. To nam je veliki mislec sv. Tomaža Akvinskega (1224-1274) tako globoko pesniško izrazil v himni: "Hvali Sion Rešenika!" V 24 kriticah pesmi nam je predcič ta čudež, kar navedem le v nekaj kriticah:

Kar tedaj je Kristus storil, "to" — učencem je govoril: V spomin naj se vrši!

Naročilo se spolnjuje, kruh in vino se daruje za rešenje vseh ljudi.

Vera nas uči kristjane, kruh tedaj meso postane, vino spremeni se v kri.

Vid in um ne izmodruje, živa vera potruje: nadnaravne so reči!

Te podobe raznolike, skrivajo reči velike v znamenjih, a ne v stvareh.

V tem nam je strnjeno vse dostojanstvo, ki ga je Kristus dal duhovništvu.

V 15. poglavju nam je sv. Janez Evangelist ohranil božjo besedo s prispolobo Kristusa kot vinska trta. Nedoseženo

Vsem številnim dobrtnikom, ki vedno znova skušajo pomagati vsem našim misijonarjem, naj Bog žrtve milijonkrat povrne! Ne pozabimo v počitnih dneh, ko si vsak običajno malo več privošči, darovati del razpoložljivega za naše misijonarje. Če le mislimo na to, bodo naše počitnice vedno kombinirale prijetno s koristnim.

Rev. Charles A. Wolbang CM St. Joseph's College Box 351 Princeton, N.J. 08540

Tiskovni sklad A.D.

MALI OGLASI

NAPRODAJ hiša za eno družino, 6 sob, 1½ kopalnica, dvojni garaža, blizu cerkve Marije Vnebovzetje v Collinwoodu. Kličite 541-2965. (109)

2 hiši naprodaj Ena dvodružinska in ena enodružinska, ograja vseokoli, vse prebarvano, se lahko takoj vselete. Kličite 361-0763. (109)

OB OSMI OBLETNICI ODKAR JE V

JANEZ JALEN:

BOBRI
 Prva knjiga
SAM
RAZGLELDNI HRAST

Spomlad je razvila zemljo. Pred dobrimi tremi lunami so južni vetrovi razlomili nepregledno planjavo ledu na obsežnem jezeru v neštečem plošču. Zgornje so gazi, ki so vezale med seboj posamezna količica, spajale otoke s celino in vodile vsevprek, po dolgem in počesu, da se je videl z razglednikov današnjosti Ljubljansko barje kakor velikanska, redko pletena mreža, pripeta z mogočnimi hrasti, višokimi jelkami in še z raznimi vrstnimi drugim drevjem na obkrožajoči obod hribov in gora naokrog. Ogrevajoča se voda je večino plošč raztopila, dokaj pa sta jih noč in dan bučeči vetter in komaj zaznavni tok zgnala proti mrzli strani in jih nagradila v tesni, skozi katere se je jezero mimo strmo odsekalo, nato pa razlivači se Reki proti belim prodrom deroče. Save. Voda v jezeru je narasla do kolov, na katere so bile postavljene koče, in je pricela upadati.

CAN YOU SPARE AN HOUR FOR YOUR SENIOR SLOVENIANS?

Many volunteers are needed at the Slovenske Home for the Aged, 18621 Neff Rd.

Now in the summer people are needed to help with crafts between the hours of 1:30 and 4 p.m. — Any day.

Volunteers are also needed in other areas — a few hours a sebno tem v pogubo so se v gozduh. Anyone wishing to help can choose from assisting with clerical work, reception, crafts, and other desperately needed areas.

Some women are planning to organize an auxiliary with the purpose of donating a few hours of time at the Slovenske Home for the Aged. The Home is desperately asking for any help you can give.

If interested, or for more information, call Dorothy Urbanich or Madeline Debevec at 531-0989.

"Won't you donate a few hours of your time for people who need you very much?"

"We need your smile, we need your help, we need your skill, we need you," says Mrs. Debevec.

PETNAJSTE OBLETNICE SMRTI MOJEGA LJUBLJENEGA SOPROGA

JOHN JERAJ

ki je umrl 18. julija 1960

Let petnajst Te zemlja krije, truplo Tvoje v grobu spi, pri meni pa žalost je velika, ker Te več pri meni ni.

