METODOLOŠKA POJASNILA

Sprememba v metodologiji raziskovanja

V letu 2006 smo v skladu s Spremembo in dopolnitvijo letnega programa statističnih raziskovanj za leto 2006 (Uradni list RS, št. 46/2006) ukinili Četrtno statistično raziskovanje trgovine (TRG/ČL) in ga nadomestili z Letnim statističnim raziskovanjem trgovine (TRG/L). V vzorcu enot za TRG/L za leto 2006 so bila zastopana podjetja vseh velikostnih razredov glede na prihodek in število zaposlenih (velika, srednje velika in mala podjetja).

Omejitve

Sprememba v metodologiji raziskovanja je zmanjšala primerljivost podatkov za leto 2006 s predhodno časovno vrsto podatkov. Z uporabo nove metodologije nismo mogli zagotoviti popolne primerljivosti podatkov, še zlasti po dejavnostih in blagovnih skupinah, z obstoječo časovno vrsto podatkov za nazaj.

Namen statističnega raziskovanja

je letni prikaz podatkov o trgovinski mreži, vrednosti prihodka od prodaje blaga in materiala po dejavnostih in blagovnih skupinah v trgovini na drobno in na debelo ter o prihodu od posredništva pri prodaji blaga.

Statistična enota opazovanja

je vsak poslovni objekt ali le njegov del (podjetje, družba, podjetnik posameznik, poslovna enota), ki se ukvarja s trgovinsko dejavnostjo. Podatke nam sporočajo podjetja, katerih glavna dejavnost je trgovina, pa tudi podjetja z drugimi dejavnostmi, vendar se tu prikazani podatki o teh podjetjih nanašajo vedno le na tisti del njihove dejavnosti, ki se lahko uvršča v trgovino (nakup blaga za nadaljnjo prodajo in dejanska prodaja tega blaga). Notranjih prodajnih tokov med trgovino na debelo in trgovino na drobno v sestavljenem podjetju ne zajemamo; kot prihodek se šteje le vrednost prodaje zunanjim kupcem.

Statistično zajetje

Trgovinska dejavnost v tej publikaciji obsega področje G iz Standardne klasifikacije dejavnosti, razen skupin Popravila izdelkov široke porabe in Vzdrževanje in popravila motornih vozil ter razreda Trgovina na drobno na tržnicah in stojnicah. Tudi storitve, opravljene v prometu blaga, ki jih je mogoče posebej prikazati, niso zajete.

Ker je opazovana dejavnost t. i. čista trgovinska dejavnost (ne glede na to, ali jo podjetje opravlja kot svojo glavno ali stransko dejavnost), je oddelek SKD 50 (prodaja motornih vozil in prodaja motornih goriv na drobno) smiselno razdeljen na tri opazovane sklope dejavnosti: na prodajo na drobno, prodajo na debelo in posredništvo pri prodaji. Zato je taka razdelitev drugačna od razdelitve, uporabljene v mesečni Prvi objavi z naslovom Trgovina na drobno, trgovina z motornimi vozili in vzdrževanje le-teh ter trgovina z motornimi gorivi na drobno.

Podatke, na podlagi katerih smo pripravili ocene za objavo, smo pridobili z raziskovanjem TRG/L. Raziskovanje je vzorčno; to pomeni, da podatke pridobimo iz vzorca podjetij, kajti v praksi ni mogoče pridobiti podatkov od vseh poslovnih subjektov z omenjenimi dejavnostmi. Pri določitvi podjetij, ki smo jih vključili v raziskovanje, smo uporabili podatke iz Poslovnega registra Slovenije, iz zaključnih računov za leto 2005, iz Statističnega registra delovno aktivnega prebivalstva ter podatke, ki so nam jih sporočala podjetja, sodelujoča v raziskovanju v preteklem letu. Iz vzorčnega okvira 11690 podjetij je bilo za sodelovanje v omenjenem raziskovanju v letu 2006 izbranih 3876 podjetij. Vzorec je bil stratificiran enostopenjski, stratificiran glede na skupine dejavnosti in velikostne razrede, določene s prihodkom in številom zaposlenih.

