METODOLOŠKA POJASNILA

NAMEN STATISTIČNEGA RAZISKOVANJA

Namen kvalitativne Ankete o poslovnih tendencah v gradbeništvu (PA-GRAD/M) je mesečno pridobivanje informacij o trenutnih stanjih glavnih ekonomskih kazalcev ter ocenitev njihovega gibanja v naslednjih mesecih. Rezultati anket so osnova za izračun kazalca zaupanja v gradbeništvu.

Anketo o poslovnih tendencah v gradbeništvu izvajamo v Sloveniji od marca 2002 s poenotenim vprašalnikom, na podlagi poenotene metodologije in z enako periodiko, kot jo izvajajo v državah članicah Evropske unije že več desetletij. Zato so vsi podatki neposredno primerljivi.

ENOTE OPAZOVANJA

Opazujemo podjetja, ki so razvrščena v gradbeništvo, to je v oddelku Standardne klasifikacije dejavnosti (SKD) 45 in imajo 11 zaposlenih ali več, ter so bila izbrana na podlagi dveh merit, in sicer:

- velikosti (število zaposlenih, skladno z zakonom o gospodarskih družbah) in
- razvrstitev podjetja po SKD-ju.

VIRI

Na vprašalnik odgovarjajo direktorji podjetij ali drugi vodilni delavci med 1. in 10. v mesecu.

ZAJETJE

V anketi sodeluje 433 izbranih gradbenih podjetij. V anketo smo zajeli vsa velika in srednjevelika podjetja in vsa mala podjetja z 11 zaposlenimi in več.

NAČIN ZBIRANJA PODATKOV

Anketo izvajamo mesečno po pošti.

UTEŽEVANJE ODGOVOROV

Odgovori so uteženi tako, da odražajo relativno pomembnost posameznega podjetja v vzorcu. Znotraj oddelkov SKD so odgovori uteženi s številom zaposlenih.

NEODGOVORI

Neodgovore vsak mesec obdelamo skladno s poenoteno metodologijo; delež neodgovorov se giblje med 5 in 10 % (povprečno 8 %).

DEFINICIJE

Grafikoni prikazujejo ravnotežja po posameznih vprašanjih. **Ravnotežje** je razlika med pozitivnimi in negativnimi odgovori, izražena v odstotkih. Ravnotežja prikazujejo gibanje opazovanih ekonomskih spremenljivk (stanj in pričakovanj), ne pa dejanskih velikosti ekonomskih kazalcev.

METHODOLOGICAL EXPLANATIONS

PURPOSE OF STATISTICAL SURVEY

The purpose of the qualitative Survey on Business Tendency in Construction (hereinafter: PA-GRAD/M) is to get monthly information about current situations of major economic indicators and to evaluate their movement in the following months. The results of the survey are the basis for evaluation of the construction confidence indicator.

We have been carrying out the Survey on Business Tendency in Construction in Slovenia since March 2002 with the harmonised questionnaire, methodology and periodicity, which have been used in EU Member States for several decades. Therefore, all data are directly comparable.

OBSERVATION UNITS

We are monitoring units that are registered in construction – division 45 of the Standard Classification of Activities (SKD) and have 11 or more employees. They were selected by two criteria:

- the size of the enterprise (the number of employees in accordance with the Companies Act),
- classification of the enterprise according to the SKD.

SOURCES

Respondents to the monthly questionnaire are managers of enterprises or other executives. They respond between the 1st and the 10th in the month.

COVERAGE

433 enterprises participate in the survey. We included all large and medium-sized enterprises and all small enterprises with 11 employees and more.

METHOD OF DATA COLLECTING

The survey is carried out monthly by mail.

WEIGHTS FOR RESPONSES

Responses to individual questions are weighted so that they reflect relative importance of individual enterprise in the panel. Inside divisions of Standard Classification of Activities (SKD) responses are weighted with the number of employees.

NON-RESPONSES

Non-responses are processed every month in accordance with the harmonised methodology and vary between 5 and 10% (8% on average).

DEFINITIONS

The charts show the balance by individual questions. The **balance** is the difference between positive and negative answers, expressed in percent. The balance shows the movement of observed economic variables (present situation and future expectations), and not the real size of economic indicators.

Kazalec zaupanja je povprečje odgovorov (ravnotežij) na vprašanji o sedanjih skupnih naročilih in pričakovanemu zaposlovanju.

OBJAVLJANJE PODATKOV

Sodelujoči v anketi prejmejo informacijo o gradbeništvu kot celoti, o oddelku SKD, v katerega se po dejavnosti razvrščajo in glede na vrsto gradnje, vendar le, če so izpolnili vprašalnik za tekoči mesec.

Ostalim uporabnikom so dostopni podatki na ravni gradbeništva in njegovih skupin ter podatki glede na vrsto gradnje. Slednji so mesečno objavljeni v Statističnih informacijah – Poslovne tendence v gradbeništvu in v podatkovni bazi SI-STAT na naslovu <http://www.stat.si>.