Tvoja žalujoča soproga MARY JERAJ
FRANCISCA LOGAR, sestra v Sloveniji

Cleveland, Ohio, 18. julija 1975.

jali vrh pred kratkim ozelenega orjaškega hrasta na robu stremo odsekanega hriba nad odtokom plitvega jezera. — Stolp ljubljanskega gradu stoji dandas tam. — Iz goščave je priletel pepelnatosiv, črnkasto progast in belo pikast ptič, sedel na suho vejo in zakukal v jasno, odnočne nevihte izprano jutro.

Na široko izsekano jaso okrog razglednega hrasta je hotel pravkar stopiti po obrazu šele na kratko obraščen moški, kateremu so bili konec lanskega poletja količarji vzeli ime Ostrorogi Jelen. Poprej so mu bili rekli Flamenolasec. Zaustavljen je boso nogi in se prikril. Iza leskovega grma je dolgo opazoval, kako se je prepevajoči ptič na veji sukal, se obračal na vse strani in skušal privabiti samico.

... Kuku, kuku, kuku, kuku, kuku gugugugu, je skončal samec in kakor reparski skobec odletel s hrasta onstran jase, kjer se mu je bila dražljivo zahihitala kukavica. Začel je pridruženo naglo vabiti, gugugava, samica se mu je pa nagajivo posmehovala in se mu umikala, da ga še bolj razvname. In ni odnehala, dokler ni priklicala nič manj uživanja željnega tekmece. Sama se je brž spreletela na drugo drevo, oba samca sta se zapodila za njo, kdo jo prej dobiti. Strastna tekma je privabilo tudi dokaj drobnih ptic. Zaletavale so se kar, v vse tri kukavice od kraja, kakor bi

OSME OBLETNICE — ODKAR NAS JE ZAPUSTILA NAŠA LJUBLJENA SOPROGA MATI IN STARA MATI.

Marija Gorše

ki je umrla 18. julija 1967. leta.

Leto za letom se v večnost izliva, in težke ločitve spomin se budi!

Ljubezen do Tebe pa vedno je živa, v vsem našem življenju kot lučka gori!

Zalujoci:

SOPROG in OTROCI ter OSTALO SORODSTVO Cleveland, O. 18. julija 1975.

hotele ubraniti, da bi bilo vsaj eno tujej jajce manj vtihotljeno v njihova gnezda.

Razburjeni glasovi in nagli frfot perutnic sta se oddaljila in utihnila. Iz grmovja pa je stopil na jaso visokorasi Ostrorogi Jelen. Kakor od brona so se oddali sončni žarki od njegovih mišičastih rok in širokega golega hrba. Na temni kozlovini okrog ledij pa so se zalesketale rosne kaplje, ki jih je bil mimo grede utri raz listje v grmovju. V soncu se je zasvetlikala konica dolge sulice. Iza pasa mu je gledal roževinast ročaj bovala. Ob stegnu mu je opletala kamnitka sekira. Prek hrba pa sta visela lok in tul.

Ostrorogi je obstal, razširil svoja mlada prsa in globoko vdihnil gozdni zrak, kakor bi hotel preizkusiti njegove vonje. Ozrl se je naokrog in prisluhnil na vse strani. Nič. Le pesem ptičev je donela raz drevje in grmovje.

Jelenu se je obraz razjasnil. Znova je pogledal v vrh hrasta, kakor bi si želel, da mu preroški

12. OBLETNICE SMRTI NAŠE NEPOZABNE SOPROGE MATERE, STARE MATERE IN TASCE

Marian Debevc

ki nas je nenadoma zapustila 19. julija 1963.

Pogrešamo ljubeči Tvoj smehljaj in dobrotno Tvoje srce, ki je tako ljubeče bilo za nas, zaman se oziram, kje bomo zagledali Tvoj obraz.

če bi ljubezen odločila in solza mrtve obudila, ne krila Tebe bi gomila.

Ti se je, Gospod, usmili, ljubi Ježus, Ti ji daj rajski mir na vekomaj.

Zalujoci:

soprog ANTON; sin TONY Jr.; hčere: MRS. DANNY ZUPCSAN, JULIA GRABELSK in AGNES BEEBE; sestra MARY KRALIC; brat LOUIS GERMEK; ZETJE, VNUKI in VNUKINJE ter OSTALO SORODSTVO. Madison, O. 18. julija 1975.