METHODOLOGICAL EXPLANATIONS

Change in survey methodology

In line with the Change and Completion of the Annual Programme of Statistical Surveys for 2006 (OJ RS, No.42/2006) from 2006 on the Quarterly Statistical Survey on Trade (TRG/ČL) is no longer conducted. Instead, the annual survey TRG/L (Annual Statistical Survey on Trade) is being conducted. The sample of units for 2006 covered enterprises of all sizes (large, medium-sized and small enterprises).

Limitations

The change in survey methodology limited the comparability of data for 2006 with the existing data series. By using the new methodology, we could not provide full comparability of new data - especially the comparability of data by activities and commodity groups - with the existing data series.

The purpose of the survey

is yearly monitoring of data on the distributive trade network, the value of income from turnover from sale of goods and material by activity and commodity groups in retail and wholesale trade and on turnover in commission trade.

Observation unit

is every business entity or its part (enterprise, company, business unit, entrepreneur) performing trade activity. Reporting units are thus enterprises whose main activity is trade and enterprises with other main activities. However, in both cases only data concerning trade (purchase of goods for further sale and actual sale of goods) are taken into consideration. Internal sale between wholesale and retail trade in a composite enterprise is not taken into consideration; income is only value of sale to external buyers.

Coverage

Trade in this survey is section G of the Standard Classification of Activities, except groups Repair of personal and household goods, Maintenance and repair of motor vehicles and deductible, the class Retail sale via stalls and markets, and services performed in transport of goods.

Because the observed activity is so called 'pure activity' (it is irrelevant whether the enterprise performs it as its main or supplementary activity) the NACE 50 section (the sale of motor vehicles and retail sale of fuels) is divided between three sets of observed activities: retail trade, wholesale and commission trade. Thus the breakdown in this publication is different from that in the monthly First Release entitled Retail trade and motor trade.

Data which were used as the basis for the published estimates were obtained with survey TRG/L. Because in practice it is impossible to collect data from all business entities in the mentioned activity, we collect data from a sample of enterprises. Enterprises which are included in the survey were defined on the basis of data from the Business Register of Slovenia, final accounts for 2005, the Statistical Register of Employment and their data from the previous year. From the sampling frame of 11,690 enterprises, 3,876 enterprises were included in the survey for 2006. We used a stratified, single-stage sample, which was stratified by groups of activities and size of the enterprise defined with annual turnover and number of employed persons.

Med 3876 podjetji, izbranimi v vzorec za raziskovanje v letu 2006, se je za 363 podjetij izkazalo, da so neustrezna oz. neaktivna, 569 enot pa na vprašalnik ni odgovorilo. Stopnja ustreznosti je tako znašala 90,6 %, stopnja odgovora pa 83,8 %.

Ker so bile enote izbrane s slučajnim izborom, smo vsaki enoti izračunali vzorčno utež, to pa smo pomnožili še z utežjo zaradi manjkajočih odgovorov v pripadajočem stratumu. Vzorcna utež je bila izračunana kot obratna vrednost verjetnosti izbora.

Podatki, pridobljeni z raziskovanjem TRG/L, niso niti sezonsko niti prilagojeni številu delovnih dni.

Način zbiranja podatkov

Podatke, ki so podlaga za omenjeno raziskovanje, pridobimo z vprašalnikom TRG/L (Letni vprašalnik o trgovini). Vsaka poročevalska enota vprašalnik izpolni tudi za vse svoje morebitne poslovne enote in ga statističnemu uradu pošlje po pošti. Vir podatkov je računovodska in kadrovska evidenca podjetij, izjemoma tudi njihova ocena.

It turned out that 363 enterprises (of all 3,876 enterprises in 2006) were either ineligible or inactive and 569 enterprises did not respond. The eligibility rate was 90.6% and the response rate was 83.8%.

Because units were randomly selected, for each unit its sampling weight was calculated, which was multiplied by the weight due to non-response in the individual stratum. The sampling weight was calculated as the reverse value of the probability of selection.

The results of TRG/L survey are not seasonally adjusted nor working-day adjusted.

Method of data collection

Data from enterprises are collected with the TRG/L questionnaire (annual trade questionnaire). Every reporting unit answers the questionnaire for all its establishments and sends us the data by post. The source of data are the accounting and personnel records of enterprises and only exceptionally their estimates.