Vi trdo delate za svoje prihranke Mi trdo delamo za njihovo varovanje

V negotovih časih, kot so sedanji, hočete biti posebno gotovi, da so vaši prihranki varni. V Cleveland Trust je vaš denar tako varen, kot le more kje biti, ker je Cleveland Trust ena največjih v najbolj varnih bank.

Vaš denar je popolnoma zavarovan po Federal Deposit Insurance Corporation do \$40,000. S povezavo nekaj različnih načrtov lahko mož in žena povečati to zavarovanje do \$200,000. Na primer: vsak ima svoj poseben hranilni račun, kar jima daje zavarovanje za skupno vsoto \$80,000. Skupna vloga lahko doda novih \$40,000. Vsak lahko vzame tudi še račun, izplačljiv ob smrti, kar spravi skupno zavarovanih vlog na \$200,000.

Če ma torej ne bi odprli pri bližnjem uradu Cleveland Trust svojega hranilnega računa? Nudimo vam redne hranilne knjižice z brezplačnim čekovnim računom in z dnevnim obračunavanjem obresti, če imate na njem stalno \$500 ali več. Imamo tudi druge hranilne načrte z dnevnim obračunavanjem obresti. Taki so dohodinske in vložbene hranilne knjižice in vložbeni certifikati.

COMING OF SPACE AGE

(The author, 14, is a student at Park Tudor school in Indianapolis, Ind., and the daughter of Virginia Kenick (from St. Vitus), and the granddaughter of Prof. William Kenick.)

By TAMSAN BEATTIE

As long as man has existed, man has also wondered about the stars and space. We've come such a long way since R. H. Goddard launched his first rocket, and we have such a long way to go!

The period from 1920 to the present is called the Space Age (although some like to say it began with Sputnik I). But I feel that Charles A. Lindbergh helped greatly in the evolution of the rocket, but of course Robert H. Goddard was the one who invented the rocket. When a little gadget that resembles a Judge Ralph S. Locher whose record for helping Slovenians and all peoples really surpasses.

Another little thing is that attached to each container is a little germicide tablet, and whenever an astronaut is eating, he must put the tablet inside the container to prevent rotting.

For water each astronaut has invented the rocket. When a little gadget that resembles a gun and when the trigger is experiments, he persuaded a pressed water squirts out, the friend of his to give Goddard \$25,000 a year to continue his work on rockets.

Many of our rockets today are very much like the ones that Goddard experimented with. At first Goddard used gunpowder for the rocket's power, but he found, however, this did not work too well! Then he switched to a mixture of gasoline and oxygen, and found that when using proper amounts of each, this combination worked very well.

Space travel involves many problems, one being the hostile environments of outer space. Man needed to take with him the water he drinks; the air he breathes; the food he eats; and his own pressurized space suit to protect him from the wrong pressures, and radiation, from germs and diseases, and from extreme temperatures.

The astronaut can adjust his spacesuit to any temperature that he pleases. The suit is also pressure inflatable in case of a puncture in the craft. Oxygen is constantly being pumped into the spacesuit for the astronaut to breathe, there are several extra tanks of oxygen on hand if they are needed. Inside the suit are many different little instruments to measure the astronaut's heartbeat, blood pressure, etc.

On the spacecraft are all kinds of gadgets, mirrors, zippers, fasteners, straps, and pockets. Some suits weigh as much as 25 pounds! Also since the space suit lets no oxygen out, it lets no strange germs in.

Another problem was the problem of carrying enough fuel to send rockets for long distances. The fuel used today, eat in space. It was reported is roughly the same as Goddard that one of the astronauts broke Goddard's idea that the flight because of little droplets more fuel which is used up, the of orange juice kept floating lighter the load becomes. The around.

Before Shepard was sent up, NASA sent up a monkey named Ham. That monkey had a very rough time, when his spacecraft landed, he came out of it screaming! The next time he was shown a spacecraft, he bared his teeth and would go no where near it!

John Glenn almost had an extremely HOT ride!! When Glenn came back into Earth's atmosphere the heatshield, on the bottom of the capsule, which keeps the capsule from burning up when coming for a splashdown, came loose. Or at least the scientists at home thought so. But John Glenn was very lucky and he made it. He said after he landed: "That was a real fireball, boy!!!"

There is one type of food

called Freeze-dehydrated Food. This food has all water removed, and it is vacuum packed in special containers. A prescribed amount of water is added to the food in the container, and it is shaken up. Then the astronaut may eat it directly from the tube on the container, since there is no gravity, this prevents the food from floating around.

Another type of food is cubed food, which is freeze-dried and these can be eaten just in cube form.

Another little thing is that attached to each container is a little germicide tablet, and whenever an astronaut is eating, he must put the tablet inside the container to prevent rotting.

Or at least the scientists at home thought so. But John Glenn was very lucky and he made it. He said after he landed: "That was a real fireball, boy!!!"

There is one type of food

called Freeze-dehydrated Food. This food has all water removed, and it is vacuum packed in special containers. A prescribed amount of water is added to the food in the container, and it is shaken up. Then the astronaut may eat it directly from the tube on the container, since there is no gravity, this prevents the food from floating around.

Another type of food is cubed food, which is freeze-dried and these can be eaten just in cube form.

Another little thing is that attached to each container is a little germicide tablet, and whenever an astronaut is eating, he must put the tablet inside the container to prevent rotting.

For water each astronaut has invented the rocket. When a little gadget that resembles a gun and when the trigger is experiments, he persuaded a pressed water squirts out, the friend of his to give Goddard \$25,000 a year to continue his work on rockets.

Many of our rockets today are very much like the ones that Goddard experimented with. At first Goddard used gunpowder for the rocket's power, but he found, however, this did not work too well! Then he switched to a mixture of gasoline and oxygen, and found that when using proper amounts of each, this combination worked very well.

Space travel involves many problems, one being the hostile environments of outer space. Man needed to take with him the water he drinks; the air he breathes; the food he eats; and his own pressurized space suit to protect him from the wrong pressures, and radiation, from germs and diseases, and from extreme temperatures.

The astronaut can adjust his spacesuit to any temperature that he pleases. The suit is also pressure inflatable in case of a puncture in the craft. Oxygen is constantly being pumped into the spacesuit for the astronaut to breathe, there are several extra tanks of oxygen on hand if they are needed. Inside the suit are many different little instruments to measure the astronaut's heartbeat, blood pressure, etc.

On the spacecraft are all kinds of gadgets, mirrors, zippers, fasteners, straps, and pockets. Some suits weigh as much as 25 pounds! Also since the space suit lets no oxygen out, it lets no strange ger

THE COMING OF THE SPACE AGE

(Continued from Page 5)
The next project of NASA's was the Gemini Program. Now two men were sent up instead of one.

Gemini space crafts sent men up to orbit Earth for as much as 220 orbits. In fact Borman and Lovell set the record, 220 orbits. It took them 330.6 hours! Gemini also sent up some regular satellites. One satellite blew up six minutes after launching, good thing men weren't in it!

Now we come to the most well known projects: Project Apollo. Project Apollo began making lunar orbits, then Apollo 11 made a lunar landing with astronauts: Neil Armstrong, Michael Collins, and Edwin Aldrin.

Apollo Project began with the Apollo test crew, which consisted of V. Grissom, E. White II, and R. Chaffee. Unfortunately all three were killed aboard the command module on January 27, 1967 during a rehearsal count-down.

After the test crew came Apollo 7, which circled the earth for seven days. Then Apollo 8 became the first spacecraft with humans of earth to escape the earth's gravity!!! Then came the first space walk made by R. L. Schweißkert of Apollo 9.

Six years ago on July 20, 1969 Neil Armstrong became the first human ever to set foot on another celestial body!!!!

Jumping to Apollo 15, we have the first "moondrive" ever! The astronauts covered 17 miles in moonrover. Apollo 17, the last Apollo took the first geologist-astronaut to the moon.

SKYLAB

Skylab, the U.S.'s first space laboratory orbits the earth.

Skylab was launched from Cape Kennedy, Florida on May 14, 1973. The first Skylab crew was to be launched the next day...but!...a problem arose. Skylab had barely been launched when a thin aluminum shield tore off as the station roared through the atmosphere! This caused two major problems. One, it disabled the two solar wings which were to provide Skylab's electricity, and second, the aluminum was to reflect the sun's intense rays.