Merila natančnosti

- ocene s koeficientom variacije, manjšim od 0,15 ($KV \leq 0,15$), so objavljene brez omejitve;
- ocene s koeficientom variacije od 0,15 do 0,30 ($0,15 < KV \leq 0,30$) so objavljene v enojnih oklepajih;
- ocene s koeficientom variacije, večjim od 0,30 ($KV > 0,30$), niso objavljene, nadomeščene so s piko.

Uporabnik ocen (podatkov) iz raziskovanja naj bi pri uporabi podatkov upošteval, da so ocene, objavljene brez omejitev, dovolj zanesljive, tiste v oklepajih pa manj.

Definitions and other explanations

- estimates with the coefficient of variation under 0.15 ($CV \leq 0.15$) are published without limitations;
- estimates with the coefficient of variation between 0.15 and 0.30 ($0.15 < CV \leq 0.30$) are published in single parentheses;
- estimates with the coefficient of variation over 0.30 ($CV > 0.30$) are not published, but each one is substituted by a dot.

The user of survey estimates (data) should take into account that estimates published without limitations are sufficiently reliable, while those in parentheses are less reliable.

Statistične definicije

Trgovina na debelo je nakupovanje blaga za nadaljnjo prodajo in nadaljnja prodaja tega blaga trgovcem, predelovalcem ali velikim porabnikom doma ali v tujini. Blago se lahko prodaja nespremenjeno ali po obdelavi, pakiranju, prepakiranju, ki je značilno za trgovino na debelo.

Trgovina na drobno je nakupovanje blaga ter nadaljnja prodaja tega blaga končnim porabnikom (za osebno porabo in potrebe gospodinjstev) ali drugim, ki nabavljeno blago uporabljajo za opravljanje dejavnosti pod določenimi pogoji.

Posredništvo (SKD 51.1) je:

- dejavnost trgovskih posrednikov in trgovcev na debelo, ki trgujejo v svojem imenu in za račun drugih,
- dejavnost tistih, ki posredujejo med prodajalci in kupci in prevzemajo trgovske posle v imenu lastnika blaga, tudi prek interneta,
- dejavnost dražbenih hiš pri prodaji na debelo.

V dejavnost posredništvo pri prodaji blaga vključujemo tudi posredništvo pri trgovini z motornimi vozili, z rezervnimi deli za motorna vozila, z motornimi kolesi in rezervnimi deli ter posredništvo pri prodaji z motornimi gorivi (prodaja na bencinskih servisih prek franšize) na drobno.

Posrednik trži tuje blago za tuj račun, npr. komisionarji, agenti, posredniki, zadrage, ki se ukvarjajo s trženjem kmetijskih izdelkov, ipd. Prihodek posrednika od prodaje je provizija.

Vrednost prodaje (prodaja) je prihodek in davek na dodano vrednost.

Prihodek od prodaje blaga in materiala – kupcem zaračunana prodaja – je skupni znesek, ki ga podjetje obračuna za prodajo blaga in materiala,

Definitions

Wholesale is purchase of goods for further sale to merchants, processors or big customers at home or abroad. Goods can be sold unchanged or after processing, packing or re-packing characteristic of wholesale.

Retail trade is purchase of goods for further sale to final users (for personal and household use) or to others who use purchased goods for performing activity under certain conditions.

Commission trade (NACE Rev. 1.1 51.1) is:

- activity of commercial agents and wholesale traders trading on their own behalf and on third party account,
- activity of those who act as agents between sellers and buyers and take over trade business on behalf of the owner of goods, even via the Internet,
- activity of auction houses in wholesale.

Commission trade activities in sale of goods include also commission trade in sale of motor vehicles and spare parts for motor vehicles, sale of motorcycles and spare parts for motorcycles, and commission trade in sale of motor fuels (franchise sale at petrol stations).

The agent trades foreign goods on third party account, e.g. commission agents, agents, brokers, cooperatives trading agricultural products, etc. The agents' sales income is the commission.

Turnover including value added tax is in our case the whole value of sale including value added tax.