Without the shield, Skylab would be terribly overheated and unbearable to live in!

Finally 11 days later on May 25, the first crew took off and docked with the Skylab. They amazingly fixed everything up

IN LOVING MEMORY
ON THE FIRST ANNIVERSARY
OF THE DEATH OF
MY HUSBAND AND
OUR BROTHER

JOHN CERNE

who passed away July 19, 1974

God saw you getting weary,
He did what he thought best.
He came and stood beside you
And whispered, come and rest.

You bade no one a last farewell,
Or even said goodbye.
Our hearts still ache with sadness
Our eyes shed many a tear.

God alone knows how we miss you.

Rose, nee Macerol, loving wife,
Michael and Stephen, brothers,
Mary and Joan, sisters
Other surviving relatives.

Lorain, Ohio, July 18, 1975.

Eckart skips mayor race runs Council-at-large

and went into the lab. They were up there for 28 days, splashdown on June 22.

On July 23, the Skylab III crew was launched. They stayed in Skylab for a record-breaking 59 days in space!!! They orbited the earth 858 times! And they brought back 77,000 photographs of the sun!!!

The crew also took two spiders, Anita and Arabella. These spiders at first were very confused over the lack of gravity, but they soon adjusted and began to spin their webs as usual.

And Skylab IV mission was to be a whopping 84 days. This time Dr. Edward G. Gibson, a solar scientist was launched to Skylab (along with the regular astronaut group), on Nov. 16, 1973.

PIONEER 10

Pioneer 10, an unmanned spacecraft, was launched on March 2, 1972. On December 3, 1973 Pioneer flew within 81,000 miles of Jupiter, and sent back dazzling color pictures and volumes of data. Pioneer had journeyed 620,000,000 miles before it reached Jupiter!!!

By 1980, if the craft continues to function, it will have become the first spacecraft ever to leave our solar system!!!!!!

SUMMARY

For many years we were behind the U.S.S.R. in space developments. The race began on October 4, 1957 when the Russians sent up their first Sputnik.

This event made U.S. scientists sit up and worry very much! It was known that Russia was having much greater success with their rockets. So all of Goddard's suspicions about rocket progress in foreign countries came true. If people had only listened to him sooner!

Then a month later the Russians launched their second Sputnik. Americans became bitterly upset and disheartened! Especially since this time in the Sputnik was a live dog named Laika. But finally 2 months later we launched our first satellite, which weighed three pounds and it was 6 inches round. The head of Russia dismissed it as a grapefruit.

However, this little satellite was very complicated and it could perform many things that the Russian satellites could not. And ours was predicted to stay in orbit for 2,000 years but the Russian satellite could stay in orbit only a few months.

A few weeks after Ham, the monkey returned, Russia sent their first man into space. His name was Yuri Gagarin!

We did catch up though, we became the first country to land a man on the moon!! And as far as I know the Russians still have not landed anyone on the moon!

Wait 'till 8 urges CEI

"Wait 'till 8!" That is what the Illuminating Co. (CEI) is urging its residential customers in a new educational campaign to put off the use of electric appliances until after 8 p.m. whenever possible!

The company began the campaign July 7 to spread the heavy daytime demand for electricity over more hours. CEI said the effort could help reduce the future cost of electricity.

Arthur M. Merims, CEI manager of public information, said the greatest demand for CEI electricity is between 9 a.m. and 8 p.m. The peak hours are 1 to 3 p.m. Electricity use gradually tapers until 8 p.m. when there is a sharp decline until the next morning.

Merims also said CEI has no plans to change its rate structure in the near future to include peak pricing. Vermont is the first state to use peak pricing. ('Peak' demand refers to those times when people use electricity the most.)

Eckart skips mayor race runs Council-at-large

In a surprise development, Euclid Councilman Edward J. Eckart revealed a letter that he sent to Councilman Frank Takacs in which Eckart announced he would not be a candidate for Mayor but would instead seek re-election to his Council-at-Large post. He will run as a Democrat.

In the letter, Eckart stated that one of the basic reasons for making his decision was the fact that he had commissioned a poll which showed that all three mayor candidates were within a total of five percentage points.

Eckart added that attempts were made to solidify the mayoral picture, but were unsuccessful, and that the net results of such a situation would be the election of a Mayor actually elected by a minority of the voters, who thus would not truly represent all the people of the city.