Turnover without value added tax - from sale of goods and material - sale charged to buyers - is value of goods and materials which were in

ki sta bila v opazovanem obdobju prodana kupcem in za katera je bila izdana faktura. Vsebuje vse stroške in obremenitve, vezane na kupca, ne zajema pa davka na dodano vrednost, morebitne prodaje osnovnih sredstev in drugih izrednih prihodkov. Prodaja na posojilo se šteje v mesec fakturiranja.

Davek na dodano vrednost je znesek dajatev, ki jih ob prodaji plača kupec (izstopni davek).

Pri neposrednem izvozu je prikazan prihodek od prodaje blaga in materiala, ki ju je podjetje v svojem imenu in za svoj račun (brez posredovanja drugih) prodalo v tujino.

V številu oseb, ki so ob koncu leta delale v trgovini na drobno, v trgovini na debelo in v posredništvu, so upoštevane osebe, ki so izključno ali pretežno opravljale trgovinsko dejavnost, tudi upravni in administrativni delavci, sezonski delavci, vajenci, pripravniki.

V številu prodajaln na koncu leta upoštevamo klasično prodajalno, samopostrežno prodajalno, blagovno hišo, diskontno trgovino, bencinsko črpalno, kiosk in lekarno. Odprtih stojnic na živilskih trgih ali ulicah, raznih skladiščnih prostorov za razkladanje ipd. ter prodajaln v tujini ne upoštevamo.

Obdelava podatkov

Za podjetja, ki niso bila vključena v vzorec opazovanih enot oz. od njih nismo prejeli vprašalnika, vrednosti podatkov ocenimo tako, da utežimo odgovore podjetij, ki so sodelovala v raziskovanju.

Oceno poslovanja cele populacije opazovane dejavnosti povezujemo po razredih dejavnosti, ki jo opazovana enota opravlja. Dejavnost je definirana glede na skupino blaga, s katerim podjetje pretežno posluje (ta opredelitev torej ne pomeni dejansko prodanega blaga).

Posamezni razredi dejavnosti podjetij so v tej publikaciji smiselno združeni v skupine, te pa združujemo (agregiramo) še na ravni trgovine z živil, trgovine z neživil in trgovine z motornimi vozili in gorivi.

Rezultati so prikazani po tekočih cenah; sprememba cen ni izločena.

the observed period sold to buyers and for which invoices (or some other accounting documents) were issued. It includes all costs and charges linked to the buyer and excludes the value added tax, eventual sale of fixed assets and other extra income. Sale for loan is registered in the month of invoicing.

Value added tax is a tax buyers pay at sale (output value added tax).

Direct export is income from goods and material which an enterprise on its own behalf and account (without external intervention) sold abroad.

Number of persons working at the end of the year in retail trade, wholesale and commission trade includes persons exclusively or predominantly performing trade activity, including administrative service, seasonal workers, apprentices.

Number of stores at the end of the quarter includes classical stores, self-service stores, department stores, discount stores, petrol stations, kiosks and pharmacies. Open stalls on market places or streets, various warehouses for unloading etc. and stores abroad are not taken into consideration.

Data processing

For enterprises which are not included in the sample of observed units and from which we received no reports we evaluate the value of data by weighting the available data of enterprises, which participated the survey.

We combine results which present the whole population of the observed activity into groups by classes of activity which the observed unit performs. An activity is defined with regard to the group of goods with which an enterprise predominantly does business and not with regard to the actually sold goods.

Individual classes of activity are in our case logically combined into groups which we aggregate also to the level of trade with food, trade with non-food and trade with motor vehicles and fuels.

Results are shown at current prices; a change of prices is not eliminated.

Poročevalske enote ob vsakokratnem poročanju same določajo tisto svojo dejavnost po skupini blaga, ki je v prihodku opazovanega obdobja najpomembnejša. To pri analizi podatkov po dejavnostih lahko povzroči nihanja indeksov. Statistični urad preverja spremembe pri navedbi dejavnosti enot med posameznimi poročevalskimi obdobji.

Reporting units define their activity according to the commodity group which has the greatest influence on the turnover of the observed period. This may cause fluctuations of indices in data analysis by activity. The statistical office controls all changed activities between reporting periods.