"I view this as unfortunate," Eckart said. "Such a mayor's race could only serve to further divide a city at a time when unity will be our only saving grace."

The poll, which was conducted by a private agency, contacted 762 registered voters throughout the city during the period of June 30 thru July 9.

The respondents were selected at random from the registered voters in the city according to their respective parties and wards. The poll revealed that undecided in the mayor's race ranged from 45% to 61% in different areas of the city, which is in excess of what is considered a normal undecided percentage at this time.

On the issue of party identification, only 30% viewed the importance of party label as "very important." This is in comparison with the 55% plus of the registered voters who are registered by party.

On the Briardale issue, homes compared to a golf course were preferred by the startling range of almost 2 to 1, and by a better than 3 to 1 margin the voters of the city rejected the expenditure of any city funds for the study of a golf course.

Eckart stated that the poll vindicated his position on the development of homes for the vacant Briardale property. He said that he intends to make that a campaign issue.

In Eckart's letter to Takacs, Eckart indicated that he would run on his record and that the two of them would continue to serve the best interests of all citizens.

Flamethrowers kill bees

A swarm of African bees killed a schoolteacher in the northeastern city of Aracaju, Brazil, and firemen had to use flamethrowers to fight them off.

African bees were brought to Brazil by a genetics professor in 1956 for experimental purposes. Some of the insects escaped and cross-bred with Brazilian bees, producing an irritable hybrid that attacks animals and people.

The killer bees have spread into neighboring Argentina and Bolivia. Scientists say they are likely to continue migrating north, reaching the United States within 10 years.

54 wedding anniversary

Mr. Frank and Frances Plemel, 19612 Kildeer Ave., will celebrate their 54th wedding anniversary Sunday, July 20.

Dues collection

On Friday, July 25th, dues will be collected for St. Mary Magdalene Society No. 162 KSKJ in St. Vitus Church Hall from 5:30 to 7:30 p.m.

News from around town

★ Mrs. Frank Znidar, 15606 Holmes Ave., has returned home from the hospital and wishes to thank everyone for visits, cards and gifts. She is still under the doctor's care. We wish her a speedy recovery!

★ Visiting Mrs. Antonia Mihevc, 1135 E. 60 St., are her nephew Bert Miklavec and his wife, Linda, who came here from Slovenia. Welcome!

★ At the St. Vitus festival, the following received awards: \$1,500 Joseph Zelle, 1227 Addison Rd.; \$1,000 Mrs. Marie Kolegar, 17930 Windward Ave.; \$500 Don Avsec Sr., 6128 Glass Ave.; \$100 Mrs. F. Novak, 1172 Addison Rd., Mrs. Mary Staric, 1214 E. 61 St., J. Drobni, 917 E. 73 St., E. Turk, 17822 Brazil Rd., Miss Suzanne Lukanc, 217 Courtland Blvd. A first night recipient was Mrs. Mary Kozel of E. 61 St., who received a summer chair.

★ Mr. and Mrs. Victor Derling of Madison, Ohio, celebrated recently their 35th wedding anniversary. Congratulations and wishes for many more happy and healthy anniversaries!

★ Tonka Urankar, 19409 Mohican Ave., has returned from St. Vincent Charity Hospital and wishes to thank everyone for visits, cards and gifts. She is still under the doctor's care.

★ Mr. and Mrs. Joseph Legan, who are now living at the home of their son on Lander Rd., Orange Village, formerly of Stanley Ave., Maple Heights, O., celebrated their 60th wedding anniversary on June 21st. Congratulations and wishes for many more happy and healthy wedding anniversaries!

★ Mary Anna Lukanc, a student at Villa Angela, is attending the Mexican Technological Institute at Monterey for six weeks to study Spanish. She was accompanied by Sr. Deborah of Villa Angela and another student, Chris Ferlinc. Mary Ann is the daughter of Mr. and Mrs. John Lukanc, 20961 South Lake Shore Blvd.

★ CleveTrust Corp. reported second quarter income before securities gains was \$10,231,000, or \$1.70 a share, up from \$9,670,000, or \$1.60 a share, a year ago.

Foilesters Tee Off

Attention all C.O.F. divit diggers, hackers, dubbers, choppers, blasters and pro za niches:

Baraga Court No. 1317 (Catholic Order of Foresters) Golf Outings will take place on

Saturday, July 19
Saturday, Aug. 16

at the Tam-A-Rac Country Club. Tee off time begins at 10 a.m.

Limited number of foursomes will be accepted. Call for your tee-off reservation NOW! — Al Giambetta, 361-2329 or Elmer Perme, 732-7779.

Future Reminder: The Fall Golf Tournament will be held at Pleasant Hills Golf Course on Sept. 27. More details will be furnished at a later date.

Ohio KSKJ Day Picnic set for Aug. 3

The 24th annual Ohio KSKJ Day is to be held Sunday, Aug. 3, at St. Joseph Grove, White Road, Cleveland, Ohio.

It is sponsored by the Ohio Federation of the American Slovenian Catholic Union societies as a social event for all KSKJ members and friends to renew old acquaintances and enjoy fine fellowship.

Everyone is kindly invited to come and join the get-together.

The Markic-Zaggar Orchestra will provide music from 4 to 8 p.m.

There will be food available and liquid refreshments. A bake sale will feature home-made delicacies by the members.

The picnic is from 1 to 8 p.m.

St. Vitus Holy Namers name new officers

The following officers were installed last Sunday in a special ceremony as officers for 1975 - 1976:

Spiritual Director — Rev. A. Edward Pevec

President — Stan Hribar

Vice-Presidents — Joseph Hocevar, John Ovsenik

Recording Secretaries: John Hocevar, Jr., Miro Odar

Corresponding Secretary — Greg Hribar

Treasurer — Charles Winter, Jr.

Program Co-Chairmen — Edward Thomas, Ken Tomsick

Assistants: Ulrich Lube, Louis Petelin, Sr., Al Orehek

Membership Committee — Joseph Hocevar (Chairman)

Assistants — John Skrabeck, Frank Zupancic, Frank L. Grdina

Marshalls — Edward Avsec, Charles Winter, Sr.

Sick and Vigil — Anton Oblak (Chairman)

Assistants — Mike Kolar, Frank Bisjak

Publicity Chairman — Daniel J. Postotnik, John Sever

Youth Chairman — Greg Hribar

Assistants — Stan Hribar, Charles Winter, Jr., John Hocevar, Jr., Anton Oblak

Retreat Chairmen — Mike Kolar, Miro Odar, Frank Kamin

Breakfast Chairman — Joseph Strumbel

Assistants — John Kerzisnik, Sam Reiger, Leo Pretnar, Tony Zigman, Wencel Frank, Peter Sterk, Frank Zupancic, John Budic

Special Ass'ts (Audio) — Robert Mills, (Illustrator) Edward Thomas

Dinner Chairman — Joseph Komat (Chef)

Assistants — Frank Bisjak, Edward Kuhel, Sr., Sam Reiger, Joe Cimperman, William J. Vidmar, Frank Kern, Frank Bogovich, Nick Maczko, Jim Zipple

Auditing Committee — Ted Zak, Ed Arhar, Joe Marinko

Delegates — John Hocevar, Jr., Charles Winter, Jr., Charles Winter, Sr.

Catholic Action Committee — Frank L. Grdina, John Sever

—

Death Notices

BAJUK, ALOJZ — Husband of Martina, father of Mrs. Walter (Martina) Van Horn, Louis, brother of Cvetka Strukelj, Anna, Maria, Christina, and a brother in Yugoslavia. Residence in Lorain, Ohio.

BARILATZ, MIKE — Husband of Anna (nee Majacek), father of Beatrice Barilatz, Michael J. Residence on Lake Shore Blvd.

COPELAND, AGNES E. (nee Segal) — Wife of James R., mother of Lois A. Schulta (Fla.), James L. Brink (Andover, O.), sister of Violet Cooke, Frances (Calif.). Residence at 25310 Lake Shore Blvd.

KIRCHNER, MARY — Mother of Theodore, Paul, Marion. Residence at 18609 Pawnee Ave.

MUTH, VICTOR — Brother of Ethel Sanner, uncle of Jean Halbeda, Donna Yonosick, Melvin Sanner. Residence at 1198 E. 80 St.

SADECKAS, PETER P. — Husband of Stella (nee Bozeglav), brother of Joseph, Edward, Rita Johnson. Residence at E.
